Observation of nonlinear resonances in the advanced light source
[DE95-006561] p 2425 N95-27675
Use of nonlinear identification in robust attitude and attitude rate estimation for SAMPEX
p 2149 N95-27781
Nonlinear optical microscopy for imaging thin films and surfaces
[DE95-007872] p 2426 N95-28018
An investigation of the chemical and physical properties of pristine, electrochromically damaged, and photochromically damaged KTiOPO4 (KTP) using surface analytical and optical spectroscopic techniques
[DE95-007865] p 2443 N95-28023
Modification of the optical properties of glass by sequential ion implantation
[DE95-007401] p 2237 N95-28080
Nonlinear beam dynamics experimental program at SPEAR
[DE95-007823] p 2422 N95-28122
Beam-beam interaction working group summary
[DE95-007824] p 2422 N95-28123
Bearing defect signature analysis using advanced nonlinear signal analysis in a controlled environment
[NASA-TM-108491] p 2304 N95-28364
Denoising and robust non-linear wavelet analysis
[AD-A291668] p 2257 N95-28455
Characterization of solid state laser and nonlinear optical materials
[AD-A291684] p 2300 N95-28458
Chua's circuits: Phenomena and applications
[AD-A291638] p 2271 N95-28666

NONPARAMETRIC STATISTICS
A method to determine the structure of an unknown mixture using the Akaike Information Criterion and the bootstrap
[AD-A288295] p 2394 N95-26415
The 1994 IEEE-IMS Workshop on Information Theory and Statistics
[AD-A288808] p 2380 N95-26492

NONUNIFORM MAGNETIC FIELDS
Electromagnetic hysteretic response calculation for superconductors in demagnetizing geometries
[DE95-005028] p 2264 N95-27403

NORMAL DENSITY FUNCTIONS
Truncated Gaussians as tolerance sets
[NASA-CR-197732] p 2395 N95-27417
A method for generating skewed random numbers using two overlapping uniform distributions
[DE95-008747] p 2392 N95-28162

NORTH ATLANTIC TREATY ORGANIZATION (NATO)
AGARD membership, 1995
[AGARD-MEMB-95] p 2450 N95-26353

NORTHERN HEMISPHERE
The northern wintertime divergence extrema at 200 hPa and surface cyclones as simulated in the integration of the ECMWF general circulation model
[DE95-007946] p 2332 N95-28550

NOTCH SENSITIVITY
Tension fracture of laminates for transport fuselage. Part 1: Material screening p 2137 N95-28471

NOVAE
Classical novae and recurrent novae: General properties p 2459 N95-27072
Models of classical and recurrent novae
p 2459 N95-27073
Typical examples of classical novae
p 2459 N95-27074
Recurrent novae p 2460 N95-27075
A new method of determining the ejected mass of novae
[DE95-007884] p 2462 N95-28062

NOZZLE DESIGN
The noise reduction potential of dual-stream coaxial rectangular improperly expanded jet flows
[NASA-CR-197820] p 2277 N95-26995
The application of waterjets for cleaning
p 2233 N95-27130

NOZZLE FLOW
An investigation of the AFIT 2-inch shock tube as a flow source for supersonic testing
[AD-A289246] p 2143 N95-26966
Effects of blowing ratio on heat transfer to the throat region of a porous-walled nozzle
[AD-A289459] p 2167 N95-27153
A laboratory scale supersonic combustive flow system
[DE95-006347] p 2206 N95-27851
Structure of high-speed sprays
[AD-A291696] p 2288 N95-28523

NOZZLE GEOMETRY
Effects of blowing ratio on heat transfer to the throat region of a porous-walled nozzle
[AD-A289459] p 2167 N95-27153

NUCLEAR BINDING ENERGY
Aspects of strange matter
[DE95-008316] p 2414 N95-28170

NUCLEAR FUELS
An overview of activities and accomplishments of the Metals and Ceramics Division
[DE95-007020] p 2241 N95-28560

NUCLEAR FUSION
Bubble fusion: Preliminary estimates
[DE95-006337] p 2420 N95-27494
Parallel plasma fluid turbulence calculations
[DE95-006741] p 2431 N95-27537

NUCLEAR MAGNETIC RESONANCE
NQR-NMR studies of higher alcohol synthesis Cu-Co catalysts
[DE95-007926] p 2205 N95-27680

NUCLEAR PHYSICS
Signatures of Higgs-Triplet representations at TeV-e(+)e(-) colliders
[DE95-007201] p 2419 N95-27089
The systems of the proportional chambers registration electronics for present experiments in nuclear physics
[DE95-608559] p 2419 N95-27161
Monolithic electronics for nuclear and high-energy physics experiments
[DE95-005393] p 2420 N95-27427
Intermediate energy neutrons at WNR. Spin-isospin and energy dependence of the NN interaction and the nuclear response
[DE95-006291] p 2408 N95-27466

NUCLEAR POWER PLANTS
Physics assessment of stellarators as fusion power plants
[DE95-007045] p 2431 N95-27498

NUCLEAR RADIATION
Comparison of the resistance of the MOS integrated circuits with various types of nuclear radiation
[DE95-608623] p 2261 N95-27023

NUCLEAR REACTIONS
Search for deeply bound pionic atoms with high-purity germanium tagging spectrometer
[DE95-609072] p 2416 N95-28252

NUCLEAR REACTORS
Heat pipe cooled reactors for multi-kilowatt space power supplies
[DE95-005211] p 2420 N95-27425
Gamma ray-induced embrittlement of pressure vessel alloys
[DE95-007133] p 2220 N95-28072
Reactor pressure vessel structural integrity research
[DE95-007034] p 2223 N95-28208

NUCLEAR STRUCTURE
Measurement of the reaction C(nu(sub mu), mu(-)) X near threshold
[DE95-007888] p 2412 N95-28063

NUCLEATION
Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device development
[AD-A289550] p 2437 N95-26756
Growth, characterization and device development in monocrystalline diamond films
[AD-A289356] p 2439 N95-27416
Bubble chamber spectroscopy for chemical analysis: A new concept
[DE95-006350] p 2209 N95-28088
Atomic layer epitaxy of group 4 materials: Surface processes, thin films, devices and their characterization
[AD-A289092] p 2446 N95-28327
The in situ observation of epitaxial diamond thin film nucleation and growth using emission electron microscopy
[AD-A289841] p 2447 N95-28618

NUCLEIC ACIDS
DNA denaturation through a model of the partition points on a one-dimensional lattice
[DE95-607909] p 2439 N95-27201
NUCLEON-NUCLEON INTERACTIONS
Recent status in the search for the quark-gluon plasma
[DE95-007036] p 2417 N95-28447
NUCLEON-NUCLEON SCATTERING
Measurement of the reaction C(nu(sub mu), mu(-)) X near threshold
[DE95-007888] p 2412 N95-28063
NUCLEONS
Lattice calculation for lepton capture from vacuum-pair production in relativistic heavy-ion collisions
[DE95-007392] p 2413 N95-28077
HZETRN: Description of a free-space ion and nucleon transport and shielding computer program
[NASA-TP-3495] p 2465 N95-28530
NUCLEOTIDES
Single molecule detection using charge-coupled device array technology
[DE95-006425] p 2411 N95-27953
NUCLIDES
Alpha characterization inside pipes using ion-transport technology
[DE95-007869] p 2411 N95-28024
NUMERICAL ANALYSIS
Encoding user-defined problems with SIPE-2
[AD-A288390] p 2380 N95-26475
Addressing tension instability in SPH methods
[AD-A289531] p 2276 N95-26852
Numerical analysis of wave scattering
[AD-A289478] p 2401 N95-26925
Mathematical simulation of three-dimensional magnetic field of spectrometric magnet SP-40
[DE95-608736] p 2398 N95-27239
Spectral methods on arbitrary grids
[NASA-CR-198158] p 2279 N95-27247
Numerical methods for determining interstitial oxygen in silicon
[DE95-007710] p 2205 N95-27683
A numerical study of fundamental shock noise mechanisms
[NASA-TM-110608] p 2401 N95-27908
Prediction of material strength and fracture of glass using the SPHINX smooth particle hydrodynamics code
[DE95-004869] p 2236 N95-27943
Numerical analysis of intra-cavity and power-stream flow interaction in multiple gas-turbine disk-cavities
[NASA-TM-106886] p 2140 N95-28344
Third-order-accurate numerical methods for efficient, large time-step solutions of mixed linear and nonlinear problems
[DE95-009184] p 2288 N95-28533
NUMERICAL CONTROL
Robust hybrid state-space self-tuning control using dual-rate sampling
[AD-A288359] p 2380 N95-26468
Next generation controller specification for an open systems architecture standard - overview
[AD-A289507] p 2368 N95-26853
To develop an aerosoling immunomagnetic device for rapid medical diagnosis from clinical samples
[AD-A288504] p 2354 N95-27059
Statistical data analysis
[DE95-007214] p 2454 N95-27090
Process and control systems for composites manufacturing p 2184 N95-28267
Particle fallout/activity sensor
[NASA-CASE-KSC-11687-1] p 2293 N95-28362
ALLIANCE: An architecture for fault tolerant, cooperative control of heterogeneous mobile robots
[DE95-007374] p 2387 N95-28536
Next generation controller specification for an open systems architecture standard
[AD-A289567] p 2375 N95-28647
NUMERICAL DATA BASES
Indexing meso-beta surface wind site representative
[AD-A288501] p 2341 N95-26650
NUMERICAL FLOW VISUALIZATION
Three-dimensional visualization of reactive flows in complex geometries
[DE95-006332] p 2284 N95-27845
NUMERICAL INTEGRATION
Analysis and development of finite element methods for the study of nonlinear thermomechanical behavior of structural components
[NASA-CR-195354] p 2307 N95-26387
The attenuation of microwave radiation by fog and rain
[AD-A288326] p 2249 N95-26562
A numerical study of ultra-short-pulse reflectometry
[DE95-006070] p 2266 N95-28015
NUMERICAL STABILITY
Analysis and development of finite element methods for the study of nonlinear thermomechanical behavior of structural components
[NASA-CR-195354] p 2307 N95-26387
Spectral methods on arbitrary grids
[NASA-CR-198158] p 2279 N95-27247
NUMERICAL WEATHER FORECASTING
Diagnosing cloudiness from global numerical weather prediction model forecasts
[AD-A289456] p 2356 N95-26992
NUTATION
Optimal attitude maneuver execution for the Advanced Composition Explorer (ACE) mission
p 2149 N95-27778
NUTATION DAMPERS
Optimization of a nutation damper attached to a spin-stabilized satellite
[AD-A289424] p 2162 N95-26887
NUTRITION
Performance enhancing ration components program: Supplemental carbohydrate test
[AD-A288560] p 2358 N95-26558

O

OBJECT-ORIENTED PROGRAMMING
Specifying weak sets
[AD-A288587] p 2364 N95-26536
User's and test case manual for FEMATS
[NASA-CR-197803] p 2366 N95-26694
NEXTSTEP: The next step in the right direction? Part 2: Software development with NEXTSTEP
[REPT-94-33-PT-2] p 2450 N95-26803
The re-engineering of the Air Force Institute of Technology Student Information System
[AD-A289426] p 2453 N95-26866
EASY-SIM: A visual simulation system software architecture with an Ada 9X application framework
[AD-A289325] p 2368 N95-26895
Flight dynamics software in a distributed network environment p 2151 N95-27790
OBLATE SPHEROIDS
Simple equivalent dipole distributions for dielectric spheroidal scatterers
[PB95-184883] p 2254 N95-27049
OBLIQUE WINGS
Preliminary design problems and solutions for a supersonic oblique all-wing transport aircraft
p 2118 N95-26942
OBSERVATORIES
Long Duration Exposure Facility post-flight data as it influences the Tropical Rainfall Measuring Mission
p 2345 N95-27666
The installation of and first results from the superconducting gravimeter GWR20 at the Metsahovi Station, Finland
[REPT-95:1] p 2338 N95-27995
OCCULTATION
Proceedings of the 1993 Scientific Conference on Obscuration and Aerosol Research
[AD-A280084] p 2331 N95-28153
OCEAN BOTTOM
Very low frequency seismo-acoustic noise below the sea floor (0.2-10 Hz)
[AD-A289164] p 2347 N95-27011
Observations of near-bottom flow in a wave-dominated nearshore environment
[AD-A289331] p 2347 N95-27043
Investigation on comprehensive fossil fuel cycle analysis and assessment approach as viewed from the global environment
[DE95-759241] p 2329 N95-27935
On the persistence of the oceanic background of apparent sea level changes in the Baltic Sea
[REPT-94:5] p 2348 N95-27996
Seismic constraints on shallow crustal processes at the East Pacific rise
[AD-A289055] p 2338 N95-28094
Ultrasonic studies of liquid/solid seimoacoustic wave phenomena
[AD-A289644] p 2402 N95-28622
OCEAN CURRENTS
A geo-acoustic and oceanographic description of several shallow water experimental sites on the Scotian Shelf
[AD-A288300] p 2345 N95-26420
Calculation of suspended sediment transport by combined wave-current flows
[AD-A289368] p 2346 N95-26904
Nonlinear problems in fluid dynamics and inverse scattering: Langmuir circulations and spiral flows
[AD-A289194] p 2278 N95-27019
Observations of near-bottom flow in a wave-dominated nearshore environment
[AD-A289331] p 2347 N95-27043
Biological/physical modeling of upper ocean processes
[AD-A289468] p 2347 N95-27151
Study of the response of a three-dimensional coupled ice-ocean model to daily varying atmospheric forcing
[AD-A289050] p 2347 N95-27189
Tomographic observations of deep convection and the thermal evolution of the Greenland Sea Gyre 1988-1989
[AD-A289104] p 2348 N95-28096
Altimeter analysis of ocean currents
[AD-A290167] p 2315 N95-28392
OCEAN DYNAMICS
Nonlinear problems in fluid dynamics and inverse scattering: Langmuir circulations and spiral flows
[AD-A289194] p 2278 N95-27019
OCEAN MODELS
Hindcasting wind-driven anomalies using reduced-gravity global ocean models with 1/2 deg and 1/4 deg resolution
[AD-A289060] p 2345 N95-26406
Infrared field measurements of sea surface temperature: Analysis of wake signatures and comparison of skin layer models
[NASA-CR-197849] p 2346 N95-26533
A parallel coupled oceanic-atmospheric general circulation model
[DE95-005918] p 2335 N95-26622
Biological/physical modeling of upper ocean processes
[AD-A289468] p 2347 N95-27151
Study of the response of a three-dimensional coupled ice-ocean model to daily varying atmospheric forcing
[AD-A289050] p 2347 N95-27189
Testing the correlation between seismic stratigraphy, diagenesis and physical rock properties: Evaluation of fluid flow during early and late diagenesis
[DE95-008338] p 2338 N95-28083
OCEAN SURFACE
SeaWiFS technical report series. Volume 26: Results of the SeaWiFS Data Analysis Round-Robin, July 1994 (DARR-1994)
[NASA-TM-104566-VOL-26] p 2345 N95-26430
Infrared field measurements of sea surface temperature: Analysis of wake signatures and comparison of skin layer models
[NASA-CR-197849] p 2346 N95-26533
Deep convection in the Mediterranean Sea
[AD-A288497] p 2346 N95-26647
Fluxes across the west coast resolved by Picket Fence observations during stormfest
[AD-A288511] p 2341 N95-26653
Modeling surface effects with the parabolic equation method
[AD-A289199] p 2254 N95-27021
Biological/physical modeling of upper ocean processes
[AD-A289468] p 2347 N95-27151
Study of the response of a three-dimensional coupled ice-ocean model to daily varying atmospheric forcing
[AD-A289050] p 2347 N95-27189
An in situ evaluation of TOPEX/Poseidon altimetric measurements versus meaurements made by moorings and inverted echo sounders for sea surface height
[NASA-CR-198621] p 2347 N95-27805
Tomographic observations of deep convection and the thermal evolution of the Greenland Sea Gyre 1988-1989
[AD-A289104] p 2348 N95-28096
The northern wintertime divergence extrema at 200 hPa and surface cyclones as simulated in the integration of the ECMWF general circulation model
[DE95-007946] p 2332 N95-28550
OCEAN TEMPERATURE
Temporal and spatial decorrelation scales of the Yellow Sea thermal fields
[AD-A288617] p 2346 N95-26483
Infrared field measurements of sea surface temperature: Analysis of wake signatures and comparison of skin layer models
[NASA-CR-197849] p 2346 N95-26533
OCEANOGRAPHIC PARAMETERS
A geo-acoustic and oceanographic description of several shallow water experimental sites on the Scotian Shelf
[AD-A288300] p 2345 N95-26420
Analysis of historical oceanographic data on a personal computer. Program MDS
[AD-A288965] p 2363 N95-26447
Meteorological and oceanographic data collected during the ASREX 91 field experiment
[AD-A289492] p 2342 N95-26826
Downloading environmental data in the new MOODS format
[AD-A288835] p 2456 N95-28589

OCEANOGRAPHY

Hindcasting wind-driven anomalies using reduced-gravity global ocean models with 1/2 deg and 1/4 deg resolution [AD-A289060] p 2345 N95-26406

A geo-acoustic and oceanographic description of several shallow water experimental sites on the Scotian Shelf [AD-A288300] p 2345 N95-26420

SeaWiFS technical report series. Volume 26: Results of the SeaWiFS Data Analysis Round-Robin, July 1994 (DARR-1994) [NASA-TM-104566-VOL-26] p 2345 N95-26430

Analysis of historical oceanographic data on a personal computer. Program MDS [AD-A288965] p 2363 N95-26447

The effect of infrared sea surface temperature measurements on evaporation duct height estimation [AD-A289045] p 2346 N95-26477

Infrared field measurements of sea surface temperature: Analysis of wake signatures and comparison of skin layer models [NASA-CR-197849] p 2346 N95-26533

Biological/physical modeling of upper ocean processes [AD-A289468] p 2347 N95-27151

Airborne geophysics and precise positioning: Scientific issues and future directions [LC-94-68678] p 2314 N95-27156

WTEC panel report on research submersibles and undersea technologies [NASA-CR-198565] p 2247 N95-27909

Tomographic observations of deep convection and the thermal evolution of the Greenland Sea Gyre 1988-1989 [AD-A289104] p 2348 N95-28096

Emerging applications of probability (stochastic models in geosystems) [AD-A289117] p 2313 N95-28099

OCEANS

Observations of near-bottom flow in a wave-dominated nearshore environment [AD-A289331] p 2347 N95-27043

Measurement of heterogeneous chemical processes relevant to aerosol surfaces and trace gases active in the marine environment [DE95-008337] p 2328 N95-27743

Survey on researches related to ocean disposal of carbon dioxide [DE95-759247] p 2329 N95-27939

Inspection methods for underwater cables [AD-A289610] p 2312 N95-28616

OCTETS

Search for exotic particles at CDF [DE95-008383] p 2411 N95-27933

OGIVES

Polarization sensitivity of monopulse radar boresight error induced by large, ogive radomes [AD-A289254] p 2252 N95-26972

OH-58 HELICOPTER

Diagnosis of helicopter gearboxes using structure-based networks [NASA-TM-106932] p 2302 N95-27373

OHMIC DISSIPATION

OBIC analysis of stressed, thermally-isolated polysilicon resistors [DE95-008511] p 2268 N95-28201

OIL SLICKS

Design, construction, test and evaluation of a frequency scanning radiometer for measuring oil slick thicknesses [AD-A290040] p 2293 N95-28389

OILS

Biomass Pyrolysis Oil Properties and Combustion Meeting [DE95-004017] p 2204 N95-27438

Design, construction, test and evaluation of a frequency scanning radiometer for measuring oil slick thicknesses [AD-A290040] p 2293 N95-28389

OLIGOMERS

Molecular object liquid crystals: An approach to new materials [AD-A288905] p 2437 N95-26553

Materials with self organized surfaces: 2D polymer assemblies [AD-A288928] p 2226 N95-26627

Phenylethynyl terminated imide oligomers [NASA-CASE-LAR-15175-1] p 2235 N95-27732

Molecular engineering of thin polymer films prepared from functionally-terminated oligomers [AD-A291681] p 2240 N95-28457

ON-LINE SYSTEMS

Long term distributed file reference tracing: Implementation and experience [AD-A288585] p 2452 N95-26535

The systems of the proportional chambers registration electronics for present experiments in nuclear physics [DE95-608559] p 2419 N95-27161

Magnetic field measurement for the spectrometric magnet of the ISTRA-M setup [DE95-608560] p 2362 N95-27162

Real-time value-driven diagnosis p 2386 N95-27396

Transparent access to distributed, heterogeneous environmental information systems [DE95-007268] p 2454 N95-27483

Long Duration Exposure Facility (LDEF) Archive System p 2457 N95-27658

Development and implementation of an electronic library tour for the NASA Langley Technical Library [NASA-TM-110619] p 2455 N95-27701

Flight dynamics software in a distributed network environment p 2151 N95-27790

Methods development for measuring and classifying flammability/combustibility of refrigerants. Task 1: Annotated bibliography [DE95-007232] p 2238 N95-28133

Teaching interdisciplinary computational science from an electronic book on the Internet [DE95-006525] p 2373 N95-28498

Building an electronic book on the Internet. CSEP:An interdisciplinary syllabus for teaching computational science at the graduate level [DE95-006526] p 2375 N95-28632

ONBOARD DATA PROCESSING

Classification of RF transients in space using digital signal processing and neural network techniques [DE95-006287] p 2256 N95-27840

ONBOARD EQUIPMENT

Alternate charging profiles for the onboard nickel cadmium batteries of the Explorer Platform/Extreme Ultraviolet Explorer p 2272 N95-26796

Analysis of filter tuning techniques for sequential orbit determination p 2146 N95-27764

ONE DIMENSIONAL FLOW

The method of space-time conservation element and solution element-applications to one-dimensional and two-dimensional time-marching flow problems [NASA-TM-106915] p 2389 N95-26663

The use of wavelet transforms in the solution of two-phase flow problems [DE95-004688] p 2284 N95-27721

OPEN CIRCUIT VOLTAGE

Adiabatic charging of nickel-hydrogen batteries p 2272 N95-26795

OPENINGS

Analysis of stresses in finite anisotropic panels with centrally located cutouts p 2187 N95-28286

OPERATING COSTS

Lessons learned from the introduction of autonomous monitoring to the EUVE science operations center p 2385 N95-27393

OPERATING SYSTEMS (COMPUTERS)

Application-aware adaptation for mobile computing [AD-A288366] p 2363 N95-26469

Operating system support for coexistence of real-time and conventional scheduling [AD-A288584] p 2364 N95-26534

Energetic particle destabilization of shear Alfven waves in stellarators and tokamaks [DE95-006393] p 2431 N95-27419

OPERATING TEMPERATURE

Comparison of the calculated and measured stability of a NbTi cable-in-conduit conductor [DE95-007964] p 2265 N95-27693

OPERATIONAL PROBLEMS

Air traffic operational inventory CY 1994 [AD-A288281] p 2126 N95-26454

OPERATOR PERFORMANCE

Subjective workload assessment in a spatial memory task [AD-A289491] p 2356 N95-26825

Generic satellite monitoring expert system [AD-A289209] p 2163 N95-26987

Gloved operator performance study. The effects of hand wear and elastic resistance of a control during tracking performance [AD-A289405] p 2360 N95-27099

Image quality metrics for color CRT displays [AD-A288934] p 2262 N95-27196

OPERATORS (MATHEMATICS)

Gromov-Lawson-Rosenberg conjecture for groups with periodic cohomology [PB95-185203] p 2389 N95-26915

Quantum k-Poincare 1994 [DE95-608754] p 2448 N95-27332

The assembly tower and some categorical and algebraic aspects of frame theory [AD-A289360] p 2391 N95-27489

Remarks on the growth of the resolvent operators for power bounded operators [PB95-195418] p 2393 N95-28653

OPERATORS (PERSONNEL)

Handbook of perception and human performance, volume 2. Cognitive processes and performance [AD-A289587] p 2355 N95-26692

OPTICAL COMPUTERS

Digital optical computing [AD-A289395] p 2368 N95-26881

OPTICAL CONTROL

An optoelectronic attenuator for the high-speed control of microwave integrated circuits [AD-A289579] p 2260 N95-26690

Characterization of microwave MESFET circuits under laser illumination. Applications to phased array radar, microwave communications, and digital clock control [AD-A289181] p 2261 N95-27015

OPTICAL CORRECTION PROCEDURE

Experience from the in-flight calibration of the Extreme Ultraviolet Explorer (EUVE) and Upper Atmosphere Research Satellite (UARS) fixed head star trackers (FHSTs) p 2149 N95-27779

OPTICAL DATA PROCESSING

Digital optical computing [AD-A289395] p 2368 N95-26881

Nonlinear dynamics of a coherent polariton-biexciton system [DE95-609150] p 2417 N95-28607

OPTICAL DENSITY

Evaluation of laser-protective eyewear dyes in UVEX lenses [AD-A290076] p 2361 N95-28390

OPTICAL EQUIPMENT

Near-resonant properties of nonlinear organic materials for optical devices [AD-A288339] p 2178 N95-26570

The development of infrared detectors and mechanisms for use in future infrared space missions [NASA-CR-197819] p 2290 N95-26702

Ultra-high, resolution, modular optical angle encoder for space-based opto-mechanical applications p 2156 N95-27270

Direct ultrashort-pulse retrieval using frequency-resolved optical gating and a computational neural network [DE95-007148] p 2425 N95-27482

Long Duration Exposure Facility (LDEF) space optics handbook p 2428 N95-27654

Optical design and performance of the inelastic scattering beamline at the National Synchrotron Light Source [DE95-007679] p 2422 N95-28195

OPTICAL FIBERS

JPRS report: Science and technology. Central Eurasia [JPRS-UST-95-016] p 2262 N95-27170

OPTICAL FILTERS

Display system employing acousto-optic tunable filter [NASA-CASE-NPO-18736-1-CU] p 2426 N95-27843

OPTICAL FLOW (IMAGE ANALYSIS)

Schlieren System and method for moving objects [NASA-CASE-LAR-15053-1] p 2291 N95-27191

OPTICAL MATERIALS

A new growth technology for highly non-linear, optical quality organic films: Organic vapor phase deposition [AD-A289006] p 2178 N95-26567

Study of frequency doubling antireflection coating [AD-A289634] p 2424 N95-26860

Growth and evaluation of nonlinear optical crystals for laser applications: Lithium borate, barium borate and silver gallium selenide [AD-A289147] p 2277 N95-27000

Evaluation of space environmental effects on metals and optical thin films on EOIM-3 p 2210 N95-27641

BMDO materials testing in the EOIM-3 experiment p 2211 N95-27644

Point defect formation in optical materials expos ed to the space environment p 2428 N95-27646

Effects of the LDEF orbital environment on the reflectance of optical mirror materials p 2428 N95-27651

Passive spatial beam control, appendix [AD-A288913] p 2300 N95-28333

Characterization of solid state laser and nonlinear optical materials [AD-A291684] p 2300 N95-28458

Influences of film structures on laser damage thresholds [AD-A289647] p 2300 N95-28633

OPTICAL MEASUREMENT

Flow visualization of a turbulent shear flow using an optical wavefront sensor [AD-A289208] p 2277 N95-26986

Investigation of the collision line broadening problem as applicable to the NASA Optical Plume Anomaly Detection (OPAD) system, phase 1 [NASA-CR-198605] p 2426 N95-27913

Effect of noise on Frequency-Resolved Optical Gating measurements of ultrashort pulses
[DE95-007149] p 2298 N95-27969
A numerical study of ultra-short-pulse reflectometry
[DE95-008070] p 2266 N95-28015
Analysis of solar receiver flux distributions for US/Russian solar dynamic system demonstration on the MIR Space Station
[NASA-TM-106933] p 2169 N95-28036
Off-specular scattering in neutron reflectometry
[DE95-007835] p 2412 N95-28057
Low power limits in ultrashort pulse measurement using Frequency-Resolved Optical Gating
[DE95-007150] p 2299 N95-28219
Particle fallout/activity sensor
[NASA-CASE-KSC-11687-1] p 2293 N95-28362

OPTICAL MEASURING INSTRUMENTS
Measurement of high acidity using a renewable-reagent fiber optic sensor
[DE95-006327] p 2425 N95-27734
Passive spatial beam control, appendix
[AD-A288913] p 2300 N95-28333

OPTICAL MEMORY (DATA STORAGE)
Optical implementation of inner product neural associative memory
[NASA-CASE-NPO-18491-2-CU] p 2427 N95-28363

OPTICAL POLARIZATION
Conversion of sunflower multiband radiometer polarization measurements to polarization parameters
[NASA-CR-197774] p 2314 N95-26815
Fundamental concepts of integrated and fiber optic sensors
[NASA-TM-106920] p 2426 N95-27906

OPTICAL PROPERTIES
Molecular object liquid crystals: An approach to new materials
[AD-A288905] p 2437 N95-26553
Design, fabrication, modeling, and optical characterization of organic polymer nonlinear directional couplers
[AD-A289327] p 2227 N95-26897
Growth, characterization and device development in monocrystalline diamond films
[AD-A289356] p 2439 N95-27416
Photoemission and optical properties of C60 fullerites
[DE95-006588] p 2425 N95-27539
Evaluation of space environmental effects on metals and optical thin films on EOIM-3 p 2210 N95-27641
Observation of asymmetrical two-cone Vavilov-Cherenkov radiation in biaxial crystal of triglycinesulphate emitted by 658 MeV protons passing along bi normal
[DE94-629017] p 2441 N95-27867
Modification of the optical properties of glass by sequential ion implantation
[DE95-007401] p 2237 N95-28080
Coherent V2O3 precipitates in alpha-Al2O3CO-implanted with vanadium and oxygen
[DE95-007404] p 2444 N95-28081
Low temperature carrier transport properties in isotopically controlled germanium
[DE95-008489] p 2444 N95-28092
Proceedings of the 1993 Scientific Conference on Obscuration and Aerosol Research
[AD-A280084] p 2331 N95-28153
Characterization of solid state laser and nonlinear optical materials
[AD-A291684] p 2300 N95-28458
Laser beam aerosol interactions
[AD-A291723] p 2300 N95-28509
Influences of film structures on laser damage thresholds
[AD-A289647] p 2300 N95-28633

OPTICAL RADAR
Continuously-tunable, narrow-linewidth, Q-switched Cr:LiSAF laser for lidar applications
[DE95-006285] p 2296 N95-27672
The concentration-estimation problem for multiple-wavelength differential absorption lidar
[DE95-008375] p 2256 N95-28231
Remote sensing of the atmosphere by resonance Raman LIDAR
[DE95-007312] p 2315 N95-28520
Measurements of daytime and upper tropospheric water vapor profiles by Raman lidar
[DE95-007640] p 2344 N95-28538

OPTICAL REFLECTION
Phase retrieval and time-frequency methods in the measurement of ultrashort laser pulses
[DE95-006499] p 2300 N95-28549

OPTICAL RESONATORS
Thermally-induced unsymmetric optical distortion of output window of high-power CO2 laser
[AD-A289604] p 2300 N95-28650

OPTICAL SCANNERS
Characterization of Ultra-Low Carbon Baintic steels for use as weld wire consumables
[AD-A288292] p 2212 N95-26411
Tensile properties of Fe-16 at. % Al alloys
[DE95-007102] p 2215 N95-27450

OPTICAL SWITCHING
An optoelectronic attenuator for the high-speed control of microwave integrated circuits
[AD-A289579] p 2260 N95-26690

OPTICAL TRACKING
An image quality analysis of ANVIS-6 night vision goggles
[AD-A289398] p 2359 N95-26883
Long-range eye tracking: A feasibility study
[DE95-008587] p 2357 N95-28176

OPTICAL WAVEGUIDES
Design, fabrication, modeling, and optical characterization of organic polymer nonlinear directional couplers
[AD-A289327] p 2227 N95-26897
Perturbations on effective index of refraction from prism coupling
[AD-A291700] p 2427 N95-28524

OPTICS
Retrofitting a fine-pointing system to satellite optics
p 2157 N95-27277
The 132 nsec bunch spacing in the Tevatron proton-antiproton collider
[DE95-005750] p 2422 N95-28346
Basic and applied research in the field of electronics and communications
[AD-A291727] p 2270 N95-28512

OPTIMAL CONTROL
Flight control design using mixed H2/micron optimization
[AD-A289288] p 2142 N95-27036
Optimal control of two queues in series
[DE95-608731] p 2382 N95-27045
Optimal attitude maneuver execution for the Advanced Composition Explorer (ACE) mission
p 2149 N95-27778
Use of nonlinear identification in robust attitude and attitude rate estimation for SAMPEX
p 2149 N95-27781

OPTIMIZATION
Supersonic transport grid generation, validation, and optimization
[NASA-CR-197752] p 2365 N95-26648
Contribution to the optimal shape design of two-dimensional internal flows with embedded shocks
[NASA-CR-195062] p 2389 N95-26672
Alternate charging profiles for the onboard nickel cadmium batteries of the Explorer Platform/Extreme Ultraviolet Explorer p 2272 N95-26796
A process improvement model for software verification and validation
[NASA-CR-197761] p 2367 N95-26814
Creating an alternative parameter optimization method (APO) p 2118 N95-26946
Observations on the solvating power of supercritical fluids p 2228 N95-27106
A sustainable genetic algorithm for satellite resource allocation p 2376 N95-27383
Improved numerical solution of mixed H2/H(infinity) optimization with applications
[AD-A289315] p 2386 N95-27400
Optimization of wave rotors for use as gas turbine engine topping cycles
[NASA-TM-106951] p 2140 N95-27860
CORSSTOL: Cylinder Optimization of Rings, Skin, and Stringers with Tolerance sensitivity
[NASA-TP-3551] p 2392 N95-28215
Upgrade of the computer modeling programs POLU10 and POLU13A for open burning and open detonation of energetic materials p 2172 N95-28306
Distributed methods and processes in games of incomplete information
[PB95-184842] p 2396 N95-28352
Distributed methods and processes in games of incomplete information
[PB95-184859] p 2396 N95-28353
Local design optimization for composite transport fuselage crown panels p 2137 N95-28473
Optimization strategies for molecular dynamics programs on Cray computers and scalar work stations
[AD-A289574] p 2418 N95-28648
Structural optimisation of cage induction motors using finite element analysis
[PB95-195434] p 2271 N95-28655

OPTOELECTRONIC DEVICES
Characterization of optical polymers for multi-layered electro-optic devices
[AD-A289255] p 2227 N95-26973

ORBIT CALCULATION
Flight Mechanics/Estimation Theory Symposium 1995
[NASA-CP-3299] p 2146 N95-27763
Analysis of filter tuning techniques for sequential orbit determination p 2146 N95-27764
Evaluation and modeling of autonomous attitude thrust control for the Geostation Operational Environmental Satellite (GOES)-8 orbit determination
p 2146 N95-27765
Differenced Range Versus Integrated Doppler (DRVID) ionospheric analysis of metric tracking in the Tracking and Data Relay Satellite System (TDRSS)
p 2147 N95-27766
Accurate orbit determination strategies for the tracking and data relay satellites p 2147 N95-27768
Operational improvements of long-term predicted ephemerides of the Tracking and Data Relay Satellites (TDRSs) p 2147 N95-27769
Observational magnetometer calibration with the Hubble Space Telescope's new magnetometers
p 2148 N95-27773
Ulysses orbit determination at high declinations
p 2151 N95-27787
A demonstration of unified TDRS/GPS tracking and orbit determination p 2151 N95-27792
GPS as an orbit determination subsystems
p 2152 N95-27793
Operational considerations of using GPS for spacecraft navigation p 2152 N95-27794
Geostationary Operational Environmental Satellite (GOES)-8 mission flight experience
p 2153 N95-27798
ORION: A Supersynchronous Transfer Orbit mission
p 2154 N95-27804
On the physics of ion ring generation for the stabilization of FRX discharges
[DE95-007105] p 2410 N95-27922

ORBIT INSERTION
Electric propulsion for geostationary orbit insertion
[NASA-TM-106942] p 2168 N95-27727

ORBIT PERTURBATION
Orbit analysis
[DE95-007216] p 2419 N95-27091
Evaluation and modeling of autonomous attitude thrust control for the Geostation Operational Environmental Satellite (GOES)-8 orbit determination
p 2146 N95-27765

ORBITAL ASSEMBLY
Pre-integrated truss space station and method of assembly
[NASA-CASE-MSC-22015-1] p 2165 N95-27842

ORBITAL ELEMENTS
Computing NORAD mean orbital elements from a state vector
[AD-A289281] p 2146 N95-27033

ORBITAL MANEUVERS
Contingency maneuver strategies for the Total Ozone Mapping Spectrometer-Earth Probe (TOMS-EP)
p 2152 N95-27796

ORBITAL MECHANICS
Kepler Equation solver p 2147 N95-27767
Operational improvements of long-term predicted ephemerides of the Tracking and Data Relay Satellites (TDRSs) p 2147 N95-27769
Summary of EOS flight dynamics analysis
p 2152 N95-27797
Dynamics and control of SEDSAT tethered multi-probe for thermospheric research flight data analysis of SEDS-2 satellite: Tethered systems dynamics and flight data analysis
[NASA-CR-198653] p 2165 N95-27836

ORBITAL POSITION ESTIMATION
Analysis of filter tuning techniques for sequential orbit determination p 2146 N95-27764
Accurate orbit determination strategies for the tracking and data relay satellites p 2147 N95-27768
Operational improvements of long-term predicted ephemerides of the Tracking and Data Relay Satellites (TDRSs) p 2147 N95-27769
A PC-based magnetometer-only attitude and rate determination system for gyroless spacecraft
p 2147 N95-27770
Observational magnetometer calibration with the Hubble Space Telescope's new magnetometers
p 2148 N95-27773
A demonstration of unified TDRS/GPS tracking and orbit determination p 2151 N95-27792
Estimation of attitude sensor timetag biases
p 2153 N95-27799
Contingency designs for attitude determination of TRMM p 2154 N95-27803

ORBITAL RENDEZVOUS
Fuzzy logic techniques for rendezvous and docking of two geostationary satellites p 2384 N95-27386

A modified proportional navigation scheme for rendezvous and docking with tumbling targets: The Planar case p 2150 N95-27784

ORDER-DISORDER TRANSFORMATIONS

Rotor phases in compound semiconductors [DE95-004139] p 2436 N95-26442

A first principles approach to phase stability and order-disorder transformation: Application to Li-Al alloys [DE95-609152] p 2218 N95-27756

Multifractal character of the electronic states in disordered two-dimensional systems [DE95-609153] p 2443 N95-28016

Phase separation and ordering in InGaAsP and InGaAs materials [DE95-007493] p 2443 N95-28050

Aspects of macroscopic phase separation and interstitial oxygen ordering in oxygen doped La2CuO(4+delta) [DE95-007864] p 2443 N95-28060

Electronic structure of ordered and disordered transition metal aluminides [DE95-609034] p 2223 N95-28250

ORDNANCE

A comprehensive energetic materials resource recovery and recycling program p 2176 N95-28323

ORGANIC CHARGE TRANSFER SALTS

Electrocrystallization of an ordered organic monolayer: Selective epitaxial growth of beta(ET)213 ongraphite [AD-A288942] p 2178 N95-26569

ORGANIC CHEMISTRY

Environmentally Benign Cleaning and Degreasing Technology: JANNAF Safety and Protection Subcommittee and Propellant Development and Characterization Subcommittee Joint Workshop [CPIA-PUBL-611] p 2227 N95-27101

ORGANIC COMPOUNDS

Design, fabrication, modeling, and optical characterization of organic polymer nonlinear directional couplers [AD-A289327] p 2227 N95-26897

Bioremediation of chlorinated organics: PCBs, TCE, HCFCs p 2179 N95-27117

On the synthesis of mixed-metal and mixed-pnicogen13-15 ring-systems [AD-A288869] p 2223 N95-28332

Self-assembly of low-dimensional molecular nanoclusters on Au(111) surfaces [AD-A288936] p 2178 N95-28334

ORGANIC LASERS

An organic thin film laser diode: A novel light source [AD-A289007] p 2294 N95-26568

ORGANIC MATERIALS

Photo and thermal excitation of surface chemistry on model catalyst surfaces [AD-A288541] p 2200 N95-26528

An organic thin film laser diode: A novel light source [AD-A289007] p 2294 N95-26568

Near-resonant properties of nonlinear organic materials for optical devices [AD-A288339] p 2178 N95-26570

Process for non-contact removal of organic coatings from the surface of paintings [NASA-CASE-LEW-15896-1] p 2235 N95-27702

A compatibility study of containment materials in FEFO, bis-(2-fluoro-2,2-dinitroethyl) formal [DE95-007548] p 2206 N95-27750

Passive spatial beam control, appendix [AD-A288913] p 2300 N95-28333

ORGANIC SUPERCONDUCTORS

Design strategies for the preparation of polymeric organic superconductors [AD-A289022] p 2436 N95-26462

ORGANISMS

Live from Antarctica: The coldest, windiest place on Earth [NASA-CR-197737] p 2335 N95-26595

Survey on researches related to ocean disposal of carbon dioxide [DE95-759247] p 2329 N95-27939

Energy transfer in real and artificial photosynthetic systems [DE95-005824] p 2351 N95-27948

ORGANIZATIONS

Change, Learning and Mental Work in Organizations: Working papers of the 3rd Otaniemi-Dresden Workshop [PB95-184941] p 2356 N95-26909

Investigation on LCA (Life Cycle Analysis/assessment) [DE95-759260] p 2330 N95-27942

Fracture testing and analysis of adhesively bonded joints for automotive applications [DE95-007024] p 2184 N95-28207

ORGANOMETALLIC COMPOUNDS

On the synthesis of mixed-metal and mixed-pnicogen13-15 ring-systems [AD-A288869] p 2223 N95-28332

ORR-SOMMERFELD EQUATIONS

The stability of the flow in a laminar separation bubble [CUED/A-AERO/TR-22] p 2275 N95-26809

ORTHOPEDICS

Automatic locking knee brace joint [NASA-CASE-MFS-28997-1] p 2360 N95-27501

OSCILLATION DAMPERS

High-precision buffer circuit for suppression of regenerative oscillation [NASA-TM-4658] p 2291 N95-27259

OSCILLATIONS

Self-excited oscillations in a duct with closed brances [IFTR-18/1994] p 2400 N95-26358

Suppressor of oscillations in airframe cavities [AD-D017265] p 2128 N95-26507

Visualization of the multiple supersonic jet oscillations by swept focused strobed schlieren technique p 2119 N95-26952

The near-wake flow behavior of an oscillating airfoil with modified trailing edge p 2119 N95-26953

Induced axial oscillations in superconducting dipole windings [DE95-005690] p 2265 N95-27554

Neutrino oscillations in strong magnetic fields [DE95-608876] p 2416 N95-28249

Stability of strange quark stars with nuclear crusts against radial oscillations [DE95-008484] p 2463 N95-28357

OSCILLATORS

The phenomena of subharmonic bifurcations, runaway, and transition to chaos in a non-linear oscillator: perturbation methods and a numerical experiment [IFTR-16/1994] p 2398 N95-26518

Wigner quantum oscillators. OSP (3/2) oscillators [DE95-608756] p 2448 N95-27334

Time-dependent multi-dimensional simulation studies of the electron output scheme for high power FELs [DE95-006593] p 2297 N95-27737

High power free-electron laser concepts and problems [DE95-007841] p 2298 N95-28059

Theoretical and experimental study of low-loss, High-efficiency monolithic antenna structures at 94 GHz [AD-A291785] p 2257 N95-28513

Method and apparatus for maintaining linearity and frequency accuracy of an FM chirp waveform [AD-D017398] p 2258 N95-28615

OTOLITH ORGANS

Comparative Transduction Mechanisms of Vestibular Otolith Hair Cells [NASA-CR-197980] p 2349 N95-26727

Regional differences in lectin binding patterns of vestibular hair cells p 2349 N95-26728

Hair cell regeneration in the bullfrog vestibular otolith organs following aminoglycoside toxicity p 2349 N95-26729

Peripheral innervation patterns of vestibular nerve afferents in the bullfrog utriculus p 2349 N95-26730

Comparative transduction mechanisms of hair cells in the bullfrog utriculus. 1: Responses to intracellular current p 2350 N95-26731

Comparative transduction mechanisms of hair cells in the bullfrog uticulus. 2: Sensitivity and response dynamics to hair bundle displacement p 2350 N95-26732

OUTGASSING

Evaluation of Oxygen Interactions with Materials 3: Mission and induced environments p 2210 N95-27631

Cryogenic BRDF measurements at 10.6 micrometers and 0.63 micrometers on contaminated mirrors [AD-A291611] p 2427 N95-28408

OV-10 AIRCRAFT

Flutter clearance flight tests of an OV-10A airplane modified for wake vortex flight experiments [NASA-TM-109168] p 2117 N95-26381

OVER-THE-HORIZON RADAR

Auto-processing of OTH radar amplitude/range/Doppler data [AD-A289152] p 2253 N95-27005

Assessment of the AN/FPS-118 Ionospheric model and proposed improvements [AD-A289439] p 2337 N95-27146

Measurements of HF auroral clutter using the Verona Ava Linear Array Radar (VALAR) [AD-A289442] p 2337 N95-27147

OXIDASE

Peripheral innervation patterns of vestibular nerve afferents in the bullfrog utriculus p 2349 N95-26730

OXIDATION

Iron oxides characterization by Moessbauer spectroscopy [DE95-607869] p 2202 N95-27199

Systematic study of the ion beam mixing of oxide markers into alumina [DE95-006262] p 2217 N95-27555

Spacecraft materials studies on the Aerospace Corporation tray on EOIM-3 p 2210 N95-27632

Orbital atomic oxygen effects on materials: An overview of MSFC experiments on the STS-46 EOIM-3 p 2419 N95-27637

Effects of atomic oxygen on polymeric materials flown on EOIM-3 p 2242 N95-27638

BMDO materials testing in the EOIM-3 experiment p 2211 N95-27644

Structural oxidation state studies of the manganese cluster in the oxygen evolving complex of Photosystem II [DE95-008488] p 2409 N95-27744

A compatibility study of containment materials in FEFO, bis-(2-fluoro-2,2-dinitroethyl) formal [DE95-007548] p 2206 N95-27750

Kinetics and dynamics of oxidation reactions involving adsorbed CO species on bulk supported Pt and copper oxides [DE95-006420] p 2207 N95-27952

The oxidation state and magnetic behaviour of Tb in high-(Tc) related materials [DE95-007129] p 2219 N95-27966

Hydrothermal oxidation of solid rocket propellant and other department of defense hazardous wastes p 2177 N95-28325

Mechanism of deposit formation on fuel-wetted hot metal surfaces [AD-A289847] p 2210 N95-28621

High temperature oxidation of nickel concentrates [PB95-195566] p 2224 N95-28644

TV-holography at high temperatures: In situ observations of the oxidation of advanced materials [PB95-195343] p 2294 N95-28651

Photoemission study of solid state reaction and initial oxidation of the Ce/Al(100) system [PB95-195368] p 2210 N95-28652

OXIDATION RESISTANCE

Stability of chromite interconnections in dual environments [DE95-007755] p 2267 N95-28131

OXIDATION-REDUCTION REACTIONS

Design strategies for the preparation of polymeric organic superconductors [AD-A289022] p 2436 N95-26462

Defect characterization of electronic conducting pseudo-perovskite systems [DE95-007487] p 2220 N95-28049

OXIDE FILMS

Transport phenomena and interfacial kinetics in multiphase combustion systems [AD-A288297] p 2199 N95-26417

Coatings of non-oxide ceramics for improved corrosion resistance in high temperature coal combustion [DE95-006932] p 2241 N95-28604

OXIDES

Non-metallic oxide inclusion formation in C-Mnlow alloy steel welds [DE94-019160] p 2215 N95-27319

Systematic study of the ion beam mixing of oxide markers into alumina [DE95-006262] p 2217 N95-27555

The oxidation state and magnetic behaviour of Tb in high-(Tc) related materials [DE95-007129] p 2219 N95-27966

Coherent V2O3 precipitates in alpha-Al2O3CO-implanted with vanadium and oxygen [DE95-007404] p 2444 N95-28081

Sensor for measuring the atomic fraction in highly dissociated hydrogen [DE95-006531] p 2415 N95-28204

Development of low-expansion ceramics with strength retention to elevated temperatures [DE95-005760] p 2239 N95-28397

Characterization of solid state laser and nonlinear optical materials [AD-A291684] p 2300 N95-28458

Local texture and grain boundary misorientations in high H(C) oxide superconductors [DE95-007004] p 2447 N95-28606

Muon spin relaxation in ferromagnets: Theoretical results for paramagnetic EuO and EuS [PB95-192860] p 2418 N95-28641

OXIDIZERS

International Space Station Alpha trace contaminant control subassembly life test report [NASA-TM-108488] p 2358 N95-26364

A new method for measuring hypergol scrubber emissions p 2174 N95-28312

OXYGEN

Environmental effects on high energy density materials [AD-A288296] p 2199 N95-26416

Chemical physics of uniform cyclic etching [AD-A288975] p 2404 N95-26574

Prediction of rain attenuation and total atmospheric attenuation for low-availability satellite communications in Europe
[PB95-184925] p 2252 N95-26908

Stoichiometry, structure, and properties of La2NiO(4+(delta)) and La(2-x)Sr(x)NiO(4+/-(delta))
[DE95-007682] p 2439 N95-27443

Crystal structure, short-range oxygen defects, and water adsorption in La- and Nd-modified ZrO2
[DE95-007134] p 2439 N95-27452

LDEF: 69 Months in Space. Third Post-Retrieval Symposium, part 3
[NASA-CP-3275-PT-3] p 2466 N95-27629

Molecular beam scattering from C-13 enriched Kapton and correlation with the EOIM-3 carousel experiment
p 2419 N95-27643

Numerical methods for determining interstitial oxygen in silicon
[DE95-007710] p 2205 N95-27683

ECR plasma-assisted deposition of Al2O3 and dispersion-strengthened AlO2
[DE95-007743] p 2235 N95-27687

High temperature kinetic study of the reactions H + O2 = OH + O and O + H2 = OH + H in H2/O2 system by shock tube-laser absorption spectroscopy
[NASA-CR-195473] p 2206 N95-27695

Absorption of sparingly soluble gases by reactive media in self-aerated gas-liquid contactors: A scale-up procedure
[DE95-006429] p 2206 N95-27707

Structural oxidation state studies of the manganese cluster in the oxygen evolving complex of Photosystem II
[DE95-008488] p 2409 N95-27744

Aspects of macroscopic phase separation and interstitial oxygen ordering in oxygen doped La2CuO(4+delta)
[DE95-007864] p 2443 N95-28060

Formation of anisotropic Tl-1212, Tl-2212, Tl-1223 and Tl-2223 particles using aerosol flow reacted powders
[DE95-007400] p 2444 N95-28079

Modification of the optical properties of glass by sequential ion implantation
[DE95-007401] p 2237 N95-28080

Coherent V2O3 precipitates in alpha-Al2O3CO-implanted with vanadium and oxygen
[DE95-007404] p 2444 N95-28081

Mars Sample Return mission utilizing in-situ propellant production
[NASA-CR-188371] p 2145 N95-28261

High energy density systems in cryogenic media: The production and reactions of atoms and radicals
[AD-A289818] p 2417 N95-28572

High temperature oxidation of nickel concentrates
[PB95-195566] p 2224 N95-28644

OXYGEN ATOMS

An overview of the Evaluation of Oxygen Interactions with Materials 3 experiment: Space Shuttle Mission 46, July-August 1992 p 2210 N95-27630

Evaluation of Oxygen Interactions with Materials 3: Mission and induced environments
p 2210 N95-27631

Spacecraft materials studies on the Aerospace Corporation tray on EOIM-3 p 2210 N95-27632

Exposure of LDEF materials to atomic oxygen: Results of EOIM 3 p 2210 N95-27633

Atomic oxygen dosimetry measurements made on STS-46 by CONCAP 2 p 2418 N95-27634

Inflight resistance measurement on high-T(sub c) superconducting thin films exposed to orbital atomic oxygen on CONCAP-2 (STS-46) p 2272 N95-27635

LEO degradation of graphite and carbon-based composites aboard Space Shuttle Flight STS-46
p 2199 N95-27636

Orbital atomic oxygen effects on materials: An overview of MSFC experiments on the STS-46 EOIM-3
p 2419 N95-27637

Effects of atomic oxygen on polymeric materials flown on EOIM-3 p 2242 N95-27638

Analysis of selected specimens from the STS-46 Energetic Oxygen Interaction with Materials-3 experiment p 2210 N95-27642

Molecular beam scattering from C-13 enriched Kapton and correlation with the EOIM-3 carousel experiment
p 2419 N95-27643

BMDO materials testing in the EOIM-3 experiment
p 2211 N95-27644

STS-46 plasma composition measurements using the EOIM-3 mass spectrometer p 2211 N95-27645

Effects of the LDEF orbital environment on the reflectance of optical mirror materials
p 2428 N95-27651

LDEF's contribution to the selection of thermal control coatings for the Space Station p 2242 N95-27661

Process for non-contact removal of organic coatings from the surface of paintings
[NASA-CASE-LEW-15896-1] p 2235 N95-27702

OXYGEN ISOTOPES

LEO degradation of graphite and carbon-based composites aboard Space Shuttle Flight STS-46
p 2199 N95-27636

D/H and O-18/O-16 partitioning between water liquid and vapor in the system H2O-Na-K-Mg-Ca-Cl-SO4 from 0 to 350 C
[DE95-007013] p 2208 N95-27961

OXYGEN-HYDROCARBON ROCKET ENGINES

Advanced Earth-to-orbit propulsion technology information, dissemination and research
[NASA-CR-196582] p 2168 N95-27424

OZONE

Electromagnetic devices and processes in environment protection
[AD-A288656] p 2141 N95-26487

Spectral analyses, climatology, and interannual variability of Nimbus-7 TOMS version 6 total column ozone
[NASA-RP-1360] p 2341 N95-26689

Coupled chemistry/climate issues
[DE95-006443] p 2327 N95-27532

Evaluation of microporous carbon filters as catalysts for ozone decomposition
[DE95-006498] p 2331 N95-28548

Stratospheric ozone reactive chemicals generated by space launches worldwide
[AD-A289852] p 2332 N95-28623

OZONE DEPLETION

Live from Antarctica, volume 4
[NASA-CR-197828] p 2335 N95-26596

The importance of propulsion engineers in protecting the global environment p 2170 N95-28295

OZONOSPHERE

The importance of propulsion engineers in protecting the global environment p 2170 N95-28295

P

P WAVES

Study of parity and time reversal violation in neutron-nucleus interactions
[DE95-005158] p 2405 N95-27081

Fowler DMO and time migration for transversely isotropic media with explicit operators
[DE95-007671] p 2339 N95-28194

P-I-N JUNCTIONS

Amorphous silicon pixel radiation detectors and associated thin film transistor electronics readout
[DE95-006568] p 2265 N95-27678

P-TYPE SEMICONDUCTORS

Photoluminescence spectroscopy of 4H- and 6H-SiC
[AD-A289326] p 2202 N95-26896

Defect characterization of electronic conducting pseudo-perovskite systems
[DE95-007487] p 2220 N95-28049

Low temperature deposition and characterization of N- and P-type silicon carbide thin films and associated Ohmic and Schottky contacts
[AD-A289107] p 2237 N95-28097

PACIFIC OCEAN

Fluxes across the west coast resolved by Picket Fence observations during stormfest
[AD-A288511] p 2341 N95-26653

Meteorological and oceanographic data collected during the ASREX 91 field experiment
[AD-A289492] p 2342 N95-26826

PACKAGING

JTEC Panel report on microelectromechanical systems in Japan
[NASA-CR-197831] p 2268 N95-28239

Development of an ultra-safe rechargeable lithium-ion battery
[AD-A288959] p 2269 N95-28349

PACKET TRANSMISSION

A high performance totally ordered multicast protocol
[NASA-CR-197765] p 2371 N95-27252

PACKETS (COMMUNICATION)

The reliable multicast protocol application programming interface
[NASA-CR-197762] p 2363 N95-26388

A high performance totally ordered multicast protocol
[NASA-CR-197765] p 2371 N95-27252

Simulator report for SCI systems with HIC-router
[PB95-196580] p 2379 N95-28093

PAINTS

Thermal control materials on EOIM-3
p 2242 N95-27639

Optimization of measurements with pressure sensitive paints
[NASA-TM-4695] p 2293 N95-27915

Assay of weathering effects on protective polymer coatings using positron annihilation spectroscopy
[DE95-007040] p 2236 N95-27962

Surface scanning techniques to locate and study defects in painted zinc and zinc alloy coated steels
[DE95-006099] p 2240 N95-28547

PAIR PRODUCTION

Search for SUSY at CDF
[DE95-005109] p 2407 N95-27430

Search for supersymmetry and leptoquark states at FNAL
[DE95-003381] p 2410 N95-27871

Lattice calculation for lepton capture from vacuum-pair production in relativistic heavy-ion collisions
[DE95-007392] p 2413 N95-28077

PALLADIUM

Magnetic and structural properties of Fe/Pd multilayers studied by magnetic x-ray dichroism and x-ray absorption spectroscopy
[DE95-007095] p 2206 N95-27755

Residual stress, strain, and faults in nanocrystalline palladium and copper
[DE95-008294] p 2223 N95-28543

PALLADIUM COMPOUNDS

Density changes in amorphous Pd80Si20 during low temperature ion irradiation
[DE95-007132] p 2441 N95-27928

PANEL METHOD (FLUID DYNAMICS)

TranAir: A full-potential, solution-adaptive, rectangular grid code for predicting subsonic, transonic, and supersonic flows about arbitrary configurations. Theory document
[NASA-CR-4348] p 2123 N95-28265

PANELS

The collapse of composite cylindrical panels with various thickness using finite element analysis
[AD-A289370] p 2308 N95-26905

Weightless Environment Training Facility (WETF) materials coating evaluation, volume 3
[NASA-CR-188366-VOL-3] p 2239 N95-28387

Composite fuselage crown panel manufacturing technology p 2137 N95-28474

Effect of low-spe[illegible]pact damage and damage location on behavior of composite panels p 2197 N95-28481

Response of multi-panel assembly to noise from a jet in forward motion
[NASA-CR-198164] p 2289 N95-28673

PARABOLIC DIFFERENTIAL EQUATIONS

Adaptive finite element method I: Solution algorithm and computational examples
[AD-A288979] p 2389 N95-26609

Modeling surface effects with the parabolic equation method
[AD-A289199] p 2254 N95-27021

PARACHUTES

Wind tunnel experiments on wake flow field behind a reentry capsule from a viewpoint of parachute deployment at supersonic speeds
[ISAS-R-655] p 2121 N95-26740

The performance of cargo airdrop systems using g-12E parachutes: Statistical determination of minimum altitude
[AD-A291666] p 2126 N95-28454

PARALLEL COMPUTERS

Grain size management in repetitive task graphs for multiprocessor computer scheduling
[AD-A288575] p 2377 N95-26551

Aeroelasticity of wing and wing-body configurations on parallel computers
[NASA-CR-197756] p 2129 N95-26590

Minimizing the impact of synchronization overhead in parallel discrete event simulations
[AD-A289278] p 2377 N95-26984

Language constructs and runtime systems for compositional parallel programming
[DE95-008298] p 2378 N95-27741

PARALLEL PLATES

Energy-measuring resistor bank
[AD-D017392] p 2271 N95-28613

PARALLEL PROCESSING (COMPUTERS)

Parallelizing locally-weighted regression
[AD-A288294] p 2394 N95-26414

Massively parallel self-consistent-field calculations
[DE95-004128] p 2376 N95-26441

A fixed time performance evaluation of parallel CFD applications
[DE94-014240] p 2273 N95-26445

Parallel computing on various platforms: A case study
[AD-A289008] p 2376 N95-26460

Parallelism detection and scheduling strategies for reliable and efficient execution on multicomputers
[AD-A288370] p 2376 N95-26471

Modified eigenvalue problems with applications to structural dynamic re-analysis on parallel computers
[AD-A288257] p 2307 N95-26547

Algorithms for parallel flow solvers on message passing architectures
[NASA-CR-197758] p 2274 N95-26588

Aeroelasticity of wing and wing-body configurations on parallel computers
[NASA-CR-197756] p 2129 N95-26590
A parallel coupled oceanic-atmospheric general circulation model
[DE95-005918] p 2335 N95-26622
A parallel complexity model for functional languages
[AD-A288589] p 2365 N95-26656
Performance prediction: A case study using a multi-ring KSR-1 machine
[NASA-CR-195066] p 2361 N95-26697
Second International Conference on Software for Multiprocessors and Supercomputers Theory, Practice, Experience
[AD-A289474] p 2368 N95-26820
An architecture for optimal all-to-all personalized communication
[AD-A288532] p 2377 N95-26840
An exploratory application of neural networks for airfoil design p 2118 N95-26943
Minimizing the impact of synchronization overhead in parallel discrete event simulations
[AD-A289278] p 2377 N95-26984
Scalability in production system programs
[AD-A289345] p 2453 N95-27063
The systems of the proportional chambers registration electronics for present experiments in nuclear physics
[DE95-608559] p 2419 N95-27161
Accelerating conservative parallel simulation of VHDL circuits
[AD-A289317] p 2264 N95-27294
NAS Technical Summaries, March 1993 - February 1994
[NASA-RP-1355] p 2466 N95-27367
XTP as a transport protocol for distributed parallel processing
[DE95-004992] p 2378 N95-27402
Parallel algorithms for semi-Lagrangian transport in global atmospheric circulation models
[DE95-007385] p 2327 N95-27457
Language constructs and runtime systems for compositional parallel programming
[DE95-008298] p 2378 N95-27741
Design of a real-time wind turbine simulator using a custom parallel architecture p 2322 N95-27979
Parallel block implicit integration technique for trajectory parallelism
[AD-A288961] p 2379 N95-28335
Exploiting parallelism in a Monte Carlo image-matching algorithm
[AD-A289872] p 2374 N95-28625

PARALLEL PROGRAMMING
A parallel complexity model for functional languages
[AD-A288589] p 2365 N95-26656
Second International Conference on Software for Multiprocessors and Supercomputers Theory, Practice, Experience
[AD-A289474] p 2368 N95-26820
Language constructs and runtime systems for compositional parallel programming
[DE95-008298] p 2378 N95-27741
A new shared-memory programming paradigm for molecular dynamics simulations on the Intel Paragon
[DE95-007289] p 2378 N95-28019
Parallel block implicit integration technique for trajectory parallelism
[AD-A288961] p 2379 N95-28335

PARAMETER IDENTIFICATION
Use of nonlinear identification in robust attitude and attitude rate estimation for SAMPEX
p 2149 N95-27781

PARAMETERIZATION
A new angle on the Euler angles
p 2153 N95-27800

PARAMETRIC AMPLIFIERS
Femtosecond OPO's at 3 microns and beyond: Design and performance issues related to the crystal properties of KTP and similar materials
[DE95-007286] p 2446 N95-28242

PARITY
Study of parity and time reversal violation in neutron-nucleus interactions
[DE95-005158] p 2405 N95-27081
Rare decays/CP: The perspective of a kaon physicist
[DE95-005964] p 2416 N95-28338

PARKING ORBITS
Contingency maneuver strategies for the Total Ozone Mapping Spectrometer-Earth Probe (TOMS-EP)
p 2152 N95-27796

PARSING ALGORITHMS
Unification of LARCH and Z-based object models to support algebraically-based design refinement: The Z perspective
[AD-A289234] p 2369 N95-26962

PARTIAL DIFFERENTIAL EQUATIONS
Introduction to multigrid methods
[NASA-CR-195045] p 2388 N95-26395
General purpose finite element solver
[PB95-185062] p 2388 N95-26495
Performance evaluation of a new parallel preconditioner
[AD-A288563] p 2376 N95-26529
Adaptive finite element method I: Solution algorithm and computational examples
[AD-A288979] p 2389 N95-26609
A model of bubble evolution during decompression based on a Monte Carlo simulation of inert gas diffusion
[AD-A289400] p 2353 N95-26885
Nonlinear problems in fluid dynamics and inverse scattering: Propagation and capturing of singularities in problems of fluid dynamics and inverse scattering
[AD-A289146] p 2277 N95-26999
Nonlinear problems in fluid dynamics and inverse scattering: Langmuir circulations and spiral flows
[AD-A289194] p 2278 N95-27019
Spectral methods on arbitrary grids
[NASA-CR-198158] p 2279 N95-27247
Extensional flow convecting a reactant undergoing a first order homogeneous reaction and diffusional mass transfer from a sphere at low to intermediate Peclet and Damkohler numbers p 2280 N95-27346
The use of wavelet transforms in the solution of two-phase flow problems
[DE95-004688] p 2284 N95-27721

PARTIAL PRESSURE
Stability of chromite interconnections in dual environments
[DE95-007755] p 2267 N95-28131

PARTICLE ACCELERATION
Acceleration theorems
[DE95-007300] p 2420 N95-27484

PARTICLE ACCELERATOR TARGETS
PXAMS: Projectile X ray AMS: X ray yields and applications
[DE95-006438] p 2204 N95-27496

PARTICLE ACCELERATORS
Signatures of Higgs-Triplet representations at TeV-e(+)e(-) colliders
[DE95-007201] p 2419 N95-27089
Statistical data analysis
[DE95-007214] p 2454 N95-27090
Orbit analysis
[DE95-007216] p 2419 N95-27091
CAS CERN Accelerator School 5th General Accelerator Physics Course
[DE95-608324] p 2419 N95-27158
The CDF upgrade
[DE95-006683] p 2421 N95-28107
Beam-beam interaction working group summary
[DE95-007824] p 2422 N95-28123

PARTICLE BEAMS
Signatures of Higgs-Triplet representations at TeV-e(+)e(-) colliders
[DE95-007201] p 2419 N95-27089
Orbit analysis
[DE95-007216] p 2419 N95-27091
Coupling in the Tevatron
[DE95-005129] p 2421 N95-27531
Beam-beam interaction working group summary
[DE95-007824] p 2422 N95-28123
Plasma lens experiments at the final focus test beam
[DE95-008595] p 2434 N95-28161
The 132 nsec bunch spacing in the Tevatron proton-antiproton collider
[DE95-005750] p 2422 N95-28346

PARTICLE COLLISIONS
Anomalous collision rate in the time counter scheme of the direct simulation Monte Carlo method for rarefied gas flow analysis
[ISAS-R-653] p 2275 N95-26742
Simulating the production of free defects in irradiated metals
[DE95-007165] p 2214 N95-27088
Signatures of Higgs-Triplet representations at TeV-e(+)e(-) colliders
[DE95-007201] p 2419 N95-27089
A study of events with large total transverse energy produced in proton-antiproton collisions at (radical)s = 1.8 TeV
[DE95-003382] p 2410 N95-27872
Investigation of the collision line broadening problem as applicable to the NASA Optical Plume Anomaly Detection (OPAD) system, phase 1
[NASA-CR-198605] p 2426 N95-27913
The CDF upgrade
[DE95-006683] p 2421 N95-28107
Constraints on the anomalous WW gamma couplings from b vector s gamma
[DE95-608866] p 2415 N95-28246
The 132 nsec bunch spacing in the Tevatron proton-antiproton collider
[DE95-005750] p 2422 N95-28346
Recent status in the search for the quark-gluon plasma
[DE95-007036] p 2417 N95-28447
B-Physics results from D0
[DE95-005126] p 2417 N95-28495

PARTICLE DECAY
Physics with relativistic heavy ions: QGP and other delicacies
[DE95-007014] p 2406 N95-27307
Implications of horizontal symmetries on baryon number violation in supersymmetric models
[DE95-610202] p 2407 N95-27406
Transverse tau polarization in inclusive bar-B yields tau bar-nu X decays
[DE95-610325] p 2407 N95-27409
Large relativistic corrections to the positronium decay rate
[DE95-610470] p 2407 N95-27412
Studies of kinematic distributions and mass reconstruction of CDF top candidate events
[DE95-005108] p 2408 N95-27478
Measurement of the D0 WAMUS magnet inductance
[DE95-005128] p 2399 N95-27530
Preliminary heavy-light decay constants from the MILC Collaboration
[DE95-005685] p 2409 N95-27552
Search for the top quark in dilepton decay modes at D(PHI)
[DE95-007764] p 2409 N95-27689
Probing strongly-interacting electroweak dynamics through W(+)W(-)/ZZ ratios at future e(+)e(-) colliders
[DE95-007202] p 2413 N95-28067
Precise measurement of the left-right cross section asymmetry in Z boson production by e(+)e(-) collisions
[DE95-008591] p 2414 N95-28158
Weak matrix elements efforts on the lattice: Status and prospects
[DE95-007701] p 2416 N95-28355
Production and decay of hybrid mesons by flux-tube breaking
[PB95-192837] p 2418 N95-28640

PARTICLE DIFFUSION
Measurement of particle transport coefficients on Alcator C-Mod
[DE95-007763] p 2411 N95-28020

PARTICLE IMAGE VELOCIMETRY
Fuzzy inference enhanced information recovery from digital PIV using cross-correlation combined with particle tracking
[NASA-TM-106896] p 2291 N95-27173

PARTICLE INTERACTIONS
Abrasion-ablation model for neutron production in heavy ion reactions
[NASA-TM-4656] p 2420 N95-27372
Supersymmetry and light quark masses in a realistic superstring model
[DE95-610201] p 2412 N95-28041
Aspects of strange matter
[DE95-008316] p 2414 N95-28170

PARTICLE MASS
Measurement of inclusive Lambda production in electron-positron interactions at the upsilon energies
[DE95-610302] p 2407 N95-27407
Search for supersymmetry and leptoquark states at FNAL
[DE95-003381] p 2410 N95-27871

PARTICLE MOTION
Skew chromaticity
[DE95-007677] p 2422 N95-28115

PARTICLE PRODUCTION
A simple relativistic model of pp-bar yields K(+)K(-)
[DE95-608852] p 2406 N95-27318
Abrasion-ablation model for neutron production in heavy ion reactions
[NASA-TM-4656] p 2420 N95-27372
Measurement of inclusive Lambda production in electron-positron interactions at the upsilon energies
[DE95-610302] p 2407 N95-27407
Precise measurement of the left-right cross section asymmetry in Z boson production by e(+)e(-) collisions
[DE95-008591] p 2414 N95-28158
Aspects of strangeness
[DE95-008314] p 2414 N95-28169
Recent status in the search for the quark-gluon plasma
[DE95-007036] p 2417 N95-28447
B-Physics results from D0
[DE95-005126] p 2417 N95-28495
Production and decay of hybrid mesons by flux-tube breaking
[PB95-192837] p 2418 N95-28640

PARTICLE SIZE DISTRIBUTION
Survey of sub-micrometre powder size measurement for ceramic and cermet powders
[PB95-190104] p 2227 N95-26746
Analytical electron microscopy of nanometer-sized particles
[AD-A289124] p 2413 N95-28101
PARTICLE SPIN
Excited Charm States
[DE95-005749] p 2409 N95-27747
PARTICLE THEORY
The 1993 European school of high-energy physis
[DE95-610196] p 2421 N95-28040
PARTICLE TRACKS
Fuzzy inference enhanced information recovery from digital PIV using cross-correlation combined with particle tracking
[NASA-TM-106896] p 2291 N95-27173
PARTICULATE REINFORCED COMPOSITES
Structural ceramics incorporating whiskers, platelets, and particulate phases
[DE95-007048] p 2235 N95-27499
PARTICULATES
The orbital debris detector consortium: Suppliers of instruments for in-situ measurements of small-particles in the space environment p 2294 N95-27670
Engineering photochemical smog through convection towers
[DE95-007727] p 2328 N95-27686
A compatibility study of containment materials in FEFO, bis-(2-fluoro-2,2-dinitroethyl) formal
[DE95-007548] p 2206 N95-27750
PARTITIONS (MATHEMATICS)
Yang-Baxter type equations and posets of maximal chains
[PB95-185195] p 2388 N95-26516
Symmetries of the KAC-Peterson modular matrices of affine algebras
[PB95-190138] p 2392 N95-28010
PARTONS
A study of parton distribution functions with the use of photon + jet event kinematics in p(bar p) collisions at (radical)s = TeV
[DE95-005127] p 2408 N95-27444
PASCAL (PROGRAMMING LANGUAGE)
Programming for time resolved spectrum in pulse radiolysis experiments
[DE95-607929] p 2406 N95-27212
PASSENGERS
Enplanement and all cargo activity
[AD-A280074] p 2144 N95-28151
PASSIVITY
FTIR studies of CH3OH on porous silicon
[AD-A289038] p 2207 N95-27904
Energy-measuring resistor bank
[AD-D017392] p 2271 N95-28613
PASTES
A compatibility study of containment materials in FEFO, bis-(2-fluoro-2,2-dinitroethyl) formal
[DE95-007548] p 2206 N95-27750
Mechanical properties of Hysol EA-9394 structural adhesive
[DE95-008187] p 2240 N95-28405
PATENTS
Bibliography of patents and licenses 1951-1990. 1991 edition
[AD-A289603] p 2452 N95-26721
PATHOGENS
Anti-idiotype probes for toxin detection
[AD-A288955] p 2348 N95-26435
PATHS
Piecemeal learning of an unknown environment
[AD-A291683] p 2387 N95-28461
PATTERN RECOGNITION
Integration of video and radiation analysis data
[DE95-004165] p 2379 N95-26443
Non-linear resistive grid kernel estimator useful in single feature, two-class pattern classification
[AD-D017394] p 2271 N95-28614
TRAINS: Dialogue transcription tools
[AD-A289869] p 2259 N95-28624
PAVEMENTS
Layer coefficients for NHDOT pavement materials
[AD-A288262] p 2246 N95-26548
Silicone joint sealants for pavements
[AD-A289843] p 2241 N95-28620
PAYLOADS
Basic space payload fastener p 2156 N95-27273
Development and testing of the rack insertion device
p 2158 N95-27289
Lessons learned from the introduction of autonomous monitoring to the EUVE science operations center
p 2385 N95-27393
Electric propulsion for geostationary orbit insertion
[NASA-TM-106942] p 2168 N95-27727
System identification of damped truss-like space structures
[NASA-TM-106638] p 2303 N95-27911
PEACETIME
Surviving the peace. Lessons learned from the aircraft industry in the 1920s and 1930s
[AD-A288284] p 2117 N95-26455
PEEK
An overview of the Evaluation of Oxygen Interactions with Materials 3 experiment: Space Shuttle Mission 46, July-August 1992 p 2210 N95-27630
Effects of atomic oxygen on polymeric materials flown on EOIM-3 p 2242 N95-27638
On the thermally-induced residual stresses in thick fiber-thermoplastic matrix (PEEK) cross-ply laminated plates p 2187 N95-28285
PELLETS
Proposed high speed pellet injection system HIPEL for large helical device
[NIFS-255] p 2419 N95-26584
CO2 pellet blast cleaning and degreasing: The true environmentally benign technology
p 2229 N95-27109
Recent high-speed ballistics experiments at ORNL
[DE95-006534] p 2422 N95-28205
Pellet injector research and development at ORNL
[DE95-006736] p 2435 N95-28596
PELVIS
Manikin integrated data acquisition system (MIDAS) initial modifications
[AD-A291662] p 2361 N95-28667
PENETRATION
Proposed high speed pellet injection system HIPEL for large helical device
[NIFS-255] p 2419 N95-26584
High energy electron beams for ceramic joining
[DE95-006316] p 2420 N95-27480
Effects of hydrogen on carbon steels at the Multi-Function Waste Tank Facility
[DE95-007194] p 2219 N95-28005
Alpha characterization inside pipes using ion-transport technology
[DE95-007869] p 2411 N95-28024
PENTABORANES
Recovery, evaluation, and decontamination of landfilled pentaborane cylinders, former liquid propellant rocket engine test facility, Washoe County, Nevada
p 2171 N95-28302
PERCOLATION
Probabilistic growth model
[PB95-185054] p 2395 N95-26913
PERFORATING
The effect on stability and thermal hydraulic quenchback of perforating the jacket of a cable-in-conduit conductor
[DE95-005392] p 2262 N95-27083
PERFORMANCE
Femtosecond OPO's at 3 microns and beyond: Design and performance issues related to the crystal properties of KTP and similar materials
[DE95-007286] p 2446 N95-28242
PERFORMANCE PREDICTION
Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation. Volume 3: Basic events and minimal cutsets
[NASA-CR-197810] p 2160 N95-26400
Performance modeling of hyperspectral imaging sensors for atmospheric studies
[AD-A289017] p 2289 N95-26461
Ram accelerator performance calculations using a modified version of the NASA CET89 equilibrium chemistry code
[AD-A289554] p 2201 N95-26678
Performance prediction: A case study using a multi-ring KSR-1 machine
[NASA-CR-195066] p 2361 N95-26697
Air cushioned landing craft (LCAC) based ship to shore movement simulation: A decision aid for the amphibious commander. A (SMMAT) application
[AD-A289635] p 2246 N95-26722
The 1994 27th Annual NASA Aerospace Battery Workshop
[NASA-CP-3292] p 2317 N95-26785
Progress towards computer simulation of NiH2 battery performance over life p 2272 N95-26786
Long life 80Ah standard IPV NiH2 battery cell
p 2272 N95-26787
Grayscale/resolution trade-off for text: Model predictions and psychophysical results for letter confusion and letter discrimination
[NASA-CR-197784] p 2369 N95-26930
A study of workstation computational performance for real-time flight simulation
[NASA-TM-109184] p 2362 N95-27241
Effects of bearing cleaning and lube environment on bearing performance p 2158 N95-27285
Transitional flow in thin tubes for space station freedom radiator p 2282 N95-27360
Attitude determination using an adaptive multiple model filtering Scheme p 2148 N95-27772
Determining GPS average performance metrics
p 2128 N95-27791
The vibration transmission of lift truck suspension seats
[ISVR-TR-245] p 2302 N95-27844
Experimental studies to test simple flexural neutralizers fitted to beams
[ISVR-TR-239] p 2309 N95-27846
Horizontal axis wind turbine post stall airfoil characteristics synthesization p 2124 N95-27974
Calculation of design load for the MOD-5A 7.3 mW wind turbine system p 2312 N95-27982
Analysis of solar receiver flux distributions for US/Russian solar dynamic system demonstration on the MIR Space Station
[NASA-TM-106933] p 2169 N95-28036
Performance analysis of bullet trajectory estimation: Approach, simulation, and experiments
[DE95-007949] p 2399 N95-28109
PERFORMANCE TESTS
Weather And Radar Processor (WARP) Test and Evaluation Master Plan (TEMP)
[AD-A288280] p 2340 N95-26453
An analysis of orbital propagators for Low Earth Orbit Rendezvous
[AD-A288883] p 2161 N95-26458
Aircraft fuel system lightning protection design and qualification test procedures development
[AD-A288401] p 2125 N95-26497
Performance evaluation of a new parallel preconditioner
[AD-A288563] p 2376 N95-26529
Development of repair processes and sources for C/KC-135 aircraft windows/windshields
[AD-A288348] p 2117 N95-26629
Design and testing of low sonic boom configurations and an oblique all-wing supersonic transport
[NASA-CR-197744] p 2129 N95-26651
Research and development report. Eureka 147: Tests of the error performance of the DAB system
[BBC-RD-1994/18] p 2249 N95-26696
High-rate/high-temperature capability of a single-layer zicar-separator nickel-hydrogen cell
p 2272 N95-26788
Air Force Ni-H2 cell test program: State of Charge test
p 2272 N95-26789
Calorimetric evaluation of commercial Ni-MH cells and charges p 2272 N95-26790
The 50 Ah NiH2 CPV qualification tests
p 2272 N95-26792
Unique features of a new nickel-hydrogen 2-cell CPV
p 2272 N95-26793
Hubble Space Telescope nickel-hydrogen battery testing: An update p 2272 N95-26794
Adiabatic charging of nickel-hydrogen batteries
p 2272 N95-26795
Alternate charging profiles for the onboard nickel cadmium batteries of the Explorer Platform/Extreme Ultraviolet Explorer p 2272 N95-26796
Development test of a liquid Apogee engine for the ETS-6
[NAL-TR-1250] p 2167 N95-26799
The effects of UH-1 experience on UH-6O simulator performance: A preliminary study
[AD-A289457] p 2130 N95-26993
The noise reduction potential of dual-stream coaxial rectangular improperly expanded jet flows
[NASA-CR-197820] p 2277 N95-26995
Visual system operational evaluation
[AD-A289173] p 2356 N95-27012
Sceening, down selection, and implementation of environmentally compliant cleaning and insulation bonding for MNASA p 2165 N95-27124
Effects of blowing ratio on heat transfer to the throat region of a porous-walled nozzle
[AD-A289459] p 2167 N95-27153
Ionizing radiation measurements on LDEF: A0015 Free flyer biostack experiment
[NASA-CR-196603] p 2202 N95-27168
A review of nickel hydrogen battery technology
[NASA-TM-106918] p 2167 N95-27177
Sailplane glide performance and control using fixed and articulating winglets
[NASA-CR-198579] p 2131 N95-27180
Measuring fault tolerance with the FTAPE fault injection tool
[NASA-CR-197773] p 2306 N95-27253
Design, testing and evaluation of latching end effector
p 2155 N95-27261
Deployment and retraction of a cable-driven solar array: Testing and simulation p 2158 N95-27283

Practical color vision tests for air traffic control applicants: En route center and terminal facilities
[DOT/FAA/AM-95/13] p 2357 N95-27323

Evaluation of high ester content PAO based single hydraulic fluid in high humidity conditions
[AD-A289374] p 2233 N95-27324

Use of CTFE as an additive to enhance fire resistance of single hydraulic fluid
[AD-A289377] p 2233 N95-27325

Performance of a stand-alone wind-electric ice maker for remote villages
[DE95-004006] p 2320 N95-27475

Engineered materials for appliation in severe metallurgical environments: Tantalum-carbon alloy development
[DE95-006838] p 2216 N95-27488

Atomic oxygen dosimetry measurements made on STS-46 by CONCAP 2 p 2418 N95-27634

Inflight resistance measurement on high-T(sub c) superconducting thin films exposed to orbital atomic oxygen on CONCAP-2 (STS-46) p 2272 N95-27635

Improved performance 1590 nm Er:YLF laser
[DE95-003691] p 2296 N95-27705

AFC generator development
[DE95-007094] p 2266 N95-27754

GPS as an orbit determination subsystems
p 2152 N95-27793

Propulsion system assessment for very high UAV under ERAST
[NASA-CR-195469] p 2140 N95-27866

DOE/KEURP Site Operator Program
[DE95-007116] p 2266 N95-27926

The development and testing of ceramic components in piston engines
[DE95-005759] p 2236 N95-27946

Collected papers on wind turbine technology
[NASA-CR-195432] p 2321 N95-27970

Comparative performance tests on the Mod-2, 2.5-mW wind turbine with and without vortex generators
p 2124 N95-27978

FENIX experimental results of large-scale CICC made of bronze-processed Nb3Sn strands
[DE95-007965] p 2222 N95-28167

Cosmic ray test results of the D0 prototype scintillating fiber tracker
[DE95-007215] p 2415 N95-28221

Evaluation of a conductive polymer-based sensor for detection of hydrazines at the part-per-billion level
p 2173 N95-28309

Prototype development and test results of a continuous ambient air monitoring system for hydrazine at the 110 ppb level p 2173 N95-28310

A new method for measuring hypergol scrubber emissions p 2174 N95-28312

A continuous emissions monitor for airborne metals
p 2174 N95-28313

Pressure vessel burst test study p 2175 N95-28317

Experimental investigation of inlet-combustor isolators for a dual-mode scramjet at a Mach number of 4
[NASA-TP-3502] p 2140 N95-28343

Manufacture and testing of the superconducting wire and cable for the RHIC dipoles and quadrupoles
[DE95-006000] p 2270 N95-28515

PERIGEES

Evaluation and modeling of autonomous attitude thrust control for the Geostation Operational Environmental Satellite (GOES)-8 orbit determination
p 2146 N95-27765

PERIODIC FUNCTIONS

Generalized CNF satisfiability, local reductions and complexity of succinctly specified problems
[DE95-006343] p 2372 N95-27849

A study of non-stationary processes and their applications
[AD-A291725] p 2395 N95-28510

PERIODIC VARIATIONS

Typical examples of classical novae
p 2459 N95-27074

Induced axial oscillations in superconducting dipole windings
[DE95-005690] p 2265 N95-27554

Determining GPS average performance metrics
p 2128 N95-27791

Reflection of neutrons from an optical grating
[DE95-007145] p 2411 N95-28004

A study of heart rate and heart rate variability during rapid decompression to 50,000 ft
[AD-A291598] p 2355 N95-28561

PERMANENT MAGNETS

Investigation of high-temperature superconducting flywheel energy storage devices
[DE95-759242] p 2320 N95-27936

PERMEABILITY

Toward molecular selectivity with chemically modified electrodes: Can electroactivity and permeability through an overlaying metallopolymer film be controlled via rational manipulation of internal architecture?
[AD-A288719] p 2403 N95-26491

Computation of electromagnetic scattering parameters for lognormal distributions of magnetic spheres: Theory and algorithms
[AD-A289672] p 2250 N95-26759

The electrical behaviour of an excitable cell at different conditions
[DE95-607911] p 2351 N95-27254

PERMITTIVITY

A book and series of monographs on ice physics
[AD-A288319] p 2200 N95-26422

Characterization of optical polymers for multi-layered electro-optic devices
[AD-A289255] p 2227 N95-26973

PERMUTATIONS

Symmetries of the KAC-Peterson modular matrices of affine algebras
[PB95-190138] p 2392 N95-28010

PEROVSKITES

Investigations of the hyperfine interactions in copper-oxide perovskites using Eu-151 and Fe-57 Moessbauer spectroscopy
[PB95-185138] p 2437 N95-26513

Neutron diffraction studies on recrystallization of solution derived lead zirconate titanates
[DE95-004771] p 2439 N95-27429

Material analysis using combined Elastic Recoil Detection and Rutherford/Enhanced Rutherford Backscattering Spectrometry
[DE95-005415] p 2205 N95-27681

Transient studies of low temperature catalyst for methane conversion
[DE95-007913] p 2205 N95-27692

Defect characterization of electronic conducting pseudo-perovskite systems
[DE95-007487] p 2220 N95-28049

PERSONAL COMPUTERS

Analysis of historical oceanographic data on a personal computer. Program MDS
[AD-A288965] p 2363 N95-26447

PC Software graphics tool for conceptual design of space/planetary electrical power systems
[NASA-TM-106908] p 2372 N95-27905

PERSONALITY TESTS

Myers-Briggs type indicators and Kirton adaption-innovation inventory correlations
[AD-A288435] p 2357 N95-27181

PERSONNEL

AGARD membership, 1995
[AGARD-MEMB-95] p 2450 N95-26353

The effect of infrared sea surface temperature measurements on evaporation duct height estimation
[AD-A289045] p 2346 N95-26477

Myers-Briggs type indicators and Kirton adaption-innovation inventory correlations
[AD-A288435] p 2357 N95-27181

An ugly duckling becomes a swan (hor ellipsis): How an organization becomes customer focused through listening
[DE95-004974] p 2454 N95-27461

Building-integrated photovoltaics: A case study
[DE95-004032] p 2325 N95-28396

PERSONNEL DEVELOPMENT

Enhancing the effects of diversity awareness training: A review of the research literature
[DOT/FAA/AM-95/10] p 2355 N95-26361

PERSONNEL MANAGEMENT

Enhancing the effects of diversity awareness training: A review of the research literature
[DOT/FAA/AM-95/10] p 2355 N95-26361

Change, Learning and Mental Work in Organizations: Working papers of the 3rd Otaniemi-Dresden Workshop
[PB95-184941] p 2356 N95-26909

PERTURBATION

Suppressor of oscillations in airframe cavities
[AD-D017265] p 2128 N95-26507

The phenomena of subharmonic bifurcations, runaway, and transition to chaos in a non-linear oscillator: perturbation methods and a numerical experiment
[IFTR-16/1994] p 2398 N95-26518

Meso-beta scale numerical simulation studies of terrain-induced jet streak mass/momentum perturbations
[NASA-CR-197804] p 2335 N95-26592

Perturbations on effective index of refraction from prism coupling
[AD-A291700] p 2427 N95-28524

PERTURBATION THEORY

A diagram technique for strongly interacting fermion systems. One-and two-band Hubbard models
[DE95-609437] p 2410 N95-27881

Numerical and theoretical studies of rough surface scattering
[AD-A291748] p 2257 N95-28528

PETRI NETS

Design tool for multiprocessor scheduling and evaluation of iterative dataflow algorithms
[NASA-TP-3491] p 2366 N95-26685

PH

Measurement of high acidity using a renewable-reagent fiber optic sensor
[DE95-006327] p 2425 N95-27734

Hydrogen-ion titrations of amino acids and proteins in solutions containing concentrated electrolyte
[DE95-008356] p 2209 N95-28229

PH FACTOR

Feasibility studies for separation processes using environmentally sensitive hydrogels
[DE95-008355] p 2238 N95-28226

PHASE CONTROL

Generation of a single-lobe, far-field intensity pattern from a laser diode array using an optical delay line
[AD-A289226] p 2295 N95-26961

PHASE DETECTORS

The sensitive detection of hydrazine using chemiluminescence p 2173 N95-28311

PHASE DIAGRAMS

Modeling the growth of electronic materials
[AD-A289137] p 2438 N95-26997

Stoichiometry, structure, and properties of La2NiO(4+(delta)) and La(2-x)Sr(x)NiO(4+/-(delta))
[DE95-007682] p 2439 N95-27443

PHASE ERROR

A phase-stepped point diffraction interferometer using liquid crystals
[NASA-TM-106922] p 2293 N95-28037

Atmospheric dispersion in adaptive optics
[AD-A289639] p 2428 N95-28617

PHASE MODULATION

Fundamental concepts of integrated and fiber optic sensors
[NASA-TM-106920] p 2426 N95-27906

Full complex modulation using two one-parameter spatial light modulators
[NASA-CASE-MSC-22255-1] p 2427 N95-28384

PHASE SEPARATION (MATERIALS)

Phase separation and ordering in InGaAsP and InGaAs materials
[DE95-007493] p 2443 N95-28050

Aspects of macroscopic phase separation and interstitial oxygen ordering in oxygen doped La2CuO(4+delta)
[DE95-007864] p 2443 N95-28060

PHASE SHIFT

A phase-stepped point diffraction interferometer using liquid crystals
[NASA-TM-106922] p 2293 N95-28037

PHASE STABILITY (MATERIALS)

A first principles approach to phase stability and order-disorder transformation: Application to Li-Al alloys
[DE95-609152] p 2218 N95-27756

PHASE TRANSFORMATIONS

Rotor phases in compound semiconductors
[DE95-004139] p 2436 N95-26442

Continuum mechanical modeling of solids undergoing a phase transformation
[AD-A288274] p 2200 N95-26451

Applications of Second Harmonic and Sum Frequency Generation to graphite and silica type interfaces
[AD-A288228] p 2201 N95-26544

Stability and thermal influences in nonlinear continuum mechanics and material science
[AD-A288333] p 2448 N95-26563

Lattice parameters and Debye-Waller factors of gamma-TiAl alloys
[AD-A288843] p 2213 N95-26681

Temperature dependence of ion-beam-induced amorphization in (Beta)-SiC
[DE95-007164] p 2438 N95-27087

Stoichiometry, structure, and properties of La2NiO(4+(delta)) and La(2-x)Sr(x)NiO(4+/-(delta))
[DE95-007682] p 2439 N95-27443

Surface crystallization and thin film melting in normal alkanes
[DE95-006694] p 2440 N95-27535

Study of the phase transformations and microstructures of uranium rich alloys of the binary uranium-gallium system
[DE95-609624] p 2217 N95-27713

Ceramic fiber-reinforced monoclinic celsian phase glass-ceramic matrix composite material
[NASA-CASE-LEW-15714-1] p 2183 N95-27717

Amorphization of complex ceramics by heavy-particle irradiations
[DE95-005725] p 2236 N95-27733

High pressure optical studies of semiconductors and heterostructures
[DE95-007119] p 2410 N95-27927

Determination of phase transitions in a lyotropic liquid crystal by positron annihilation technique
[DE95-609162] p 2442 N95-27964
Coherent V2O3 precipitates in alpha-Al2O3CO-implanted with vanadium and oxygen
[DE95-007404] p 2444 N95-28081
Ordered one-component plasmas: Phase transitions, normal modes, large systems, and experiments in a storage ring
[DE95-007077] p 2434 N95-28233
Cooling apparatus and couplings therefor
[NASA-CASE-ARC-11921-1] p 2304 N95-28256
Use of SURFACE CHEMKIN to model multiphase atmospheric chemistry: Application to nitrogen tetroxide spills p 2172 N95-28305
Supercooled liquid dynamics for the charged hard-sphere model
[DE95-609158] p 2241 N95-28609
Critical behaviour of spin models: A transfer-matrix approach
[PB95-192456] p 2418 N95-28638

PHASED ARRAYS
Active antennas with periodic structures
[AD-A289437] p 2252 N95-26924
Quasi-optical millimeter wave power combining
[AD-A291767] p 2270 N95-28529

PHENANTHRENE
Comparison of the activities of fine-particle size catalysts
[DE95-004773] p 2203 N95-27423

PHENOLS
Preconversion catalytic deoxygenation of phenolic functional groups
[DE95-007556] p 2204 N95-27458

PHENOMENOLOGY
Theory of exotic superconductivity and normal states of heavy electron and high temperature superconductivity materials
[DE95-006637] p 2268 N95-28198
A phenomenological treatment of rotating turbulence
[NASA-CR-198168] p 2288 N95-28228

PHONONS
Precursor phenomenon of martensitic transformation in Au-49.5at%Cd alloy
[DE95-007698] p 2222 N95-28166
Subharmonic phonon transmission and Kapitza conductance between crystals with very different vibrational spectra
[DE95-609151] p 2447 N95-28608

PHOSPHATES
A study of the use beta-alumina as a weak interface in alumina fiber composites
[AD-A288629] p 2179 N95-26484
The structure of lead-indium phosphate glass
[DE95-007130] p 2237 N95-27967
Femtosecond OPO's at 3 microns and beyond: Design and performance issues related to the crystal properties of KTP and similar materials
[DE95-007286] p 2446 N95-28242
Ash-based ceramic materials
[AD-D017272] p 2241 N95-28582

PHOSPHORS
Radiation sensitive area detection device and method
[NASA-CASE-MFS-28563-3] p 2423 N95-26385
Flat panel display development activities at Sandia National Laboratories
[DE95-005442] p 2265 N95-27706

PHOSPHORUS
Photo and thermal excitation of surface chemistry on model catalyst surfaces
[AD-A288541] p 2200 N95-26528

PHOSPHORUS COMPOUNDS
Surface energy driven crystallization of amorphous Ni69Cr14P17 alloy
[DE95-005543] p 2438 N95-27085

PHOTOACOUSTIC SPECTROSCOPY
Photoacoustic chambers for studying solids and gases: Theory and practical examples
[IFTR-39/1994] p 2143 N95-26837

PHOTOCATHODES
Can TMAE photocathode be used for high rate applications?
[DE95-008594] p 2293 N95-28178

PHOTOCHEMICAL REACTIONS
Photo and thermal excitation of surface chemistry on model catalyst surfaces
[AD-A288541] p 2200 N95-26528
Stabilization and control of high energy intermediates through adsorption of restricted spaces
[AD-A288552] p 2201 N95-26606
Coupled chemistry/climate issues
[DE95-006443] p 2327 N95-27532
Engineering photochemical smog through convection towers
[DE95-007727] p 2328 N95-27686
Photochemistry in constrained spaces: Zeolites and layered double metal hydroxides
[DE95-006417] p 2207 N95-27951
Radiant exchange considerations in design and scaleup of photocatalytic reactors for purification of nitroglycerine-contaminated air p 2171 N95-28300

PHOTOCONDUCTIVITY
Characterization of microwave MESFET circuits under laser illumination. Applications to phased array radar, microwave communications, and digital clock control
[AD-A289181] p 2261 N95-27015

PHOTOELECTRIC EMISSION
Resonant photoemission studies of thickness dependence of the unoccupied Gd 5d bands
[DE95-004127] p 2436 N95-26440
Photoemission and optical properties of C60 fullerites
[DE95-006588] p 2425 N95-27539
Finite pulse effects in self-amplified-spontaneous emission
[DE95-006585] p 2298 N95-28104
Photoemission study of solid state reaction and initial oxidation of the Ce/Al(100) system
[PB95-195368] p 2210 N95-28652

PHOTOELECTRICITY
Room-temperature photocurrent spectroscopy of GaAs/GaAlAs multiple quantum wells
[AD-A289607] p 2201 N95-26707

PHOTOELECTRON SPECTROSCOPY
Room-temperature photocurrent spectroscopy of GaAs/GaAlAs multiple quantum wells
[AD-A289607] p 2201 N95-26707
Probe molecule studies: Active species in alcohol synthesis
[DE95-003514] p 2203 N95-27420
NO decomposition in non-reducing atmospheres
[DE95-007895] p 2205 N95-27690
Low resistivity ohmic contacts to moderately doped n-GaAs with low temperature processing
[DE95-008507] p 2445 N95-28144

PHOTOELECTRONS
Development of density and temperature profile diagnostics for ICF targets
[DE95-007664] p 2433 N95-28052
The in situ observation of epitaxial diamond thin film nucleation and growth using emission electron microscopy
[AD-A289841] p 2447 N95-28618

PHOTOEXCITATION
Photoinduced dipoles and charge pairs in condensed phase
[DE95-007071] p 2207 N95-27921

PHOTOGRAMMETRY
Three-dimensional photogrammetry for laboratory applications
[AD-A291624] p 2294 N95-28410

PHOTOGRAPHIC RECORDING
Debris/Ice/TPS assessment and integrated photographic analysis of Shuttle mission STS-67
[NASA-TM-110651] p 2160 N95-27238

PHOTOGRAPHS
The Long Duration Exposure Facility (LDEF) photographic survey special publication
p 2457 N95-27660
Three-dimensional photogrammetry for laboratory applications
[AD-A291624] p 2294 N95-28410

PHOTOIONIZATION
Laser ionization of molecular clusters
[DE95-007011] p 2296 N95-27550
A novel sensitive detector of atmospheric nitrocompounds based on laser photofragmentation/ionization spectrometry
p 2174 N95-28314

PHOTOLITHOGRAPHY
Time-optimal control of the magnetically levitated photolithography platen
[DE95-005493] p 2266 N95-27724

PHOTOLUMINESCENCE
Photoluminescence spectroscopy of 4H- and 6H-SiC
[AD-A289326] p 2202 N95-26896

PHOTOLYSIS
Energy transfer from excited nitrenes at high density
[AD-A288352] p 2403 N95-26466
High energy density systems in cryogenic media: The production and reactions of atoms and radicals
[AD-A289818] p 2417 N95-28572

PHOTOMAPPING
Frame selection performance limits for statistical image reconstruction of adaptive optics compensated images
[AD-A289240] p 2424 N95-26965

PHOTOMETERS
Solid-state image sensor with focal-plane digital photon-counting pixel array
[NASA-CASE-NPO-18518-1-CU] p 2424 N95-26894
Method for determining surface coverage by materials exhibiting different fluorescent properties
[NASA-CASE-GSC-13539-1] p 2315 N95-28211

PHOTOMETRY
An illumination planner for Lambertian polyhedral objects
[AD-A289332] p 2424 N95-26900
Solar UV flux measurements from the SBUV2 monitor on the NOAA9 satellite. Part 1: Mg II h and k line core-to-wing ratios for 1986-1988
[PB95-181962] p 2464 N95-28007

PHOTON BEAMS
Crab crossing in a gamma-gamma collider
[DE95-006580] p 2420 N95-27470

PHOTONICS
Design and characterization of resonant cavity light-emitting diodes
[AD-A289307] p 2261 N95-26921

PHOTONS
Demonstration of photo-assisted tunneling process across the coulomb blockade energy gap in mesoscopic tunnel junctions --- photon-assisted tunneling
[AD-A289534] p 2438 N95-26872
Solid-state image sensor with focal-plane digital photon-counting pixel array
[NASA-CASE-NPO-18518-1-CU] p 2424 N95-26894
The photon structure function F2 in QCD with nonlocal vacuum quark condensates
[DE95-608829] p 2406 N95-27314
A study of parton distribution functions with the use of photon + jet event kinematics in p(bar p) collisions at (radical)s = TeV
[DE95-005127] p 2408 N95-27444
Photon burst mass spectrometry--ultrasensitive detection of rare isotopes
[DE95-006403] p 2204 N95-27467
Application of conventional laser technology to gamma-gamma colliders
[DE95-006341] p 2297 N95-27736
Nonlinear optical microscopy for imaging thin films and surfaces
[DE95-007872] p 2426 N95-28018
Finite pulse effects in self-amplified-spontaneous emission
[DE95-006585] p 2298 N95-28104
Photon rockets and gravitational radiation
[PB95-190161] p 2397 N95-28174
Low noise monolithic Si JFETS for operation in the 90-300K range and in high radiation environments
[DE95-007303] p 2269 N95-28244
Constraints on the anomalous WW gamma couplings from b vector s gamma
[DE95-608866] p 2415 N95-28246
The Bremsstrahlung of soft gamma-quanta created by elastic pp- and np-scatterings and the dibaryon resonance problem
[DE95-608870] p 2415 N95-28248
Nonlinear dynamics of a coherent polariton-biexciton system
[DE95-609150] p 2417 N95-28607

PHOTOSYNTHESIS
Structural oxidation state studies of the manganese cluster in the oxygen evolving complex of Photosystem II
[DE95-008488] p 2409 N95-27744
Photoinduced dipoles and charge pairs in condensed phase
[DE95-007071] p 2207 N95-27921
Investigation on energy conversion technology using biochemical reaction elements, 2
[DE95-759250] p 2321 N95-27940
Energy transfer in real and artificial photosynthetic systems
[DE95-005824] p 2351 N95-27948

PHOTOTHERMAL CONVERSION
Solar concentrator technology development for space based applications, volume 1
[NASA-CR-197723] p 2319 N95-27193

PHOTOVOLTAIC CELLS
Analysis of shadowing effects on MIR photovoltaic and solar dynamic power systems
[NASA-TM-106940] p 2169 N95-28213
Strategies for recycling CdTe photovoltaic modules
[DE95-006776] p 2325 N95-28517

PHOTOVOLTAIC CONVERSION
Recent progress in the Photovoltaic Manufacturing Technology Project (PVMaT)
[DE95-000279] p 2320 N95-27704
Building-integrated photovoltaics: A case study
[DE95-004032] p 2325 N95-28396

PHYSICAL CHEMISTRY
Theoretical studies of reaction surfaces
[AD-A288458] p 2404 N95-26632
Evaluations of the effectiveness of environmentally benign cleaning methodologies p 2230 N95-27115

Analysis of the dimerized Sb/Si(001)-(2x1) surface by x-ray standing waves
[DE95-007097] p 2208 N95-27965

PHYSICAL EXERCISE
Basic mechanisms and implications of non-photic entrainment of circadian rhythmicity
[AD-A288433] p 2353 N95-26779

PHYSICAL PROPERTIES
Lightweight cold weather underwear investigation
[AD-A288506] p 2358 N95-26736

PHYSICS
Beginning to edit physics
[DE95-008374] p 2455 N95-28085

PHYSIOLOGICAL EFFECTS
Biochemically vulnerable sites for antifungal intercession in the control of fungal growth
[AD-A288345] p 2348 N95-26573
Acute and subacute toxicity of ammonium dinitramide (ADN) p 2175 N95-28318
Toxicity assessment of liquid propellant XM46
p 2175 N95-28319
Development and application of low-temperature AFM
[AD-A291704] p 2352 N95-28525

PHYSIOLOGICAL RESPONSES
A study of heart rate and heart rate variability during rapid decompression to 50,000 ft
[AD-A291598] p 2355 N95-28561

PHYTOPLANKTON
Investigation on technology for increasing the biological CO2 sink and technology for CO2 fixation and reutilization
[DE95-759251] p 2329 N95-27941

PIEZOELECTRICITY
Large area smart piezoelectric and pyroelectric sensors
[AD-A288565] p 2290 N95-26541
Vibrational behavior of adaptive aircraft wing structures modelled as composite thin-walled beams
p 2191 N95-28435
Molecular modeling: An approach for the study of piezoelectric polymers
[AD-A289821] p 2241 N95-28574

PILOT PERFORMANCE
The effects of UH-1 experience on UH-60 simulator performance: A preliminary study
[AD-A289457] p 2130 N95-26993

PILOT PLANTS
Molten Carbonate Fuel Cell (MCFC) product development test
[DE95-007345] p 2316 N95-26543

PILOT TRAINING
Visual system operational evaluation
[AD-A289173] p 2356 N95-27012

PILOTLESS AIRCRAFT
Design and synthesis of a real-time controller for an unmanned air vehicle
[AD-A289134] p 2141 N95-26555
Propulsion system assessment for very high UAV under ERAST
[NASA-CR-195469] p 2140 N95-27866
Unmanned aerial vehicles, 1994 master plan
[AD-A291628] p 2136 N95-28411

PILOTS (PERSONNEL)
Development of a coding form for approach control/pilot voice communications
[DOT/FAA/AM-95/15] p 2128 N95-28540

PINS
Extended linear ion trap frequency standard apparatus
[NASA-CASE-NPO-19081-1-CU] p 2404 N95-26861
The development and testing of ceramic components in piston engines
[DE95-005759] p 2236 N95-27946
Extended linear ion trap frequency standard apparatus
[NASA-CASE-NPO-19081-1-CU] p 2416 N95-28348

PIONS
Couplings of heavy hadrons with soft pions from QCD sum rules
[DE95-610349] p 2407 N95-27410
Some aspects of the OZI-rule violation in the reaction anti-pp yields phi pi(0)
[DE95-608853] p 2415 N95-28245
Search for deeply bound pionic atoms with high-purity germanium tagging spectrometer
[DE95-609072] p 2416 N95-28252

PIPE FLOW
Validation of the SINDA/FLUINT code using several analytical solutions p 2281 N95-27350
Analysis of developing laminar flows in circular pipes using a higher-order finite-difference technique
p 2281 N95-27352

PIPES (TUBES)
Split pipe testing device for the measurement of bond of reinforcement under controlled confinement
[AD-D017258] p 2245 N95-26500
Experimental investigation of the effects of relative physical orientation between evaporator and condenser for a loop heat pipe
[AD-A289248] p 2277 N95-26968
On the nonlinear stability of the unsteady, viscous flow of an incompressible fluid in a curved pipe
[NASA-CR-195065] p 2278 N95-27028
Alpha characterization inside pipes using ion-transport technology
[DE95-007869] p 2411 N95-28024
Water driven turbine/brush pipe cleaner
[NASA-CASE-KSC-11669-1] p 2304 N95-28359

PISTON ENGINES
The development and testing of ceramic components in piston engines
[DE95-005759] p 2236 N95-27946

PISTONS
The development and testing of ceramic components in piston engines
[DE95-005759] p 2236 N95-27946

PITCH (INCLINATION)
An investigation of the effects of pitch-roll (de)coupling on helicopter handling qualities
[NASA-TM-110349] p 2141 N95-26773

PITCHING MOMENTS
A comparison of the Neal-Smith and omega Tau function, zeta function and tau function flying qualities criteria
[AD-A289503] p 2130 N95-26844

PITTING
Pulsed ion beam surface treatment for preparing rapidly solidified corrosion resistant steel and aluminum surfaces
[DE95-007741] p 2221 N95-28116
Chromate-free corrosion resistant conversion coatings for aluminum alloys
[DE95-007742] p 2238 N95-28117

PIVOTS
Status of bonded boron/epoxy doublers for military and commercial aircraft structures p 2132 N95-27506

PIXELS
Solid-state image sensor with focal-plane digital photon-counting pixel array
[NASA-CASE-NPO-18518-1-CU] p 2424 N95-26894
Moment and hypergeometric filters for high precision computation of focus, stereo and optical flow
[AD-A289293] p 2425 N95-27038
Amorphous silicon pixel radiation detectors and associated thin film transistor electronics readout
[DE95-006568] p 2265 N95-27678

PLANAR STRUCTURES
Theoretical and experimental study of low-loss, High-efficiency monolithic antenna structures at 94 GHz
[AD-A291785] p 2257 N95-28513
Evaluation of defect-related diffusion in semiconductors by electrooptical sampling
[AD-A291630] p 2270 N95-28544

PLANE WAVES
Laser beam propagation in non-Kolmogorov atmospheric turbulence
[AD-A289256] p 2295 N95-26974

PLANETARY GEOLOGY
The Alpha-Proton-X-ray Spectrometer deployment mechanism: An anthropomorphic approach to sensor placement on Martian rocks and soil
p 2155 N95-27265

PLANETARY MAGNETOSPHERES
Energization and transport of ions of ionospheric origin in the terrestrial magnetosphere
[NASA-CR-198618-REV] p 2338 N95-28035

PLANETARY MAPPING
Naval Aviation System TEAM mapping, charting, and geodesy handbook
[AD-A288590] p 2314 N95-26841

PLANETARY NEBULAE
Theoretical studies of interstellar processes
[NASA-CR-198647] p 2462 N95-28216

PLANETARY ORBITS
Space modeler: An expanded, distributed, virtual environment for space visualization
[AD-A289409] p 2461 N95-27131

PLANETARY SYSTEMS
TOPS: Toward Other Planetary Systems. A report by the solar system exploration division
[NASA-TM-110609] p 2464 N95-28009

PLANETARY WAVES
Spectral analyses, climatology, and interannual variability of Nimbus-7 TOMS version 6 total column ozone
[NASA-RP-1360] p 2341 N95-26689
Studies of planetary scale waves and instabilities in support of the geophysical fluid flow cell experiment on USML-2
[NASA-CR-198646] p 2463 N95-27916

PLANETS
TOPS: Toward Other Planetary Systems. A report by the solar system exploration division
[NASA-TM-110609] p 2464 N95-28009
Space Science Division cumulative bibliography: 1989-1994
[NASA-TM-110355] p 2457 N95-28677

PLANNING
Integrated planning and scheduling for Earth science data processing p 2384 N95-27382

PLANT DESIGN
Molten Carbonate Fuel Cell (MCFC) product development test
[DE95-007345] p 2316 N95-26543

PLANTING
Investigation on technology for increasing the biological CO2 sink and technology for CO2 fixation and reutilization
[DE95-759251] p 2329 N95-27941

PLANTS (BOTANY)
Third international congress of plant molecular biology: Molecular biology of plant growth and development
[DE95-006482] p 2352 N95-28496

PLASMA ACCELERATION
Proceedings of the International Workshop on Acceleration and Radiation Generation in Space and Laboratory Plasmas
[AD-A291673] p 2436 N95-28668

PLASMA ACCELERATORS
Proposed high speed pellet injection system HIPEL for large helical device
[NIFS-255] p 2419 N95-26584
High-density plasma source for large-area chemical vapor deposition of diamond films
[AD-A289053] p 2430 N95-27190
Proceedings of the International Workshop on Acceleration and Radiation Generation in Space and Laboratory Plasmas
[AD-A291673] p 2436 N95-28668

PLASMA ANTENNAS
One dimensional global and local solution for ICRF heating
[DE95-007984] p 2392 N95-28110

PLASMA CLOUDS
Space tether-radar data processing
[AD-A289654] p 2250 N95-26725
Bow shock data analysis
[AD-A288432] p 2429 N95-26800

PLASMA COMPOSITION
STS-46 plasma composition measurements using the EOIM-3 mass spectrometer p 2211 N95-27645

PLASMA CONTROL
Analysis of instability growth and collisionless relaxation in thermionic converters using 1-D PIC simulations
[AD-A289310] p 2319 N95-26891
Magnetically controlled deposition of metals using gas plasma
[DE95-007248] p 2430 N95-27237
Dynamics of the L yields H transition, VH-mode evolution, edge localized modes and R.F. driven confinement control in tokamaks
[DE95-007012] p 2430 N95-27306
Fluctuations in high beta(sub p) plasmas in DIII-D
[DE95-008071] p 2432 N95-27710
Application of modern diagnostic methods to environmental improvement
[DE95-005797] p 2330 N95-28119
Divertor research on the DIII-D tokamak
[DE95-003942] p 2434 N95-28185
Recent high-speed ballistics experiments at ORNL
[DE95-006534] p 2422 N95-28205
Transport simulation of negative magnetic shear discharges
[DE95-003941] p 2416 N95-28329
Theoretical aspects of energy confinement in spheromaks
[DE95-008079] p 2435 N95-28542
Operating points and feedback control of plasma characteristics in tokamaks with full current drive
[DE95-007037] p 2435 N95-28553
Simulation of burning tokamak plasmas
[PB95-195426] p 2435 N95-28654

PLASMA CURRENTS
Global dynamo in a reversed field pinch plasma
[DE94-765441] p 2432 N95-27869
Measurement of particle transport coefficients on Alcator C-Mod
[DE95-007763] p 2411 N95-28020
One dimensional global and local solution for ICRF heating
[DE95-007984] p 2392 N95-28110

PLASMA DENSITY
Proposed high speed pellet injection system HIPEL for large helical device
[NIFS-255] p 2419 N95-26584

Development of density and temperature profile diagnostics for ICF targets
[DE95-007664] p 2433 N95-28052
Transport simulation of negative magnetic shear discharges
[DE95-003941] p 2416 N95-28329
PLASMA DIAGNOSTICS
Proposed high speed pellet injection system HIPEL for large helical device
[NIFS-255] p 2419 N95-26584
Low energy neutral atom imaging: Remote observations of the magnetosphere
[DE95-006342] p 2337 N95-27848
Development of density and temperature profile diagnostics for ICF targets
[DE95-007664] p 2433 N95-28052
Application of modern diagnostic methods to environmental improvement
[DE95-005797] p 2330 N95-28119
PLASMA DIFFUSION
Nonlinear phenomena, turbulence and anomalous transport in fusion plasmas
[DE95-007044] p 2431 N95-27497
Fluctuations and transport in fusion plasmas
[DE95-007111] p 2433 N95-27924
PLASMA DRIFT
Fluctuations and transport in fusion plasma
[DE95-004178] p 2429 N95-26444
Effect of toroidal plasma flow and flow shear on global MHD modes
[DE95-006676] p 2433 N95-28106
PLASMA DYNAMICS
Dynamics of the L yields H transition, VH-mode evolution, edge localized modes and R.F. driven confinement control in tokamaks
[DE95-007012] p 2430 N95-27306
Parallel plasma fluid turbulence calculations
[DE95-006741] p 2431 N95-27537
PLASMA EQUILIBRIUM
Fluctuations in high beta(sub p) plasmas in DIII-D
[DE95-008071] p 2432 N95-27710
PLASMA GENERATORS
Electromagnetic devices and processes in environment protection
[AD-A288656] p 2141 N95-26487
PLASMA HEATING
Energetic particle destabilization of shear Alfven waves in stellarators and tokamaks
[DE95-006393] p 2431 N95-27419
Experimental aspects of effects of high-energy particles on Alfven modes
[DE95-003383] p 2432 N95-27673
One dimensional global and local solution for ICRF heating
[DE95-007984] p 2392 N95-28110
Engineering design of the ITER RF systems
[DE95-008064] p 2434 N95-28140
Faraday screen sputtering on TPX
[DE95-008347] p 2434 N95-28224
Operating points and feedback control of plasma characteristics in tokamaks with full current drive
[DE95-007037] p 2435 N95-28553
PLASMA INTERACTIONS
Nonlinear instability and chaos in plasma wave-wave interactions. I. Introduction
[DE95-005529] p 2429 N95-27084
Special features of the CLUSTER antenna and radial booms design, development and verification
p 2157 N95-27281
PLASMA JETS
Destruction of pyrotechnics manufacture wastewater treatment sludge by plasma arc pyrolysis
p 2171 N95-28301
PLASMA LAYERS
Scrape-off layer plasma modeling for the DIII-D tokamak
[DE95-008059] p 2433 N95-28054
UEDGE and DEGAS modeling of the DIII-D scrape-off layer plasma, revision 1
[DE95-008052] p 2433 N95-28065
PLASMA PHYSICS
Radiation production from stagnating compact toroids employing a nonequilibrium radiation diffusion model
[AD-A289602] p 2429 N95-26720
Tokamak ETE engineering preliminary project
[INPE-5529-PRE/1796] p 2435 N95-28562
Proceedings of the International Workshop on Acceleration and Radiation Generation in Space and Laboratory Plasmas
[AD-A291673] p 2436 N95-28668
PLASMA RESONANCE
Nonlinear optical studies of surfaces
[DE95-006574] p 2428 N95-28557
PLASMA SPRAYING
Magnetically controlled deposition of metals using gas plasma
[DE95-007248] p 2430 N95-27237
PLASMA TEMPERATURE
Observation on radiation transfer experiments using k-shell absorption spectra
[DE95-008068] p 2434 N95-28141
PLASMA TORCHES
Application of modern diagnostic methods to environmental improvement
[DE95-005797] p 2330 N95-28119
PLASMA TURBULENCE
Nonlinear phenomena, turbulence and anomalous transport in fusion plasmas
[DE95-007044] p 2431 N95-27497
Parallel plasma fluid turbulence calculations
[DE95-006741] p 2431 N95-27537
Fluctuations and transport in fusion plasmas
[DE95-007111] p 2433 N95-27924
PLASMA WAVES
On helicon wave induced radial plasma transport
[DE94-634477] p 2429 N95-26438
Fluctuations and transport in fusion plasma
[DE95-004178] p 2429 N95-26444
Nonlinear instability and chaos in plasma wave-wave interactions. I. Introduction
[DE95-005529] p 2429 N95-27084
PLASMAS (PHYSICS)
On helicon wave induced radial plasma transport
[DE94-634477] p 2429 N95-26438
Wake fields in semiconductor plasmas
[DE94-634523] p 2429 N95-26439
Fluctuations and transport in fusion plasma
[DE95-004178] p 2429 N95-26444
Proposed high speed pellet injection system HIPEL for large helical device
[NIFS-255] p 2419 N95-26584
Analysis of instability growth and collisionless relaxation in thermionic converters using 1-D PIC simulations
[AD-A289310] p 2319 N95-26891
MHD simulations of DC helicity injection for current drive in tokamaks
[DE95-007018] p 2429 N95-26940
Analytical spectroscopy
[DE95-607896] p 2203 N95-27200
Evaluation of current drive requirements and operating characteristics of a high bootstrap fraction advanced tokamak reactor
[DE95-007041] p 2430 N95-27308
Indirectly driven targets for ignition
[DE95-006451] p 2430 N95-27327
Axionic fuel for sun
[DE95-608788] p 2464 N95-27342
Fast wave current drive in D3-D
[DE95-007582] p 2431 N95-27441
Parallel plasma fluid turbulence calculations
[DE95-006741] p 2431 N95-27537
ECR plasma-assisted deposition of Al2O3 and dispersion-strengthened AlO2
[DE95-007743] p 2235 N95-27687
Neutral gas compression in the Alcator C-Mod divertor. Experimental observations
[DE95-007762] p 2432 N95-27688
Global dynamo in a reversed field pinch plasma
[DE94-765441] p 2432 N95-27869
Pumping characteristics of a cryopump with Ar sorbent in He and in D2/He mixture
[DE95-007049] p 2302 N95-27875
Fluctuations and transport in fusion plasmas
[DE95-007111] p 2433 N95-27924
Laboratory high-energy astrophysics on lasers
[DE95-008062] p 2462 N95-28013
A numerical study of ultra-short-pulse reflectometry
[DE95-008070] p 2266 N95-28015
Measurement of particle transport coefficients on Alcator C-Mod
[DE95-007763] p 2411 N95-28020
Normal modes and continuous spectra
[DE95-006166] p 2287 N95-28055
Advanced tokamak operating modes in TPX and ITER
[DE95-008058] p 2434 N95-28138
Observation on radiation transfer experiments using k-shell absorption spectra
[DE95-008068] p 2434 N95-28141
Plasma lens experiments at the final focus test beam
[DE95-008595] p 2434 N95-28161
Divertor research on the DIII-D tokamak
[DE95-003942] p 2434 N95-28185
Recent high-speed ballistics experiments at ORNL
[DE95-006534] p 2422 N95-28205
Ordered one-component plasmas: Phase transitions, normal modes, large systems, and experiments in a storage ring
[DE95-007077] p 2434 N95-28233
Shear Alfven wave excitation by direct antenna coupling and fast wave resonant mode conversion
[DE95-609109] p 2256 N95-28254
Third-order-accurate numerical methods for efficient, large time-step solutions of mixed linear and nonlinear problems
[DE95-009184] p 2288 N95-28533
Operating points and feedback control of plasma characteristics in tokamaks with full current drive
[DE95-007037] p 2435 N95-28553
Pellet injector research and development at ORNL
[DE95-006736] p 2435 N95-28596
Supercooled liquid dynamics for the charged hard-sphere model
[DE95-609158] p 2241 N95-28609
PLASMONS
Monte Carlo study of electron-plasmon scattering effects on hot electron transport in GaAs
[DE95-607768] p 2403 N95-26542
Nonlinear optical studies of surfaces
[DE95-006574] p 2428 N95-28557
Proceedings of the International Workshop on Acceleration and Radiation Generation in Space and Laboratory Plasmas
[AD-A291673] p 2436 N95-28668
PLASTIC ANISOTROPY
Identification of the plastic anisotropy of an aluminum alloy
[IFTR-26/1994] p 2212 N95-26512
PLASTIC COATINGS
Analysis of selected specimens from the STS-46 Energetic Oxygen Interaction with Materials-3 experiment p 2210 N95-27642
Weightless Environment Training Facility (WETF) materials coating evaluation, volume 1
[NASA-CR-188366-VOL-1] p 2239 N95-28385
PLASTIC DEFORMATION
Determination of the cyclical properties of 18G2A steel on the basis of skeleton curves for a planar stress state
[IFTR-32/1994] p 2211 N95-26359
Identification of the plastic anisotropy of an aluminum alloy
[IFTR-26/1994] p 2212 N95-26512
The development of the anisotropic properties of copper under plastic deformation induced by creep and monotonic loading
[IFTR-23/1994] p 2212 N95-26517
Changes in the anisotropy parameters of an aluminum alloy caused by cyclical deformation
[IFTR-27/1994] p 2212 N95-26666
Forming metallurgy: Supervised drawing course, NTH
[PB95-196507] p 2219 N95-27934
High-temperature deformation of ZrO2-Al2O3/SiC whisker composites fabricated by two techniques
[DE95-008273] p 2183 N95-28069
Residual stress, strain, and faults in nanocrystalline palladium and copper
[DE95-008294] p 2223 N95-28543
PLASTIC PROPERTIES
Changes in the anisotropy parameters of an aluminum alloy caused by cyclical deformation
[IFTR-27/1994] p 2212 N95-26666
PLASTICS
Japan's electronic packaging technologies
p 2263 N95-27230
Indirectly driven targets for ignition
[DE95-006451] p 2430 N95-27327
JTEC monograph on biodegradable polymers and plastics in Japan: Research, development, and applications
[NASA-CR-198562] p 2235 N95-27694
Deformation limits on two-parameter fracture mechanics in terms of higher order asymptotics
[AD-A289113] p 2310 N95-28098
PLATE THEORY
An improved plate theory of order (1,2) for thick composite laminates p 2187 N95-28283
PLATENS
Time-optimal control of the magnetically levitated photolithography platen
[DE95-005493] p 2266 N95-27724
PLATES (STRUCTURAL MEMBERS)
Study of damage evolutions in composite plates subjected to bending loads using micro-macro analysis
[AD-A288523] p 2308 N95-26839
An improved plate theory of order (1,2) for thick composite laminates p 2187 N95-28283
On the thermally-induced residual stresses in thick fiber-thermoplastic matrix (PEEK) cross-ply laminated plates p 2187 N95-28285
Compressive strength of damaged and repaired composite plates p 2198 N95-28484
Fundamental concepts in the suppression of delamination buckling by stitching p 2198 N95-28486

PLATES (TECTONICS)
Live from Antarctica, volume 4
[NASA-CR-197828] p 2335 N95-26596
PLATING
Magnetically controlled deposition of metals using gas plasma
[DE95-007248] p 2430 N95-27237
PLATINUM
Hydrogen induced C-C, C-N, and C-S bond activities on Pi and Ni surfaces
[DE95-006251] p 2206 N95-27838
Kinetics and dynamics of oxidation reactions involving adsorbed CO species on bulk supported Pt and copper oxides
[DE95-006420] p 2207 N95-27952
Development of an optical trap as an ultra-sensitive analytical tool
[DE95-007843] p 2426 N95-28022
PLATINUM ALLOYS
Stability of reference masses 4: Growth of carbonaceous contamination on platinum-iridium mass standard surfaces, and its cleaning by UV/ozone treatment
[PB95-190096] p 2226 N95-26745
PLUMES
Plume measurements with the T5 xenon ion thruster
[AD-A288697] p 2167 N95-26489
Soot particle density determination from a laser extinction multipass technique
[AD-A288551] p 2423 N95-26532
The small-scale structure of dispersing clouds in the atmosphere
[AD-A288256] p 2341 N95-26546
Load measurement system with load cell lock-out mechanism p 2159 N95-27291
PLUTONIUM
Engineered materials for appliation in severe metallurgical environments: Tantalum-carbon alloy development
[DE95-006838] p 2216 N95-27488
Materials considerations for molten salt accelerator-based plutonium conversion systems
[DE95-006743] p 2217 N95-27544
PLY ORIENTATION
Compression failure of angle-ply laminates
p 2190 N95-28428
PNEUMATIC EQUIPMENT
Design and development of a test rig for the high frequency testing of rolling sleeve airsprings
[DSTO-TN-0001] p 2142 N95-26378
PNEUMATICS
Pressure vessel burst test study p 2175 N95-28317
POINCARE SPHERES
Orbit analysis
[DE95-007216] p 2419 N95-27091
POINT DEFECTS
A book and series of monographs on ice physics
[AD-A288319] p 2200 N95-26422
Structure of ordinary ice Ih. Part 2: Defects in ice. Volume 1: Point defects
[AD-A288279] p 2200 N95-26452
Point defect formation in optical materials expos ed to the space environment p 2428 N95-27646
POINTING CONTROL SYSTEMS
SAMPEX special pointing mode p 2149 N95-27780
POISSON RATIO
Indentability of conventional and negative Poisson's ratio foams p 2195 N95-28472
POLAR COORDINATES
User documentation of the CTA program
[AD-A289508] p 2121 N95-26854
POLAR METEOROLOGY
Replicator for characterization of cirrus and polar stratospheric cloud particles
[NASA-CR-197785] p 2341 N95-26669
POLAR REGIONS
An improved model of high-latitude f-region scintillation (WBMOD version 13)
[AD-A288558] p 2334 N95-26520
Contingency maneuver strategies for the Total Ozone Mapping Spectrometer-Earth Probe (TOMS-EP)
p 2152 N95-27796
POLARIMETRY
Processing of wide-angle synthetic aperture radar signals for detection of obscured ground targets
[AD-A289243] p 2253 N95-26976
POLARITONS
Nonlinear dynamics of a coherent polariton-biexciton system
[DE95-609150] p 2417 N95-28607
POLARITY
Observations on the solvating power of supercritical fluids p 2228 N95-27106
POLARIZATION
On-axis polarization coupling in y-cut titanium in-diffused lithium niobate slab waveguides
[AD-A289260] p 2253 N95-26977
POLARIZATION (CHARGE SEPARATION)
Photoinduced dipoles and charge pairs in condensed phase
[DE95-007071] p 2207 N95-27921
Situation in study of electric polarizability and mean square charge radius of the neutron
[DE95-608869] p 2415 N95-28247
POLARIZATION (SPIN ALIGNMENT)
Transverse tau polarization in inclusive bar-B yields tau bar-nu X decays
[DE95-610325] p 2407 N95-27409
Observation of asymmetrical two-cone Vavilov-Cherenkov radiation in biaxial crystal of triglycinesulphate emitted by 658 MeV protons passing along bi normal
[DE94-629017] p 2441 N95-27867
POLARIZATION (WAVES)
Method and apparatus for polaradiometric pyrometer
[NASA-CASE-NPO-19064-1-CU] p 2290 N95-26765
Conversion of sunflower multiband radiometer polarization measurements to polarization parameters
[NASA-CR-197774] p 2314 N95-26815
Modeling surface effects with the parabolic equation method
[AD-A289199] p 2254 N95-27021
POLARIZATION CHARACTERISTICS
Hydrogen-like atom in laser field: Invariant atomic parameters in the ground state
[DE95-609036] p 2411 N95-27930
Scattering by a small object close to an interface. 3. Buried object
[PB95-184909] p 2256 N95-28354
Internal electric field of anisotropic and bi-anisotropic spheres
[PB95-195491] p 2257 N95-28449
POLARIZATION MODULATION
Fundamental concepts of integrated and fiber optic sensors
[NASA-TM-106920] p 2426 N95-27906
POLARIZED ELECTROMAGNETIC RADIATION
Conversion of sunflower multiband radiometer polarization measurements to polarization parameters
[NASA-CR-197774] p 2314 N95-26815
POLARIZED LIGHT
Resonant photoemission studies of thickness dependence of the unoccupied Gd 5d bands
[DE95-004127] p 2436 N95-26440
Display system employing acousto-optic tunable filter
[NASA-CASE-NPO-18736-1-CU] p 2426 N95-27843
POLARIZERS
Conversion of sunflower multiband radiometer polarization measurements to polarization parameters
[NASA-CR-197774] p 2314 N95-26815
POLICIES
Space Commerce 1994 Forum: The 10th National Space Symposium. Proceedings report
[NASA-CR-198031] p 2144 N95-26583
Global trade in satellites and launch services
[GPO-84-811] p 2165 N95-28342
POLLUTION
Community relations plan: Galena Airport and Camp ion Air Force Station, Alaska
[AD-A286722] p 2327 N95-27234
POLLUTION CONTROL
Absorption of sparingly soluble gases by reactive media in self-aerated gas-liquid contactors: A scale-up procedure
[DE95-006429] p 2206 N95-27707
Automated remedial assessment methodology software system
[DE95-007287] p 2373 N95-28243
Use of mussels in biomonitoring of environmental impacts of propellants, projectiles, explosives, and pyrotechnics p 2170 N95-28298
Commercial reformulation: An economic and environmentally neutral means of managing explosives and solid propellants p 2175 N95-28320
Evaluation of microporous carbon filters as catalysts for ozone decomposition
[DE95-006498] p 2331 N95-28548
POLLUTION MONITORING
Application of modern diagnostic methods to environmental improvement
[DE95-005797] p 2330 N95-28119
Use of SURFACE CHEMKIN to model multiphase atmospheric chemistry: Application to nitrogen tetroxide spills p 2172 N95-28305
Survey on bio-chemical complex harmonized with global environment
[DE95-759252] p 2331 N95-28535
POLLUTION TRANSPORT
A method for generating skewed random numbers using two overlapping uniform distributions
[DE95-008747] p 2392 N95-28162
POLYATOMIC MOLECULES
Spectroscopic and dynamical studies of highly energized small polyatomic molecules
[DE95-006640] p 2414 N95-28199
POLYBENZIMIDAZOLE
Polybenzimidazoles via aromatic nucleophilic displacement
[NASA-CASE-LAR-14924-1-CU] p 2179 N95-28361
POLYCARBONATES
Evaluation of laser-protective eyewear dyes in UVEX lenses
[AD-A290076] p 2361 N95-28390
POLYCRYSTALS
Forming metallurgy: Supervised drawing course, NTH
[PB95-196507] p 2219 N95-27934
POLYESTERS
JTEC monograph on biodegradable polymers and plastics in Japan: Research, development, and applications
[NASA-CR-198562] p 2235 N95-27694
POLYETHYLENES
Fractionation studies of polyethylene using DSC-technique
[PB95-185252] p 2200 N95-26540
POLYHEDRONS
Yang-Baxter type equations and posets of maximal chains
[PB95-185195] p 2388 N95-26516
A point-centered diffusion differencing for unstructured meshes in 3-D
[DE95-008382] p 2392 N95-28232
POLYIMIDE RESINS
Phenylethynyl terminated imide oligomers
[NASA-CASE-LAR-15175-1] p 2235 N95-27732
POLYIMIDES
Statistical analysis of tensile mechanical property data of carbon/polyimide composites
[NAL-TR-1238] p 2180 N95-26667
Wipe solvent substitutions for 1,1,1-trichloroethane (TCA) and methyl ethyl ketone (MEK) at Hill Air Force Base p 2228 N95-27107
Phenylethynyl terminated imide oligomers
[NASA-CASE-LAR-15175-1] p 2235 N95-27732
POLYMER BLENDS
Evaluation of a conductive polymer-based sensor for detection of hydrazines at the part-per-billion level
p 2173 N95-28309
POLYMER CHEMISTRY
Synthesis and characterization of polymeric materials
[AD-A288613] p 2225 N95-26482
Molecular object liquid crystals: An approach to new materials
[AD-A288905] p 2437 N95-26553
Stabilization and control of high energy intermediates through adsorption of restricted spaces
[AD-A288552] p 2201 N95-26606
Materials with self organized surfaces: 2D polymer assemblies
[AD-A288928] p 2226 N95-26627
JPRS report: Science and technology. Central Eurasia
[JPRS-UST-95-015] p 2246 N95-27213
Polymer infiltration studies
[NASA-CR-198601] p 2236 N95-27857
POLYMER MATRIX COMPOSITES
Overview of through-thickness test methods for polymer matrix composites
[PB95-190112] p 2227 N95-26747
Probabilistic simulation of long term behavior in polymer matrix composites
[NASA-TM-106893] p 2309 N95-27174
Polymer infiltration studies
[NASA-CR-198601] p 2236 N95-27857
Designing for time-dependent material response in spacecraft structures p 2166 N95-28292
Mechanisms of compressive failure in woven composites and stitched laminates p 2189 N95-28424
Advanced wing design survivability testing and results
p 2138 N95-28488
POLYMER PHYSICS
Synthesis and characterization of polymeric materials
[AD-A288613] p 2225 N95-26482
The 18th Asilomar Conference on Polymeric Materials
[AD-A291721] p 2240 N95-28508
POLYMERIC FILMS
Toward molecular selectivity with chemically modified electrodes: Can electroactivity and permeability through an overlaying metallopolymer film be controlled via rational manipulation of internal architecture?
[AD-A288719] p 2403 N95-26491
Assay of weathering effects on protective polymer coatings using positron annihilation spectroscopy
[DE95-007040] p 2236 N95-27962
POLYMERIZATION
Synthesis and characterization of polymeric materials
[AD-A288613] p 2225 N95-26482

Toward molecular selectivity with chemically modified electrodes: Can electroactivity and permeability through an overlaying metallopolymer film be controlled via rational manipulation of internal architecture?
[AD-A288719] p 2403 N95-26491

Non-covalent immobilization of proteins and enzymes on polymerized lipid assemblies
[AD-A288234] p 2225 N95-26526

Small angle neutron scattering study of the micelle structure of amphiphilic block copolymers
[DE95-006625] p 2234 N95-27486

Poly(N-arylenbenzimidazoles) via aromatic nucleophilic displacement
[NASA-CASE-LAR-14939-1] p 2179 N95-28360

The 18th Asilomar Conference on Polymeric Materials
[AD-A291721] p 2240 N95-28508

Porosity in hexylene-bridged polysilsesquioxanes: Effects of monomer concentration
[DE95-005421] p 2240 N95-28531

Comparison of bridged polysilsesquioxane xerogels prepared from methoxy- and ethoxy-silyl monomers
[DE95-005422] p 2240 N95-28532

POLYMORPHISM

Fractionation studies of polyethylene using DSC-technique
[PB95-185252] p 2200 N95-26540

POLYNOMIALS

Adaptive finite element method I: Solution algorithm and computational examples
[AD-A288979] p 2389 N95-26609

On commutativity of right s-unital rings with some polynomial constraints
[DE95-608752] p 2390 N95-27330

Coordinates of the quantum plane as q-tensor operators in U(sub q) (su(2) * su(2))
[DE95-007100] p 2397 N95-28234

Atmospheric dispersion in adaptive optics
[AD-A289639] p 2428 N95-28617

POLYPEPTIDES

Materials design and processing by biomimicking. Section 1: Research progress
[AD-A288229] p 2226 N95-26623

Design and processing of materials by biomimicking. Section 2. Publications
[AD-A288230] p 2226 N95-26624

Predicting protein structure using parallel genetic algorithms
[AD-A289305] p 2369 N95-26919

POLYPHENYLS

Design, fabrication, modeling, and optical characterization of organic polymer nonlinear directional couplers
[AD-A289327] p 2227 N95-26897

POLYPROPYLENE

Creep recovery of PVC and polypropylene
[PB95-185112] p 2224 N95-26448

Application of bacterial bioemusifiers to in situ maintenance of oil/water separators
p 2179 N95-27120

POLYSACCHARIDES

Materials design and processing by biomimicking. Section 1: Research progress
[AD-A288229] p 2226 N95-26623

JTEC monograph on biodegradable polymers and plastics in Japan: Research, development, and applications
[NASA-CR-198562] p 2235 N95-27694

POLYSTYRENE

New radiation stable and long-lived plastic scintillators
[DE95-608622] p 2233 N95-27163

Surface-emitting semiconductor laser for intracavity spectroscopy and microscopy
[DE95-007745] p 2299 N95-28128

POLYSULFIDES

Wipe solvent substitutions for 1,1,1-trichloroethane (TCA) and methyl ethyl ketone (MEK) at Hill Air Force Base p 2228 N95-27107

POLYTOPES

Yang-Baxter type equations and posets of maximal chains
[PB95-185195] p 2388 N95-26516

Using the dimension reduction technique to prove that clique trees define facets for the asymmetric traveling salesman polytope
[AD-A289397] p 2389 N95-26882

POLYVINYL CHLORIDE

Creep recovery of PVC and polypropylene
[PB95-185112] p 2224 N95-26448

POROSITY

Template synthesis of electronically conductive polymer nanostructures
[AD-A288373] p 2225 N95-26472

Ambient-pressure silica aerogel films
[DE95-008161] p 2237 N95-28090

Porosity in hexylene-bridged polysilsesquioxanes: Effects of monomer concentration
[DE95-005421] p 2240 N95-28531

POROUS MATERIALS

The use of acoustic methods to determine the parameters of porous materials
[IFTR-40/1994] p 2401 N95-26519

Investigation of boundary layer and performance effects of transpiration cooling through a porous plate in a rocket nozzle
[AD-A289393] p 2167 N95-26880

A probabilistic model of a porous heat exchanger
p 2282 N95-27359

Detecting alpha particles through scintillation in porous materials
[AD-A289313] p 2406 N95-27399

FTIR studies of CH3OH on porous silicon
[AD-A289038] p 2207 N95-27904

Evaluation of microporous carbon filters as catalysts for ozone decomposition
[DE95-006498] p 2331 N95-28548

POROUS PLATES

Investigation of boundary layer and performance effects of transpiration cooling through a porous plate in a rocket nozzle
[AD-A289393] p 2167 N95-26880

PORTABLE EQUIPMENT

Test operations procedure (TOP) 2-2-613, electromagnetic interference testing and electrical subsystem - non-communication
[AD-A289521] p 2251 N95-26851

Portable laser laboratory
[DE95-008376] p 2298 N95-27876

Lithium ion rechargeable systems studies
[DE95-006810] p 2268 N95-28200

POSITION (LOCATION)

Scalable multicast tree construction for wide area networks
[AD-A288318] p 2379 N95-26421

An illumination planner for Lambertian polyhedral objects
[AD-A289332] p 2424 N95-26900

Electro-hydrostatic actuator controller design using quantitative feedback theory
[AD-A289220] p 2141 N95-26957

Matrix kernels for MEG and EEG source localization and imaging
[DE95-005236] p 2354 N95-27426

Scaling of localization length of a quasi 1D system with longitudinal boundary roughness
[DE95-609148] p 2391 N95-27739

Development of a direct match technique for star identification on the SWAS mission
p 2148 N95-27771

Reflection of neutrons from an optical grating
[DE95-007145] p 2411 N95-28004

FY 1994 ambient air monitoring report for McMurdo Station, Antarctica
[DE95-008565] p 2331 N95-28149

Effects of floor location on response of composite fuselage frames p 2192 N95-28439

POSITION ERRORS

Flight evaluation of GPS/DGPS sensor systems installed in NAL Do228
[NAL-TR-1230] p 2126 N95-26585

Observational magnetometer calibration with the Hubble Space Telescope's new magnetometers
p 2148 N95-27773

Estimation of attitude sensor timetag biases
p 2153 N95-27799

POSITIONING

Airborne geophysics and precise positioning: Scientific issues and future directions
[LC-94-68678] p 2314 N95-27156

The Alpha-Proton-X-ray Spectrometer deployment mechanism: An anthropomorphic approach to sensor placement on Martian rocks and soil
p 2155 N95-27265

POSITRON ANNIHILATION

Model independent constraints on anomalous gauge boson self-couplings from e(+)e(-) colliders with longitudinally polarized beams
[DE95-608844] p 2406 N95-27317

Measurement of R in e(+)e(-)-annihilation at center-of-mass energies between 7.2 and 10.34 GeV
[DE95-610303] p 2407 N95-27408

Assay of weathering effects on protective polymer coatings using positron annihilation spectroscopy
[DE95-007040] p 2236 N95-27962

Determination of phase transitions in a lyotropic liquid crystal by positron annihilation technique
[DE95-609162] p 2442 N95-27964

Probing strongly-interacting electroweak dynamics through W(+)W(-)/ZZ ratios at future e(+)e(-) colliders
[DE95-007202] p 2413 N95-28067

Vacancy related defects in thin film Pb(Zr,Ti)O3 materials
[DE95-007696] p 2445 N95-28165

Measurement of alpha(s) in e(+)e(-) annihilation at E(cm) = 29 GeV
[DE95-006486] p 2417 N95-28594

POSITRONIUM

Large relativistic corrections to the positronium decay rate
[DE95-610470] p 2407 N95-27412

POSITRONS

Characterization of defects in deuterium-implanted beryllium
[DE95-005688] p 2217 N95-27553

Positron microscopy
[DE95-007042] p 2410 N95-27874

Plasma lens experiments at the final focus test beam
[DE95-008595] p 2434 N95-28161

POSTFLIGHT ANALYSIS

Debris/Ice/TPS assessment and integrated photographic analysis of Shuttle mission STS-67
[NASA-TM-110651] p 2160 N95-27238

Thermal control materials on EOIM-3
p 2242 N95-27639

Molecular beam scattering from C-13 enriched Kapton and correlation with the EOIM-3 carousel experiment
p 2419 N95-27643

LDEF systems special investigation group overview
p 2470 N95-27647

Geostationary Operational Environmental Satellite (GOES)-8 mission flight experience
p 2153 N95-27798

POSTMISSION ANALYSIS (SPACECRAFT)

LDEF: 69 Months in Space. Third Post-Retrieval Symposium, part 3
[NASA-CP-3275-PT-3] p 2466 N95-27629

A final look at LDEF electro-optic systems components p 2428 N95-27650

Long Duration Exposure Facility (LDEF) Archive System p 2457 N95-27658

The Long Duration Exposure Facility (LDEF) annotated bibliography p 2457 N95-27659

Geostationary Operational Environmental Satellite (GOES)-8 mission flight experience
p 2153 N95-27798

POSTURE

Role of somatosensory and vestibular cues in attenuating visually induced human postural sway
[NASA-CR-197845] p 2357 N95-27697

POTASSIUM CHLORIDES

The off-center effect on the diffusion coefficient of Cu(+) and Li(+) in the KCl lattice
[DE95-609146] p 2446 N95-28255

POTASSIUM HYDROXIDES

Long life 80Ah standard IPV NiH2 battery cell
p 2272 N95-26787

Electrical conductivity measurements of aqueous electrolyte solutions at high temperatures and high pressures
[DE95-006748] p 2208 N95-27956

POTASSIUM OXIDES

Femtosecond OPO's at 3 microns and beyond: Design and performance issues related to the crystal properties of KTP and similar materials
[DE95-007286] p 2446 N95-28242

POTENTIAL ENERGY

Investigation into the behavior of geometrically nonlinear composite arches
[AD-A289258] p 2308 N95-26975

Analysis of forward and inverse problems in chemical dynamics and spectroscopy
[DE95-009309] p 2209 N95-28164

Theoretical studies of interstellar processes
[NASA-CR-198647] p 2462 N95-28216

POTENTIAL FIELDS

The electric field of Bohr's atom
[DE95-608758] p 2448 N95-27336

POTENTIAL FLOW

Computational fluid dynamics and transonic flow
[AD-A288962] p 2273 N95-26405

POWDER (PARTICLES)

Lattice parameters and Debye-Waller factors of gamma-TiAl alloys
[AD-A288843] p 2213 N95-26681

Survey of sub-micrometre powder size measurement for ceramic and cermet powders
[PB95-190104] p 2227 N95-26746

Neutron diffraction studies on recrystallization of solution derived lead zirconate titanates
[DE95-004771] p 2439 N95-27429

Crystal and magnetic structure of stoichiometric YFe2O4
[DE95-006627] p 2440 N95-27487

Formation of anisotropic Tl-1212, Tl-2212, Tl-1223 and Tl-2223 particles using aerosol flow reacted powders
[DE95-007400] p 2444 N95-28079

The effects of processing variables on reaction synthesis of Fe-Al alloys
[DE95-007405] p 2221 N95-28082

POWDER METALLURGY
Review of activities in USA on HTS materials
[DE95-006404] p 2234 N95-27468

POWDERED ALUMINUM
Ceramic fiber-reinforced monoclinic celsian phase glass-ceramic matrix composite material
[NASA-CASE-LEW-15714-1] p 2183 N95-27717

POWER AMPLIFIERS
Material characterization system
[AD-D017385] p 2210 N95-28584

POWER CONVERTERS
The 77 K operation of a multi-resonant power converter
[NASA-TM-106941] p 2264 N95-27374
Forback DC-to-DC converter
[NASA-CASE-GSC-13404-1] p 2269 N95-28341

POWER FACTOR CONTROLLERS
Control system design for the MOD-5A 7.3 mW wind turbine generator p 2306 N95-27985

POWER LIMITERS
Low power limits in ultrashort pulse measurement using Frequency-Resolved Optical Gating
[DE95-007150] p 2299 N95-28219

POWER SERIES
Construction of arbitrary order schemes for many dimensional wave equation
[PB95-184818] p 2276 N95-26928

POWER SPECTRA
Synthetic 3-D atmospheric temperature structure: A model for known geophysical power spectra using a hybrid autoregression and Fourier technique
[AD-A289058] p 2340 N95-26479
Laser beam propagation in non-Kolmogorov atmospheric turbulence
[AD-A289256] p 2295 N95-26974
Post Kalman progress p 2148 N95-27776
Basic principles and recent observations of rotationally sampled wind p 2321 N95-27971

POWER SUPPLIES
Hubble Space Telescope nickel-hydrogen battery testing: An update p 2272 N95-26794

PREAMPLIFIERS
Low noise monolithic Si JFETS for operation in the 90-300K range and in high radiation environments
[DE95-007303] p 2269 N95-28244

PRECIPITATES
Modeling precipitation from concentrated solutions with the EQ3/6 chemical speciation codes
[DE95-006264] p 2204 N95-27556
ECR plasma-assisted deposition of Al2O3 and dispersion-strengthened AlO2
[DE95-007743] p 2235 N95-27687
Coherent V2O3 precipitates in alpha-Al2O3CO-implanted with vanadium and oxygen
[DE95-007404] p 2444 N95-28081

PRECISION
An integrated GPS/INS/BARO and radar altimeter system for aircraft precision approach landings
[AD-A289280] p 2127 N95-26985
Moment and hypergeometric filters for high precision computation of focus, stereo and optical flow
[AD-A289293] p 2425 N95-27038
Perturbations on effective index of refraction from prism coupling
[AD-A291700] p 2427 N95-28524

PREDICTION ANALYSIS TECHNIQUES
Aircraft noise prediction program theoretical manual: Rotorcraft System Noise Prediction System (ROTONET), part 4
[NASA-TM-83199-PT-4] p 2400 N95-26392
Intelligent computer based reliability assessment of multichip modules
[AD-A288833] p 2259 N95-26550
A mathematical framework for an improved search model
[AD-A288858] p 2358 N95-26552
Life prediction methodology for composite laminates. Part 1: Constant amplitude and two-stress level fatigue
[AD-A288343] p 2180 N95-26571
Deep convection in the Mediterranean Sea
[AD-A288497] p 2346 N95-26647
Embedology and neural estimation for time series prediction
[AD-A289312] p 2394 N95-26892
Study of the response of a three-dimensional coupled ice-ocean model to daily varying atmospheric forcing
[AD-A289050] p 2347 N95-27189
Applying AI tools to operational space environmental analysis p 2382 N95-27376
Accurate orbit determination strategies for the tracking and data relay satellites p 2147 N95-27768
Operational improvements of long-term predicted ephemerides of the Tracking and Data Relay Satellites (TDRSs) p 2147 N95-27769
Attitude determination using an adaptive multiple model filtering Scheme p 2148 N95-27772
A model of rotationally-sampled wind turbulence for predicting fatigue loads in wind turbines p 2312 N95-27972
A NASTRAN-based computer program for structural dynamic analysis of Horizontal Axis Wind Turbines p 2312 N95-27980
Calculation of design load for the MOD-5A 7.3 mW wind turbine system p 2312 N95-27982
Comparison of measured and calculated dynamic loads for the Mod-2 2.5 mW wind turbine system p 2312 N95-27983
Neural networks versus linear regression: Research into the value of neural networks in meteorological practice
[KNMI-TR-165] p 2343 N95-28236
Chemical reactions identified in the Titan 2, Titan 4, and Delta 2 propellant systems and their application to source modeling p 2172 N95-28304
Applications of a damage tolerance analysis methodology in aircraft design and production p 2197 N95-28483
A study of non-stationary processes and their applications
[AD-A291725] p 2395 N95-28510

PREDICTIONS
Life prediction methodology for composite laminates. Part 1: Constant amplitude and two-stress level fatigue
[AD-A288343] p 2180 N95-26571
Embedology and neural estimation for time series prediction
[AD-A289312] p 2394 N95-26892
Prediction of material strength and fracture of glass using the SPHINX smooth particle hydrodynamics code
[DE95-004869] p 2236 N95-27943
Analytical and experimental evaluation of joining silicon carbide to silicon carbide and silicon nitride to silicon nitride for advanced heat engine applications, phase 2
[DE95-005761] p 2303 N95-27947

PREFLIGHT ANALYSIS
Debris/Ice/TPS assessment and integrated photographic analysis of Shuttle mission STS-67
[NASA-TM-110651] p 2160 N95-27238

PREFORMS
TEM characterization of Al/Al2O3 composite fabricated by reactive metal infiltration
[DE95-008508] p 2184 N95-28145
Design of fabric preforms for double diaphragm forming p 2184 N95-28269
Through-the Thickness(R) braided composites for aircraft applications p 2185 N95-28273
Resin transfer molding of textile preforms for aircraft structural applications p 2185 N95-28276
Recent progress in NASA Langley textile reinforced composites program p 2196 N95-28475
Advanced textile applications for primary aircraft structures p 2138 N95-28476
Comparison of resin film infusion, resin transfer molding, and consolidation of textile preforms for primary aircraft structure p 2196 N95-28477

PREPOLYMERS
Boron-carbon-silicon polymers and the ceramic thereof
[NASA-CASE-ARC-11891-1-SB] p 2238 N95-28212

PREPREGS
Composite prepreg application device
[NASA-CASE-LAR-15259-1] p 2182 N95-27192
Scarf joint technique with cocured and precured patches for composite repair p 2135 N95-27524
Polymer infiltration studies
[NASA-CR-198601] p 2236 N95-27857
Design of fabric preforms for double diaphragm forming p 2184 N95-28269
Advanced tow placement of composite fuselage structure p 2185 N95-28271

PRESSURE BREATHING
A study of heart rate and heart rate variability during rapid decompression to 50,000 ft
[AD-A291598] p 2355 N95-28561

PRESSURE DEPENDENCE
The effect on stability and thermal hydraulic quenchback of perforating the jacket of a cable-in-conduit conductor
[DE95-005392] p 2262 N95-27083

PRESSURE DISTRIBUTION
Airfoil modification effects on subsonic and transonic pressure distributions and performance for the EA-6B airplane
[NASA-TP-3516] p 2120 N95-26382
Wind tunnel experiments on wake flow field behind a reentry capsule from a viewpoint of parachute deployment at supersonic speeds
[ISAS-R-655] p 2121 N95-26740
Analysis of developing laminar flows in circular pipes using a higher-order finite-difference technique p 2281 N95-27352
Comparative wind tunnel test at high Reynolds numbers of NACA 64 621 airfoils with two aileron configurations p 2124 N95-27977
Measurements of store forces and moments and cavity pressures for a generic store in and near a box cavity at subsonic and transonic speeds
[NASA-TM-4611] p 2123 N95-28241

PRESSURE EFFECTS
Compressible turbulence measurements in a supersonic boundary layer including favorable pressure gradient effects
[AD-A289475] p 2276 N95-26821
Load transfer in the stiffener-to-skin joints of a pressurized fuselage
[NASA-CR-198610] p 2310 N95-27865
High pressure optical studies of semiconductors and heterostructures
[DE95-007119] p 2410 N95-27927
Composite fuselage shell structures research at NASA Langley Research Center p 2194 N95-28466

PRESSURE GRADIENTS
A study of magnetic activity effects on the thermospheric winds in the low ionosphere
[AD-A288677] p 2334 N95-26488
Compressible turbulence measurements in a supersonic boundary layer including favorable pressure gradient effects
[AD-A289475] p 2276 N95-26821
Compressible turbulence measurements in a supersonic flow with adverse pressure gradient
[AD-A289477] p 2276 N95-26822

PRESSURE MEASUREMENT
Unsteady base pressure measurements in the near wake of a cylinder with imposed three-dimensional disturbances
[AD-A289498] p 2276 N95-26827
Stall precursor study of high frequency data for three high speed, swept compressor rotors
[AD-A289379] p 2139 N95-26878
Non-invasive method and apparatus for monitoring intracranial pressure and pressure volume index in humans
[NASA-CASE-LAR-13894-1] p 2353 N95-26889
Optimization of measurements with pressure sensitive paints
[NASA-TM-4695] p 2293 N95-27915

PRESSURE PULSES
Pressure vessel burst test study p 2175 N95-28317

PRESSURE RATIO
The noise reduction potential of dual-stream coaxial rectangular improperly expanded jet flows
[NASA-CR-197820] p 2277 N95-26995
High pressure optical studies of semiconductors and heterostructures
[DE95-007119] p 2410 N95-27927

PRESSURE REDUCTION
A model of bubble evolution during decompression based on a Monte Carlo simulation of inert gas diffusion
[AD-A289400] p 2353 N95-26885
Real-time data compression using a fixed Huffman encoding scheme
[DE95-006159] p 2455 N95-27949
A study of heart rate and heart rate variability during rapid decompression to 50,000 ft
[AD-A291598] p 2355 N95-28561

PRESSURE SENSORS
Multi-channel electronically scanned cryogenic pressure sensor
[NASA-CASE-LAR-15062-1] p 2291 N95-27138
Process and control systems for composites manufacturing p 2184 N95-28267

PRESSURE VESSEL DESIGN
Long life 80Ah standard IPV NiH2 battery cell p 2272 N95-26787
The 50 Ah NiH2 CPV qualification tests p 2272 N95-26792
Unique features of a new nickel-hydrogen 2-cell CPV p 2272 N95-26793

PRESSURE VESSELS
Long life 80Ah standard IPV NiH2 battery cell p 2272 N95-26787
The 50 Ah NiH2 CPV qualification tests p 2272 N95-26792
Unique features of a new nickel-hydrogen 2-cell CPV p 2272 N95-26793
Gamma ray-induced embrittlement of pressure vessel alloys
[DE95-007133] p 2220 N95-28072
Reactor pressure vessel structural integrity research
[DE95-007034] p 2223 N95-28208
Process and control systems for composites manufacturing p 2184 N95-28267

Design prediction for long term stress rupture service of composite pressure vessels p 2188 N95-28291
Pressure vessel burst test study p 2175 N95-28317

PRESTRESSING
Stress corrosion cracking susceptibility of the earthquake resistant NOM B457 Mexican steel
[DE95-607956] p 2214 N95-27256

PREVENTION
Investigation on technology for increasing the biological CO2 sink and technology for CO2 fixation and reutilization
[DE95-759251] p 2329 N95-27941

PRINTED CIRCUITS
Life cycle costs of alternatives for F-16 printed circuit board diagnosis equipment
[AD-A288744] p 2138 N95-28586

PRIORITIES
Operating system support for coexistence of real-time and conventional scheduling
[AD-A288584] p 2364 N95-26534

PRISMS
Perturbations on effective index of refraction from prism coupling
[AD-A291700] p 2427 N95-28524

PROBABILITY DENSITY FUNCTIONS
A method to determine the structure of an unknown mixture using the Akaike Information Criterion and the bootstrap
[AD-A288295] p 2394 N95-26415
Fast multidimensional density estimation based on Random-width bins
[AD-A288286] p 2394 N95-26457
Soot particle density determination from a laser extinction multipass technique
[AD-A288551] p 2423 N95-26532
ROC analysis of IR segmentation techniques
[AD-A289252] p 2424 N95-26971
Recent progress in the joint velocity-scalar PDF method p 2285 N95-27890
Recent advances in PDF modeling of turbulent reacting flows p 2286 N95-27892
PDF methods for turbulent reactive flows
p 2287 N95-27900
A composition joint PDF method for the modeling of spray flames p 2287 N95-27901
Improvements and new features in the PDF module
p 2287 N95-27902
Uncertainties in obtaining high reliability from stress-strength models p 2193 N95-28442

PROBABILITY DISTRIBUTION FUNCTIONS
Fast multidimensional density estimation based on Random-width bins
[AD-A288286] p 2394 N95-26457
Statistical theory and reliability
[AD-A288519] p 2394 N95-26733
Probabilistic simulation of long term behavior in polymer matrix composites
[NASA-TM-106893] p 2309 N95-27174
Probabilistic evaluation of fuselage-type composite structures p 2137 N95-28444

PROBABILITY THEORY
Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation. Volume 2: Integrated loss of vehicle model
[NASA-CR-197809] p 2159 N95-26399
Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation. Volume 5: Auxiliary shuttle risk analyses
[NASA-CR-197812] p 2160 N95-26403
A mathematical framework for an improved search model
[AD-A288858] p 2358 N95-26552
Life prediction methodology for composite laminates. Part 1: Constant amplitude and two-stress level fatigue
[AD-A288343] p 2180 N95-26571
Chemical physics of uniform cyclic etching
[AD-A288975] p 2404 N95-26574
Probabilistic growth model
[PB95-185054] p 2395 N95-26913
Automatically selecting and using primary effects in planning: Theory and experiments
[AD-A289347] p 2450 N95-27064
Fitting: Subroutine to fit four-moment probability distributions to data
[DE95-007722] p 2395 N95-27684
Emerging applications of probability (stochastic models in geosystems)
[AD-A289117] p 2313 N95-28099
Cesium/oxide interactions for ultrathin films on (alpha)-Al2O3(001) and (alpha)-Al2O3(1(bar 1)O2)
[DE95-008159] p 2238 N95-28358
Probabilistic design of advanced composite structure
p 2193 N95-28443
Proof test methodology for composites
p 2193 N95-28445
Stochastic control and topics in applied probability
[AD-A291712] p 2395 N95-28526
An automated cost uncertainty program
[AD-A288747] p 2374 N95-28588

PROBLEM SOLVING
Modified Gaussian elimination for adaptive beamforming using RNS arithmetic
[AD-A288809] p 2248 N95-26356
Parallel computing on various platforms: A case study
[AD-A289008] p 2376 N95-26460
Encoding user-defined problems with SIPE-2
[AD-A288390] p 2380 N95-26475
Hyperkaehler metrics associated to compact Lie groups
[PB95-185161] p 2388 N95-26514
Neural models of spatial orientation in novel environments
[AD-A288420] p 2380 N95-26530
Modified eigenvalue problems with applications to structural dynamic re-analysis on parallel computers
[AD-A288257] p 2307 N95-26547
Automatic test data generation tool for large-scale software systems
[AD-A289081] p 2365 N95-26611
Contribution to the optimal shape design of two-dimensional internal flows with embedded shocks
[NASA-CR-195062] p 2389 N95-26672
A process improvement model for software verification and validation
[NASA-CR-197761] p 2367 N95-26814
Using the dimension reduction technique to prove that clique trees define facets for the asymmetric traveling salesman polytope
[AD-A289397] p 2389 N95-26882
Multi-agent perception for Human/Robot interaction: A framework for intuitive trajectory modification
[AD-A289399] p 2359 N95-26884
Automatically selecting and using primary effects in planning: Theory and experiments
[AD-A289347] p 2450 N95-27064
Myers-Briggs type indicators and Kirton adaption-innovation inventory correlations
[AD-A288435] p 2357 N95-27181
Automated database design from natural language input p 2383 N95-27378
Limits to ground control in autonomous spacecraft
p 2383 N95-27381
Solving recursive domain equations with enriched categories
[AD-A289358] p 2371 N95-27418
Two-body bound states and the Bethe-Salpeter equation
[DE95-008302] p 2392 N95-27742
A new algorithm for generating highly accurate benchmark solutions to transport test problems
[DE95-007397] p 2373 N95-28047
Using the scalable nonlinear equations solvers package
[DE95-008323] p 2378 N95-28071
Developmental problems and their solution for the Space Shuttle main engine alternate liquid oxygen high-pressure turbopump: Anomaly or failure investigation the key
[NASA-TP-3553] p 2169 N95-28263
Stochastic control and topics in applied probability
[AD-A291712] p 2395 N95-28526

PROCESS CONTROL (INDUSTRY)
NIST: Information management in the AMRF
[NONP-NASA-VT-95-49120] p 2454 N95-27208
STEP: A futurevision, today
[NONP-NASA-VT-95-49121] p 2451 N95-27209
Application of modern diagnostic methods to environmental improvement
[DE95-005797] p 2330 N95-28119

PROCUREMENT
Automated Procurement System (APS) revised project management plan (DS-03)
[NASA-CR-196605] p 2450 N95-27169

PRODUCT DEVELOPMENT
The development of a feature-based concurrent engineering system
[AD-A288424] p 2364 N95-26557
Microelectronics in Japan p 2263 N95-27227
Building the electronic industry's roadmaps
p 2263 N95-27228
Japan's technology and manufacturing infrastructure
p 2263 N95-27229
Successful product realization strategies
p 2264 N95-27233
Development of a miniature actuator/controller system
p 2156 N95-27272
SIHTI 2: Energy and environmental technology. Yearbook 1993 of the research programme
[DE95-755135] p 2331 N95-28202

PRODUCTION ENGINEERING
Laboratory of production engineering
[PB95-184834] p 2451 N95-28135

PRODUCTIVITY
A system dynamics based study of software reuse and its determinants
[AD-A288578] p 2364 N95-26554
Advances in welding science: A perspective
[DE95-006745] p 2302 N95-27545

PROGRAM VERIFICATION (COMPUTERS)
An evaluation of the Software Through Pictures/T Tool (StP/T) for the Software Support Activity (SSA)
[AD-A288822] p 2362 N95-26348
Concurrent engineering research center
[NASA-CR-197726] p 2362 N95-26386
Compiler-assisted debugging and multiple instruction retry
[NASA-CR-197729] p 2365 N95-26628
Turbulence modeling
[NASA-CR-197751] p 2274 N95-26665
Com(sup 3): A composite-compatible component coding system
[BBC-RD-1994/17] p 2249 N95-26670
A process improvement model for software verification and validation
[NASA-CR-197761] p 2367 N95-26814
High performance hardware and software for pattern recognition and image processing
[AD-A289153] p 2370 N95-27031
A verification procedure for MSC/NASTRAN Finite Element Models
[NASA-CR-4675] p 2131 N95-27371
Scientific statistics and graphics on the Macintosh
[DE95-006445] p 2372 N95-27533
PRISM validation
[AD-A288476] p 2337 N95-27703
A simple method for verifying the deployment of the TOMS-EP solar arrays p 2150 N95-27782
Calculation of design load for the MOD-5A 7.3 mW wind turbine system p 2312 N95-27982

PROGRAMMING ENVIRONMENTS
A software bus for thread objects
[NASA-CR-197764] p 2365 N95-26575
Unification of LARCH and Z-based object models to support algebraically-based design refinement: The Z perspective
[AD-A289234] p 2369 N95-26962

PROGRAMMING LANGUAGES
An introduction to software architecture
[AD-A288963] p 2363 N95-26446
Specifying weak sets
[AD-A288587] p 2364 N95-26536
Modal event calculus in Lolli
[AD-A288544] p 2365 N95-26605
A parallel complexity model for functional languages
[AD-A288589] p 2365 N95-26656
Using an architectural approach to integrate heterogeneous, distributed software components
[NASA-CR-197766] p 2366 N95-26711
Scalability in production system programs
[AD-A289345] p 2453 N95-27063
Language constructs and runtime systems for compositional parallel programming
[DE95-008298] p 2378 N95-27741
Guide for transmitting Standard Generalized Markup Language (SGML) encoded bibliographic records
[DOE/OSTI-11685] p 2457 N95-28675

PROGRESS
Review of activities in USA on HTS materials
[DE95-006404] p 2234 N95-27468

PROJECT MANAGEMENT
Software risk management through independent verification and validation
[NASA-CR-197767] p 2364 N95-26486
Automated Procurement System (APS) revised project management plan (DS-03)
[NASA-CR-196605] p 2450 N95-27169

PROJECT PLANNING
Automated Procurement System (APS) revised project management plan (DS-03)
[NASA-CR-196605] p 2450 N95-27169
Electric vehicle activities
[DE95-006648] p 2267 N95-28105

PROJECTILES
Ram accelerator performance calculations using a modified version of the NASA CET89 equilibrium chemistry code
[AD-A289554] p 2201 N95-26678
Atomic physics with highly charged ions
[DE95-007325] p 2407 N95-27439
PXAMS: Projectile X ray AMS: X ray yields and applications
[DE95-006438] p 2204 N95-27496

Projectile image acceleration, neutralization and electron emission during grazing interactions of multicharged ions with Au(110)
[DE95-007394] p 2409 N95-27551

Use of mussels in biomonitoring of environmental impacts of propellants, projectiles, explosives, and pyrotechnics p 2170 N95-28298

Computational studies of projectile melt in impact with typical whipple shields
[DE95-005916] p 2311 N95-28337

PROLATE SPHEROIDS

Simple equivalent dipole distributions for dielectric spheroidal scatterers
[PB95-184883] p 2254 N95-27049

PROPAGATION MODES

Depth migration in transversely isotropic media with explicit operators
[DE95-007670] p 2337 N95-27442

PROPANE

Small angle x ray scattering studies of reverse micelles in supercritical fluids
[DE95-007803] p 2287 N95-28021

PROPELLANT ADDITIVES

Mars Sample Return mission utilizing in-situ propellant production
[NASA-CR-188371] p 2145 N95-28261

PROPELLANT CHEMISTRY

Mars Sample Return mission utilizing in-situ propellant production
[NASA-CR-188371] p 2145 N95-28261

PROPELLANT COMBUSTION

Propellant injection systems and processes
[NASA-TM-110632] p 2242 N95-26781

Chemical reactions identified in the Titan 2, Titan 4, and Delta 2 propellant systems and their application to source modeling p 2172 N95-28304

PROPELLANT SENSITIVITY

Cryogenic washout of solid rocket propellants
p 2176 N95-28324

PROPELLANT STORAGE

Task 4 supporting technology. Densification requirements definition and test objectives. Propellant densification requirements definition
[NASA-CR-198629] p 2450 N95-28260

PROPELLANT TESTS

Chemical reactions identified in the Titan 2, Titan 4, and Delta 2 propellant systems and their application to source modeling p 2172 N95-28304

Acute and subacute toxicity of ammonium dinitramide (ADN) p 2175 N95-28318

PROPELLANTS

Use of mussels in biomonitoring of environmental impacts of propellants, projectiles, explosives, and pyrotechnics p 2170 N95-28298

PROPELLER BLADES

Development and validation of a blade-element mathematical model for the AH-64A Apache helicopter
[NASA-TM-108863] p 2118 N95-26710

Analysis of aircraft engine blade subject to ice impact
p 2141 N95-28277

PROPULSION

Progress in incompressible Navier-Stokes computations for propulsion flows and its dual-use applications
[NASA-CR-197746] p 2275 N95-26766

The lift-fan aircraft: Lessons learned
[NASA-CR-196694] p 2131 N95-27143

NAS Technical Summaries, March 1993 - February 1994
[NASA-RP-1355] p 2466 N95-27367

Turbulence program for propulsion systems
p 2285 N95-27883

A knowledge highway for integrated modelling from manufacturing to design
[AD-A288872] p 2247 N95-28187

PROPULSION SYSTEM CONFIGURATIONS

Simulation model of the integrated flight/propulsion control system, displays, and propulsion system for ASTOVL lift-fan aircraft
[NASA-TM-108866] p 2139 N95-26412

Funding for AFRAPT student trainees for academic year 1992-1993
[AD-A288461] p 2466 N95-26604

Direct drive options for electric propulsion systems
[NASA-TM-106576] p 2168 N95-27861

Propulsion system assessment for very high UAV under ERAST
[NASA-CR-195469] p 2140 N95-27866

PROPULSION SYSTEM PERFORMANCE

Funding for AFRAPT student trainees for academic year 1992-1993
[AD-A288461] p 2466 N95-26604

Micro electric propulsion feasibility
[NASA-CR-189139] p 2168 N95-28000

PROPULSIVE EFFICIENCY

Propulsion system assessment for very high UAV under ERAST
[NASA-CR-195469] p 2140 N95-27866

PROTECTION

Aircraft fuel system lightning protection design and qualification test procedures development
[AD-A288401] p 2125 N95-26497

The protection of electro-explosive devices (EEDs) and electronics from electrostatic discharge (ESD) hazards
[DSTO-TR-0100] p 2258 N95-28568

PROTECTIVE CLOTHING

Lightweight cold weather underwear investigation
[AD-A288506] p 2358 N95-26736

PROTECTIVE COATINGS

Engineering calculations associated with the ablative thermal protective structures of returnable satellites
[AD-A289593] p 2162 N95-26715

The response of hydrotalcite coated aluminum to sealing with transition metal salt solutions
[DE95-004767] p 2234 N95-27460

Orbital atomic oxygen effects on materials: An overview of MSFC experiments on the STS-46 EOIM-3
p 2419 N95-27637

Effects of atomic oxygen on polymeric materials flown on EOIM-3 p 2242 N95-27638

The Strategic Technologies for Automation and Robotics (STEAR) program: Protection of materials in the space environment subprogram p 2242 N95-27669

Process for non-contact removal of organic coatings from the surface of paintings
[NASA-CASE-LEW-15896-1] p 2235 N95-27702

Processing and properties of chromate-free conversion coatings on aluminum
[DE95-004768] p 2218 N95-27722

Assay of weathering effects on protective polymer coatings using positron annihilation spectroscopy
[DE95-007040] p 2236 N95-27962

Chromate-free corrosion resistant conversion coatings for aluminum alloys
[DE95-007742] p 2238 N95-28117

Weightless Environment Training Facility (WETF) materials coating evaluation, volume 1
[NASA-CR-188366-VOL-1] p 2239 N95-28385

Weightless Environment Training Facility (WETF) materials coating evaluation, volume 2
[NASA-CR-188366-VOL-2] p 2239 N95-28386

Weightless Environment Training Facility (WETF) materials coating evaluation, volume 3
[NASA-CR-188366-VOL-3] p 2239 N95-28387

Coatings of non-oxide ceramics for improved corrosion resistance in high temperature coal combustion
[DE95-006932] p 2241 N95-28604

PROTEIN CRYSTAL GROWTH

Device and method for screening crystallization conditions in solution crystal growth
[NASA-CASE-MFS-28985-1] p 2245 N95-26888

Apparatus for diffusion controlled dialysis under microgravity conditions
[NASA-CASE-MFS-28986-1] p 2245 N95-27500

PROTEIN SYNTHESIS

Device and method for screening crystallization conditions in solution crystal growth
[NASA-CASE-MFS-28985-1] p 2245 N95-26888

PROTEINS

Non-covalent immobilization of proteins and enzymes on polymerized lipid assemblies
[AD-A288234] p 2225 N95-26526

The effect of proteins on the aging properties of radiation vulcanized Natural Rubber Latex
[DE95-603357] p 2225 N95-26599

Regional differences in lectin binding patterns of vestibular hair cells p 2349 N95-26728

Predicting protein structure using parallel genetic algorithms
[AD-A289305] p 2369 N95-26919

Advances in scientific visualization
[DE95-008065] p 2343 N95-28014

Feasibility studies for separation processes using environmentally sensitive hydrogels
[DE95-008355] p 2238 N95-28226

Hydrogen-ion titrations of amino acids and proteins in solutions containing concentrated electrolyte
[DE95-008356] p 2209 N95-28229

PROTOCOL (COMPUTERS)

The reliable multicast protocol application programming interface
[NASA-CR-197762] p 2363 N95-26388

Scalable multicast tree construction for wide area networks
[AD-A288318] p 2379 N95-26421

A decentralized software bus based on IP multicasting
[NASA-CR-197768] p 2366 N95-26695

Minimizing the impact of synchronization overhead in parallel discrete event simulations
[AD-A289278] p 2377 N95-26984

A foveated system to reduce transmission bandwidth of video images from remote camera systems
[AD-A288516] p 2254 N95-27060

Efficient generation of counterexamples and witnesses in symbolic model checking
[AD-A288583] p 2370 N95-27095

Design and implementation of a software communication architecture for the JANUS-3D Visualizer
[AD-A288509] p 2370 N95-27150

Construction of a connectionist network supercomputer
[AD-A288439] p 2377 N95-27182

A high performance totally ordered multicast protocol
[NASA-CR-197765] p 2371 N95-27252

An architecture and protocol for communications satellite constellations regarded as multi-agent systems
p 2168 N95-27377

XTP as a transport protocol for distributed parallel processing
[DE95-004992] p 2378 N95-27402

Practical considerations for network addressing using CIDR
[PB95-195335] p 2379 N95-28665

PROTON BEAMS

Observation of asymmetrical two-cone Vavilov-Cherenkov radiation in biaxial crystal of triglycinesulphate emitted by 658 MeV protons passing along bi normal
[DE94-629017] p 2441 N95-27867

PROTON DAMAGE

Radiation-induced segregation: A microchemical gauge to quantify fundamental defect parameters
[DE95-005720] p 2216 N95-27492

PROTON RESONANCE

Beam-beam interaction working group summary
[DE95-007824] p 2422 N95-28123

PROTON-PROTON REACTIONS

The CDF upgrade
[DE95-006683] p 2421 N95-28107

The Bremsstrahlung of soft gamma-quanta created by elastic pp- and np-scatterings and the dibaryon resonance problem
[DE95-608870] p 2415 N95-28248

PROTONS

Implications of horizontal symmetries on baryon number violation in supersymmetric models
[DE95-610202] p 2407 N95-27406

A study of events with large total transverse energy produced in proton-antiproton collisions at (radical)s = 1.8 TeV
[DE95-003382] p 2410 N95-27872

Some aspects of the OZI-rule violation in the reaction anti-pp yields phi pi(0)
[DE95-608853] p 2415 N95-28245

The 132 nsec bunch spacing in the Tevatron proton-antiproton collider
[DE95-005750] p 2422 N95-28346

PROTOTYPES

Effect of processing parameters on surface finish for fused deposition machinable wax patterns
[NASA-TP-3550] p 2244 N95-26769

Design considerations for FrankTalk: A distributed group support system
[AD-A289386] p 2359 N95-26863

Unification of LARCH and Z-based object models to support algebraically-based design refinement: The Z perspective
[AD-A289234] p 2369 N95-26962

Weighting scheme for the space surveillance network automated tasker
[AD-A289285] p 2146 N95-27035

A general object model transformation system
[AD-A289289] p 2370 N95-27037

NIST: Information management in the AMRF
[NONP-NASA-VT-95-49120] p 2454 N95-27208

SXI Prototype mirror mount
[NASA-CR-198613] p 2301 N95-27244

Spray-formed tooling
[DE95-005031] p 2246 N95-27404

JTEC panel on display technologies in Japan
[NASA-CR-198564] p 2292 N95-27863

Research on the establishment of the database system for R and D on the innovative technology for the Earth
[DE95-759244] p 2458 N95-27937

Measurement of wakefield suppression in a detuned X-band accelerator structure
[DE95-008592] p 2422 N95-28159

Cosmic ray test results of the D0 prototype scintillating fiber tracker
[DE95-007215] p 2415 N95-28221

Prototype development and test results of a continuous ambient air monitoring system for hydrazine at the 110 ppb level p 2173 N95-28310

Dimensionally self regulating materials
[AD-A291671] p 2257 N95-28456
Manikin integrated data acquisition system (MIDAS) initial modifications
[AD-A291662] p 2361 N95-28667

PROVING
Supersonic transport grid generation, validation, and optimization
[NASA-CR-197752] p 2365 N95-26648
Cleanliness verification process at Martin Marietta Astronautics p 2165 N95-27104
Evaluations of the effectiveness of environmentally benign cleaning methodologies p 2230 N95-27115
On permanent capillar-heavy waves in circular shaped channels
[DE95-608779] p 2280 N95-27339
DOE/KEURP Site Operator Program
[DE95-007116] p 2266 N95-27926
Proof test methodology for composites
p 2193 N95-28445

PSYCHOLOGICAL EFFECTS
Basic mechanisms and implications of non-photic entrainment of circadian rhythmicity
[AD-A288433] p 2353 N95-26779

PSYCHOLOGICAL TESTS
Codes of processing and multiple resources: Model and methodology
[AD-A289583] p 2355 N95-26691
Handbook of perception and human performance, volume 2. Cognitive processes and performance
[AD-A289587] p 2355 N95-26692
Myers-Briggs type indicators and Kirton adaption-innovation inventory correlations
[AD-A288435] p 2357 N95-27181

PSYCHOLOGY
Enhancing the effects of diversity awareness training: A review of the research literature
[DOT/FAA/AM-95/10] p 2355 N95-26361
Change, Learning and Mental Work in Organizations: Working papers of the 3rd Otaniemi-Dresden Workshop
[PB95-184941] p 2356 N95-26909

PUBLIC HEALTH
Concurrent engineering research center
[NASA-CR-197726] p 2362 N95-26386
Health and environmental hazards of CdTe photovoltaic module production, use and decommissioning
[DE95-006688] p 2320 N95-27682
Current status of environmental, health, and safety issues of lithium polymer electric vehicle batteries
[DE95-004005] p 2265 N95-27719
Implementing an integrated standards-based management system to ensure compliance at Los Alamos National Laboratory
[DE95-007873] p 2451 N95-28025
Evaluating the environmental viability of open burning/open detonation operations
p 2170 N95-28297

PUBLIC RELATIONS
Community relations plan: Galena Airport and Camp ion Air Force Station, Alaska
[AD-A286722] p 2327 N95-27234

PULSARS
Multiwavelength observations of unidentified high energy gamma-ray sources
[NASA-CR-197840] p 2465 N95-26630
Was Einstein 100% right?
[PB95-190179] p 2449 N95-28175

PULSE CODE MODULATION
Pulse Code Modulation (PCM) encoder handbook for Aydin Vector MMP-900 series system
[NASA-RP-1365] p 2255 N95-27435

PULSE COMPRESSION
Method of phased magnitude correlation using binary sequences
[AD-D017257] p 2248 N95-26465

PULSE DURATION
Low power limits in ultrashort pulse measurement using Frequency-Resolved Optical Gating
[DE95-007150] p 2299 N95-28219
Ultrashort Pulse retrieval using FROG trace irradiance moments and the adaptive neural networks backpropagation algorithm
[DE95-007153] p 2299 N95-28220
Phase retrieval and time-frequency methods in the measurement of ultrashort laser pulses
[DE95-006499] p 2300 N95-28549

PULSE GENERATORS
AFC generator development
[DE95-007094] p 2266 N95-27754

PULSE RADAR
The ambiguity function of the stepped frequency radar
[AD-A289533] p 2251 N95-26871

PULSED LASER DEPOSITION
Pulsed laser deposition of zeolitic membranes
[DE95-006274] p 2298 N95-28124

PULSED LASERS
Wake fields in semiconductor plasmas
[DE94-634523] p 2429 N95-26439
Femtosecond X-ray generation through 90 degrees T homson scattering: Status of the LBL experiment
[DE95-006560] p 2296 N95-27674
Spectral broadening of KrF laser radiation by self-seeded Raman amplification in long air paths
[DE95-003697] p 2297 N95-27718
Laser with optically driven Q-switch
[NASA-CASE-NPO-18470-1-CU] p 2297 N95-27731
Bubble chamber spectroscopy for chemical analysis: A new concept
[DE95-006350] p 2209 N95-28088
Passive spatial beam control, appendix
[AD-A288913] p 2300 N95-28333

PULSED RADIATION
Surface damage effects generated by a fast-pulse laser beam
[AD-A289131] p 2295 N95-26996
Direct ultrashort-pulse retrieval using frequency-resolved optical gating and a computational neural network
[DE95-007148] p 2425 N95-27482
Phase retrieval and time-frequency methods in the measurement of ultrashort laser pulses
[DE95-006499] p 2300 N95-28549

PURGING
Comparison of numerical results and multicavity purge and rim seal data with extensions to dynamics
[NASA-TM-106685] p 2168 N95-27434

PURIFICATION
To develop an aerosoling immunomagnetic device for rapid medical diagnosis from clinical samples
[AD-A288504] p 2354 N95-27059

PURITY
Ultra high purity, dimensionally stable INVAR 36
[NASA-CASE-NPO-19358-1-CU] p 2213 N95-26862

PYROELECTRICITY
Large area smart piezoelectric and pyroelectric sensors
[AD-A288565] p 2290 N95-26541
Growth and characterization of crystals for room temperature I.R. detectors and second harmonic generation devices
[NASA-CR-198598] p 2443 N95-28033

PYROLYSIS
Junkyard chemistry p 2227 N95-27102
A practical approach to soil remediation
p 2232 N95-27125
Biomass Pyrolysis Oil Properties and Combustion Meeting
[DE95-004017] p 2204 N95-27438
Boron-carbon-silicon polymers and the ceramic thereof
[NASA-CASE-ARC-11891-1-SB] p 2238 N95-28212
Destruction of pyrotechnics manufacture wastewater treatment sludge by plasma arc pyrolysis
p 2171 N95-28301
Review and analysis of the 1980-1989 biomass thermochemical conversion program
[DE95-000287] p 2325 N95-28394

PYROLYTIC GRAPHITE
Electrocrystallization of an ordered organic monolayer: Selective epitaxial growth of beta(ET)213 ongraphite
[AD-A288942] p 2178 N95-26569
LEO degradation of graphite and carbon-based composites aboard Space Shuttle Flight STS-46
p 2199 N95-27636

PYROTECHNICS
Use of mussels in biomonitoring of environmental impacts of propellants, projectiles, explosives, and pyrotechnics p 2170 N95-28298
Destruction of pyrotechnics manufacture wastewater treatment sludge by plasma arc pyrolysis
p 2171 N95-28301
A comprehensive energetic materials resource recovery and recycling program p 2176 N95-28323

PYRROLES
High pressure conductivity study of template synthesized polypyrrole: Observation of a crossover from three to one dimensional variable range hopping
[AD-A288367] p 2224 N95-26470

Q

Q SWITCHED LASERS
Continuously-tunable, narrow-linewidth, Q-switched Cr:LiSAF laser for lidar applications
[DE95-006285] p 2296 N95-27672
Laser with optically driven Q-switch
[NASA-CASE-NPO-18470-1-CU] p 2297 N95-27731

QUADRUPOLES
Iron oxides characterization by Moessbauer spectroscopy
[DE95-607869] p 2202 N95-27199
Magnetic quadrupole moment of W-boson in Kobayashi-Maskawa model
[DE95-610355] p 2407 N95-27411
Coupling in the Tevatron
[DE95-005129] p 2421 N95-27531
STS-46 plasma composition measurements using the EOIM-3 mass spectrometer p 2211 N95-27645
Field quality improvements in superconducting magnets for RHIC
[DE95-006096] p 2269 N95-28339
Manufacture and testing of the superconducting wire and cable for the RHIC dipoles and quadrupoles
[DE95-006000] p 2270 N95-28515

QUALITY CONTROL
Evaluations of the effectiveness of environmentally benign cleaning methodologies p 2230 N95-27115
Quest for excellence 5
[NONP-NASA-VT-95-49099] p 2451 N95-27205
Malcolm Baldrige National Quality Award winners 1989
[NONP-NASA-VT-95-49119] p 2451 N95-27207
STEP: A futurevision, today
[NONP-NASA-VT-95-49121] p 2451 N95-27209
Quality assurance and reliability in the Japanese electronics industry p 2263 N95-27232
The development of an engineering standard for composite repairs p 2135 N95-27528
I(sub DDQ) testing and defect classes: A tutorial
[DE95-005467] p 2306 N95-27723
Field quality improvements in superconducting magnets for RHIC
[DE95-006096] p 2269 N95-28339

QUANTITATIVE ANALYSIS
Chemistry involving the separation, isolation, and immobilization of 3-5 compound semiconductor nanocrystals and quantum dots
[AD-A288381] p 2436 N95-26473
Corrosive effects of supercritical carbon dioxide and cosolvents on metals p 2224 N95-27113
Analysis of surfaces, films and multilayers by resonant laser ablation
[DE95-006295] p 2297 N95-27841
On the physics of ion ring generation for the stabilization of FRX discharges
[DE95-007105] p 2410 N95-27922

QUANTUM CHEMISTRY
Beyond transition state theory: Rigorous quantum approaches for determining chemical reaction rates
[DE95-008483] p 2208 N95-28086
International journal of quantum chemistry
[AD-A291633] p 2352 N95-28546

QUANTUM CHROMODYNAMICS
The photon structure function F2 in QCD with nonlocal vacuum quark condensates
[DE95-608829] p 2406 N95-27314
Addendum to the 1993 European school of high-energy physics
[DE95-610313] p 2419 N95-27321
Couplings of heavy hadrons with soft pions from QCD sum rules
[DE95-610349] p 2407 N95-27410
A study of parton distribution functions with the use of photon + jet event kinematics in p(bar p) collisions at (radical)s = TeV
[DE95-005127] p 2408 N95-27444
N. N. Bogolyubov and particle physics
[DE95-608794] p 2448 N95-27447
Lattice QCD calculation using VPP500
[DE95-007076] p 2449 N95-27448
Studies of kinematic distributions and mass reconstruction of CDF top candidate events
[DE95-005108] p 2408 N95-27478
The 1993 European school of high-energy physis
[DE95-610196] p 2421 N95-28040
Skew chromaticity
[DE95-007677] p 2422 N95-28115
Polarization as a probe to the production mechanisms of charmonium in (pi)N collisions
[DE95-008136] p 2414 N95-28142
Efficient analytic computation of higher-order QCD amplitudes
[DE95-008593] p 2449 N95-28160
The high energy behavior of the forward scattering parameters -- (sigma)(sub tot), (rho), and B
[DE95-007075] p 2415 N95-28210
Topological density and instantons on a lattice
[DE95-006348] p 2445 N95-28240
Weak matrix elements efforts on the lattice: Status and prospects
[DE95-007701] p 2416 N95-28355

Measurement of alpha(s) in e(+)e(-) annihilation at E(cm) = 29 GeV
[DE95-006486] p 2417 N95-28594
QUANTUM ELECTRODYNAMICS
The free energy of hot QED at three and a half loops
[DE95-007079] p 2449 N95-27449
The 1993 European school of high-energy physis
[DE95-610196] p 2421 N95-28040
QUANTUM MECHANICS
Mean value theorem in topological vector spaces
[DE95-608753] p 2390 N95-27331
Quantum k-Poincare 1994
[DE95-608754] p 2448 N95-27332
Wigner quantum oscillators. OSP (3/2) oscillators
[DE95-608756] p 2448 N95-27334
The Hurwitz-Eulerian reduction
[DE95-608760] p 2396 N95-27337
Realization of vector fields for quantum groups as pseudodifferential operators on quantum spaces
[DE95-008485] p 2449 N95-27877
Phase stability and elasticity of C15 transition-metal intermetallic compounds
[DE95-007876] p 2219 N95-28026
Beyond transition state theory: Rigorous quantum approaches for determining chemical reaction rates
[DE95-008483] p 2208 N95-28086
Bit-string physics: A novel theory of everything
[DE95-005941] p 2449 N95-28137
Quantum retrodiction and causality principle
[DE94-628438] p 2450 N95-28183
Some aspects of the OZI-rule violation in the reaction anti-pp yields phi pi(0)
[DE95-608853] p 2415 N95-28245
Quantum effects induced by a gap in the spectrum of atom-bath coupling constants: Freezing of atomic decay and monochromatic collective radiation
[DE95-609037] p 2416 N95-28251
QUANTUM NUMBERS
Bit-string physics: A novel theory of everything
[DE95-005941] p 2449 N95-28137
QUANTUM OPTICS
Toward coherent excitation: Development of a single-source pump for the rubidium hyperfine ground state doublet
[AD-A289413] p 2295 N95-27132
Basic and applied research in the field of electronics and communications
[AD-A291727] p 2270 N95-28512
QUANTUM STATISTICS
Algebraic structure of the Green's ansatz and its q-deformed analogue
[DE95-608780] p 2395 N95-27340
The canonical q-transformations with two q-para-Bose oscillators
[DE95-608781] p 2396 N95-27341
QUANTUM THEORY
Environmental effects on high energy density materials
[AD-A288296] p 2199 N95-26416
Analytic formulae for the Hartree-Fock order parameter at arbitrary p/q filling factors for the 2DEG in a magnetic field
[DE95-607805] p 2448 N95-26603
Toward coherent excitation: Development of a single-source pump for the rubidium hyperfine ground state doublet
[AD-A289413] p 2295 N95-27132
q-structure algebra of U(sub q)(g-circumflex) from its adjoint action
[DE95-608749] p 2390 N95-27301
Bogolyubov renormalization group
[DE95-608830] p 2448 N95-27315
Excited Charm States
[DE95-005749] p 2409 N95-27747
The 1993 European school of high-energy physis
[DE95-610196] p 2421 N95-28040
Rare decays/CP: The perspective of a kaon physicist
[DE95-005964] p 2416 N95-28338
International journal of quantum chemistry
[AD-A291633] p 2352 N95-28546
QUANTUM WELL LASERS
Comprehensive numerical model for CW vertical-cavity surface-emitting lasers
[DE95-007758] p 2299 N95-28132
QUANTUM WELLS
Joint Services Electronics Program (JSEP)
[AD-A288299] p 2345 N95-26419
Room-temperature photocurrent spectroscopy of GaAs/GaAlAs multiple quantum wells
[AD-A289607] p 2201 N95-26707
Materials, structures, and devices for high-speed electronics
[NASA-CR-197815] p 2260 N95-26816
Design and characterization of resonant cavity light-emitting diodes
[AD-A289307] p 2261 N95-26921
High pressure optical studies of semiconductors and heterostructures
[DE95-007119] p 2410 N95-27927
Time-dependent model for vertical-cavity surface-emitting laser
[DE95-007880] p 2298 N95-28027
Heterostructures and infrared emitters with compressed InAsSb layers
[DE95-008157] p 2446 N95-28399
QUARK MODELS
A simple relativistic model of pp-bar yields K(+)K(-)
[DE95-608852] p 2406 N95-27318
Implications of horizontal symmetries on baryon number violation in supersymmetric models
[DE95-610202] p 2407 N95-27406
Excited Charm States
[DE95-005749] p 2409 N95-27747
QUARK PARTON MODEL
Addendum to the 1993 European school of high-energy physics
[DE95-610313] p 2419 N95-27321
QUARKS
Physics with relativistic heavy ions: QGP and other delicacies
[DE95-007014] p 2406 N95-27307
The photon structure function F2 in QCD with nonlocal vacuum quark condensates
[DE95-608829] p 2406 N95-27314
A note on the constituent quark resonances
[DE95-608831] p 2406 N95-27316
Implications of horizontal symmetries on baryon number violation in supersymmetric models
[DE95-610202] p 2407 N95-27406
Transverse tau polarization in inclusive bar-B yields tau bar-nu X decays
[DE95-610325] p 2407 N95-27409
Studies of kinematic distributions and mass reconstruction of CDF top candidate events
[DE95-005108] p 2408 N95-27478
The gluon propagator in non-Abelian Weizsaecker-Williams fields
[DE95-006877] p 2449 N95-27547
Preliminary heavy-light decay constants from the MILC Collaboration
[DE95-005685] p 2409 N95-27552
Search for the top quark in dilepton decay modes at D(PHI)
[DE95-007764] p 2409 N95-27689
Search for supersymmetry and leptoquark states at FNAL
[DE95-003381] p 2410 N95-27871
Search for exotic particles at CDF
[DE95-008383] p 2411 N95-27933
The Top...is it There? A Survey of the CDF and D0 Experiments
[DE95-005746] p 2411 N95-27945
Supersymmetry and light quark masses in a realistic superstring model
[DE95-610201] p 2412 N95-28041
Bit-string physics: A novel theory of everything
[DE95-005941] p 2449 N95-28137
Aspects of strangeness
[DE95-008314] p 2414 N95-28169
Stability of strange quark stars with nuclear crusts against radial oscillations
[DE95-008484] p 2463 N95-28357
Recent status in the search for the quark-gluon plasma
[DE95-007036] p 2417 N95-28447
B-Physics results from D0
[DE95-005126] p 2417 N95-28495
QUARTZ
The biodegradation of fuels in soils and sediments: Differences as a function of mineralogy
p 2230 N95-27116
The effects of processing variables on reaction synthesis of Fe-Al alloys
[DE95-007405] p 2221 N95-28082
QUARTZ CRYSTALS
Analytical investigations of the acceleration sensitivity of acoustic bulk and surface wave resonators
[AD-A291715] p 2402 N95-28505
QUENCHING
The effect on stability and thermal hydraulic quenchback of perforating the jacket of a cable-in-conduit conductor
[DE95-005392] p 2262 N95-27083
QUENCHING (COOLING)
On the thermally-induced residual stresses in thick fiber-thermoplastic matrix (PEEK) cross-ply laminated plates p 2187 N95-28285
QUERY LANGUAGES
Specifying weak sets
[AD-A288587] p 2364 N95-26536
Query by image example: The CANDID approach
[DE95-006284] p 2456 N95-28631
QUEUEING THEORY
Optimal control of two queues in series
[DE95-608731] p 2382 N95-27045

R

RABBITS
Advanced formation flight control
[AD-A289271] p 2142 N95-26981
RACE FACTORS
Enhancing the effects of diversity awareness training: A review of the research literature
[DOT/FAA/AM-95/10] p 2355 N95-26361
RADAR DATA
Space tether-radar data processing
[AD-A289654] p 2250 N95-26725
Classification of ultra high range resolution radar using decision boundary analysis
[AD-A289378] p 2251 N95-26877
Processing of wide-angle synthetic aperture radar signals for detection of obscured ground targets
[AD-A289243] p 2253 N95-26976
Auto-processing of OTH radar amplitude/range/Doppler data
[AD-A289152] p 2253 N95-27005
Theoretical and experimental models of the diffuse radar backscatter from Mars
[NASA-CR-198650] p 2463 N95-27700
High performance ground penetrating radar survey of TA-49/Area 2
[DE95-006856] p 2258 N95-28601
RADAR DETECTION
Processing of wide-angle synthetic aperture radar signals for detection of obscured ground targets
[AD-A289243] p 2253 N95-26976
Nonlinear signal processing schemes for robust target detection in radar
[AD-A288449] p 2255 N95-27185
RADAR IMAGERY
Speckle spectrum of the ERS-1 wavemode product
[PB95-196564] p 2315 N95-28180
Binary segmentation of SAR images by the ICM algorithm
[INPE-5464-PRE/1772] p 2258 N95-28559
SAR noise reduction through the utilization of robust filters
[INPE-5504-PRE/1787] p 2258 N95-28569
RADAR MEASUREMENT
Measurements of HF auroral clutter using the Verona Ava Linear Array Radar (VALAR)
[AD-A289442] p 2337 N95-27147
Subsurface radar investigations at the Pegasus Glacial-ice Runway and Williams Field, McMurdo Station, Antarctica
[AD-A289323] p 2144 N95-27297
Continuously-tunable, narrow-linewidth, Q-switched Cr:LiSAF laser for lidar applications
[DE95-006285] p 2296 N95-27672
A study of lightning in winter thunderstorms and the analysis of thunderstorm overflight data
[NASA-CR-198577] p 2343 N95-28191
The concentration-estimation problem for multiple-wavelength differential absorption lidar
[DE95-008375] p 2256 N95-28231
RADAR NAVIGATION
GPS as an orbit determination subsystems
p 2152 N95-27793
Operational considerations of using GPS for spacecraft navigation p 2152 N95-27794
RADAR NETWORKS
Report to the Chairman and Ranking Minority Member, Committee on Science, House of Representatives. Weather forecasting: Radar availability requirement not being met
[GAO/AIMD-95-132] p 2342 N95-27912
RADAR RECEIVERS
GPS as an orbit determination subsystems
p 2152 N95-27793
Operational considerations of using GPS for spacecraft navigation p 2152 N95-27794
RADAR RESOLUTION
The ambiguity function of the stepped frequency radar
[AD-A289533] p 2251 N95-26871
RADAR SCATTERING
Theoretical and experimental models of the diffuse radar backscatter from Mars
[NASA-CR-198650] p 2463 N95-27700
Studies of radar backscatter as a function of wave properties and the winds in the turbulent marine atmosphere
[NASA-CR-198608] p 2315 N95-28209
RADAR TARGETS
Evaluation of the FMICW waveform in HF surface radar applications
[AD-A288245] p 2249 N95-26545

Processing of wide-angle synthetic aperture radar signals for detection of obscured ground targets
[AD-A289243] p 2253 N95-26976
RADAR TRACKING
Evaluation of the FMICW waveform in HF surface radar applications
[AD-A288245] p 2249 N95-26545
The design and implementation of the Military Applications of Shiptracks experiment on Space Transportation System - 65
[AD-A288488] p 2160 N95-26634
Fluxes across the west coast resolved by Picket Fence observations during stormfest
[AD-A288511] p 2341 N95-26653
Classification of ultra high range resolution radar using decision boundary analysis
[AD-A289378] p 2251 N95-26877
Measurements of HF auroral clutter using the Verona Ava Linear Array Radar (VALAR)
[AD-A289442] p 2337 N95-27147
Differenced Range Versus Integrated Doppler (DRVID) ionospheric analysis of metric tracking in the Tracking and Data Relay Satellite System (TDRSS)
p 2147 N95-27768
Telemetry down-link Doppler as an attitude sensor for spin stabilized spacecraft p 2150 N95-27785
GPS as an orbit determination subsystems
p 2152 N95-27793
Operational considerations of using GPS for spacecraft navigation p 2152 N95-27794
RADIAL DISTRIBUTION
The structure of lead-indium phosphate glass
[DE95-007130] p 2237 N95-27967
RADIAL FLOW
A general theory of two- and three-dimensional rotational flow in subsonic and transonic turbomachines
[NASA-CR-4496] p 2123 N95-28003
RADIANCE
SeaWiFS technical report series. Volume 26: Results of the SeaWiFS Data Analysis Round-Robin, July 1994 (DARR-1994)
[NASA-TM-104566-VOL-26] p 2345 N95-26430
Performance modeling of hyperspectral imaging sensors for atmospheric studies
[AD-A289017] p 2289 N95-26461
SeaWiFS technical report series. Volume 27: Case studies for SeaWiFS calibration and validation, part 3
[NASA-TM-104566-VOL-27] p 2348 N95-28030
A model of the diurnal variation in magnesium ion density and radiance in the thermosphere
[AD-A289824] p 2339 N95-28575
RADIANT HEATING
Radiant exchange considerations in design and scaleup of photocatalytic reactors for purification of nitroglycerine-contaminated air p 2171 N95-28300
RADIATION
Radiation in everyday life
[DE95-604111] p 2349 N95-26597
RADIATION ABSORPTION
The attenuation of microwave radiation by fog and rain
[AD-A288326] p 2249 N95-26562
Investigation of the collision line broadening problem as applicable to the NASA Optical Plume Anomaly Detection (OPAD) system, phase 1
[NASA-CR-198605] p 2426 N95-27913
Carbonaceous aerosols influencing atmospheric radiation: Black and organic carbon
[DE95-006437] p 2330 N95-28118
Anomalous cloud absorption? A critique of the paper entitled Absorption of Solar Radiation by Clouds: Observations Versus Models
[DE95-007703] p 2331 N95-28121
RADIATION CHEMISTRY
The effect of proteins on the aging properties of radiation vulcanized Natural Rubber Latex
[DE95-603357] p 2225 N95-26599
RADIATION COUNTERS
Silicon subsystem mechanical engineering closeout report for the Solenoidal Detector Collaboration
[DE95-006336] p 2421 N95-27735
The 1993 European school of high-energy physis
[DE95-610196] p 2421 N95-28040
RADIATION DAMAGE
Radiation in everyday life
[DE95-604111] p 2349 N95-26597
Annealing of radiation damaged gallium arsenide solar cells by laser illumination
[AD-A289683] p 2316 N95-26762
Toward a mechanistic understanding of radiation effects in materials
[DE95-006530] p 2221 N95-28120
RADIATION DETECTORS
Radiation sensitive area detection device and method
[NASA-CASE-MFS-28563-3] p 2423 N95-26385
Integration of video and radiation analysis data
[DE95-004165] p 2379 N95-26443
Detection of charged particles in superfluid helium
[DE95-007354] p 2403 N95-26560
Ionizing radiation measurements on LDEF: A0015 Free flyer biostack experiment
[NASA-CR-196603] p 2202 N95-27168
The physics program and status of the SLAC B-Factory and detector
[DE95-006562] p 2409 N95-27676
BEGET: The B-Factory Event Generator version 21
[DE95-008329] p 2414 N95-28171
Can TMAE photocathode be used for high rate applications?
[DE95-008594] p 2293 N95-28178
Cosmic ray test results of the D0 prototype scintillating fiber tracker
[DE95-007215] p 2415 N95-28221
RADIATION DISTRIBUTION
Radiation in everyday life
[DE95-604111] p 2349 N95-26597
A study of surface temperatures, clouds and net radiation
[NASA-CR-198589] p 2329 N95-27864
Carbonaceous aerosols influencing atmospheric radiation: Black and organic carbon
[DE95-006437] p 2330 N95-28118
International Ultraviolet Explorer Atlas of B-type spectra from 1200 to 1900 A
[NASA-RP-1363] p 2463 N95-28328
RADIATION DOSAGE
Radiation in everyday life
[DE95-604111] p 2349 N95-26597
The effect of proteins on the aging properties of radiation vulcanized Natural Rubber Latex
[DE95-603357] p 2225 N95-26599
Long-term variability of electron radiation dose in geosynchronous orbit
[AD-A289335] p 2162 N95-26902
Ionizing radiation measurements on LDEF: A0015 Free flyer biostack experiment
[NASA-CR-196603] p 2202 N95-27168
Materials considerations for molten salt accelerator-based plutonium conversion systems
[DE95-006743] p 2217 N95-27544
RADIATION EFFECTS
The effect of proteins on the aging properties of radiation vulcanized Natural Rubber Latex
[DE95-603357] p 2225 N95-26599
Radiation vulcanization of natural rubber latex
[DE95-600026] p 2226 N95-26637
Annealing of radiation damaged gallium arsenide solar cells by laser illumination
[AD-A289683] p 2316 N95-26762
Comparison of the resistance of the MOS integrated circuits with various types of nuclear radiation
[DE95-608623] p 2261 N95-27023
Investigation of radiation resistance of transistors and integrated circuits using the heavy ions beam of energy higher than 1 MeV/amu and fast neutrons
[DE95-608624] p 2261 N95-27024
Simulating the production of free defects in irradiated metals
[DE95-007165] p 2214 N95-27088
CAS CERN Accelerator School 5th General Accelerator Physics Course
[DE95-608324] p 2419 N95-27158
Numerical solution of fluid flow and heat tranfer problems with surface radiation p 2282 N95-27357
Radiation-induced grain boundary segregation in austenitic stainless steels
[DE95-005721] p 2216 N95-27493
Amorphization of complex ceramics by heavy-particle irradiations
[DE95-005725] p 2236 N95-27733
Density changes in amorphous Pd80Si20 during low temperature ion irradiation
[DE95-007132] p 2441 N95-27928
Sintering of textured YBa2Cu3O(7-x) under intensive Co-60 gamma irradiation
[DE95-007098] p 2442 N95-27950
Gamma ray-induced embrittlement of pressure vessel alloys
[DE95-007133] p 2220 N95-28072
Toward a mechanistic understanding of radiation effects in materials
[DE95-006530] p 2221 N95-28120
The real structure of columnar pinning centers in heavy-ion-irradiated cuprate superconductors
[DE95-003948] p 2445 N95-28186
The combined release and radiation effects satellite time history data base system
[AD-A289835] p 2165 N95-28578
RADIATION HAZARDS
Application of a Geographic Information System for radiologic emergency response
[DE95-007624] p 2455 N95-28113
RADIATION MEASUREMENT
Radon integral measurement system
[DE95-608074] p 2405 N95-27010
Ionizing radiation measurements on LDEF: A0015 Free flyer biostack experiment
[NASA-CR-196603] p 2202 N95-27168
Solar terrestrial radiation data from the Sleepers River Research Watershed
[AD-A288444] p 2464 N95-27184
LDEF: 69 Months in Space. Third Post-Retrieval Symposium, part 3
[NASA-CP-3275-PT-3] p 2466 N95-27629
RADIATION MEASURING INSTRUMENTS
The program for calculating sunshine duration from global radiation
[KNMI-TR-158] p 2343 N95-28237
RADIATION PROTECTION
Radiation safety aspects of commercial high-speed flight transportation
[NASA-TP-3524] p 2465 N95-26427
RADIATION PYROMETERS
Method and apparatus for polaradiometric pyrometer
[NASA-CASE-NPO-19064-1-CU] p 2290 N95-26765
RADIATION SHIELDING
Ionizing radiation measurements on LDEF: A0015 Free flyer biostack experiment
[NASA-CR-196603] p 2202 N95-27168
HZETRN: Description of a free-space ion and nucleon transport and shielding computer program
[NASA-TP-3495] p 2465 N95-28530
RADIATION SPECTRA
SeaWiFS technical report series. Volume 26: Results of the SeaWiFS Data Analysis Round-Robin, July 1994 (DARR-1994)
[NASA-TM-104566-VOL-26] p 2345 N95-26430
Cosmic ray test results of the D0 prototype scintillating fiber tracker
[DE95-007215] p 2415 N95-28221
RADIATION TOLERANCE
Radiation in everyday life
[DE95-604111] p 2349 N95-26597
Toward a mechanistic understanding of radiation effects in materials
[DE95-006530] p 2221 N95-28120
RADIATION TRANSPORT
HZETRN: Description of a free-space ion and nucleon transport and shielding computer program
[NASA-TP-3495] p 2465 N95-28530
Stationary neutrino radiation transport by maximum entropy closure
[DE95-006579] p 2463 N95-28558
RADIATIVE HEAT TRANSFER
Validation of the SINDA/FLUINT code using several analytical solutions p 2281 N95-27350
A case study of view-factor rectification procedures for diffuse-gray radiation enclosure computations
p 2281 N95-27353
CAE for thermal management of aerospace electronic boards using the BETAsoft program
p 2272 N95-27354
RADIATIVE TRANSFER
FTIR measurements of thermal infrared sky radiance and transmission
[DE95-003642] p 2334 N95-26436
Calculations of downward IR surface fluxes in the 500-3,000 cm(exp -1) wavenumber range for the 1994 ICRCCM model intercomparison study
[DE95-006430] p 2328 N95-27708
Observation on radiation transfer experiments using k-shell absorption spectra
[DE95-008068] p 2434 N95-28141
RADICALS
Engineering photochemical smog through convection towers
[DE95-007727] p 2328 N95-27686
On the synthesis of mixed-metal and mixed-pnicogen13-15 ring-systems
[AD-A288869] p 2223 N95-28332
Time-resolved FTIR emission studies of laser photofragmentation and radical reactions
[DE95-008125] p 2300 N95-28398
High energy density systems in cryogenic media: The production and reactions of atoms and radicals
[AD-A289818] p 2417 N95-28572
RADII
Preliminary design study of the beam collapser and certain optomechanical aspects of the siderostat
[AD-A288423] p 2423 N95-26549
Situation in study of electric polarizability and mean square charge radius of the neutron
[DE95-608869] p 2415 N95-28247

The minimum pore size obtainable in a silica gel during drying
[DE95-008162] p 2239 N95-28401

RADIO ALTIMETERS
An integrated GPS/INS/BARO and radar altimeter system for aircraft precision approach landings
[AD-A289280] p 2127 N95-26985

RADIO ASTRONOMY
Multiwavelength observations of unidentified high energy gamma-ray sources
[NASA-CR-197840] p 2465 N95-26630

RADIO COMMUNICATION
Assessment of long-distance HF radio and satellite communication assets for RNLAF out-of-area operations
[AD-A288633] p 2247 N95-26344

RADIO DIRECTION FINDERS
JPRS report: Science and technology. Central Eurasia
[JPRS-UST-95-019] p 2270 N95-28565

RADIO EMISSION
Theoretical and experimental models of the diffuse radar backscatter from Mars
[NASA-CR-198650] p 2463 N95-27700

RADIO EQUIPMENT
The evolution and impact of PCS technology
[AD-A288606] p 2255 N95-27249

RADIO FREQUENCIES
Electromagnetic spectrum occupancy study of a potential transmitter site for the HF Active Auroral Research Program (HAARP)
[AD-A288909] p 2249 N95-26564
Fast wave current drive in D3-D
[DE95-007582] p 2431 N95-27441
Multi-spacecraft coherent Doppler and ranging for interplanetary-navigation p 2150 N95-27786
One dimensional global and local solution for ICRF heating
[DE95-007984] p 2392 N95-28110
Engineering design of the ITER RF systems
[DE95-008064] p 2434 N95-28140
Method and apparatus for maintaining linearity and frequency accuracy of an FM chirp waveform
[AD-D017398] p 2258 N95-28615

RADIO FREQUENCY HEATING
Experimental aspects of effects of high-energy particles on Alfven modes
[DE95-003383] p 2432 N95-27873
One dimensional global and local solution for ICRF heating
[DE95-007984] p 2392 N95-28110
Faraday screen sputtering on TPX
[DE95-008347] p 2434 N95-28224

RADIO NAVIGATION
Analysis and simulation of narrowband GPS jamming using digital excision temporal filtering
[AD-A289328] p 2127 N95-26898
Multi-spacecraft coherent Doppler and ranging for interplanetary-navigation p 2150 N95-27786

RADIO OBSERVATION
Models of symbiotic stars p 2460 N95-27077

RADIO RECEIVERS
Flight evaluation of GPS/DGPS sensor systems installed in NAL Do228
[NAL-TR-1230] p 2126 N95-26585
VOCAR: An experiment in Variability of Coastal Atmospheric Refractivity
[AD-A289202] p 2253 N95-27006
Method and apparatus for maintaining linearity and frequency accuracy of an FM chirp waveform
[AD-D017398] p 2258 N95-28615

RADIO SIGNALS
An improved model of high-latitude f-region scintillation (WBMOD version 13)
[AD-A288558] p 2334 N95-26520
VOCAR: An experiment in Variability of Coastal Atmospheric Refractivity
[AD-A289202] p 2253 N95-27006

RADIO SOURCES (ASTRONOMY)
Multiwavelength observations of unidentified high energy gamma-ray sources
[NASA-CR-197840] p 2465 N95-26630

RADIO TELEMETRY
Radio telemetry buoy for long-range communication
[AD-D017269] p 2161 N95-28581

RADIO TRACKING
Radio telemetry buoy for long-range communication
[AD-D017269] p 2161 N95-28581

RADIO TRANSMISSION
An improved model of high-latitude f-region scintillation (WBMOD version 13)
[AD-A288558] p 2334 N95-26520
Information superhighway: Issues affecting development
[AD-A289434] p 2252 N95-26923
Modeling surface effects with the parabolic equation method
[AD-A289199] p 2254 N95-27021

RADIO TRANSMITTERS
Electromagnetic spectrum occupancy study of a potential transmitter site for the HF Active Auroral Research Program (HAARP)
[AD-A288909] p 2249 N95-26564
VOCAR: An experiment in Variability of Coastal Atmospheric Refractivity
[AD-A289202] p 2253 N95-27006

RADIO WAVES
Classification of RF transients in space using digital signal processing and neural network techniques
[DE95-006287] p 2256 N95-27840

RADIOACTIVE DECAY
Determination of the first hydrolysis constant of Europium (3) in 3 M of ionic strength
[DE95-607912] p 2405 N95-27211
Rare decays/CP: The perspective of a kaon physicist
[DE95-005964] p 2416 N95-28338

RADIOACTIVE ISOTOPES
Photon burst mass spectrometry--ultrasensitive detection of rare isotopes
[DE95-006403] p 2204 N95-27467
Search for deeply bound pionic atoms with high-purity germanium tagging spectrometer
[DE95-609072] p 2416 N95-28252

RADIOACTIVE MATERIALS
Recycle of radiologically contaminated austenitic stainless steels
[DE95-006464] p 2215 N95-27328

RADIOACTIVE WASTES
Recycle of radiologically contaminated austenitic stainless steels
[DE95-006464] p 2215 N95-27328
Transparent access to distributed, heterogeneous environmental information systems
[DE95-007268] p 2454 N95-27483
Multimedia Environmental Pollutant Assessment System (MEPAS) application guidance. Guidelines for evaluating MEPAS input parameters for Version 3.1
[DE95-007525] p 2328 N95-27749
Automated remedial assessment methodology software system
[DE95-007287] p 2373 N95-28243

RADIOACTIVITY
Determination of the first hydrolysis constant of Europium (3) in 3 M of ionic strength
[DE95-607912] p 2405 N95-27211
Development of an optical trap as an ultra-sensitive analytical tool
[DE95-007843] p 2426 N95-28022

RADIOLYSIS
Programming for time resolved spectrum in pulse radiolysis experiments
[DE95-607929] p 2406 N95-27212
Effects of hydrogen on carbon steels at the Multi-Function Waste Tank Facility
[DE95-007194] p 2219 N95-28005

RADIOMETERS
Conversion of sunflower multiband radiometer polarization measurements to polarization parameters
[NASA-CR-197774] p 2314 N95-26815
Solar terrestrial radiation data from the Sleepers River Research Watershed
[AD-A288444] p 2464 N95-27184
Millimeter-wave imaging radiometer data processing and development of water vapor retrieval algorithms
[NASA-CR-198593] p 2343 N95-27997
SeaWiFS technical report series. Volume 27: Case studies for SeaWiFS calibration and validation, part 3
[NASA-TM-104566-VOL-27] p 2348 N95-28030
Design, construction, test and evaluation of a frequency scanning radiometer for measuring oil slick thicknesses
[AD-A290040] p 2293 N95-28389

RADIUM
Flow cytometry as a means of detecting, enumerating and characterizing bacteria for monitoring of the environment
[AD-A288997] p 2326 N95-26610

RADOMES
Polarization sensitivity of monopulse radar boresight error induced by large, ogive radomes
[AD-A289254] p 2252 N95-26972

RADON
Radon integral measurement system
[DE95-608074] p 2405 N95-27010

RAILGUN ACCELERATORS
A high velocity electromagnetic mass launcher having an ablation resistant insulator
[AD-A288231] p 2154 N95-26524

RAIN
The attenuation of microwave radiation by fog and rain
[AD-A288326] p 2249 N95-26562
Synoptic features of the Yunan rainy season before the onset of the tropical monsoons
[AD-A289641] p 2342 N95-26724
Prediction of rain attenuation and total atmospheric attenuation for low-availability satellite communications in Europe
[PB95-184925] p 2252 N95-26908

RAM ACCELERATORS
Ram accelerator performance calculations using a modified version of the NASA CET89 equilibrium chemistry code
[AD-A289554] p 2201 N95-26678

RAMAN LASERS
Remote sensing of the atmosphere by resonance Raman LIDAR
[DE95-007312] p 2315 N95-28520

RAMAN SPECTRA
Spectral broadening of KrF laser radiation by self-seeded Raman amplification in long air paths
[DE95-003697] p 2297 N95-27718
Single molecule detection using charge-coupled device array technology
[DE95-006425] p 2411 N95-27953
Remote sensing of the atmosphere by resonance Raman LIDAR
[DE95-007312] p 2315 N95-28520

RAMAN SPECTROSCOPY
Analytical spectroscopy
[DE95-607896] p 2203 N95-27200
Remote sensing of the atmosphere by resonance Raman LIDAR
[DE95-007312] p 2315 N95-28520

RAMJET ENGINES
Transport phenomena and interfacial kinetics in multiphase combustion systems
[AD-A288297] p 2199 N95-26417
Numerical simulation of combustion flow around a flame holder with hydrogen injection
[NAL-TR-1233] p 2200 N95-26523

RANDOM NOISE
Balanced data focusing: Direction of arrival estimation with maximum likelihood performance
[AD-A288252] p 2248 N95-26407
A modified backpropagation algorithm for training neural networks on data with error bars
[DE95-608729] p 2381 N95-27025
Analysis of filter tuning techniques for sequential orbit determination p 2146 N95-27764
An automated method of tuning an attitude estimator
p 2148 N95-27774
An MME-based attitude estimator using vector observations p 2148 N95-27775
Post Kalman progress p 2148 N95-27776
Material characterization system
[AD-D017385] p 2210 N95-28584

RANDOM NUMBERS
A method for generating skewed random numbers using two overlapping uniform distributions
[DE95-008747] p 2392 N95-28162

RANDOM VARIABLES
A method for simulating correlated random variables from partially specified distributions
[AD-A288820] p 2393 N95-26347

RANGE (EXTREMES)
A comparison of measured wind park load histories with the WISPER and WISPERX load spectra
[DE95-000295] p 2319 N95-27459

RANGEFINDING
Multi-spacecraft coherent Doppler and ranging for interplanetary-navigation p 2150 N95-27786

RAPID QUENCHING (METALLURGY)
Spray-formed tooling
[DE95-005031] p 2246 N95-27404

RARE EARTH ELEMENTS
Crystal structure, short-range oxygen defects, and water adsorption in La- and Nd-modified ZrO2
[DE95-007134] p 2439 N95-27452
Defect characterization of electronic conducting pseudo-perovskite systems
[DE95-007487] p 2220 N95-28049
Characterization of solid state laser and nonlinear optical materials
[AD-A291684] p 2300 N95-28458

RARE GAS-HALIDE LASERS
A novel sensitive detector of atmospheric nitrocompounds based on laser photofragmentation/ionization spectrometry
p 2174 N95-28314

RARE GASES
A model of bubble evolution during decompression based on a Monte Carlo simulation of inert gas diffusion
[AD-A289400] p 2353 N95-26885

RAREFIED GAS DYNAMICS
Statistical model for molecular internal energy exchange in DSMC method for rarefied flow analysis
[ISAS-R-654] p 2274 N95-26741

Anomalous collision rate in the time counter scheme of the direct simulation Monte Carlo method for rarefied gas flow analysis
[ISAS-R-653] p 2275 N95-26742
A model of bubble evolution during decompression based on a Monte Carlo simulation of inert gas diffusion
[AD-A289400] p 2353 N95-26885

RAREFIED GASES
Rarefied gas effects on aerobraking/reentry vehicles with wakes
[NASA-CR-196586] p 2164 N95-27093

RATIONS
Performance enhancing ration components program: Supplemental carbohydrate test
[AD-A288560] p 2358 N95-26558

RATIOS
Investigation of boundary layer and performance effects of transpiration cooling through a porous plate in a rocket nozzle
[AD-A289393] p 2167 N95-26880

RATS
A model of the neural basis of the rat's sense of direction
[AD-A289678] p 2350 N95-26761
Hippocampal place fields, the internal compass, and the learning of landmark stability
[AD-A289406] p 2350 N95-27100

RAY TRACING
Transformation to zero offset in transversely isotropic media
[DE95-007669] p 2339 N95-28192

RAYLEIGH SCATTERING
Comparative experimental study of PIXE and X-ray fluorescence analysis
[DE95-607868] p 2327 N95-27198

RAYLEIGH WAVES
Very low frequency seismo-acoustic noise below the sea floor (0.2-10 Hz)
[AD-A289164] p 2347 N95-27011

RAYLEIGH-RITZ METHOD
Do we fully understand the symmetric Lanczos algorithm yet?
[AD-A289614] p 2368 N95-26855

RDX
Hazards analysis of an integral class 1.1/1.3 rocket motor demilitarization and ingredient recovery system using ammonia p 2174 N95-28315
A comprehensive energetic materials resource recovery and recycling program p 2176 N95-28323
Recovery and reuse of rocket motor propellant ingredients p 2177 N95-28326

REACTING FLOW
A fully implicit time accurate method for hypersonic combustion: Application to shock-induced combustion instability
[NASA-TM-106707] p 2273 N95-26380
Three-dimensional visualization of reactive flows in complex geometries
[DE95-006332] p 2284 N95-27845
Recent advances in PDF modeling of turbulent reacting flows p 2286 N95-27892
Modeling of turbulent chemical reaction
p 2286 N95-27899
PDF methods for turbulent reactive flows
p 2287 N95-27900
DNS, LES and stochastic modeling of turbulent reacting flows
[AD-A280099] p 2287 N95-28155

REACTION BONDING
Theoretical studies of reaction surfaces
[AD-A288458] p 2404 N95-26632

REACTION KINETICS
Transport phenomena and interfacial kinetics in multiphase combustion systems
[AD-A288297] p 2199 N95-26417
Stabilization and control of high energy intermediates through adsorption of restricted spaces
[AD-A288552] p 2201 N95-26606
Theoretical studies of reaction surfaces
[AD-A288458] p 2404 N95-26632
Stress corrosion cracking susceptibility of the earthquake resistant NOM B457 Mexican steel
[DE95-607956] p 2214 N95-27256
Non-metallic oxide inclusion formation in C-Mnlow alloy steel welds
[DE94-019160] p 2215 N95-27319
Analysis of gas absorption to a thin liquid film in the presence of a zero-order chemical reaction
p 2280 N95-27348
Single-drop reactive extraction/extractive reaction with forced convective diffusion and interphase mass transfer
p 2282 N95-27358
Single-drop reactive extraction/extractive reaction with forced convective diffusion and interphase mass transfer
p 2283 N95-27365
Intrusive multi-probe system
[DE95-006258] p 2292 N95-27465
Engineered materials for appliation in severe metallurgical environments: Tantalum-carbon alloy development
[DE95-006838] p 2216 N95-27488
High temperature kinetic study of the reactions H + O2 = OH + O and O + H2 = OH + H in H2/O2 system by shock tube-laser absorption spectroscopy
[NASA-CR-195473] p 2206 N95-27695
Kinetics and dynamics of oxidation reactions involving adsorbed CO species on bulk supported Pt and copper oxides
[DE95-006420] p 2207 N95-27952
Beyond transition state theory: Rigorous quantum approaches for determining chemical reaction rates
[DE95-008483] p 2208 N95-28086
The role of hydrogen in the hydrogenation and hydrogenolysis of aniline on the nickel single crystal surfaces: Its implication on the mechanisms of HDN reactions
[DE95-006687] p 2222 N95-28134
DNS, LES and stochastic modeling of turbulent reacting flows
[AD-A280099] p 2287 N95-28155
Polarization relaxation in zinc oxide varistors from 77 K to 450 K
[DE95-007761] p 2268 N95-28156
Analysis of forward and inverse problems in chemical dynamics and spectroscopy
[DE95-009309] p 2209 N95-28164
Use of SURFACE CHEMKIN to model multiphase atmospheric chemistry: Application to nitrogen tetroxide spills p 2172 N95-28305
Time-resolved FTIR emission studies of laser photofragmentation and radical reactions
[DE95-008125] p 2300 N95-28398
JPRS report: Science and technology. Central Eurasia
[JPRS-UST-95-019] p 2270 N95-28565
High temperature oxidation of nickel concentrates
[PB95-195566] p 2224 N95-28644

REACTION PRODUCTS
An overview of the Evaluation of Oxygen Interactions with Materials 3 experiment: Space Shuttle Mission 46, July-August 1992 p 2210 N95-27630
Molecular beam scattering from C-13 enriched Kapton and correlation with the EOIM-3 carousel experiment
p 2419 N95-27643

REACTION WHEELS
Design of a unidirectional composite momentum wheel rim
[NASA-TM-106911] p 2164 N95-27761

REACTION-DIFFUSION EQUATIONS
Single-drop reactive extraction/extractive reaction with forced convective diffusion and interphase mass transfer
p 2282 N95-27358

REACTIVITY
Spacecraft materials studies on the Aerospace Corporation tray on EOIM-3 p 2210 N95-27632
Atomic oxygen dosimetry measurements made on STS-46 by CONCAP 2 p 2418 N95-27634
Photochemistry in constrained spaces: Zeolites and layered double metal hydroxides
[DE95-006417] p 2207 N95-27951
TEM characterization of Al/Al2O3 composite fabricated by reactive metal infiltration
[DE95-008508] p 2184 N95-28145
High energy density systems in cryogenic media: The production and reactions of atoms and radicals
[AD-A289818] p 2417 N95-28572
Stratospheric ozone reactive chemicals generated by space launches worldwide
[AD-A289852] p 2332 N95-28623

REACTOR DESIGN
Evaluation of current drive requirements and operating characteristics of a high bootstrap fraction advanced tokamak reactor
[DE95-007041] p 2430 N95-27308
Heat pipe cooled reactors for multi-kilowatt space power supplies
[DE95-005211] p 2420 N95-27425
Hydrothermal oxidation of solid rocket propellant and other department of defense hazardous wastes
p 2177 N95-28325

REACTOR MATERIALS
FENIX experimental results of large-scale CICC made of bronze-processed Nb3Sn strands
[DE95-007965] p 2222 N95-28167
Attractive characteristics of mirrors
[DE95-008073] p 2435 N95-28356

REACTOR SAFETY
Application of a Geographic Information System for radiologic emergency response
[DE95-007624] p 2455 N95-28113

READERS
Multiclassifier fusion of an ultrasonic lip reader in automatic speech recognition
[AD-A289207] p 2254 N95-27079

READOUT
The KTeV pure CsI calorimeter
[DE95-005747] p 2292 N95-27751

REAGENTS
Energy transfer from excited nitrenes at high density
[AD-A288352] p 2403 N95-26466

REAL TIME OPERATION
Neural models of spatial orientation in novel environments
[AD-A288420] p 2380 N95-26530
Operating system support for coexistence of real-time and conventional scheduling
[AD-A288584] p 2364 N95-26534
Design and synthesis of a real-time controller for an unmanned air vehicle
[AD-A289134] p 2141 N95-26555
The D* algorithm for real-time planning of optimal traverses
[AD-A289361] p 2367 N95-26754
Next generation real-time systems: Investigating the potential of partial-solution tasks
[AD-A289203] p 2381 N95-27007
Application of bacterial bioemusifiers to in situ maintenance of oil/water separators
p 2179 N95-27120
A study of workstation computational performance for real-time flight simulation
[NASA-TM-109184] p 2362 N95-27241
SXI Prototype mirror mount
[NASA-CR-196613] p 2301 N95-27244
Real-time value-driven diagnosis
p 2386 N95-27396
Geophex airborne unmanned survey system
[DE95-007566] p 2131 N95-27440
PRISM validation
[AD-A288476] p 2337 N95-27703
Development of a Robust star identification technique for use in attitude determination of the ACE spacecraft
p 2149 N95-27777
Real-time data compression using a fixed Huffman encoding scheme
[DE95-006159] p 2455 N95-27949
Design of a real-time wind turbine simulator using a custom parallel architecture p 2322 N95-27979
Control system design for the MOD-5A 7.3 mW wind turbine generator p 2306 N95-27985
Application of modern diagnostic methods to environmental improvement
[DE95-005797] p 2330 N95-28119
Fault tolerant features and experiments of ANTS distributed real-time system
[AD-A290133] p 2256 N95-28391
Method of space-time sequence transform used to measure acousto-optic deflection and modulation
[AD-A289612] p 2402 N95-28671

RECEIVERS
Research and development report. Eureka 147: Tests of the error performance of the DAB system
[BBC-RD-1994/18] p 2249 N95-26696
ROC analysis of IR segmentation techniques
[AD-A289252] p 2424 N95-26971

RECLAMATION
A comprehensive energetic materials resource recovery and recycling program p 2176 N95-28323
Recovery and reuse of rocket motor propellant ingredients p 2177 N95-28326

RECOMBINATION COEFFICIENT
Theoretical studies of interstellar processes
[NASA-CR-198647] p 2462 N95-28216

RECOMBINATION REACTIONS
Theoretical studies of interstellar processes
[NASA-CR-198647] p 2462 N95-28216

RECOMMENDATIONS
High-stakes aviation: US-Japan technology linkages in transport aircraft
[LC-94-65759] p 2126 N95-27907
Report to Congressional Committees. Comanche Helicopter: Testing needs to be completed prior to production decisions
[GAO/NSIAD-95-112] p 2135 N95-27910
Report to the Chairman and Ranking Minority Member, Committee on Science, House of Representatives. Weather forecasting: Radar availability requirement not being met
[GAO/AIMD-95-132] p 2342 N95-27912

RECORDS MANAGEMENT
A demonstration of Client-Server technology using remote procedure calls with an application of file migration for moving records based on time
[AD-A289392] p 2453 N95-26879
Managing electronic records: A guideline
[DE95-007038] p 2456 N95-28555

RECOVERABLE SPACECRAFT

Chinese space science and technology [AD-A289618] p 2466 N95-26856

RECRYSTALLIZATION

Neutron diffraction studies on recrystallization of solution derived lead zirconate titanates [DE95-004771] p 2439 N95-27429

RECTANGULAR PANELS

Analysis of stresses in finite anisotropic panels with centrally located cutouts p 2187 N95-28286

RECTIFICATION

A case study of view-factor rectification procedures for diffuse-gray radiation enclosure computations p 2281 N95-27353

RECURSIVE FUNCTIONS

Solving recursive domain equations with enriched categories [AD-A289358] p 2371 N95-27418

RECYCLING

Marshall Space Flight Center solid waste characterization and recycling improvement study [NASA-CR-196594] p 2360 N95-27164

Recycle of radiologically contaminated austenitic stainless steels [DE95-006464] p 2215 N95-27328

Alternate use of rocket propellants as ingredients in commercial watergel explosives p 2176 N95-28321

A comprehensive energetic materials resource recovery and recycling program p 2176 N95-28323

Strategies for recycling CdTe photovoltaic modules [DE95-006776] p 2325 N95-28517

RED SHIFT

CO, HCO(+) and HCN absorption in the gravitational lens candidate B0218+357 at z=0.685 [PB95-185146] p 2461 N95-26522

The second coming of cold dark matter? [DE95-005156] p 2462 N95-27445

REDUCTION (CHEMISTRY)

Junkyard chemistry p 2227 N95-27102

REDUNDANCY

Autonomous control system reconfiguration for spacecraft with non-redundant actuators p 2153 N95-27802

REDUNDANT COMPONENTS

Retrofitting a fine-pointing system to satellite optics p 2157 N95-27277

REENTRY

Bow shock data analysis [AD-A288432] p 2429 N95-26800

REENTRY SHIELDING

Task 4 supporting technology. Part 1: Detailed test plan for leading edge tile development. Leading edge material development and testing [NASA-CR-198633] p 2160 N95-28258

Task 4 supporting technology. Part 2: Detailed test plan for thermal seals. Thermal seals evaluation, improvement and test. CAN8-1, Reusable Launch Vehicle (RLV), advanced technology demonstrator: X-33. Leading edge and seals thermal protection system technology demonstration [NASA-CR-198628] p 2304 N95-28259

REFINING

Structural chemistry of some phases in the YC-Ni-B system [DE95-007403] p 2447 N95-28537

Low-angle tracking in the presence of ducting, coherent and incoherent multipath [AD-A289838] p 2258 N95-28580

REFLECTANCE

Effects of the LDEF orbital environment on the reflectance of optical mirror materials p 2428 N95-27651

Functionalized block copolymers as adhesion promoters [DE95-008158] p 2239 N95-28400

REFLECTION

A spectral algorithm for the seriation problem [DE95-004775] p 2372 N95-27436

Multifractal character of the electronic states in disordered two-dimensional systems [DE95-609153] p 2443 N95-28016

Transformation to zero offset in transversely isotropic media [DE95-007669] p 2339 N95-28192

REFLECTORS

Micron Accuracy Deployment Experiment (MADE), phase A. Volume 1 [NASA-CR-197792] p 2144 N95-26426

Advanced neutron source materials surveillance program [DE95-005700] p 2215 N95-27464

REFRACTION

Design and fabrication of a diamond-turned hybrid diffractive/refractive singlet for visible applications at ORNL [DE95-007007] p 2427 N95-28552

REFRACTIVITY

Computation of electromagnetic scattering parameters for lognormal distributions of magnetic spheres: Theory and algorithms [AD-A289672] p 2250 N95-26759

Laser beam propagation in non-Kolmogorov atmospheric turbulence [AD-A289256] p 2295 N95-26974

Ambient-pressure silica aerogel films [DE95-008161] p 2237 N95-28090

Seismic constraints on shallow crustal processes at the East Pacific rise [AD-A289055] p 2338 N95-28094

Passive spatial beam control, appendix [AD-A288913] p 2300 N95-28333

Perturbations on effective index of refraction from prism coupling [AD-A291700] p 2427 N95-28524

REFRACTORY MATERIALS

Theory of exotic superconductivity and normal states of heavy electron and high temperature superconductivity materials [DE95-006637] p 2268 N95-28198

Boron-carbon-silicon polymers and the ceramic thereof [NASA-CASE-ARC-11891-1-SB] p 2238 N95-28212

An overview of activities and accomplishments of the Metals and Ceramics Division [DE95-007020] p 2241 N95-28560

REFRIGERANTS

Methods development for measuring and classifying flammability/combustibility of refrigerants. Task 2: Test plan [DE95-007066] p 2234 N95-27481

Methods development for measuring and classifying flammability/combustibility of refrigerants. Task 1: Annotated bibliography [DE95-007232] p 2238 N95-28133

REFUELING

Recent high-speed ballistics experiments at ORNL [DE95-006534] p 2422 N95-28205

Piecemeal learning of an unknown environment [AD-A291683] p 2387 N95-28461

REGRESSION ANALYSIS

Parallelizing locally-weighted regression [AD-A288294] p 2394 N95-26414

Analysis of fatigue fractographic data of a rod end housing using a Monte Carlo simulation [NAL-TR-1225] p 2307 N95-26521

REGULATIONS

Standards for excellence [NONP-NASA-VT-95-49096] p 2451 N95-27202

REGULATORS

Post Kalman progress p 2148 N95-27776

REINFORCED PLASTICS

Rheological measurement methods for fibre filled plastics [PB95-190088] p 2226 N95-26744

REINFORCED SHELLS

Load transfer in the stiffener-to-skin joints of a pressurized fuselage [NASA-CR-198610] p 2310 N95-27865

REINFORCEMENT (STRUCTURES)

Nondestructive testing apparatus for determining the orientation of reinforcing bars within a concrete structure [AD-D017267] p 2245 N95-26508

Recent progress in NASA Langley textile reinforced composites program p 2196 N95-28475

REINFORCING FIBERS

Rheological measurement methods for fibre filled plastics [PB95-190088] p 2226 N95-26744

Mechanical performance of fiber reinforced metal matrix composites and microstructural development of polycrystalline alumina fibers synthesized from liquid precursors [AD-A289518] p 2181 N95-26847

Composite repair of metallic airframe: Twenty years of experience p 2132 N95-27508

Ceramic fiber-reinforced monoclinic celsian phase glass-ceramic matrix composite material [NASA-CASE-LEW-15714-1] p 2183 N95-27717

Design of a unidirectional composite momentum wheel rim [NASA-TM-106911] p 2164 N95-27761

Service tough composite structures using the Z-direction reinforcement process p 2185 N95-28272

Mechanical properties of triaxially braided composites: Experimental and analytical results p 2189 N95-28423

Application of advanced material systems to composite frame elements p 2191 N95-28432

Comparison of resin film infusion, resin transfer molding, and consolidation of textile preforms for primary aircraft structure p 2196 N95-28477

Fundamental concepts in the suppression of delamination buckling by stitching p 2198 N95-28486

REINFORCING MATERIALS

Split pipe testing device for the measurement of bond of reinforcement under controlled confinement [AD-D017258] p 2245 N95-26500

Recent progress in NASA Langley textile reinforced composites program p 2196 N95-28475

RELATIVISTIC EFFECTS

Proofs of contracted length non-covariance [DE95-610175] p 2391 N95-27715

Was Einstein 100% right? [PB95-190179] p 2449 N95-28175

RELATIVISTIC ELECTRON BEAMS

Femtosecond X-ray generation through 90 degrees Thomson scattering: Status of the LBL experiment [DE95-006560] p 2296 N95-27674

High power free-electron laser concepts and problems [DE95-007841] p 2298 N95-28059

RELATIVISTIC PARTICLES

Long-term variability of electron radiation dose in geosynchronous orbit [AD-A289335] p 2162 N95-26902

Extended BRST symmetry for the relativistic particle with curvature [DE95-608799] p 2406 N95-27309

Field theory of point-like systems with higher-order derivatives [DE95-608800] p 2448 N95-27310

Large relativistic corrections to the positronium decay rate [DE95-610470] p 2407 N95-27412

Relativistic electrons in the outer-zone: An 11 year cycle, their relation to the solar wind [DE95-007882] p 2338 N95-28061

RELATIVITY

The method of space-time conservation element and solution element-applications to one-dimensional and two-dimensional time-marching flow problems [NASA-TM-106915] p 2389 N95-26663

Was Einstein 100% right? [PB95-190179] p 2449 N95-28175

General relativity and experiment [PB95-192894] p 2450 N95-28664

RELAXATION (MECHANICS)

Analysis of instability growth and collisionless relaxation in thermionic converters using 1-D PIC simulations [AD-A289310] p 2319 N95-26891

High-speed coherent laser arrays [AD-A289373] p 2295 N95-26906

RELAXATION METHOD (MATHEMATICS)

A fully implicit time accurate method for hypersonic combustion: Application to shock-induced combustion instability [NASA-TM-106707] p 2273 N95-26380

Random relaxation of fixed point iteration [PB95-185013] p 2389 N95-26910

RELIABILITY

Compiler-assisted debugging and multiple instruction retry [NASA-CR-197729] p 2365 N95-26628

Statistical theory and reliability [AD-A288519] p 2394 N95-26733

Comparison of life theories for rolling-element bearings [NASA-TM-106585] p 2301 N95-26774

Can there be reliability without reliability? [AD-A289480] p 2306 N95-26927

Quest for excellence 5 [NONP-NASA-VT-95-49099] p 2451 N95-27205

Malcolm Baldrige National Quality Award winners 1989 [NONP-NASA-VT-95-49119] p 2451 N95-27207

Quality assurance and reliability in the Japanese electronics industry p 2263 N95-27232

Electric vehicle activities [DE95-006648] p 2267 N95-28105

Low-power, parallel photonic interconnections for Multi-Chip Module applications [DE95-008518] p 2267 N95-28147

Software technology for adaptable, reliable systems (STARS). AdaWise user's manual [AD-A289655] p 2375 N95-28635

RELIABILITY ANALYSIS

Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation. Volume 5: Auxiliary shuttle risk analyses [NASA-CR-197812] p 2160 N95-26403

The 1994 updated National Airspace System performance assessment for year 2005 [AD-A288652] p 2125 N95-26485

Using SCR methods to analyze requirements documentation [NASA-CR-197760] p 2365 N95-26668

I(sub DDQ) testing and defect classes: A tutorial
[DE95-005467] p 2306 N95-27723
Performance analysis of bullet trajectory estimation: Approach, simulation, and experiments
[DE95-007949] p 2399 N95-28109
Reliability analysis of composite structures
p 2192 N95-28441
Uncertainties in obtaining high reliability from stress-strength models p 2193 N95-28442

RELIABILITY ENGINEERING
Intelligent computer based reliability assessment of multichip modules
[AD-A288833] p 2259 N95-26550
Digital optical computing
[AD-A289395] p 2368 N95-26881
Human factors in aviation maintenance, phase 4
[DOT/FAA/AM-95/14] p 2360 N95-27696
Reliability analysis of composite structures
p 2192 N95-28441
Uncertainties in obtaining high reliability from stress-strength models p 2193 N95-28442
Probabilistic design of advanced composite structure
p 2193 N95-28443
Proof test methodology for composites
p 2193 N95-28445
Post impact compressive strength in composites
p 2198 N95-28485

RELIEF MAPS
Naval Aviation System TEAM mapping, charting, and geodesy handbook
[AD-A288590] p 2314 N95-26841

REMOTE CONTROL
A foveated system to reduce transmission bandwidth of video images from remote camera systems
[AD-A288516] p 2254 N95-27060
Performance of the Satellite Test Assistant Robot in JPL's Space Simulation Facility p 2154 N95-27264
Geophex airborne unmanned survey system
[DE95-007566] p 2131 N95-27440
Pre-integrated truss space station and method of assembly
[NASA-CASE-MSC-22015-1] p 2165 N95-27842

REMOTE MANIPULATOR SYSTEM
Design, testing and evaluation of latching end effector
p 2155 N95-27261

REMOTE SENSING
FTIR measurements of thermal infrared sky radiance and transmission
[DE95-003642] p 2334 N95-26436
Radiometer measurements of snow in Sodankylae, 1991-1993
[PB95-184966] p 2313 N95-26645
Subvisual cirrus: What it is and where you find it
[AD-A289329] p 2342 N95-26899
VOCAR: An experiment in Variability of Coastal Atmospheric Refractivity
[AD-A289202] p 2253 N95-27006
Structures and materials technology needs for communications and remote sensing spacecraft
[NASA-CR-198166] p 2163 N95-27026
Design, development and testing of the x-ray timing explorer High Gain Antenna System
p 2157 N95-27279
Improved performance 1590 nm Er:YLF laser
[DE95-003691] p 2296 N95-27705
Portable laser laboratory
[DE95-008376] p 2298 N95-27876
Remote sensing of hydrologic variables in boreal areas, phase 2
[NASA-CR-198717] p 2314 N95-27998
Remote measurement of ground temperature and emissivity
[DE95-008055] p 2314 N95-28053
Method for determining surface coverage by materials exhibiting different fluorescent properties
[NASA-CASE-GSC-13539-1] p 2315 N95-28211
Altimeter analysis of ocean currents
[AD-A290167] p 2315 N95-28392
Remote sensing of the atmosphere by resonance Raman LIDAR
[DE95-007312] p 2315 N95-28520
Binary segmentation of SAR images by the ICM algorithm
[INPE-5464-PRE/1772] p 2258 N95-28559
High performance ground penetrating radar survey of TA-49/Area 2
[DE95-006856] p 2258 N95-28601
Modeling and retrieval of snow and sea ice characteristics in the frequency range 6 to 90 GHz
[PB95-195467] p 2316 N95-28656
Neural networks in the classification of uses of the soil in satellite images
[INPE-5478-PRE/1777] p 2316 N95-28672

REMOTE SENSORS
A probabilistic target classification and description model for seismic sensors
[AD-A288548] p 2335 N95-26531
Earth horizon modeling and application to static Earth sensors on TRMM spacecraft p 2150 N95-27783
WTEC panel report on research submersibles and undersea technologies
[NASA-CR-198565] p 2247 N95-27909
Large HAWT wake measurement and analysis
p 2289 N95-27973

REMOTELY PILOTED VEHICLES
Design and synthesis of a real-time controller for an unmanned air vehicle
[AD-A289134] p 2141 N95-26555
Reactor pressure vessel structural integrity research
[DE95-007034] p 2223 N95-28208
Unmanned aerial vehicles, 1994 master plan
[AD-A291628] p 2136 N95-28411

REMOVAL
CO2 pellet blast cleaning and degreasing: The true environmentally benign technology
p 2229 N95-27109
Aqueous degreasing, precision cleaning, and cleanliness verification p 2231 N95-27121
Preferentially etched epitaxial liftoff of InP material
[NASA-CASE-LEW-15760-1] p 2235 N95-27503
Process for non-contact removal of organic coatings from the surface of paintings
[NASA-CASE-LEW-15896-1] p 2235 N95-27702
Cryogenic washout of solid rocket propellants
p 2176 N95-28324

RENDEZVOUS GUIDANCE
An analysis of orbital propagators for Low Earth Orbit Rendezvous
[AD-A288883] p 2161 N95-26458

RENDEZVOUS TRAJECTORIES
An analysis of orbital propagators for Low Earth Orbit Rendezvous
[AD-A288883] p 2161 N95-26458

REPLACING
A summary of ODS replacement technologies at Litton Poly-Scientific p 2228 N95-27105
Vapor pressures of mixtures of CFC-114 with the potential replacement coolants C4F(10) andc-C4F 8
[DE95-003444] p 2208 N95-28042

REPLICAS
Scale model experiments with ceramic laminate targets
[AD-A288322] p 2225 N95-26561
Two implementation relations and the correctness of communicating replicated processes
[PB95-195640] p 2375 N95-28645

RESEARCH
Bibliography of NRL publications - 1990
[AD-A289483] p 2466 N95-26823
The high speed civil transport and NASA's High Speed Research (HSR) program p 2118 N95-26945
Laboratory of production engineering
[PB95-184834] p 2451 N95-28135

RESEARCH AIRCRAFT
Flightpath synthesis and HUD scaling for V/STOL terminal area operations
[NASA-TM-110348] p 2127 N95-26587

RESEARCH AND DEVELOPMENT
Concurrent engineering research center
[NASA-CR-197726] p 2362 N95-26386
Performance enhancing ration components program: Supplemental carbohydrate test
[AD-A288560] p 2358 N95-26558
Development test of á liquid Apogee engine for the ETS-6
[NAL-TR-1250] p 2167 N95-26799
The aerospace database: An introduction to AIAA'S computerized source for identifying scientific and technical information p 2119 N95-26950
JPRS report: Science and technology. Central Eurasia
[JPRS-UST-95-021] p 2202 N95-27155
JPRS report: Science and technology. Central Eurasia
[JPRS-UST-95-016] p 2262 N95-27170
JPRS report: Science and technology. Central Eurasia
[JPRS-UST-95-014] p 2145 N95-27171
NIST Automated Manufacturing Research Facility (AMRF): March 1987
[NONP-NASA-VT-95-49097] p 2246 N95-27203
JPRS report: Science and technology. Central Eurasia
[JPRS-UST-95-015] p 2246 N95-27213
Building the electronic industry's roadmaps
p 2263 N95-27228
Japan's technology and manufacturing infrastructure
p 2263 N95-27229
Successful product realization strategies
p 2264 N95-27233
Current programmes on physical metallurgy and related areas in BARC
[DE95-607939] p 2214 N95-27255
Advanced Earth-to-orbit propulsion technology information, dissemination and research
[NASA-CR-196582] p 2168 N95-27424
Advances in welding science: A perspective
[DE95-006745] p 2302 N95-27545
Spaceflight revolution: NASA Langley Research Center from Sputnik to Apollo
[NASA-SP-4308] p 2474 N95-27685
JTEC monograph on biodegradable polymers and plastics in Japan: Research, development, and applications
[NASA-CR-198562] p 2235 N95-27694
JPRS report: Science and technology. Central Eurasia
[JPRS-UST-94-022] p 2246 N95-27699
Recent progress in the Photovoltaic Manufacturing Technology Project (PVMaT)
[DE95-000279] p 2320 N95-27704
WTEC panel report on research submersibles and undersea technologies
[NASA-CR-198565] p 2247 N95-27909
Collected papers on wind turbine technology
[NASA-CR-195432] p 2321 N95-27970
Research and Technology Objectives and Plans Summary (RTOPS)
[NASA-TM-108574] p 2475 N95-28002
JTEC/WTEC annual report and program summary: 1993/94
[NASA-CR-198563] p 2475 N95-28038
LLNL input to FY94 hydrogen annual report
[DE95-007950] p 2243 N95-28064
Transportation R and D included in thermal and mechanical sciences program
[DE95-008275] p 2303 N95-28070
Methods development for measuring and classifying flammability/combustibility of refrigerants. Task 1: Annotated bibliography
[DE95-007232] p 2238 N95-28133
JPRS Report: Science and Technology. Central Eurasia
[JPRS-UST-95-020] p 2145 N95-28257
Development of an ultra-safe rechargeable lithium-ion battery
[AD-A288959] p 2269 N95-28349
Attractive characteristics of mirrors
[DE95-008073] p 2435 N95-28356
An overview of activities and accomplishments of the Metals and Ceramics Division
[DE95-007020] p 2241 N95-28560
JPRS report: Science and technology. Central Eurasia
[JPRS-UST-95-019] p 2270 N95-28565

RESEARCH FACILITIES
Live from Antarctica: Then and now
[NASA-CR-197829] p 2335 N95-26594
Design and development of experimental facilities for short duration, low-gravity combustion and fire experiments
[NASA-CR-195458] p 2244 N95-26709
Preliminary results and research capabilities of a new jet facility at the University of Kansas
p 2119 N95-26951
NIST Automated Manufacturing Research Facility (AMRF): March 1987
[NONP-NASA-VT-95-49097] p 2246 N95-27203
NIST: Information management in the AMRF
[NONP-NASA-VT-95-49120] p 2454 N95-27208
Microgravity Sciences Biotechnology Facility assessment
[NASA-CR-196602] p 2351 N95-27329
Three-dimensional computer modeling of hydrogen injection and combustion
[DE95-006261] p 2203 N95-27437
Intermediate energy neutrons at WNR. Spin-isospin and energy dependence of the NN interaction and the nuclear response
[DE95-006291] p 2408 N95-27466
A review of Australian and New Zealand investigations on aeronautical fatigue during the period Apr. 1993 - Mar. 1995
[AR-009-202] p 2136 N95-27918
An overview of activities and accomplishments of the Metals and Ceramics Division
[DE95-007020] p 2241 N95-28560

RESEARCH MANAGEMENT
Funding for AFRAPT student trainees for academic year 1992-1993
[AD-A288461] p 2466 N95-26604
Bibliography of patents and licenses 1951-1990. 1991 edition
[AD-A289603] p 2452 N95-26721
Research and Technology Objectives and Plans Summary (RTOPS)
[NASA-TM-108574] p 2475 N95-28002

RESEARCH PROJECTS
Activities of the Laboratory of Information Processing Science
[PB95-184982] p 2452 N95-26631

Automated Procurement System (APS) revised project management plan (DS-03)
[NASA-CR-196605] p 2450 N95-27169
Chemical engineering: Measurements for a competitive age
[NONP-NASA-VT-95-49098] p 2203 N95-27204
Spaceflight revolution: NASA Langley Research Center from Sputnik to Apollo
[NASA-SP-4308] p 2474 N95-27685
A review of Australian and New Zealand investigations on aeronautical fatigue during the period Apr. 1993 - Mar. 1995
[AR-009-202] p 2136 N95-27918
Collected papers on wind turbine technology
[NASA-CR-195432] p 2321 N95-27970
A comprehensive energetic materials resource recovery and recycling program p 2176 N95-28323

RESEARCH VEHICLES
Computational analysis of forebody tangential slot blowing on the high alpha research vehicle
[NASA-CR-197754] p 2129 N95-26591
Numerical simulation of the flow about the F-18 HARV at high angle of attack
[NASA-CR-197755] p 2121 N95-26735
Electric vehicle activities
[DE95-006648] p 2267 N95-28105

RESIDUAL STRENGTH
Life prediction methodology for composite laminates. Part 1: Constant amplitude and two-stress level fatigue
[AD-A288343] p 2180 N95-26571
Modeling considerations in the prediction of residual strength in composite laminates
[AD-A289128] p 2182 N95-27142
Assembly induced delaminations in composite structures p 2186 N95-28279
Investigation of static and cyclic bearing failure mechanisms for GR/EP laminates p 2190 N95-28427
Compressive residual strength of graphite/epoxy laminates after impact p 2191 N95-28431

RESIDUAL STRESS
Fatigue fracture analysis in medium carbon structural steel and austenitic stainless steel by X-ray fractography
[DE95-601504] p 2213 N95-26675
Growth of hydrogenated amorphous silicon (a-Si:H) on patterned substrates for increased mechanical stability
[DE95-006589] p 2234 N95-27472
On the thermally-induced residual stresses in thick fiber-thermoplastic matrix (PEEK) cross-ply laminated plates p 2187 N95-28285
Residual stress, strain, and faults in nanocrystalline palladium and copper
[DE95-008294] p 2223 N95-28543

RESIDUES
CO2 pellet blast cleaning and degreasing: The true environmentally benign technology
p 2229 N95-27109
Ethyl lactate as a solvent alternative for cleaning metal parts p 2229 N95-27112
Hardware cleanliness methodology and certification
p 2211 N95-27656

RESIN MATRIX COMPOSITES
Stress analysis and failure of an internally pressurized composite-jacketed steel cylinder p 2186 N95-28280
Static and dynamic strain energy release rates in toughened thermosetting composite laminates
p 2188 N95-28288
Characteristics of laminates with delamination control strips p 2191 N95-28434

RESIN TRANSFER MOLDING
A fast numerical method for isothermal resin transfer mold filling
[AD-A288944] p 2179 N95-26565
Development of a low-cost, modified resin transfer molding process using elastomeric tooling and automated preform fabrication p 2184 N95-28268
Resin transfer molding of textile preforms for aircraft structural applications p 2185 N95-28276
Development of stitched/RTM composite primary structures p 2195 N95-28469
Test and analysis results for composite transport fuselage and wing structures p 2137 N95-28470
Composite fuselage crown panel manufacturing technology p 2137 N95-28474
Advanced textile applications for primary aircraft structures p 2138 N95-28476
Comparison of resin film infusion, resin transfer molding, and consolidation of textile preforms for primary aircraft structure p 2196 N95-28477
Characterization and manufacture of braided composites for large commercial aircraft structures
p 2196 N95-28478

RESINS
Fractionation studies of polyethylene using DSC-technique
[PB95-185252] p 2200 N95-26540
Composite repair of metallic airframe: Twenty years of experience p 2132 N95-27508
Field repair materials for naval aircraft
p 2133 N95-27514
A new technique for ground simulation of hypervelocity debris p 2154 N95-27671
Polymer infiltration studies
[NASA-CR-198801] p 2236 N95-27857
Development of stitched/RTM composite primary structures p 2195 N95-28469
Surfactants and desensitizing wax substitutes for TNT-Based systems
[AD-A289652] p 2243 N95-28634

RESISTANCE HEATING
OBIC analysis of stressed, thermally-isolated polysilicon resistors
[DE95-008511] p 2268 N95-28201

RESISTORS
OBIC analysis of stressed, thermally-isolated polysilicon resistors
[DE95-008511] p 2268 N95-28201
Energy-measuring resistor bank
[AD-D017392] p 2271 N95-28613

RESONANCE
Study of parity and time reversal violation in neutron-nucleus interactions
[DE95-005158] p 2405 N95-27081
CAS CERN Accelerator School 5th General Accelerator Physics Course
[DE95-608324] p 2419 N95-27158
A note on the constituent quark resonances
[DE95-608831] p 2406 N95-27316
Observation of nonlinear resonances in the advanced light source
[DE95-006561] p 2425 N95-27675
NQR-NMR studies of higher alcohol synthesis Cu-Co catalysts
[DE95-007926] p 2205 N95-27680
A numerical study of ultra-short-pulse reflectometry
[DE95-008070] p 2266 N95-28015
Shear Alfven wave excitation by direct antenna coupling and fast wave resonant mode conversion
[DE95-609109] p 2256 N95-28254
Subharmonic phonon transmission and Kapitza conductance between crystals with very different vibrational spectra
[DE95-609151] p 2447 N95-28608

RESONANCE SCATTERING
The Bremsstrahlung of soft gamma-quanta created by elastic pp- and np-scatterings and the dibaryon resonance problem
[DE95-608870] p 2415 N95-28248
Remote sensing of the atmosphere by resonance Raman LIDAR
[DE95-007312] p 2315 N95-28520

RESONANT FREQUENCIES
Extended linear ion trap frequency standard apparatus
[NASA-CASE-NPO-19081-1-CU] p 2404 N95-26861
Extended linear ion trap frequency standard apparatus
[NASA-CASE-NPO-19081-1-CU] p 2416 N95-28348
Material characterization system
[AD-D017385] p 2210 N95-28584

RESONANT VIBRATION
Material characterization system
[AD-D017385] p 2210 N95-28584

RESONATORS
Analytical investigations of the acceleration sensitivity of acoustic bulk and surface wave resonators
[AD-A291715] p 2402 N95-28505

RESOURCES MANAGEMENT
An ugly duckling becomes a swan (hor ellipsis): How an organization becomes customer focused through listening
[DE95-004974] p 2454 N95-27461
Evaluating the environmental viability of open burning/open detonation operations
p 2170 N95-28297
Commercial reformulation: An economic and environmentally neutral means of managing explosives and solid propellants p 2175 N95-28320

RESPIRATORY RATE
A study of heart rate and heart rate variability during rapid decompression to 50,000 ft
[AD-A291598] p 2355 N95-28561

RESTORATION
Process for non-contact removal of organic coatings from the surface of paintings
[NASA-CASE-LEW-15896-1] p 2235 N95-27702

RETINAL IMAGES
Neural models of spatial orientation in novel environments
[AD-A288420] p 2380 N95-26530

RETROFITTING
Retrofitting conventional vapor degreasers to use a solvent wash/fluorochemical rinse process
p 2232 N95-27127
Retrofitting a fine-pointing system to satellite optics
p 2157 N95-27277
Retrofitting a fine-pointing system to satellite optics
[DE95-004529] p 2427 N95-28516

REUSABLE HEAT SHIELDING
Task 4 supporting technology. Part 1: Detailed test plan for leading edge tile development. Leading edge material development and testing
[NASA-CR-198633] p 2160 N95-28258

REUSABLE LAUNCH VEHICLES
Reusable launch vehicle development research
[NASA-CR-196614] p 2154 N95-27245
Task 4 supporting technology. Part 1: Detailed test plan for leading edge tile development. Leading edge material development and testing
[NASA-CR-198633] p 2160 N95-28258
Task 4 supporting technology. Part 2: Detailed test plan for thermal seals. Thermal seals evaluation, improvement and test. CAN8-1, Reusable Launch Vehicle (RLV), advanced technology demonstrator: X-33. Leading edge and seals thermal protection system technology demonstration
[NASA-CR-198628] p 2304 N95-28259
Task 4 supporting technology. Densification requirements definition and test objectives. Propellant densification requirements definition
[NASA-CR-198629] p 2450 N95-28260

REVERBERATION CHAMBERS
Photoacoustic chambers for studying solids and gases: Theory and practical examples
[IFTR-39/1994] p 2143 N95-26837

REVERSE FIELD PINCH
Far-infrared laser interferometry measurements on the STP-3(M) reversed-field pinch
[DE94-765440] p 2297 N95-27868
Global dynamo in a reversed field pinch plasma
[DE94-765441] p 2432 N95-27869
Burst of energetic ions from reversed field pinch plasma
[DE94-765447] p 2432 N95-27870

REYNOLDS EQUATION
Computational analysis of forebody tangential slot blowing on the high alpha research vehicle
[NASA-CR-197754] p 2129 N95-26591
A 3D agglomeration multigrid solver for the Reynolds-averaged Navier-Stokes equations on unstructured meshes
[NASA-CR-195073] p 2390 N95-27029

REYNOLDS NUMBER
Comparative wind tunnel test at high Reynolds numbers of NACA 64 621 airfoils with two aileron configurations
p 2124 N95-27977

REYNOLDS STRESS
Effect of turbulence models on criticality conditions in swirling flows p 2282 N95-27356
Dithering transitions in resistive pressure-gradient-driven turbulence
[DE95-006737] p 2431 N95-27536

RHENIUM COMPOUNDS
An investigation of the applicability of the new Reillex(tm)-HPQ anion exchange resin system for technetium/rhenium and uranium in the Hanford waste tanks
[DE95-007643] p 2412 N95-28051

RHEOLOGY
Rheological measurement methods for fibre filled plastics
[PB95-190088] p 2226 N95-26744

RHEOMETERS
Measurement of viscosity by capillary rheometry: Dwell time effects
[PB95-190203] p 2201 N95-26750

RIBS (SUPPORTS)
Composite sandwich structure and method for making same
[NASA-CASE-LAR-14898-1] p 2180 N95-26764

RICHARDSON NUMBER
Three objective indices for clear-air turbulence reconsidered
[KNMI-TR-160] p 2342 N95-27366

RIEMANN MANIFOLD
Hyperkaehler metrics associated to compact Lie groups
[PB95-185161] p 2388 N95-26514
Holomorphic curves in Abelian varieties, part 1
[DE95-608749] p 2396 N95-27300
Harmonic maps of the bounded symmetric domains
[DE95-608798] p 2397 N95-27485
Collapsing and solvmanifolds
[PB95-196267] p 2393 N95-28501

RIGID STRUCTURES
Manual for SHOCK3D, version 2.0. Computer program for non-linear shock response
[AD-A288631] p 2307 N95-28342

A modified proportional navigation scheme for rendezvous and docking with tumbling targets: The Planar case p 2150 N95-27764
Composite fuselage shell structures research at NASA Langley Research Center p 2194 N95-28466
RIMS
Comparison of numerical results and multicavity purge and rim seal data with extensions to dynamics
[NASA-TM-106685] p 2168 N95-27434
Design of a unidirectional composite momentum wheel rim
[NASA-TM-106911] p 2164 N95-27761
RING STRUCTURES
Ball bearing vibrations amplitude modeling and test comparisons p 2158 N95-27286
RINGS (MATHEMATICS)
Some commutativity theorems for a certain class of rings
[DE95-608750] p 2390 N95-27302
RIO GRANDE (NORTH AMERICA)
Investigation of rifting processes in the Rio Grande Rift using data from an unusually large earthquake swarm
[DE95-007623] p 2339 N95-28126
RISC PROCESSORS
Optimization strategies for molecular dynamics programs on Cray computers and scalar work stations
[AD-A289574] p 2418 N95-28648
RISK
Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation, volume 1
[NASA-CR-197808] p 2159 N95-26398
Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation. Volume 2: Integrated loss of vehicle model
[NASA-CR-197809] p 2159 N95-26399
Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation. Volume 3: Basic events and minimal cutsets
[NASA-CR-197810] p 2160 N95-26400
Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation. Volume 4: System models and data analysis
[NASA-CR-197811] p 2160 N95-26401
Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation. Volume 5: Auxiliary shuttle risk analyses
[NASA-CR-197812] p 2160 N95-26403
Software risk management through independent verification and validation
[NASA-CR-197767] p 2364 N95-26486
Fuzzy-algebra uncertainty assessment
[DE95-005426] p 2391 N95-27432
An introductory guide to uncertainty analysis in environmental and health risk assessment. Environmental Restoration Program
[DE95-008097] p 2354 N95-28136
ROADS
Using virtual active vision tools to improve autonomous driving tasks
[AD-A289175] p 2356 N95-27013
ELVIS: Eigenvectors for land vehicle image system
[AD-A289297] p 2381 N95-27041
ROBOT ARMS
Dynamic coupling of underactuated manipulators
[AD-A289404] p 2301 N95-27098
Some mechanical design aspects of the European Robotic Arm p 2155 N95-27262
Advanced development for space robotics with emphasis on fault tolerance p 2155 N95-27263
A rotating arm using shape-memory alloy
p 2157 N95-27276
ROBOT CONTROL
Learning Hand/Eye coordination by an active observer. part 1: Organizing centers
[AD-A289502] p 2356 N95-26843
Multi-agent perception for Human/Robot interaction: A framework for intuitive trajectory modification
[AD-A289399] p 2359 N95-26884
Advanced development for space robotics with emphasis on fault tolerance p 2155 N95-27263
Performance of the Satellite Test Assistant Robot in JPL's Space Simulation Facility p 2154 N95-27264
Stable adaptive neurocontrollers for spacecraft and space robots p 2384 N95-27385
A linguistic geometry for 3D strategic planning
p 2386 N95-27397
ROBOTICS
The D* algorithm for real-time planning of optimal traverses
[AD-A289361] p 2367 N95-26754
Learning Hand/Eye coordination by an active observer. part 1: Organizing centers
[AD-A289502] p 2356 N95-26843
Multi-agent perception for Human/Robot interaction: A framework for intuitive trajectory modification
[AD-A289399] p 2359 N95-26884
A systems engineering approach to electro-mechanical reconfiguration for mobility autonomy
[AD-A289479] p 2301 N95-26926
Survey and implementation of commercial manual controllers for a generic telerobotics architecture
[AD-A289215] p 2381 N95-26990
The 29th Aerospace Mechanisms Symposium
[NASA-CP-3293] p 2154 N95-27260
Design, testing and evaluation of latching end effector
p 2155 N95-27261
Some mechanical design aspects of the European Robotic Arm p 2155 N95-27262
Advanced development for space robotics with emphasis on fault tolerance p 2155 N95-27263
The Strategic Technologies for Automation and Robotics (STEAR) program: Protection of materials in the space environment subprogram p 2242 N95-27669
ALLIANCE: An architecture for fault tolerant, cooperative control of heterogeneous mobile robots
[DE95-007374] p 2387 N95-28536
Bilateral force feedback for hydraulically actuated systems
[AD-A291632] p 2387 N95-28545
ROBOTS
The D* algorithm for real-time planning of optimal traverses
[AD-A289361] p 2367 N95-26754
A systems engineering approach to electro-mechanical reconfiguration for mobility autonomy
[AD-A289479] p 2301 N95-26926
Dynamic coupling of underactuated manipulators
[AD-A289404] p 2301 N95-27098
Performance of the Satellite Test Assistant Robot in JPL's Space Simulation Facility p 2154 N95-27264
ALLIANCE: An architecture for fault tolerant, cooperative control of heterogeneous mobile robots
[DE95-007374] p 2387 N95-28536
ROBUSTNESS (MATHEMATICS)
Intelligent computer based reliability assessment of multichip modules
[AD-A288833] p 2259 N95-26550
Attitude determination using an adaptive multiple model filtering Scheme p 2148 N95-27772
Development of a Robust star identification technique for use in attitude determination of the ACE spacecraft
p 2149 N95-27777
SAR noise reduction through the utilization of robust filters
[INPE-5504-PRE/1787] p 2258 N95-28569
ROCHE LIMIT
Models for various aspects of dwarf novae and nova-like stars p 2459 N95-27071
ROCK INTRUSIONS
Seismic constraints on shallow crustal processes at the East Pacific rise
[AD-A289055] p 2338 N95-28094
ROCK MECHANICS
Planning, design and construction of the cavern arena: Heating, ventilation and air conditioning
[PB95-196382] p 2361 N95-28659
ROCKET ENGINE DESIGN
Propellant injection systems and processes
[NASA-TM-110632] p 2242 N95-26781
Advanced Earth-to-orbit propulsion technology information, dissemination and research
[NASA-CR-196582] p 2168 N95-27424
Micro electric propulsion feasibility
[NASA-CR-189139] p 2168 N95-28000
ROCKET ENGINES
Electromechanical rotary actuator
p 2157 N95-27278
RTE: A computer code for Rocket Thermal Evaluation
p 2177 N95-27355
The demilitarization of class 1.1 rocket motors using high pressure waterjets p 2176 N95-28322
ROCKET EXHAUST
Bow shock data analysis
[AD-A288432] p 2429 N95-26800
Investigation of the collision line broadening problem as applicable to the NASA Optical Plume Anomaly Detection (OPAD) system, phase 1
[NASA-CR-198605] p 2426 N95-27913
ROCKET FLIGHT
Bow shock data analysis
[AD-A288432] p 2429 N95-26800
ROCKET LAUNCHING
Development and implementation of a system safety program for the space launch complex 3 east (SLC-3E) ground support system project to support Atlas 2 family of space launch vehicles p 2174 N95-28316
ROCKET PROPELLANTS
High pressure Earth storable rocket technology program: Basic program
[NASA-CR-195449] p 2166 N95-26390
The demilitarization of class 1.1 rocket motors using high pressure waterjets p 2176 N95-28322
ROCKS
The Alpha-Proton-X-ray Spectrometer deployment mechanism: An anthropomorphic approach to sensor placement on Martian rocks and soil
p 2155 N95-27265
ROCKWELL HARDNESS
Improved hardness RHA weldability and material property testing
[AD-A289127] p 2221 N95-28102
ROCKY MOUNTAINS (NORTH AMERICA)
Meso-beta scale numerical simulation studies of terrain-induced jet streak mass/momentum perturbations
[NASA-CR-197804] p 2335 N95-26592
RODS
Identification of the plastic anisotropy of an aluminum alloy
[IFTR-26/1994] p 2212 N95-26512
Analysis of fatigue fractographic data of a rod end housing using a Monte Carlo simulation
[NAL-TR-1225] p 2307 N95-26521
Extended linear ion trap frequency standard apparatus
[NASA-CASE-NPO-19081-1-CU] p 2404 N95-26861
Extended linear ion trap frequency standard apparatus
[NASA-CASE-NPO-19081-1-CU] p 2416 N95-28348
Nonlinear optical studies of surfaces
[DE95-006574] p 2428 N95-28557
ROLL
Compiler-assisted debugging and multiple instruction retry
[NASA-CR-197729] p 2365 N95-26628
An investigation of the effects of pitch-roll (de)coupling on helicopter handling qualities
[NASA-TM-110349] p 2141 N95-26773
ROLLERS
Preliminary design study of the beam collapser and certain optomechanical aspects of the siderostat
[AD-A288423] p 2423 N95-26549
Composite prepreg application device
[NASA-CASE-LAR-15259-1] p 2182 N95-27192
The development and testing of ceramic components in piston engines
[DE95-005759] p 2236 N95-27946
ROLLING CONTACT LOADS
Design and development of a test rig for the high frequency testing of rolling sleeve airsprings
[DSTO-TN-0001] p 2142 N95-26378
Comparison of life theories for rolling-element bearings
[NASA-TM-106585] p 2301 N95-26774
ROOFS
Building-integrated photovoltaics: A case study
[DE95-004032] p 2325 N95-28396
ROOM TEMPERATURE
Optical features of nanosize iron and molybdenum sulfide clusters
[DE95-005417] p 2202 N95-27136
Molecular approach to mesoporous metal sulfides
[DE95-005418] p 2202 N95-27137
Laser ultrasonic generation at the surface of a liquid metal
[DE95-004999] p 2216 N95-27477
Characterization of defects in deuterium-implanted beryllium
[DE95-005688] p 2217 N95-27553
High temperature Hexoloy(trademark) SX silicon carbide
[DE95-007290] p 2221 N95-28075
Mechanical properties of Hysol EA-9394 structural adhesive
[DE95-008187] p 2240 N95-28405
ROSS ICE SHELF
Subsurface radar investigations at the Pegasus Glacial-ice Runway and Williams Field, McMurdo Station, Antarctica
[AD-A289323] p 2144 N95-27297
ROTARY STABILITY
Comparison of numerical results and multicavity purge and rim seal data with extensions to dynamics
[NASA-TM-106685] p 2168 N95-27434
Whirl plus tilt
[DE95-007948] p 2399 N95-28108
ROTARY WING AIRCRAFT
Vibration analysis of a split path gearbox
[NASA-TM-106875] p 2302 N95-27855
Evaluation of a doubly-swept blade tip for rotorcraft noise reduction
[NASA-CR-189677] p 2402 N95-28264
Application of advanced material systems to composite frame elements p 2191 N95-28432

Rotorcraft crashworthy airframe and fuel system technology development program [AD-A289986] p 2126 N95-28630

ROTARY WINGS

An experimental investigation of helicopter downwash and tailboom interaction at the Wichita State University 7x10 foot wind tunnel p 2120 N95-26955

Flow structure generated by perpendicular blade vortex interaction and implications for helicopter noise predictions [NASA-CR-198590] p 2123 N95-28193

Aeroelasticity and structural optimization of composite helicopter rotor blades with swept tips [NASA-CR-4665] p 2136 N95-28262

Evaluation of a doubly-swept blade tip for rotorcraft noise reduction [NASA-CR-189677] p 2402 N95-28264

Nonlinear dynamics and aeroelasticity of rotorcraft in forward flight [AD-A291714] p 2136 N95-28504

Modeling helicopter blade dynamics using a modified Myklestad-Prohl transfer matrix method [AD-A289891] p 2136 N95-28626

ROTATING BODIES

The calculation of the mass moment of inertia of a fluid in a rotating rectangular tank [NASA-CR-197777] p 2278 N95-27165

ROTATING DISKS

Magnetic viscosity by localized shear flow instability in magnetized accretion disks [DE95-006879] p 2433 N95-28111

ROTATING FLUIDS

A phenomenological treatment of rotating turbulence [NASA-CR-198168] p 2288 N95-28228

ROTATING PLASMAS

Effect of toroidal plasma flow and flow shear on global MHD modes [DE95-006676] p 2433 N95-28106

Wall stabilization of rotating high (Beta) discharges in D3-D [DE95-008207] p 2435 N95-28406

ROTATING SHAFTS

Use of blade pitch control to provide power train damping for the Mod-2, 2.5-mW wind turbine p 2306 N95-27986

ROTATION

Investigation into the behavior of geometrically nonlinear composite arches [AD-A289258] p 2308 N95-26975

A new angle on the Euler angles p 2153 N95-27800

Whirl plus tilt [DE95-007948] p 2399 N95-28108

Wall stabilization of rotating high (Beta) discharges in D3-D [DE95-008207] p 2435 N95-28406

Modeling helicopter blade dynamics using a modified Myklestad-Prohl transfer matrix method [AD-A289891] p 2136 N95-28626

ROTATIONAL SPECTRA

Basic principles and recent observations of rotationally sampled wind p 2321 N95-27971

A model of rotationally-sampled wind turbulence for predicting fatigue loads in wind turbines p 2312 N95-27972

ROTOR AERODYNAMICS

Aircraft noise prediction program theoretical manual: Rotorcraft System Noise Prediction System (ROTONET), part 4 [NASA-TM-83199-PT-4] p 2400 N95-26392

Development and validation of a blade-element mathematical model for the AH-64A Apache helicopter [NASA-TM-108863] p 2118 N95-26710

Preliminary analysis of dynamic stall effects on a 91-meter wind turbine rotor p 2124 N95-27975

ROTOR BLADES (TURBOMACHINERY)

Comparison of numerical results and multicavity purge and rim seal data with extensions to dynamics [NASA-TM-106685] p 2168 N95-27434

Preliminary analysis of dynamic stall effects on a 91-meter wind turbine rotor p 2124 N95-27975

Comparative wind tunnel tests of NACA 23024 airfoils with several aileron and spoiler configurations p 2124 N95-27976

ROTOR DYNAMICS

Aircraft noise prediction program theoretical manual: Rotorcraft System Noise Prediction System (ROTONET), part 4 [NASA-TM-83199-PT-4] p 2400 N95-26392

Development and validation of a blade-element mathematical model for the AH-64A Apache helicopter [NASA-TM-108863] p 2118 N95-26710

Stall precursor study of high frequency data for three high speed, swept compressor rotors [AD-A289379] p 2139 N95-26878

Whirl plus tilt [DE95-007948] p 2399 N95-28108

Modeling helicopter blade dynamics using a modified Myklestad-Prohl transfer matrix method [AD-A289891] p 2136 N95-28626

ROTORS

Optimization of wave rotors for use as gas turbine engine topping cycles [NASA-TM-106951] p 2140 N95-27860

Comparative wind tunnel tests of NACA 23024 airfoils with several aileron and spoiler configurations p 2124 N95-27976

Whirl plus tilt [DE95-007948] p 2399 N95-28108

RUBBER

The effect of proteins on the aging properties of radiation vulcanized Natural Rubber Latex [DE95-603357] p 2225 N95-26599

Radiation vulcanization of natural rubber latex [DE95-600026] p 2226 N95-26637

Variation of solvent scattering-length density small-angle neutron scattering as a means of determining structure of composite materials [DE95-005394] p 2183 N95-27428

RUBIDIUM

Toward coherent excitation: Development of a single-source pump for the rubidium hyperfine ground state doublet [AD-A289413] p 2295 N95-27132

RUBIDIUM COMPOUNDS

Muon spin relaxation in antiferromagnets: A study of RbMnF3 based on the coupled-mode theory of paramagnetic and critical spin fluctuations [PB95-192878] p 2418 N95-28642

RUN TIME (COMPUTERS)

A demonstration of Client-Server technology using remote procedure calls with an application of file migration for moving records based on time [AD-A289392] p 2453 N95-26879

Design of a real-time wind turbine simulator using a custom parallel architecture p 2322 N95-27979

RUNGE-KUTTA METHOD

Parallel block implicit integration technique for trajectory parallelism [AD-A288961] p 2379 N95-28335

Third-order-accurate numerical methods for efficient, large time-step solutions of mixed linear and nonlinear problems [DE95-009184] p 2288 N95-28533

Numerical study to assess sulfur hexafluoride as a medium for testing multielement airfoils [NASA-TP-3496] p 2124 N95-28674

RUNWAY CONDITIONS

Subsurface radar investigations at the Pegasus Glacial-ice Runway and Williams Field, McMurdo Station, Antarctica [AD-A289323] p 2144 N95-27297

RUNWAYS

Precision landing system mathematical modeling study report for Andrews Air Force Base, runway 19L, Camp Springs, MD [AD-A289015] p 2127 N95-27903

RUPTURING

Design prediction for long term stress rupture service of composite pressure vessels p 2188 N95-28291

RUSSIAN FEDERATION

JPRS report: Science and technology. Central Eurasia [JPRS-UST-95-021] p 2202 N95-27155

JPRS report: Science and technology. Central Eurasia [JPRS-UST-95-016] p 2262 N95-27170

JPRS report: Science and technology. Central Eurasia [JPRS-UST-95-014] p 2145 N95-27171

JPRS report: Science and technology. Central Eurasia [JPRS-UST-95-015] p 2246 N95-27213

JPRS report: Science and technology. Central Eurasia [JPRS-UST-94-022] p 2246 N95-27699

WTEC panel report on research submersibles and undersea technologies [NASA-CR-198565] p 2247 N95-27909

The distribution of cloud cover over the former USSR as derived from the RIHMI 223-Station 3-hourly meteorological database [DE95-007046] p 2343 N95-27920

JPRS Report: Science and Technology. Central Eurasia [JPRS-UST-95-020] p 2145 N95-28257

JPRS report: Science and technology. Central Eurasia [JPRS-UST-95-019] p 2270 N95-28565

Computational and experimental studies of hydrodynamic instabilities and turbulent mixing [DE95-006837] p 2288 N95-28603

RUTHENIUM COMPOUNDS

Photochemistry in constrained spaces: Zeolites and layered double metal hydroxides [DE95-006417] p 2207 N95-27951

RUTILE

The influence of surface structure on the interaction of water with TiO2(100) [DE95-004927] p 2203 N95-27401

S

S MATRIX THEORY

On the Hopf structure of U(p,q)(gl(1/1)) and the universal Tau-matrix of Fun(p,q)(GL(1/1)) [DE95-608755] p 2448 N95-27333

S WAVES

Energetic particle destabilization of shear Alfven waves in stellarators and tokamaks [DE95-006393] p 2431 N95-27419

Shear Alfven wave excitation by direct antenna coupling and fast wave resonant mode conversion [DE95-609109] p 2256 N95-28254

SACCHAROMYCES

Biochemically vulnerable sites for antifungal intercession in the control of fungal growth [AD-A288345] p 2348 N95-26573

SAFEGUARD SYSTEM

Development and implementation of a system safety program for the space launch complex 3 east (SLC-3E) ground support system project to support Atlas 2 family of space launch vehicles p 2174 N95-28316

SAFETY

Fuzzy-algebra uncertainty assessment [DE95-005426] p 2391 N95-27432

Current status of environmental, health, and safety issues of lithium polymer electric vehicle batteries [DE95-004005] p 2265 N95-27719

Implementing an integrated standards-based management system to ensure compliance at Los Alamos National Laboratory [DE95-007873] p 2451 N95-28025

Lithium ion rechargeable systems studies [DE95-006810] p 2268 N95-28200

Reactor pressure vessel structural integrity research [DE95-007034] p 2223 N95-28208

Development of an ultra-safe rechargeable lithium-ion battery [AD-A288959] p 2269 N95-28349

SAFETY FACTORS

Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation, volume 1 [NASA-CR-197808] p 2159 N95-26398

A comparison of error categorization schemes for use in software system safety programs [AD-A288741] p 2371 N95-27251

Development and implementation of a system safety program for the space launch complex 3 east (SLC-3E) ground support system project to support Atlas 2 family of space launch vehicles p 2174 N95-28316

SAFETY MANAGEMENT

Evaluating the environmental viability of open burning/open detonation operations p 2170 N95-28297

Cape Canaveral air station launch emergency response forces and toxic materials release contingency plans p 2172 N95-28306

Development and implementation of a system safety program for the space launch complex 3 east (SLC-3E) ground support system project to support Atlas 2 family of space launch vehicles p 2174 N95-28316

SAMPLED DATA SYSTEMS

Robust hybrid state-space self-tuning control using dual-rate sampling [AD-A288359] p 2380 N95-26468

SAMPLING

Robust hybrid state-space self-tuning control using dual-rate sampling [AD-A288359] p 2380 N95-26468

Use of mussels in biomonitoring of environmental impacts of propellants, projectiles, explosives, and pyrotechnics p 2170 N95-28298

Design, construction, test and evaluation of a frequency scanning radiometer for measuring oil slick thicknesses [AD-A290040] p 2293 N95-28389

Evaluation of defect-related diffusion in semiconductors by electrooptical sampling [AD-A291630] p 2270 N95-28544

SANDS

The biodegradation of fuels in soils and sediments: Differences as a function of mineralogy p 2230 N95-27116

SANDWICH STRUCTURES

Composite sandwich structure and method for making same [NASA-CASE-LAR-14898-1] p 2180 N95-26764

An experimental investigation of sandwich flat panels under low velocity impact [AD-A289420] p 2309 N95-27135

Composite repair issues on the CF-18 aircraft
p 2134 N95-27518
External patch repair of CFRP/honeycomb sandwich
p 2134 N95-27522
Application of fiber-reinforced bismaleimide materials to aircraft nacelle structures
p 2137 N95-28278

SAPPHIRE
Coherent V2O3 precipitates in alpha-Al2O3CO-implanted with vanadium and oxygen
[DE95-007404] p 2444 N95-28081
Cesium/oxide interactions for ultrathin films on (alpha)-Al2O3(001) and (alpha)-Al2O3(1(bar 1)O2)
[DE95-008159] p 2238 N95-28358

SATELLITE ANTENNAS
Telemetry down-link Doppler as an attitude sensor for spin stabilized spacecraft
p 2150 N95-27785

SATELLITE ATTITUDE CONTROL
Autonomous control system reconfiguration for spacecraft with non-redundant actuators
p 2153 N95-27802
Micro electric propulsion feasibility
[NASA-CR-189139] p 2168 N95-28000

SATELLITE COMMUNICATION
Assessment of long-distance HF radio and satellite communication assets for RNLAF out-of-area operations
[AD-A288633] p 2247 N95-26344
Prediction of rain attenuation and total atmospheric attenuation for low-availability satellite communications in Europe
[PB95-184925] p 2252 N95-26908
Preliminary flight software specification for the petite amateur Navy satellite (PANSAT)
[AD-A280068] p 2165 N95-28150

SATELLITE CONSTELLATIONS
An architecture and protocol for communications satellite constellations regarded as multi-agent systems
p 2166 N95-27377

SATELLITE CONTROL
Generic satellite monitoring expert system
[AD-A289209] p 2163 N95-26987
An architecture and protocol for communications satellite constellations regarded as multi-agent systems
p 2166 N95-27377
GPS as an orbit determination subsystems
p 2152 N95-27793
Dynamics and control of SEDSAT tethered multi-probe for thermospheric research flight data analysis of SEDS-2 satellite: Tethered systems dynamics and flight data analysis
[NASA-CR-198653] p 2165 N95-27836

SATELLITE DESIGN
Structures and materials technology needs for communications and remote sensing spacecraft
[NASA-CR-198166] p 2163 N95-27026
Low-cost tubular antenna deployer for WISP-2
p 2156 N95-27269
Non-explosive actuation for the ORBCOMM (TM) satellite
p 2156 N95-27274
Long Duration Exposure Facility post-flight data as it influences the Tropical Rainfall Measuring Mission
p 2345 N95-27666

SATELLITE IMAGERY
The design and implementation of the Military Applications of Shiptracks experiment on Space Transportation System - 65
[AD-A288488] p 2160 N95-26634
The Solar X-ray Imager Vacuum Door Assembly
p 2157 N95-27280
Improved reduced-resolution satellite imagery
p 2376 N95-27388
Reconstruction of an infrared band of meteorological satellite imagery with abductive networks
[SAIC-94/1062] p 2345 N95-27389
Speckle spectrum of the ERS-1 wavemode product
[PB95-196564] p 2315 N95-28180
Neural networks in the classification of uses of the soil in satellite images
[INPE-5478-PRE/1777] p 2316 N95-28672

SATELLITE INSTRUMENTS
Model-based monitoring and diagnosis of a satellite-based instrument
p 2166 N95-27390
Solar UV flux measurements from the SBUV2 monitor on the NOAA9 satellite. Part 1: Mg II h and k line core-to-wing ratios for 1986-1988
[PB95-181962] p 2464 N95-28007

SATELLITE LIFETIME
Dynamics and control of SEDSAT tethered multi-probe for thermospheric research flight data analysis of SEDS-2 satellite: Tethered systems dynamics and flight data analysis
[NASA-CR-198653] p 2165 N95-27836

SATELLITE OBSERVATION
Technical report series on global modeling and data assimilation. Volume 6: A multiyear assimilation with the GEOS-1 system: Overview and results
[NASA-TM-104606-VOL-6] p 2334 N95-26423
The design and implementation of the Military Applications of Shiptracks experiment on Space Transportation System - 65
[AD-A288488] p 2160 N95-26634
Deep convection in the Mediterranean Sea
[AD-A288497] p 2346 N95-26647
Differenced Range Versus Integrated Doppler (DRVID) ionospheric analysis of metric tracking in the Tracking and Data Relay Satellite System (TDRSS)
p 2147 N95-27766
An in situ evaluation of TOPEX/Poseidon altimetric measurements versus meaurements made by moorings and inverted echo sounders for sea surface height
[NASA-CR-198621] p 2347 N95-27805
Studies of radar backscatter as a function of wave properties and the winds in the turbulent marine atmosphere
[NASA-CR-198608] p 2315 N95-28209
Altimeter analysis of ocean currents
[AD-A290167] p 2315 N95-28392

SATELLITE ORBITS
Space modeler: An expanded, distributed, virtual environment for space visualization
[AD-A289409] p 2461 N95-27131
Earth horizon modeling and application to static Earth sensors on TRMM spacecraft
p 2150 N95-27783
Determining GPS average performance metrics
p 2128 N95-27791
Estimation of attitude sensor timetag biases
p 2153 N95-27799

SATELLITE ORIENTATION
Optimization of a nutation damper attached to a spin-stabilized satellite
[AD-A289424] p 2162 N95-26887
Evaluation and modeling of autonomous attitude thrust control for the Geostation Operational Environmental Satellite (GOES)-8 orbit determination
p 2146 N95-27765
An MME-based attitude estimator using vector observations
p 2148 N95-27775
Earth horizon modeling and application to static Earth sensors on TRMM spacecraft
p 2150 N95-27783
Telemetry down-link Doppler as an attitude sensor for spin stabilized spacecraft
p 2150 N95-27785
Estimation of attitude sensor timetag biases
p 2153 N95-27799
Autonomous control system reconfiguration for spacecraft with non-redundant actuators
p 2153 N95-27802

SATELLITE TRACKING
Generic satellite monitoring expert system
[AD-A289209] p 2163 N95-26987
Flight Mechanics/Estimation Theory Symposium 1995
[NASA-CP-3299] p 2146 N95-27763
Evaluation and modeling of autonomous attitude thrust control for the Geostation Operational Environmental Satellite (GOES)-8 orbit determination
p 2146 N95-27765
Differenced Range Versus Integrated Doppler (DRVID) ionospheric analysis of metric tracking in the Tracking and Data Relay Satellite System (TDRSS)
p 2147 N95-27766
Accurate orbit determination strategies for the tracking and data relay satellites
p 2147 N95-27768
Use of nonlinear identification in robust attitude and attitude rate estimation for SAMPEX
p 2149 N95-27781
Determining GPS average performance metrics
p 2128 N95-27791
A demonstration of unified TDRS/GPS tracking and orbit determination
p 2151 N95-27792
GPS as an orbit determination subsystems
p 2152 N95-27793

SATELLITE-BORNE INSTRUMENTS
Retrofitting a fine-pointing system to satellite optics
p 2157 N95-27277
Design, development and testing of the x-ray timing explorer High Gain Antenna System
p 2157 N95-27279
The Solar X-ray Imager Vacuum Door Assembly
p 2157 N95-27280
SAMPEX special pointing mode
p 2149 N95-27780
A simple method for verifying the deployment of the TOMS-EP solar arrays
p 2150 N95-27782
Retrofitting a fine-pointing system to satellite optics
[DE95-004529] p 2427 N95-28516

SATELLITE-BORNE RADAR
Telemetry down-link Doppler as an attitude sensor for spin stabilized spacecraft
p 2150 N95-27785
A demonstration of unified TDRS/GPS tracking and orbit determination
p 2151 N95-27792

SATURATION
Measurement of the D0 WAMUS magnet inductance
[DE95-005128] p 2399 N95-27530

SCALARS
On higher derivative gravity in two dimensions
[DE95-608789] p 2462 N95-27343
Two-body bound states and the Bethe-Salpeter equation
[DE95-008302] p 2392 N95-27742
Advances in scientific visualization
[DE95-008065] p 2343 N95-28014

SCALE EFFECT
Scaling issues in dynamic fragmentation
[DE95-008509] p 2309 N95-27745

SCALE MODELS
Scale model experiments with ceramic laminate targets
[AD-A288322] p 2225 N95-26561
Spray-formed tooling
[DE95-005031] p 2246 N95-27404
Large HAWT wake measurement and analysis
p 2289 N95-27973
Comparative wind tunnel tests of NACA 23024 airfoils with several aileron and spoiler configurations
p 2124 N95-27976

SCALING LAWS
Scaling of localization length of a quasi 1D system with longitudinal boundary roughness
[DE95-609148] p 2391 N95-27739
Theoretical aspects of energy confinement in spheromaks
[DE95-008079] p 2435 N95-28542

SCANNERS
MHD simulations of DC helicity injection for current drive in tokamaks
[DE95-007018] p 2429 N95-26940
A cryogenic scan mechanism for use in Fourier transform spectrometers
p 2158 N95-27287
High-performance reactionless scan mechanism
p 2158 N95-27288
Reconstruction of an infrared band of meteorological satellite imagery with abductive networks
[SAIC-94/1062] p 2345 N95-27389

SCANNING ELECTRON MICROSCOPY
Tensile properties of Fe-16 at. % Al alloys
[DE95-007102] p 2215 N95-27450
C15 intermetallic compounds HfV2+Nb
[DE95-005264] p 2215 N95-27463
Formation of anisotropic Tl-1212, Tl-2212, Tl-1223 and Tl-2223 particles using aerosol flow reacted powders
[DE95-007400] p 2444 N95-28079
Ambient-pressure silica aerogel films
[DE95-008161] p 2237 N95-28090

SCANNING TUNNELING MICROSCOPY
Boron-induced reconstructions of Si(100) investigated by scanning tunneling microscopy
[AD-A289222] p 2438 N95-26959
Boron-induced morphology changes in silicon CVD growth: A scanning tunneling microscopy study
[AD-A289275] p 2290 N95-26982

SCATTERING
User's and test case manual for FEMATS
[NASA-CR-197803] p 2366 N95-26694
Improving the performance of spiral antennas by using passive scatterers
[AD-A289324] p 2251 N95-26893
Variation of solvent scattering-length density small-angle neutron scattering as a means of determining structure of composite materials
[DE95-005394] p 2183 N95-27428
Integrating the QMR method with first principles material science application code
[DE95-007380] p 2408 N95-27456
Femtosecond X-ray generation through 90 degrees T homson scattering: Status of the LBL experiment
[DE95-006560] p 2296 N95-27674

SCATTERING CROSS SECTIONS
Statistical model for molecular internal energy exchange in DSMC method for rarefied flow analysis
[ISAS-R-654] p 2274 N95-26741

SCATTEROMETERS
Studies of radar backscatter as a function of wave properties and the winds in the turbulent marine atmosphere
[NASA-CR-198608] p 2315 N95-28209

SCHEDULES
A hybrid vehicle evaluation code and its application to vehicle design. Revision 1
[DE95-008053] p 2303 N95-28029
A hybrid vehicle evaluation code and its application to vehicle design, revision 2
[DE95-008060] p 2303 N95-28139
International journal of quantum chemistry
[AD-A291633] p 2352 N95-28546

SCHEDULING
Parallelism detection and scheduling strategies for reliable and efficient execution on multicomputers
[AD-A288370] p 2376 N95-26471

Operating system support for coexistence of real-time and conventional scheduling
[AD-A288584] p 2364 N95-26534

Grain size management in repetitive task graphs for multiprocessor computer scheduling
[AD-A288575] p 2377 N95-26551

Design tool for multiprocessor scheduling and evaluation of iterative dataflow algorithms
[NASA-TP-3491] p 2366 N95-26685

A gain scheduling optimization method using genetic algorithms
[AD-A289306] p 2381 N95-26920

Integrated planning and scheduling for Earth science data processing p 2384 N95-27382

A sustainable genetic algorithm for satellite resource allocation p 2376 N95-27383

A rule-based shell to hierarchically organize HST observations p 2384 N95-27384

SCHLIEREN PHOTOGRAPHY

Visualization of the multiple supersonic jet oscillations by swept focused strobed schlieren technique
p 2119 N95-26952

Schlieren System and method for moving objects
[NASA-CASE-LAR-15053-1] p 2291 N95-27191

SCHOOLS

CAS CERN Accelerator School 5th General Accelerator Physics Course
[DE95-608324] p 2419 N95-27158

SCHOTTKY DIODES

The effects of temperature on Schottky diode barrier height and evidence of multiple barrier
[DE95-609147] p 2264 N95-27405

Low temperature deposition and characterization of N- and P-type silicon carbide thin films and associated Ohmic and Schottky contacts
[AD-A289107] p 2237 N95-28097

JPRS report: Science and technology. Central Eurasia
[JPRS-UST-95-019] p 2270 N95-28565

SCHROEDINGER EQUATION

An invariant measure for a nonlinear Schroedinger equation
[DE95-610166] p 2391 N95-27714

Hydrogen-like atom in laser field: Invariant atomic parameters in the ground state
[DE95-609036] p 2411 N95-27930

Quantum retrodiction and causality principle
[DE94-628438] p 2450 N95-28183

SCIENTIFIC SATELLITES

A magnetic hysteresis model p 2153 N95-27801

SCIENTIFIC VISUALIZATION

Three-dimensional visualization of reactive flows in complex geometries
[DE95-006332] p 2284 N95-27845

Advances in scientific visualization
[DE95-008065] p 2343 N95-28014

Visualization methods for the exploration of high dimensional data
[AD-A291717] p 2393 N95-28507

SCIENTISTS

NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 35: The use of computer networks in aerospace engineering
[NASA-CR-198170] p 2456 N95-28600

SCINTILLATING FIBERS

Cosmic ray test results of the D0 prototype scintillating fiber tracker
[DE95-007215] p 2415 N95-28221

SCINTILLATION

An improved model of high-latitude f-region scintillation (WBMOD version 13)
[AD-A288558] p 2334 N95-26520

Detecting alpha particles through scintillation in porous materials
[AD-A289313] p 2406 N95-27399

SCINTILLATION COUNTERS

New radiation stable and long-lived plastic scintillators
[DE95-608622] p 2233 N95-27163

Detecting alpha particles through scintillation in porous materials
[AD-A289313] p 2406 N95-27399

Scintillator materials for calorimetry
[DE95-006570] p 2421 N95-27679

Measurement of the reaction C(nu(sub mu), mu(-)) X near threshold
[DE95-007888] p 2412 N95-28063

Cosmic ray test results of the D0 prototype scintillating fiber tracker
[DE95-007215] p 2415 N95-28221

SCRAPERS

Observation of nonlinear resonances in the advanced light source
[DE95-006561] p 2425 N95-27675

SCREWS

Basic space payload fastener p 2156 N95-27273

SCRUBBERS

A new method for measuring hypergol scrubber emissions p 2174 N95-28312

SEA FLOOR SPREADING

Seismic constraints on shallow crustal processes at the East Pacific rise
[AD-A289055] p 2338 N95-28094

SEA ICE

Study of the response of a three-dimensional coupled ice-ocean model to daily varying atmospheric forcing
[AD-A289050] p 2347 N95-27189

Tomographic observations of deep convection and the thermal evolution of the Greenland Sea Gyre 1988-1989
[AD-A289104] p 2348 N95-28096

Modeling and retrieval of snow and sea ice characteristics in the frequency range 6 to 90 GHz
[PB95-195467] p 2316 N95-28656

SEA LEVEL

An in situ evaluation of TOPEX/Poseidon altimetric measurements versus meaurements made by moorings and inverted echo sounders for sea surface height
[NASA-CR-198621] p 2347 N95-27805

On the persistence of the oceanic background of apparent sea level changes in the Baltic Sea
[REPT-94:5] p 2348 N95-27996

Testing the correlation between seismic stratigraphy, diagenesis and physical rock properties: Evaluation of fluid flow during early and late diagenesis
[DE95-008338] p 2338 N95-28083

SEA ROUGHNESS

Meteorological and oceanographic data collected during the ASREX 91 field experiment
[AD-A289492] p 2342 N95-26826

SEA SURFACE TEMPERATURE

The effect of infrared sea surface temperature measurements on evaporation duct height estimation
[AD-A289045] p 2346 N95-26477

Infrared field measurements of sea surface temperature: Analysis of wake signatures and comparison of skin layer models
[NASA-CR-197849] p 2346 N95-26533

SEA WATER

FREZCHEM: A chemical-thermodynamic model for aqueous solutions at subzero temperatures
[AD-A288456] p 2200 N95-26432

Temporal and spatial decorrelation scales of the Yellow Sea thermal fields
[AD-A288617] p 2346 N95-26483

Investigation on comprehensive fossil fuel cycle analysis and assessment approach as viewed from the global environment
[DE95-759241] p 2329 N95-27935

Numerical simulation of coupled flow and transport with TOUGH2: A verification study
[DE95-008351] p 2287 N95-28225

SEALERS

Task 4 supporting technology. Part 2: Detailed test plan for thermal seals. Thermal seals evaluation, improvement and test. CAN8-1, Reusable Launch Vehicle (RLV), advanced technology demonstrator: X-33. Leading edge and seals thermal protection system technology demonstration
[NASA-CR-198628] p 2304 N95-28259

Silicone joint sealants for pavements
[AD-A289843] p 2241 N95-28620

SEALING

The response of hydrotalcite coated aluminum to sealing with transition metal salt solutions
[DE95-004767] p 2234 N95-27460

SEALS (STOPPERS)

Comparison of numerical results and multicavity purge and rim seal data with extensions to dynamics
[NASA-TM-106685] p 2168 N95-27434

Numerical analysis of intra-cavity and power-stream flow interaction in multiple gas-turbine disk-cavities
[NASA-TM-106886] p 2140 N95-28344

SEARCHING

Piecemeal learning of an unknown environment
[AD-A291683] p 2387 N95-28461

SEAS

Temporal and spatial decorrelation scales of the Yellow Sea thermal fields
[AD-A288617] p 2346 N95-26483

Tomographic observations of deep convection and the thermal evolution of the Greenland Sea Gyre 1988-1989
[AD-A289104] p 2348 N95-28096

SECONDARY EMISSION

Ionizing radiation measurements on LDEF: A0015 Free flyer biostack experiment
[NASA-CR-196603] p 2202 N95-27168

SECONDARY FLOW

Turbomachinery design and tonal acoustics computations
[NASA-CR-197749] p 2139 N95-26777

Numerical analysis of intra-cavity and power-stream flow interaction in multiple gas-turbine disk-cavities
[NASA-TM-106886] p 2140 N95-28344

SEDIMENT TRANSPORT

A geo-acoustic and oceanographic description of several shallow water experimental sites on the Scotian Shelf
[AD-A288300] p 2345 N95-26420

Calculation of suspended sediment transport by combined wave-current flows
[AD-A289368] p 2346 N95-26904

Testing the correlation between seismic stratigraphy, diagenesis and physical rock properties: Evaluation of fluid flow during early and late diagenesis
[DE95-008338] p 2338 N95-28083

SEDIMENTARY ROCKS

Testing the correlation between seismic stratigraphy, diagenesis and physical rock properties: Evaluation of fluid flow during early and late diagenesis
[DE95-008338] p 2338 N95-28083

Contact micromechanics in granular media with clay
[DE95-006566] p 2340 N95-28583

SEDIMENTS

Calculation of suspended sediment transport by combined wave-current flows
[AD-A289368] p 2346 N95-26904

The biodegradation of fuels in soils and sediments: Differences as a function of mineralogy
p 2230 N95-27116

SEEDS

Intrusive multi-probe system
[DE95-006258] p 2292 N95-27465

SEGMENTS

ROC analysis of IR segmentation techniques
[AD-A289252] p 2424 N95-26971

SEISMIC WAVES

Seismic constraints on shallow crustal processes at the East Pacific rise
[AD-A289055] p 2338 N95-28094

Emerging applications of probability (stochastic models in geosystems)
[AD-A289117] p 2313 N95-28099

Dip-moveout processing by Fourier transform in anisotropic media
[DE95-007668] p 2339 N95-28190

Transformation to zero offset in transversely isotropic media
[DE95-007669] p 2339 N95-28192

Fowler DMO and time migration for transversely isotropic media with explicit operators
[DE95-007671] p 2339 N95-28194

Contact micromechanics in granular media with clay
[DE95-006566] p 2340 N95-28583

SEISMOGRAPHS

Micromechanisms for optimism seismometer
p 2159 N95-27292

SEISMOLOGY

A probabilistic target classification and description model for seismic sensors
[AD-A288548] p 2335 N95-26531

Micromechanisms for optimism seismometer
p 2159 N95-27292

Seismic constraints on shallow crustal processes at the East Pacific rise
[AD-A289055] p 2338 N95-28094

Investigation of rifting processes in the Rio Grande Rift using data from an unusually large earthquake swarm
[DE95-007623] p 2339 N95-28126

Fowler DMO and time migration for transversely isotropic media with explicit operators
[DE95-007671] p 2339 N95-28194

Contact micromechanics in granular media with clay
[DE95-006566] p 2340 N95-28583

SELECTION

Moment and hypergeometric filters for high precision computation of focus, stereo and optical flow
[AD-A289293] p 2425 N95-27038

Alternative fuels and vehicles choice model
[DE95-005695] p 2243 N95-27944

SELECTIVE DISSEMINATION OF INFORMATION

Browsing the World Wide Web from behind a firewall
[DE95-006805] p 2455 N95-27957

SELF CONSISTENT FIELDS

Massively parallel self-consistent-field calculations
[DE95-004128] p 2376 N95-26441

SELF EXCITATION

Nonlinear dynamics and aeroelasticity of rotorcraft in forward flight
[AD-A291714] p 2136 N95-28504

SELF ORGANIZING SYSTEMS

Self-organizing artificial neural networks in dynamic systems modeling and control
[PB95-185120] p 2379 N95-26449

Higher-order probabilistic perceptrons as Bayesian inference engines
[DE95-608730] p 2381 N95-27044

SEMANTICS

A parallel complexity model for functional languages
[AD-A288589] p 2365 N95-26656

Semantic heterogeneity in database and data dictionary integration for command and control systems
[AD-A289180] p 2453 N95-27014

Solving recursive domain equations with enriched categories
[AD-A289358] p 2371 N95-27418

SEMICIRCULAR CANALS

Regional differences in lectin binding patterns of vestibular hair cells p 2349 N95-26728

SEMICONDUCTING FILMS

Materials, structures, and devices for high-speed electronics
[NASA-CR-197815] p 2260 N95-26816

SEMICONDUCTOR DEVICES

Technical progress report to the Department of Energy on the Solid State Sciences Committee (SSSC)
[DE95-007113] p 2441 N95-27925

SEMICONDUCTOR DIODES

An organic thin film laser diode: A novel light source
[AD-A289007] p 2294 N95-26568

High-speed coherent laser arrays
[AD-A289373] p 2295 N95-26906

SEMICONDUCTOR JUNCTIONS

Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device development
[AD-A289550] p 2437 N95-26756

Demonstration of photo-assisted tunneling process across the coulomb blockade energy gap in mesoscopic tunnel junctions — photon-assisted tunneling
[AD-A289534] p 2438 N95-26872

SEMICONDUCTOR LASERS

An organic thin film laser diode: A novel light source
[AD-A289007] p 2294 N95-26568

High-speed coherent laser arrays
[AD-A289373] p 2295 N95-26906

Generation of a single-lobe, far-field intensity pattern from a laser diode array using an optical delay line
[AD-A289226] p 2295 N95-26961

Laser with optically driven Q-switch
[NASA-CASE-NPO-18470-1-CU] p 2297 N95-27731

Surface-emitting semiconductor laser for intracavity spectroscopy and microscopy
[DE95-007745] p 2299 N95-28128

SEMICONDUCTOR PLASMAS

Wake fields in semiconductor plasmas
[DE94-634523] p 2429 N95-26439

SEMICONDUCTORS (MATERIALS)

Joint Services Electronics Program (JSEP)
[AD-A288299] p 2345 N95-26419

Wake fields in semiconductor plasmas
[DE94-634523] p 2429 N95-26439

Rotor phases in compound semiconductors
[DE95-004139] p 2436 N95-26442

Template synthesis of electronically conductive polymer nanostructures
[AD-A288373] p 2225 N95-26472

Chemistry involving the separation, isolation, and immobilization of 3-5 compound semiconductor nanocrystals and quantum dots
[AD-A288381] p 2436 N95-26473

The 18th Annual Condensed Matter Physics Meeting
[DE95-605568] p 2398 N95-26598

Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device development
[AD-A289550] p 2437 N95-26756

Electronic characterization of defects in narrow gap semiconductors: Comparison of electronic energy levels and formation energies in mercury cadmium telluride, mercury zinc telluride, and mercury zinc selenide
[NASA-CR-197835] p 2437 N95-26780

Materials Research Society Symposium Proceedings. Volume 339: Diamond, SiC and nitride wide bandgap semiconductors
[AD-A288690] p 2437 N95-26818

Solid-state image sensor with focal-plane digital photon-counting pixel array
[NASA-CASE-NPO-18518-1-CU] p 2424 N95-26894

Modeling the growth of electronic materials
[AD-A289137] p 2438 N95-26997

Atomic structure and bonding of boron-induced reconstructions on Si(001)
[AD-A289187] p 2405 N95-27017

Modeling of trapping and abrupt doping effects in MESFET's using R-dynamic element
[PB95-184891] p 2262 N95-27050

Optical features of nanosize iron and molybdenum sulfide clusters
[DE95-005417] p 2202 N95-27136

Model of a single impurity in a wide bandgap semiconductor describing electric field screening
[AD-A289322] p 2264 N95-27296

The physics and chemistry of heavy Fermions
[DE95-005277] p 2407 N95-27431

Characterization of wafer charging mechanisms and oxide survival prediction methodology
[DE95-006583] p 2440 N95-27538

Technical progress report to the Department of Energy on the Solid State Sciences Committee (SSSC)
[DE95-007113] p 2441 N95-27925

High pressure optical studies of semiconductors and heterostructures
[DE95-007119] p 2410 N95-27927

First-principles calculations for AlN, GaN, and InN: Bulk and alloy properties
[DE95-006822] p 2219 N95-27958

Phase separation and ordering in InGaAsP and InGaAs materials
[DE95-007493] p 2443 N95-28050

Low temperature carrier transport properties in isotopically controlled germanium
[DE95-008489] p 2444 N95-28092

Research activities of the Solid State Sciences Committee in the development of a Federal initiative on advanced materials and processing
[DE95-009328] p 2445 N95-28179

Low noise monolithic Si JFETS for operation in the 90-300K range and in high radiation environments
[DE95-007303] p 2269 N95-28244

Temperature dependence of the static dielectric response in a Q1D electron gas
[DE95-609269] p 2400 N95-28350

Evaluation of defect-related diffusion in semiconductors by electrooptical sampling
[AD-A291630] p 2270 N95-28544

Nonlinear dynamics of a coherent polariton-biexciton system
[DE95-609150] p 2417 N95-28607

SENSITIVITY

Comparative transduction mechanisms of hair cells in the bullfrog utriculus. 1: Responses to intracellular current p 2350 N95-26731

Comparative transduction mechanisms of hair cells in the bullfrog uticulus. 2: Sensitivity and response dynamics to hair bundle displacement p 2350 N95-26732

Polarization sensitivity of monopulse radar boresight error induced by large, ogive radomes
[AD-A289254] p 2252 N95-26972

Measurement of N2(+) mobility He via Fourier transform emission spectroscopy
[AD-A289266] p 2404 N95-26979

Design considerations in supercritical fluid technology
p 2232 N95-27126

Optimization of measurements with pressure sensitive paints
[NASA-TM-4695] p 2293 N95-27915

Nonlinear optical microscopy for imaging thin films and surfaces
[DE95-007872] p 2426 N95-28018

CORSSTOL: Cylinder Optimization of Rings, Skin, and Stringers with Tolerance sensitivity
[NASA-TP-3551] p 2392 N95-28215

Analytical investigations of the acceleration sensitivity of acoustic bulk and surface wave resonators
[AD-A291715] p 2402 N95-28505

SENSORS

Fundamental concepts of integrated and fiber optic sensors
[NASA-TM-106920] p 2426 N95-27906

JTEC Panel report on microelectromechanical systems in Japan
[NASA-CR-197831] p 2268 N95-28239

SENSORY DEPRIVATION

A model of the neural basis of the rat's sense of direction
[AD-A289678] p 2350 N95-26761

SENSORY PERCEPTION

Research activities on somatosensory (SI) cortical neurons
[AD-A288794] p 2348 N95-26360

Handbook of perception and human performance, volume 2. Cognitive processes and performance
[AD-A289587] p 2355 N95-26692

SENTENCES

Absolute logics
[ISBN-951-41-0775-6] p 2397 N95-28238

SEPARATED FLOW

Turbulence modeling
[NASA-CR-197751] p 2274 N95-26665

Demonstration study of hierarchical control of fluid-dynamic phenomena
[AD-A289341] p 2275 N95-26751

Performance characterization of a highly-offset diffuser with and without blowing vortex generator jets
[AD-A289334] p 2122 N95-26901

Computation of three-dimensional mixed convective boundary layer flow p 2280 N95-27347

SEPARATORS

High-rate/high-temperature capability of a single-layer zicar-separator nickel-hydrogen cell
p 2272 N95-26788

Development of an optical trap as an ultra-sensitive analytical tool
[DE95-007843] p 2426 N95-28022

SEQUENCING

Modal event calculus in Lolli
[AD-A288544] p 2365 N95-26605

Evaluation of composite joints
[AD-A289247] p 2181 N95-26967

A spectral algorithm for the seriation problem
[DE95-004775] p 2372 N95-27436

A comparison of measured wind park load histories with the WISPER and WISPERX load spectra
[DE95-000295] p 2319 N95-27459

Sequence comparison on a cluster of workstations using the PVM system
[DE95-006527] p 2378 N95-27709

SEQUENTIAL ANALYSIS

Analysis of filter tuning techniques for sequential orbit determination p 2146 N95-27764

SERVICE LIFE

The 1994 27th Annual NASA Aerospace Battery Workshop
[NASA-CP-3292] p 2317 N95-26785

Progress towards computer simulation of NiH2 battery performance over life p 2272 N95-26786

Long life 80Ah standard IPV NiH2 battery cell
p 2272 N95-26787

The 50 Ah NiH2 CPV qualification tests
p 2272 N95-26792

Hubble Space Telescope nickel-hydrogen battery testing: An update p 2272 N95-26794

Summary of EOS flight dynamics analysis
p 2152 N95-27797

SERVOMECHANISMS

Design and synthesis of a real-time controller for an unmanned air vehicle
[AD-A289134] p 2141 N95-26555

SET THEORY

The assembly tower and some categorical and algebraic aspects of frame theory
[AD-A289360] p 2391 N95-27489

A case for dynamic sets in operating systems
[AD-A289354] p 2454 N95-27529

Absolute logics
[ISBN-951-41-0775-6] p 2397 N95-28238

SEWAGE

Ash-based ceramic materials
[AD-D017272] p 2241 N95-28582

SEWAGE TREATMENT

Microbial treatment for shipboard collection, holding, and transfer system tanks p 2179 N95-27119

SEWING

Development of stitched/RTM composite primary structures p 2195 N95-28469

Test and analysis results for composite transport fuselage and wing structures p 2137 N95-28470

SHADOWS

Analysis of shadowing effects on MIR photovoltaic and solar dynamic power systems
[NASA-TM-106940] p 2169 N95-28213

SHAFTS (MACHINE ELEMENTS)

Analytical and experimental evaluation of joining silicon carbide to silicon carbide and silicon nitride to silicon nitride for advanced heat engine applications, phase 2
[DE95-005761] p 2303 N95-27947

SHAKERS

In situ dynamic material property measurement system
[AD-D017387] p 2210 N95-28585

SHALLOW WATER

A geo-acoustic and oceanographic description of several shallow water experimental sites on the Scotian Shelf
[AD-A288300] p 2345 N95-26420

Temporal and spatial decorrelation scales of the Yellow Sea thermal fields
[AD-A288617] p 2346 N95-26483

SHAPE FUNCTIONS

Investigation into the behavior of geometrically nonlinear composite arches
[AD-A289258] p 2308 N95-26975

SHAPE MEMORY ALLOYS

A rotating arm using shape-memory alloy
p 2157 N95-27276

SMART materials: Surfaces, transforms and interfaces. The commensurate engineering dimension
[AD-A289598] p 2312 N95-28649

SHAPES
Contribution to the optimal shape design of two-dimensional internal flows with embedded shocks
[NASA-CR-195062] p 2389 N95-26672
SHEAR FLOW
Flow visualization of a turbulent shear flow using an optical wavefront sensor
[AD-A289208] p 2277 N95-26986
Basic studies in turbulent shear flows
[AD-A289145] p 2277 N95-26998
Two-layer or free surface shear flows and viscoelastic shear flows and the relationship between stability and eigenvalues --- viscoelastic, shear, and convective flows
[AD-A289510] p 2278 N95-27047
Turbulance boundary conditions for shear flow analysis, using the DTNS flow solver p 2283 N95-27362
Magnetic viscosity by localized shear flow instability in magnetized accretion disks
[DE95-006879] p 2433 N95-28111
Computational and experimental studies of hydrodynamic instabilities and turbulent mixing
[DE95-006837] p 2288 N95-28603
SHEAR LAYERS
The stability of the flow in a laminar separation bubble
[CUED/A-AERO/TR-22] p 2275 N95-26809
Flow visualization of a turbulent shear flow using an optical wavefront sensor
[AD-A289208] p 2277 N95-26986
Turbulance boundary conditions for shear flow analysis, using the DTNS flow solver p 2283 N95-27362
SHEAR PROPERTIES
Overview of through-thickness test methods for polymer matrix composites
[PB95-190112] p 2227 N95-26747
Stress transfer from axially loaded fiber to matrix in a microcomposite
[DE95-007366] p 2183 N95-28043
SHEAR STRENGTH
Analysis of plate-twist test for in-plane shear modulus of composite materials (revised)
[PB95-190195] p 2308 N95-26749
Scarf joint technique with cocured and precured patches for composite repair p 2135 N95-27524
Tungsten carbide fragmentation: Experimental characterization and numerical modelling
[DE95-008521] p 2236 N95-27879
SHEAR STRESS
Studies of radar backscatter as a function of wave properties and the winds in the turbulent marine atmosphere
[NASA-CR-198608] p 2315 N95-28209
SHELL THEORY
The collapse of composite cylindrical panels with various thickness using finite element analysis
[AD-A289370] p 2308 N95-26905
Characterization of the membrane theory of a clamped shell. The hyperbolic case
[PB95-185021] p 2308 N95-26911
SHELLS (STRUCTURAL FORMS)
Composite fuselage shell structures research at NASA Langley Research Center p 2194 N95-28466
SHIPS
The design and implementation of the Military Applications of Shiptracks experiment on Space Transportation System - 65
[AD-A288488] p 2160 N95-26634
Tie-down trials involving a Sikorsky S-70B-2 helicopter
[DSTO-TR-0132] p 2136 N95-28567
Severe weather guide mediterranean
[AD-A289829] p 2344 N95-28577
SHOCK HEATING
High temperature kinetic study of the reactions H + O2 = OH + O and O + H2 = OH + H in H2/O2 system by shock tube-laser absorption spectroscopy
[NASA-CR-195473] p 2206 N95-27695
Investigation of HE driven cylindrical liner
[DE95-007866] p 2311 N95-28539
SHOCK LAYERS
Viscous shock-layer analysis on hypersonic flow over reentry capsule with nonequilibrium chemistry
[ISAS-R-656] p 2274 N95-26739
SHOCK MEASURING INSTRUMENTS
Micro-time stress measurement device development
[AD-A289511] p 2361 N95-26845
SHOCK RESISTANCE
Development of low-expansion ceramics with strength retention to elevated temperatures
[DE95-005760] p 2239 N95-28397
SHOCK TUBES
An investigation of the AFIT 2-inch shock tube as a flow source for supersonic testing
[AD-A289246] p 2143 N95-26966
Computational and experimental studies of hydrodynamic instabilities and turbulent mixing
[DE95-006837] p 2288 N95-28603
SHOCK WAVE INTERACTION
A fully implicit time accurate method for hypersonic combustion: Application to shock-induced combustion instability
[NASA-TM-106707] p 2273 N95-26380
Compressible turbulence measurements in a supersonic flow with adverse pressure gradient
[AD-A289477] p 2276 N95-26822
A numerical study of fundamental shock noise mechanisms
[NASA-TM-110608] p 2401 N95-27908
Response of multi-panel assembly to noise from a jet in forward motion
[NASA-CR-198164] p 2289 N95-28673
SHOCK WAVE PROPAGATION
A numerical study of fundamental shock noise mechanisms
[NASA-TM-110608] p 2401 N95-27908
SHOCK WAVES
Contribution to the optimal shape design of two-dimensional internal flows with embedded shocks
[NASA-CR-195062] p 2389 N95-26672
Bow shock data analysis
[AD-A288432] p 2429 N95-26800
An investigation of the AFIT 2-inch shock tube as a flow source for supersonic testing
[AD-A289246] p 2143 N95-26966
A numerical study of fundamental shock noise mechanisms
[NASA-TM-110608] p 2401 N95-27908
Swords to plowshares: Shock wave applications to advanced lithography
[DE95-008154] p 2299 N95-28223
Modeling the shock response of submerged structures
[AD-A289082] p 2288 N95-28351
SHORT WAVE RADIATION
A study of surface temperatures, clouds and net radiation
[NASA-CR-198589] p 2329 N95-27864
SHRINKAGE
The minimum pore size obtainable in a silica gel during drying
[DE95-008162] p 2239 N95-28401
SIGNAL ANALYSIS
Speech analysis and synthesis based on pitch-synchronous segmentation of the speech waveform
[AD-A288824] p 2248 N95-26349
The automatic extraction of selected speech spectral characteristics
[IFTR-2/1994] p 2250 N95-26835
An introduction to wavelet transforms
[AD-A289083] p 2256 N95-28095
Bearing defect signature analysis using advanced nonlinear signal analysis in a controlled environment
[NASA-TM-108491] p 2304 N95-28364
SIGNAL ANALYZERS
Multipurpose bus interface utilizing a digital signal processor
[AD-D017264] p 2248 N95-26505
An introduction to wavelet transforms
[AD-A289083] p 2256 N95-28095
Low-power, parallel photonic interccnnections for Multi-Chip Module applications
[DE95-008518] p 2267 N95-28147
SIGNAL DETECTION
Research and development report. Digital audio broadcasting: Comparison of coverage at Band 2 and Band 3
[BBC-RD-1994/16] p 2248 N95-26493
Target detection for vision systems
[AD-D017271] p 2249 N95-26509
Analysis of group performance in visual signal detection
[AD-A289561] p 2355 N95-26683
Nonlinear signal processing schemes for robust target detection in radar
[AD-A288449] p 2255 N95-27185
The concentration-estimation problem for multiple-wavelength differential absorption lidar
[DE95-008375] p 2256 N95-28231
SIGNAL ENCODING
An experimental version of the MZT (speech-from-text) system with external F(sub 0) control
[IFTR-14/1994] p 2250 N95-26836
An introduction to wavelet transforms
[AD-A289083] p 2256 N95-28095
SIGNAL PROCESSING
Balanced data focusing: Direction of arrival estimation with maximum likelihood performance
[AD-A288252] p 2248 N95-26407
Joint Services Electronics Program (JSEP)
[AD-A288299] p 2345 N95-26419
Ultrasonic test system
[AD-D017261] p 2400 N95-26502
Multipurpose bus interface utilizing a digital signal processor
[AD-D017264] p 2248 N95-26505
Target detection for vision systems
[AD-D017271] p 2249 N95-26509
Evaluation of the FMICW waveform in HF surface radar applications
[AD-A288245] p 2249 N95-26545
Design tool for multiprocessor scheduling and evaluation of iterative dataflow algorithms
[NASA-TP-3491] p 2366 N95-26685
Signals processing using acousto-optical technology
[AD-A289597] p 2250 N95-26717
Enhanced visual user interface support for domain-oriented application composition systems
[AD-A289337] p 2359 N95-26737
The ambiguity function of the stepped frequency radar
[AD-A289533] p 2251 N95-26871
Multipoint multirate signal processing
[AD-A289211] p 2253 N95-26988
Voice analysis using the bispectrum
[AD-A289204] p 2254 N95-27008
Head related transfer function approximation using neural networks
[AD-A289422] p 2382 N95-27145
JPRS report: Science and technology. Central Eurasia
[JPRS-UST-95-016] p 2262 N95-27170
Nonlinear signal processing schemes for robust target detection in radar
[AD-A288449] p 2255 N95-27185
Classification of RF transients in space using digital signal processing and neural network techniques
[DE95-006287] p 2256 N95-27840
An introduction to wavelet transforms
[AD-A289083] p 2256 N95-28095
Long-range eye tracking: A feasibility study
[DE95-008587] p 2357 N95-28176
Full complex modulation using two one-parameter spatial light modulators
[NASA-CASE-MSC-22255-1] p 2427 N95-28384
Method and apparatus for maintaining linearity and frequency accuracy of an FM chirp waveform
[AD-D017398] p 2258 N95-28615
Manikin integrated data acquisition system (MIDAS) initial modifications
[AD-A291662] p 2361 N95-28667
SIGNAL TO NOISE RATIOS
Balanced data focusing: Direction of arrival estimation with maximum likelihood performance
[AD-A288252] p 2248 N95-26407
Performance modeling of hyperspectral imaging sensors for atmospheric studies
[AD-A289017] p 2289 N95-26461
Signals processing using acousto-optical technology
[AD-A289597] p 2250 N95-26717
Frame selection performance limits for statistical image reconstruction of adaptive optics compensated images
[AD-A289240] p 2424 N95-26965
SIGNAL TRANSMISSION
Self-excited oscillations in a duct with closed brances
[IFTR-18/1994] p 2400 N95-26358
Research and development report. Digital audio broadcasting: Comparison of coverage at Band 2 and Band 3
[BBC-RD-1994/16] p 2248 N95-26493
Signals processing using acousto-optical technology
[AD-A289597] p 2250 N95-26717
The automatic extraction of selected speech spectral characteristics
[IFTR-2/1994] p 2250 N95-26835
Simulating a multi-target acoustic array on the Intel Paragon
[AD-A288443] p 2377 N95-27183
SIGNATURE ANALYSIS
Bearing defect signature analysis using advanced nonlinear signal analysis in a controlled environment
[NASA-TM-108491] p 2304 N95-28364
SIGNATURES
Unification of LARCH and Z-based object models to support algebraically-based design refinement: The Z perspective
[AD-A289234] p 2369 N95-26962
SIGNS AND SYMPTOMS
Diagnostic antigens of Leishmania
[AD-A288805] p 2350 N95-27097
SIKORSKY AIRCRAFT
Report to Congressional Committees. Comanche Helicopter: Testing needs to be completed prior to production decisions
[GAO/NSIAD-95-112] p 2135 N95-27910
Tie-down trials involving a Sikorsky S-70B-2 helicopter
[DSTO-TR-0132] p 2136 N95-28567
SILICA GEL
The minimum pore size obtainable in a silica gel during drying
[DE95-008162] p 2239 N95-28401

SILICA GLASS
Characteristics of thermal lens in a copper-vapor laser
[AD-A289545] p 2294 N95-26874
Effects of long term space environment exposure on optical substrates and coatings p 2428 N95-27653
SILICATES
Silicate gel dye laser
[AD-D017262] p 2294 N95-26503
Investigation on technology for increasing the biological CO2 sink and technology for CO2 fixation and reutilization
[DE95-759251] p 2329 N95-27941
The structure of lead-indium phosphate glass
[DE95-007130] p 2237 N95-27967
SILICON
Surface chemistry of silicon
[AD-A288893] p 2224 N95-26351
Silicon based microactuators for telerobotic tactile stimulation
[AD-A289340] p 2260 N95-26767
Boron-induced morphology changes in silicon CVD growth: A scanning tunneling microscopy study
[AD-A289275] p 2290 N95-26982
Surface damage effects generated by a fast-pulse laser beam
[AD-A289131] p 2295 N95-26996
Atomic structure and bonding of boron-induced reconstructions on Si(001)
[AD-A289187] p 2405 N95-27017
Atomically resolved STM study of the adsorption and dissociation of methyl chloride on Si(001)
[AD-A289218] p 2438 N95-27061
Monolithic electronics for nuclear and high-energy physics experiments
[DE95-005393] p 2420 N95-27427
Numerical methods for determining interstitial oxygen in silicon
[DE95-007710] p 2205 N95-27683
Silicon subsystem mechanical engineering closeout report for the Solenoidal Detector Collaboration
[DE95-006336] p 2421 N95-27735
FTIR studies of CH3OH on porous silicon
[AD-A289038] p 2207 N95-27904
Analysis of the dimerized Sb/Si(001)-(2x1) surface by x-ray standing waves
[DE95-007097] p 2208 N95-27965
Effects of interlayers on the scratch adhesion performance of ultra-thin films of copper and gold on silicon substrates
[DE95-007367] p 2220 N95-28044
Cavity formation and impurity gettering in He-implanted Si
[DE95-007744] p 2444 N95-28127
Chemical and electrical properties of cavities in silicon and germanium
[DE95-006812] p 2445 N95-28206
Comparison of bridged polysilsesquioxane xerogels prepared from methoxy- and ethoxy-silyl monomers
[DE95-005422] p 2240 N95-28532
Leak detection utilizing analog binaural (VLSI) techniques
[NASA-CASE-NPO-18399-1-CU] p 2271 N95-28599
SILICON ALLOYS
Electrolyte effects in Li(Si)/FeS2 thermal batteries
[DE95-001614] p 2264 N95-27474
SILICON CARBIDES
Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device development
[AD-A289550] p 2437 N95-26756
Materials Research Society Symposium Proceedings. Volume 339: Diamond, SiC and nitride wide bandgap semiconductors
[AD-A288690] p 2437 N95-26818
Characterization of fatigue behavior of 2-D woven fabric reinforced ceramic matrix composite at elevated temperature
[AD-A289423] p 2181 N95-26886
Photoluminescence spectroscopy of 4H- and 6H-SiC
[AD-A289326] p 2202 N95-26896
A study of internal damage of metal matrix composites by neutron diffraction
[DE95-005157] p 2182 N95-27080
Temperature dependence of ion-beam-induced amorphization in (Beta)-SiC
[DE95-007164] p 2438 N95-27087
Fatigue behavior of a cross-ply ceramic matrix composite subjected to tension-tension cycling with hold time
[AD-A289418] p 2182 N95-27134
Analytical and experimental evaluation of joining silicon carbide to silicon carbide and silicon nitride to silicon nitride for advanced heat engine applications, phase 2
[DE95-005761] p 2303 N95-27947
Thermal shock behavior of fiber-reinforced composites
[DE95-006746] p 2183 N95-27955
Effects of high-temperature environments on flaw generation and fracture behavior of SiC/SiC composites
[DE95-008270] p 2183 N95-28068
High-temperature deformation of ZrO2-Al2O3/SiC whisker composites fabricated by two techniques
[DE95-008273] p 2183 N95-28069
High temperature Hexoloy(trademark) SX silicon carbide
[DE95-007290] p 2221 N95-28075
Low temperature deposition and characterization of N- and P-type silicon carbide thin films and associated Ohmic and Schottky contacts
[AD-A289107] p 2237 N95-28097
Composite flexible insulation for thermal protection of space vehicles p 2166 N95-28293
SILICON COMPOUNDS
Boron-carbon-silicon polymers and the ceramic thereof
[NASA-CASE-ARC-11891-1-SB] p 2238 N95-28212
SILICON DIOXIDE
Applications of Second Harmonic and Sum Frequency Generation to graphite and silica type interfaces
[AD-A288228] p 2201 N95-26544
Ambient-pressure silica aerogel films
[DE95-008161] p 2237 N95-28090
Atomic layer epitaxy of group 4 materials: Surface processes, thin films, devices and their characterization
[AD-A289092] p 2446 N95-28327
Characterization of a fused silica capacitance standard
[DE95-006457] p 2270 N95-28597
SILICON FILMS
Growth of hydrogenated amorphous silicon (a-Si:H) on patterned substrates for increased mechanical stability
[DE95-006589] p 2234 N95-27472
SILICON JUNCTIONS
Low noise monolithic Si JFETS for operation in the 90-300K range and in high radiation environments
[DE95-007303] p 2269 N95-28244
SILICON NITRIDES
Analytical and experimental evaluation of joining silicon carbide to silicon carbide and silicon nitride to silicon nitride for advanced heat engine applications, phase 2
[DE95-005761] p 2303 N95-27947
Solid state sintering of silicon nitride ARL-CR-114
[DE95-007291] p 2443 N95-28076
SILICON OXIDES
Characterization of collision cascade damage in Ca2La8(SiO4)6O2 by HRTEM
[DE95-005719] p 2440 N95-27491
Surface crystallization and thin film melting in normal alkanes
[DE95-006694] p 2440 N95-27535
SILICON POLYMERS
Low temperature materials growth and processing development for flat panel display technology applications
[AD-A288970] p 2233 N95-27187
Recent progress in the Photovoltaic Manufacturing Technology Project (PVMaT)
[DE95-000279] p 2320 N95-27704
OBIC analysis of stressed, thermally-isolated polysilicon resistors
[DE95-008511] p 2268 N95-28201
SILICON RADIATION DETECTORS
Amorphous silicon pixel radiation detectors and associated thin film transistor electronics readout
[DE95-006568] p 2265 N95-27678
SILICON TRANSISTORS
Low temperature materials growth and processing development for flat panel display technology applications
[AD-A288970] p 2233 N95-27187
SILICONE RUBBER
Design and development of experimental facilities for short duration, low-gravity combustion and fire experiments
[NASA-CR-195458] p 2244 N95-26709
Analysis of selected specimens from the STS-46 Energetic Oxygen Interaction with Materials-3 experiment p 2210 N95-27642
SILICONES
Effects of atomic oxygen on polymeric materials flown on EOIM-3 p 2242 N95-27638
Hardware cleanliness methodology and certification
p 2211 N95-27656
Task 4 supporting technology. Part 1: Detailed test plan for leading edge tile development. Leading edge material development and testing
[NASA-CR-198633] p 2160 N95-28258
Silicone joint sealants for pavements
[AD-A289843] p 2241 N95-28620
SILOXANES
Siloxane-based ferroelectric liquid crystal elastomers and Self-Assembled Mono- and multilayers
[AD-A288285] p 2224 N95-26456
A summary of ODS replacement technologies at Litton Poly-Scientific p 2228 N95-27105
SILVER
Atomic oxygen dosimetry measurements made on STS-46 by CONCAP 2 p 2418 N95-27634
SILVER ALLOYS
Electronic structure of disordered Cu-Ag alloys
[DE95-609156] p 2219 N95-27758
SILVER COMPOUNDS
Growth and evaluation of nonlinear optical crystals for laser applications: Lithium borate, barium borate and silver gallium selenide
[AD-A289147] p 2277 N95-27000
SIMPLIFICATION
Efficient analytic computation of higher-order QCD amplitudes
[DE95-008593] p 2449 N95-28160
SIMULATED ANNEALING
Weighting scheme for the space surveillance network automated tasker
[AD-A289285] p 2146 N95-27035
Simulating the production of free defects in irradiated metals
[DE95-007165] p 2214 N95-27088
Automated integration of genomic physical mapping data via parallel simulated annealing
[DE95-008057] p 2351 N95-27725
SIMULATION
Balanced data focusing: Direction of arrival estimation with maximum likelihood performance
[AD-A288252] p 2248 N95-26407
Performance modeling of hyperspectral imaging sensors for atmospheric studies
[AD-A289017] p 2289 N95-26461
Statistical model for molecular internal energy exchange in DSMC method for rarefied flow analysis
[ISAS-R-654] p 2274 N95-26741
Image perception wavelet simulation and enhancement for the visually impaired
[AD-A289303] p 2353 N95-26917
MHD simulations of DC helicity injection for current drive in tokamaks
[DE95-007018] p 2429 N95-26940
The near-wake flow behavior of an oscillating airfoil with modified trailing edge p 2119 N95-26953
Advanced formation flight control
[AD-A289271] p 2142 N95-26981
Study of the response of a three-dimensional coupled ice-ocean model to daily varying atmospheric forcing
[AD-A289050] p 2347 N95-27189
Deployment and retraction of a cable-driven solar array: Testing and simulation p 2158 N95-27283
A new shared-memory programming paradigm for molecular dynamics simulations on the Intel Paragon
[DE95-007289] p 2378 N95-28019
A hybrid vehicle evaluation code and its application to vehicle design. Revision 1
[DE95-008053] p 2303 N95-28029
A hybrid vehicle evaluation code and its application to vehicle design, revision 2
[DE95-008060] p 2303 N95-28139
Developments in the electron gun simulation program, EGUN
[DE95-008137] p 2267 N95-28143
Monte-Carlo simulation methods for finite flat plate winding flows
[AD-A289842] p 2289 N95-28619
SIMULATORS
Construction of a connectionist network supercomputer
[AD-A288439] p 2377 N95-27182
Simulator report for SCI systems with HIC-router
[PB95-196580] p 2379 N95-28093
SIMULTANEOUS EQUATIONS
An easy way to analyze longitudinal and lateral-directional trim problems with AEO or OEI
p 2119 N95-26949
SINE WAVES
The effects of transverse vibration on the performance of an axial groove wick heat pipe
[AD-A289349] p 2278 N95-27065
SINGLE CRYSTALS
Surface chemistry of silicon
[AD-A288893] p 2224 N95-26351
Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device development
[AD-A289550] p 2437 N95-26756

Materials Research Society Symposium Proceedings. Volume 339: Diamond, SiC and nitride wide bandgap semiconductors
[AD-A288690] p 2437 N95-26818
JPRS report: Science and technology. Central Eurasia
[JPRS-UST-95-021] p 2202 N95-27155
Growth, characterization and device development in monocrystalline diamond films
[AD-A289356] p 2439 N95-27416
Micromagnetics and microstructure of epitaxially grown Co and Co-Cr films for perpendicular magnetic recording
[DE95-004681] p 2441 N95-27720
Magnetic structures in RNi2B2C (R = Ho, Er) superconductors
[DE95-008370] p 2442 N95-27932
Low temperature carrier transport properties in isotopically controlled germanium
[DE95-008489] p 2444 N95-28092
Low temperature deposition and characterization of N- and P-type silicon carbide thin films and associated Ohmic and Schottky contacts
[AD-A289107] p 2237 N95-28097
The role of hydrogen in the hydrogenation and hydrogenolysis of aniline on the nickel single crystal surfaces: Its implication on the mechanisms of HDN reactions
[DE95-006687] p 2222 N95-28134
Precursor phenomenon of martensitic transformation in Au-49.5at%Cd alloy
[DE95-007698] p 2222 N95-28166
The high strain rate deformation of tungsten single crystals
[AD-A288874] p 2223 N95-28189
Femtosecond OPO's at 3 microns and beyond: Design and performance issues related to the crystal properties of KTP and similar materials
[DE95-007286] p 2446 N95-28242
Atomic layer epitaxy of group 4 materials: Surface processes, thin films, devices and their characterization
[AD-A289092] p 2446 N95-28327
Future opportunities and present possibilities for coherent inelastic single crystal measurements on pulsed neutron sources
[PB95-195798] p 2418 N95-28657

SINGLE STAGE TO ORBIT VEHICLES
Reusable launch vehicle development research
[NASA-CR-198614] p 2154 N95-27245

SINGULARITY (MATHEMATICS)
On higher derivative gravity in two dimensions
[DE95-608789] p 2462 N95-27343
Crushing singularities in spacetimes with spherical, plane and hyperbolic symmetry
[PB95-190146] p 2397 N95-28011
Normal modes and continuous spectra
[DE95-006166] p 2287 N95-28055
Efficient analytic computation of higher-order QCD amplitudes
[DE95-008593] p 2449 N95-28160

SINTERING
Ultra high purity, dimensionally stable INVAR 36
[NASA-CASE-NPO-19358-1-CU] p 2213 N95-26862
Crystal structure, short-range oxygen defects, and water adsorption in La- and Nd-modified ZrO2
[DE95-007134] p 2439 N95-27452
Sintering of textured YBa2Cu3O(7-x) under intensive Co-60 gamma irradiation
[DE95-007098] p 2442 N95-27950
Manufacturing tailored property ceramic composites
[DE95-006303] p 2237 N95-27993
High temperature Hexoloy(trademark) SX silicon carbide
[DE95-007290] p 2221 N95-28075
Solid state sintering of silicon nitride ARL-CR-114
[DE95-007291] p 2443 N95-28076
Solid-state sintering of tungsten heavy alloys
[DE95-007749] p 2222 N95-28130

SIZE (DIMENSIONS)
Using the dimension reduction technique to prove that clique trees define facets for the asymmetric traveling salesman polytope
[AD-A289397] p 2389 N95-26882
Reducing network depth in the Cascade-Correlation learning architecture
[AD-A289352] p 2382 N95-27066

SIZE DISTRIBUTION
Characterization of Ultra-Low Carbon Baintic steels for use as weld wire consumables
[AD-A288292] p 2212 N95-26411
Computation of electromagnetic scattering parameters for lognormal distributions of magnetic spheres: Theory and algorithms
[AD-A289672] p 2250 N95-26759
Performance of a stand-alone wind-electric ice maker for remote villages
[DE95-004006] p 2320 N95-27475

SKEWNESS
A method for generating skewed random numbers using two overlapping uniform distributions
[DE95-008747] p 2392 N95-28162

SKIN (STRUCTURAL MEMBER)
On aircraft repair verification of a fighter A/C integrally stiffened fuselage skin p 2133 N95-27515

SKY BRIGHTNESS
A mathematical analysis of the Janus combat simulation weather effects models and sensitivity analysis of sky-to-ground brightness ratio on target detection
[AD-A289629] p 2336 N95-26858

SLABS
On-axis polarization coupling in y-cut titanium in-diffused lithium niobate slab waveguides
[AD-A289260] p 2253 N95-26977
Error analysis of the quartic nodal expansion method for slab geometry
[DE95-007373] p 2412 N95-28045

SLEEVES
Design and development of a test rig for the high frequency testing of rolling sleeve airsprings
[DSTO-TN-0001] p 2142 N95-26378

SLIDING
Prediction of fatigue crack growth under constant amplitude and random loading using specimens with multiple cracks
[AD-A291614] p 2136 N95-28409

SLOPES
Natural aerosol extinction module: XSCALE 1992 user's guide
[AD-A289029] p 2340 N95-26463
Synthetic 3-D atmospheric temperature structure: A model for known geophysical power spectra using a hybrid autoregression and Fourier technique
[AD-A289058] p 2340 N95-26479

SLOT ANTENNAS
Linearly tapered slot antenna impedance characteristics
[NASA-TM-106912] p 2266 N95-27853
Theoretical and experimental study of low-loss, High-efficiency monolithic antenna structures at 94 GHz
[AD-A291785] p 2257 N95-28513

SLOTS
Computational analysis of forebody tangential slot blowing on the high alpha research vehicle
[NASA-CR-197754] p 2129 N95-26591

SLUDGE
Application of bacterial bioemusifiers to in situ maintenance of oil/water separators
p 2179 N95-27120
Destruction of pyrotechnics manufacture wastewater treatment sludge by plasma arc pyrolysis
p 2171 N95-28301

SMART STRUCTURES
SMART materials: Surfaces, transforms and interfaces. The commensurate engineering dimension
[AD-A289598] p 2312 N95-28649

SMOG
Engineering photochemical smog through convection towers
[DE95-007727] p 2328 N95-27686

SMOKE
Proceedings of the 1993 Scientific Conference on Obscuration and Aerosol Research
[AD-A280084] p 2331 N95-28153

SMOOTHING
Nonlinear scalespace via hierarchical statistical modeling
[AD-A289057] p 2394 N95-26478
Denoising and robust non-linear wavelet analysis
[AD-A291668] p 2257 N95-28455

SNOW
Radiometer measurements of snow in Sodankylae, 1991-1993
[PB95-184966] p 2313 N95-26645

SNOW COVER
Subsurface radar investigations at the Pegasus Glacial-ice Runway and Williams Field, McMurdo Station, Antarctica
[AD-A289323] p 2144 N95-27297
Modeling and retrieval of snow and sea ice characteristics in the frequency range 6 to 90 GHz
[PB95-195467] p 2316 N95-28656

SODIUM
Ash-based ceramic materials
[AD-D017272] p 2241 N95-28582

SODIUM CHLORIDES
Electrical conductivity measurements of aqueous electrolyte solutions at high temperatures and high pressures
[DE95-006748] p 2208 N95-27956

SODIUM HYDROXIDES
Electrical conductivity measurements of aqueous electrolyte solutions at high temperatures and high pressures
[DE95-006748] p 2208 N95-27956

SOFIA (AIRBORNE OBSERVATORY)
Numerical simulation of the SOFIA flow field
[NASA-CR-197757] p 2274 N95-26589

SOFTENING
Precursor phenomenon of martensitic transformation in Au-49.5at%Cd alloy
[DE95-007698] p 2222 N95-28166

SOFTWARE DEVELOPMENT TOOLS
An evaluation of the Software Through Pictures/T Tool (StP/T) for the Software Support Activity (SSA)
[AD-A288822] p 2362 N95-26348
Software risk management through independent verification and validation
[NASA-CR-197767] p 2364 N95-26486
Long term distributed file reference tracing: Implementation and experience
[AD-A288585] p 2452 N95-26535
Intelligent computer based reliability assessment of multichip modules
[AD-A288833] p 2259 N95-26550
A software bus for thread objects
[NASA-CR-197764] p 2365 N95-26575
Automatic test data generation tool for large-scale software systems
[AD-A289081] p 2365 N95-26611
Design tool for multiprocessor scheduling and evaluation of iterative dataflow algorithms
[NASA-TP-3491] p 2366 N95-26685
Software packager user's guide
[NASA-CR-197763] p 2366 N95-26693
User-centric development. Version 01.00.04
[AD-A289363] p 2368 N95-26903
High performance hardware and software for pattern recognition and image processing
[AD-A289153] p 2370 N95-27031
Getting it right, making it better
[NONP-NASA-VT-95-49118] p 2451 N95-27206
STEP: A futurevision, today
[NONP-NASA-VT-95-49121] p 2451 N95-27209
Measuring fault tolerance with the FTAPE fault injection tool
[NASA-CR-197773] p 2306 N95-27253
Automated database design from natural language input p 2383 N95-27378
Determining GPS average performance metrics
p 2128 N95-27791
PC Software graphics tool for conceptual design of space/planetary electrical power systems
[NASA-TM-106908] p 2372 N95-27905
Calculation of design load for the MOD-5A 7.3 mW wind turbine system p 2312 N95-27982

SOFTWARE ENGINEERING
An evaluation of the Software Through Pictures/T Tool (StP/T) for the Software Support Activity (SSA)
[AD-A288822] p 2362 N95-26348
An introduction to software architecture
[AD-A288963] p 2363 N95-26446
An introduction to software architecture
[AD-A288356] p 2363 N95-26467
Application-aware adaptation for mobile computing
[AD-A288366] p 2363 N95-26469
Digital mapping, charting, and geodesy analysis program: Initial technical review of Raster Product Format
[AD-A289039] p 2313 N95-26476
Software risk management through independent verification and validation
[NASA-CR-197767] p 2364 N95-26486
Operating system support for coexistence of real-time and conventional scheduling
[AD-A288584] p 2364 N95-26534
Intelligent computer based reliability assessment of multichip modules
[AD-A288833] p 2259 N95-26550
Automatic test data generation tool for large-scale software systems
[AD-A289081] p 2365 N95-26611
Software packager user's guide
[NASA-CR-197763] p 2366 N95-26693
Using an architectural approach to integrate heterogeneous, distributed software components
[NASA-CR-197766] p 2366 N95-26711
Development and analysis of SCR requirements tables for system scenarios
[NASA-CR-197769] p 2367 N95-26802
A process improvement model for software verification and validation
[NASA-CR-197761] p 2367 N95-26814

Second International Conference on Software for Multiprocessors and Supercomputers Theory, Practice, Experience
[AD-A289474] p 2368 N95-26820
User-centric development. Version 01.00.04
[AD-A289363] p 2368 N95-26903
High performance hardware and software for pattern recognition and image processing
[AD-A289153] p 2370 N95-27031
Multiple model adaptive estimation and head motion tracking in a virtual environment: An engineering approach
[AD-A289299] p 2359 N95-27046
Design and implementation of a software communication architecture for the JANUS-3D Visualizer
[AD-A288509] p 2370 N95-27150
Development of numerical methods for overset grids with applications for the integrated Space Shuttle vehicle
[NASA-CR-197759] p 2160 N95-27154
Construction of a connectionist network supercomputer
[AD-A288439] p 2377 N95-27182
Getting it right, making it better
[NONP-NASA-VT-95-49118] p 2451 N95-27206
Computer Systems Division software system metrics approach
[AD-A288837] p 2370 N95-27210
Overview of megaprogramming course: Lectures and eexercises. Version 02.00.03
[AD-A286723] p 2370 N95-27235
A comparison of error categorization schemes for use in software system safety programs
[AD-A288741] p 2371 N95-27251
Human factors in aviation maintenance, phase 4
[DOT/FAA/AM-95/14] p 2360 N95-27696
Flight dynamics software in a distributed network environment p 2151 N95-27790
Contingency designs for attitude determination of TRMM p 2154 N95-27803
A NASTRAN-based computer program for structural dynamic analysis of Horizontal Axis Wind Turbines
p 2312 N95-27980
Control system design for the MOD-5A 7.3 mW wind turbine generator p 2306 N95-27985
Operator modeling in commerical aviation: Cognitive models, intelligent displays, and pilot's assistants
[NASA-CR-198609] p 2138 N95-28203
Three-dimensional forecast models for emergency response management p 2172 N95-28303
Upgrade of the computer modeling programs POLU10 and POLU13A for open burning and open detonation of energetic materials p 2172 N95-28306
Unmanned aerial vehicles, 1994 master plan
[AD-A291628] p 2136 N95-28411
A correlational study of the SEI's capability maturity model and software development performance in DOD contracts
[AD-A288890] p 2374 N95-28591
TRAINS: Dialogue transcription tools
[AD-A289869] p 2259 N95-28624
Software process improvement in the NASA software engineering laboratory
[AD-A289912] p 2374 N95-28627
Replacing the message service component in an integration framework
[AD-A289928] p 2375 N95-28628
Building an electronic book on the Internet. CSEP:An interdisciplinary syllabus for teaching computational science at the graduate level
[DE95-006526] p 2375 N95-28632
Software technology for adaptable, reliable systems (STARS). AdaWise user's manual
[AD-A289655] p 2375 N95-28635

SOFTWARE RELIABILITY
Computer Systems Division software system metrics approach
[AD-A288837] p 2370 N95-27210

SOFTWARE REUSE
A system dynamics based study of software reuse and its determinants
[AD-A288578] p 2364 N95-26554

SOIL MECHANICS
Soil moisture prediction during freeze and thaw using a coupled heat and moisture flow model
[AD-A289343] p 2336 N95-26753
The biodegradation of fuels in soils and sediments: Differences as a function of mineralogy
p 2230 N95-27116

SOIL MOISTURE
Soil moisture prediction during freeze and thaw using a coupled heat and moisture flow model
[AD-A289343] p 2336 N95-26753
Remote sensing of hydrologic variables in boreal areas, phase 2
[NASA-CR-198717] p 2314 N95-27998

SOILS
Soil moisture prediction during freeze and thaw using a coupled heat and moisture flow model
[AD-A289343] p 2336 N95-26753
Combined use of ground water circulation (UVB) technology and in situ bioreactors for enhanced bioremediation of subsurface contamination
p 2230 N95-27118
A practical approach to soil remediation
p 2232 N95-27125
The Alpha-Proton-X-ray Spectrometer deployment mechanism: An anthropomorphic approach to sensor placement on Martian rocks and soil
p 2155 N95-27265
Method for determining surface coverage by materials exhibiting different fluorescent properties
[NASA-CASE-GSC-13539-1] p 2315 N95-28211
Biodegradation of nitrate esters p 2171 N95-28299
Neural networks in the classification of uses of the soil in satellite images
[INPE-5478-PRE/1777] p 2316 N95-28672

SOL-GEL PROCESSES
Control of thin film processing behavior through precursor structural modifications
[DE95-006468] p 2444 N95-28103
Vacancy related defects in thin film Pb(Zr,Ti)O3 materials
[DE95-007696] p 2445 N95-28165
New developments for sol-gel film and fiber processing
[DE95-008175] p 2240 N95-28404
Porosity in hexylene-bridged polysilsesquioxanes: Effects of monomer concentration
[DE95-005421] p 2240 N95-28531
Comparison of bridged polysilsesquioxane xerogels prepared from methoxy- and ethoxy-silyl monomers
[DE95-005422] p 2240 N95-28532
Coatings of non-oxide ceramics for improved corrosion resistance in high temperature coal combustion
[DE95-006932] p 2241 N95-28604

SOLAR ACTIVITY
Coronal abundances and their variation
[NASA-CR-197788] p 2464 N95-26671
Variability study of foF2 for an equatorial station
[DE95-608080] p 2337 N95-27157
Solar-geophysical data number 604, December 1994. Part 1: (Prompt reports). Data for November, October 1994, and late data
[PB95-181848] p 2465 N95-28087

SOLAR ARRAYS
Alternate charging profiles for the onboard nickel cadmium batteries of the Explorer Platform/Extreme Ultraviolet Explorer p 2272 N95-26796
Development of welded solar arrays for DMSP and GPS satellites
[AD-A289512] p 2318 N95-26846
Solar array deployment mechanism
p 2155 N95-27266
Deployment and retraction of a cable-driven solar array: Testing and simulation p 2158 N95-27283
Development of the solar array deployment and drive system for the XTE spacecraft p 2158 N95-27284
Space environmental effect on solar cells: LDEF and other flight tests p 2326 N95-27649
A simple method for verifying the deployment of the TOMS-EP solar arrays p 2150 N95-27782
Direct drive options for electric propulsion systems
[NASA-TM-106576] p 2168 N95-27861
The solar array-induced disturbance of the Hubble Space Telescope pointing system
[NASA-TP-3556] p 2311 N95-28214

SOLAR BACKSCATTER UV SPECTROMETER
Solar UV flux measurements from the SBUV2 monitor on the NOAA9 satellite. Part 1: Mg II h and k line core-to-wing ratios for 1986-1988
[PB95-181962] p 2464 N95-28007

SOLAR CELLS
Annealing of radiation damaged gallium arsenide solar cells by laser illumination
[AD-A289683] p 2316 N95-26762
A state-space model of a large, lightly damped space structure using the Eigensystem realization algorithm
[AD-A289251] p 2163 N95-26970
Heat pipe cooled reactors for multi-kilowatt space power supplies
[DE95-005211] p 2420 N95-27425
Space environmental effect on solar cells: LDEF and other flight tests p 2326 N95-27649
Health and environmental hazards of CdTe photovoltaic module production, use and decommissioning
[DE95-006688] p 2320 N95-27682
Recent progress in the Photovoltaic Manufacturing Technology Project (PVMaT)
[DE95-000279] p 2320 N95-27704

SOLAR COLLECTORS
Solar concentrator technology development for space based applications, volume 1
[NASA-CR-197723] p 2319 N95-27193
Solar concentrator technology development for space based applications, volume 2
[NASA-CR-197724] p 2319 N95-27194
Analysis of solar receiver flux distributions for US/Russian solar dynamic system demonstration on the MIR Space Station
[NASA-TM-106933] p 2169 N95-28036

SOLAR CORONA
Coronal abundances and their variation
[NASA-CR-197788] p 2464 N95-26671
Plasma properties and magnetic field structure of the solar corona, based on coordinated Max 1991 observations from SERTS, the VLA, and magnetographs
[NASA-CR-198592] p 2464 N95-27858

SOLAR CYCLES
Relativistic electrons in the outer-zone: An 11 year cycle, their relation to the solar wind
[DE95-007882] p 2338 N95-28061

SOLAR DYNAMIC POWER SYSTEMS
Analysis of shadowing effects on MIR photovoltaic and solar dynamic power systems
[NASA-TM-106940] p 2169 N95-28213

SOLAR ELECTRIC PROPULSION
Solar concentrator technology development for space based applications, volume 1
[NASA-CR-197723] p 2319 N95-27193
Solar concentrator technology development for space based applications, volume 2
[NASA-CR-197724] p 2319 N95-27194
Electric propulsion for geostationary orbit insertion
[NASA-TM-106942] p 2168 N95-27727

SOLAR ENERGY
Axionic fuel for sun
[DE95-608788] p 2464 N95-27342

SOLAR ENERGY CONVERSION
Investigation on technology for increasing the biological CO2 sink and technology for CO2 fixation and reutilization
[DE95-759251] p 2329 N95-27941

SOLAR FLUX
Solar UV flux measurements from the SBUV2 monitor on the NOAA9 satellite. Part 1: Mg II h and k line core-to-wing ratios for 1986-1988
[PB95-181962] p 2464 N95-28007
Analysis of solar receiver flux distributions for US/Russian solar dynamic system demonstration on the MIR Space Station
[NASA-TM-106933] p 2169 N95-28036
Solar-geophysical data number 604, December 1994. Part 1: (Prompt reports). Data for November, October 1994, and late data
[PB95-181848] p 2465 N95-28087

SOLAR GENERATORS
Heat pipe cooled reactors for multi-kilowatt space power supplies
[DE95-005211] p 2420 N95-27425
PC Software graphics tool for conceptual design of space/planetary electrical power systems
[NASA-TM-106908] p 2372 N95-27905

SOLAR HEATING
A study of surface temperatures, clouds and net radiation
[NASA-CR-198589] p 2329 N95-27864

SOLAR INSTRUMENTS
Notes on the calibration of the JHU-APL solar vector magnetograph at NSO-Sec peak
[AD-A289277] p 2253 N95-26983

SOLAR MAGNETIC FIELD
Plasma properties and magnetic field structure of the solar corona, based on coordinated Max 1991 observations from SERTS, the VLA, and magnetographs
[NASA-CR-198592] p 2464 N95-27858

SOLAR NEUTRINOS
Detection of charged particles in superfluid helium
[DE95-007354] p 2403 N95-26560
Threefold maximal lepton mixing and the solar and atmospheric neutrino deficits
[PB95-196259] p 2465 N95-28500

SOLAR PHYSICS
Coronal abundances and their variation
[NASA-CR-197788] p 2464 N95-26671
Solar-geophysical data number 604, December 1994. Part 1: (Prompt reports). Data for November, October 1994, and late data
[PB95-181848] p 2465 N95-28087

SOLAR RADIATION
Solar terrestrial radiation data from the Sleepers River Research Watershed
[AD-A288444] p 2464 N95-27184
Analysis of selected specimens from the STS-46 Energetic Oxygen Interaction with Materials-3 experiment p 2210 N95-27642

Calculations of downward IR surface fluxes in the 500-3,000 cm(exp -1) wavenumber range for the 1994 ICRCCM model intercomparison study
[DE95-006430] p 2328 N95-27708

A study of surface temperatures, clouds and net radiation
[NASA-CR-198589] p 2329 N95-27864

Carbonaceous aerosols influencing atmospheric radiation: Black and organic carbon
[DE95-006437] p 2330 N95-28118

Anomalous cloud absorption? A critique of the paper entitled Absorption of Solar Radiation by Clouds: Observations Versus Models
[DE95-007703] p 2331 N95-28121

SOLAR SENSORS

Development of a Robust star identification technique for use in attitude determination of the ACE spacecraft
p 2149 N95-27777

SOLAR SYSTEM

Space modeler: An expanded, distributed, virtual environment for space visualization
[AD-A289409] p 2461 N95-27131

Views of the solar system
[DE95-006446] p 2461 N95-27326

TOPS: Toward Other Planetary Systems. A report by the solar system exploration division
[NASA-TM-110609] p 2464 N95-28009

SOLAR THERMAL PROPULSION

Solar concentrator technology development for space based applications, volume 1
[NASA-CR-197723] p 2319 N95-27193

Solar concentrator technology development for space based applications, volume 2
[NASA-CR-197724] p 2319 N95-27194

SOLAR WIND

Plasma properties and magnetic field structure of the solar corona, based on coordinated Max 1991 observations from SERTS, the VLA, and magnetographs
[NASA-CR-198592] p 2464 N95-27858

SOLAR X-RAYS

SXI Prototype mirror mount
[NASA-CR-196613] p 2301 N95-27244

The Solar X-ray Imager Vacuum Door Assembly
p 2157 N95-27280

SOLDERED JOINTS

Development of welded solar arrays for DMSP and GPS satellites
[AD-A289512] p 2318 N95-26846

A microstructurally based model of solder joints under conditions of thermomechanical fatigue
[DE95-006226] p 2309 N95-27837

SOLDERS

A microstructurally based model of solder joints under conditions of thermomechanical fatigue
[DE95-006226] p 2309 N95-27837

SOLENOIDS

The consideration of a bright relative beam dynamics in the magnetic focusing field
[DE95-608377] p 2398 N95-27160

SOLID ELECTROLYTES

Current status of environmental, health, and safety issues of lithium polymer electric vehicle batteries
[DE95-004005] p 2265 N95-27719

SOLID LUBRICANTS

Advanced solid lubricant films by Ion-Beam Assisted Deposition
[AD-A288866] p 2225 N95-26499

Solid film lubricants and thermal control coatings flown aboard the EOIM-3 MDA sub-experiment
p 2242 N95-27640

Analysis of selected specimens from the STS-46 Energetic Oxygen Interaction with Materials-3 experiment p 2210 N95-27642

SOLID PHASES

Rotor phases in compound semiconductors
[DE95-004139] p 2436 N95-26442

SOLID PROPELLANT ROCKET ENGINES

Hazards analysis of an integral class 1.1/1.3 rocket motor demilitarization and ingredient recovery system using ammonia p 2174 N95-28315

SOLID ROCKET PROPELLANTS

Chemical reactions identified in the Titan 2, Titan 4, and Delta 2 propellant systems and their application to source modeling p 2172 N95-28304

Hazards analysis of an integral class 1.1/1.3 rocket motor demilitarization and ingredient recovery system using ammonia p 2174 N95-28315

Commercial reformulation: An economic and environmentally neutral means of managing explosives and solid propellants p 2175 N95-28320

Alternate use of rocket propellants as ingredients in commercial watergel explosives p 2176 N95-28321

Cryogenic washout of solid rocket propellants
p 2176 N95-28324

Hydrothermal oxidation of solid rocket propellant and other department of defense hazardous wastes
p 2177 N95-28325

SOLID SOLUTIONS

Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device development
[AD-A289550] p 2437 N95-26756

Survey of environmentally benign cleaning methodologies and materials p 2231 N95-27122

Engineered materials for appliation in severe metallurgical environments: Tantalum-carbon alloy development
[DE95-006838] p 2216 N95-27488

Synthesis and properties of lanthanide-exchanged Preyssler's heteropolyanions
[DE95-007136] p 2238 N95-28235

SOLID STATE

Technical progress report to the Department of Energy on the Solid State Sciences Committee (SSSC)
[DE95-007113] p 2441 N95-27925

Solid state sintering of silicon nitride ARL-CR-114
[DE95-007291] p 2443 N95-28076

Solid-state sintering of tungsten heavy alloys
[DE95-007749] p 2222 N95-28130

Research activities of the Solid State Sciences Committee in the development of a Federal initiative on advanced materials and processing
[DE95-009328] p 2445 N95-28179

SOLID STATE DEVICES

Solid-state image sensor with focal-plane digital photon-counting pixel array
[NASA-CASE-NPO-18518-1-CU] p 2424 N95-26894

Active antennas with periodic structures
[AD-A289437] p 2252 N95-26924

Quasi-optical millimeter wave power combining
[AD-A291767] p 2270 N95-28529

SOLID STATE LASERS

Silicate gel dye laser
[AD-D017262] p 2294 N95-26503

Characterization of solid state laser and nonlinear optical materials
[AD-A291684] p 2300 N95-28458

SOLID WASTES

The use of supercritical carbon dioxide for contaminant removal from solid waste p 2229 N95-27110

Marshall Space Flight Center solid waste characterization and recycling improvement study
[NASA-CR-196594] p 2360 N95-27164

Recovery, evaluation, and decontamination of landfilled pentaborane cylinders, former liquid propellant rocket engine test facility, Washoe County, Nevada
p 2171 N95-28302

Ash-based ceramic materials
[AD-D017272] p 2241 N95-28582

SOLID-SOLID INTERFACES

Photoemission study of solid state reaction and initial oxidation of the Ce/Al(100) system
[PB95-195368] p 2210 N95-28652

SOLIDS

Photoacoustic chambers for studying solids and gases: Theory and practical examples
[IFTR-39/1994] p 2143 N95-26837

High energy density systems in cryogenic media: The production and reactions of atoms and radicals
[AD-A289818] p 2417 N95-28572

SOLITARY WAVES

Nonlinear problems in fluid dynamics and inverse scattering: Nonlinear waves and inverse scattering
[AD-A289148] p 2278 N95-27001

Proceedings of the International Workshop on Acceleration and Radiation Generation in Space and Laboratory Plasmas
[AD-A291673] p 2436 N95-28668

SOLUBILITY

Junkyard chemistry p 2227 N95-27102

Observations on the solvating power of supercritical fluids p 2228 N95-27106

Precision parts cleaning with supercritical CO2: Practical applications and solutions p 2229 N95-27111

Fluid dynamic effects on precision cleaning with supercritical fluids p 2232 N95-27129

Absorption of sparingly soluble gases by reactive media in self-aerated gas-liquid contactors: A scale-up procedure
[DE95-006429] p 2206 N95-27707

SOLUTES

Bubble chamber spectroscopy for chemical analysis: A new concept
[DE95-006350] p 2209 N95-28088

SOLUTIONS

Automatically selecting and using primary effects in planning: Theory and experiments
[AD-A289347] p 2450 N95-27064

Apparatus for diffusion controlled dialysis under microgravity conditions
[NASA-CASE-MFS-28986-1] p 2245 N95-27500

SOLVATION

Observations on the solvating power of supercritical fluids p 2228 N95-27106

Ethyl lactate as a solvent alternative for cleaning metal parts p 2229 N95-27112

SOLVENT EXTRACTION

Determination of the first hydrolysis constant of Europium (3) in 3 M of ionic strength
[DE95-607912] p 2405 N95-27211

SOLVENTS

Environmentally Benign Cleaning and Degreasing Technology: JANNAF Safety and Protection Subcommittee and Propellant Development and Characterization Subcommittee Joint Workshop
[CPIA-PUBL-611] p 2227 N95-27101

Cleanliness verification process at Martin Marietta Astronautics p 2165 N95-27104

A summary of ODS replacement technologies at Litton Poly-Scientific p 2228 N95-27105

Wipe solvent substitutions for 1,1,1-trichloroethane (TCA) and methyl ethyl ketone (MEK) at Hill Air Force Base p 2228 N95-27107

Alternative cleaning solvents and lubricants at the Air Force PJKS facility p 2228 N95-27108

The use of supercritical carbon dioxide for contaminant removal from solid waste p 2229 N95-27110

Precision parts cleaning with supercritical CO2: Practical applications and solutions p 2229 N95-27111

Ethyl lactate as a solvent alternative for cleaning metal parts p 2229 N95-27112

Corrosive effects of supercritical carbon dioxide and cosolvents on metals p 2224 N95-27113

Precision parts cleaning with supercritical carbon dioxide p 2229 N95-27114

Evaluations of the effectiveness of environmentally benign cleaning methodologies p 2230 N95-27115

Aqueous degreasing, precision cleaning, and cleanliness verification p 2231 N95-27121

Design considerations in supercritical fluid technology
p 2232 N95-27126

Retrofitting conventional vapor degreasers to use a solvent wash/fluorochemical rinse process
p 2232 N95-27127

Fluid dynamic effects on precision cleaning with supercritical fluids p 2232 N95-27129

The application of waterjets for cleaning
p 2233 N95-27130

Variation of solvent scattering-length density small-angle neutron scattering as a means of determining structure of composite materials
[DE95-005394] p 2183 N95-27428

Magnetic resonance imaging of solvent transport in polymer networks
[DE95-007142] p 2234 N95-27455

Small angle x ray scattering studies of reverse micelles in supercritical fluids
[DE95-007803] p 2287 N95-28021

SOMMERFELD WAVES

Very low frequency seismo-acoustic noise below the sea floor (0.2-10 Hz)
[AD-A289164] p 2347 N95-27011

SONAR

Molecular modeling: An approach for the study of piezoelectric polymers
[AD-A289821] p 2241 N95-28574

SONIC BOOMS

Design and testing of low sonic boom configurations and an oblique all-wing supersonic transport
[NASA-CR-197744] p 2129 N95-26651

Supersonic civil airplane study and design: Performance and sonic boom
[NASA-CR-197745] p 2130 N95-26813

SOOT

Soot particle density determination from a laser extinction multipass technique
[AD-A288551] p 2423 N95-26532

SORPTION

An investigation of the applicability of the new Reillex(tm)-HPQ anion exchange resin system for technetium/rhenium and uranium in the Hanford waste tanks
[DE95-007643] p 2412 N95-28051

SORTING ALGORITHMS

A parallel complexity model for functional languages
[AD-A288589] p 2365 N95-26656

SOS (SEMICONDUCTORS)

Microwave characterization of sub-micron N- and P-channel MOSFET's fabricated with thin film silicon-on-sapphire
[AD-A289296] p 2438 N95-27040

SOUND DETECTING AND RANGING

Aircraft IR/acoustic detection evaluation. Volume 2: Development of a ground-based acoustic sensor system for the detection of subsonic jet-powered aircraft
[NASA-CR-189705-VOL-2] p 2402 N95-28073

SOUND FIELDS

Acoustic field in unsteady moving media
[NASA-CR-198162] p 2279 N95-27179

SOUND GENERATORS

Simulating a multi-target acoustic array on the Intel Paragon
[AD-A288443] p 2377 N95-27183

A numerical study of fundamental shock noise mechanisms
[NASA-TM-110608] p 2401 N95-27908

Molecular modeling: An approach for the study of piezoelectric polymers
[AD-A289821] p 2241 N95-28574

SOUND LOCALIZATION

Head related transfer function approximation using neural networks
[AD-A289422] p 2382 N95-27145

SOUND PRESSURE

Numerical simulation of the SOFIA flow field
[NASA-CR-197757] p 2274 N95-26589

Observed acoustic and aeroelastic spectral responses of a MOD-2 turbine blade to turbulence excitation
p 2324 N95-27991

Anechoic wind tunnel study of turbulence effects on wind turbine broadband noise p 2325 N95-27992

SOUND TRANSDUCERS

Aircraft IR/acoustic detection evaluation. Volume 2: Development of a ground-based acoustic sensor system for the detection of subsonic jet-powered aircraft
[NASA-CR-189705-VOL-2] p 2402 N95-28073

SOUND TRANSMISSION

An acoustic charge transport imager for high definition television applications
[NASA-CR-197841] p 2249 N95-26708

SOUND WAVES

Self-excited oscillations in a duct with closed brances
[IFTR-18/1994] p 2400 N95-26358

A finite element propagation model for extracting normal incidence impedance in nonprogressive acoustic wave fields
[NASA-TM-110160] p 2400 N95-26394

The use of acoustic methods to determine the parameters of porous materials
[IFTR-40/1994] p 2401 N95-26519

Evaluation of a new laboratory acoustic Doppler velocimeter
[AD-A289592] p 2290 N95-26714

Signals processing using acousto-optical technology
[AD-A289597] p 2250 N95-26717

The automatic extraction of selected speech spectral characteristics
[IFTR-2/1994] p 2250 N95-26835

Numerical analysis of wave scattering
[AD-A289478] p 2401 N95-26925

Head related transfer function approximation using neural networks
[AD-A289422] p 2382 N95-27145

Ultrasonic study on ternary liquid systems by laser-sound interaction
[DE95-606783] p 2207 N95-27929

Observed acoustic and aeroelastic spectral responses of a MOD-2 turbine blade to turbulence excitation
p 2324 N95-27991

Anechoic wind tunnel study of turbulence effects on wind turbine broadband noise p 2325 N95-27992

Ultrasonic studies of liquid/solid seimoacoustic wave phenomena
[AD-A289644] p 2402 N95-28622

SOUNDING

An in situ evaluation of TOPEX/Poseidon altimetric measurements versus meaurements made by moorings and inverted echo sounders for sea surface height
[NASA-CR-198621] p 2347 N95-27805

SOURCE PROGRAMS

Advanced neutron source materials surveillance program
[DE95-005700] p 2215 N95-27464

SPACE COMMERCIALIZATION

Structures and materials technology needs for communications and remote sensing spacecraft
[NASA-CR-198186] p 2163 N95-27026

SPACE DEBRIS

Orbital impacts and the Space Shuttle windshield
[NASA-TM-110594] p 2159 N95-26379

Space Debris Research Phase One Program: Abstracts from published papers (1990-1993)
[AD-A289504] p 2162 N95-26850

Debris/Ice/TPS assessment and integrated photographic analysis of Shuttle mission STS-67
[NASA-TM-110651] p 2160 N95-27238

LDEF: 69 Months in Space. Third Post-Retrieval Symposium, part 3
[NASA-CP-3275-PT-3] p 2466 N95-27629

Orbiting meteoroid and debris counting experiment
p 2463 N95-27668

The orbital debris detector consortium: Suppliers of instruments for in-situ measurements of small-particles in the space environment p 2294 N95-27670

A new technique for ground simulation of hypervelocity debris p 2154 N95-27671

Computational studies of projectile melt in impact with typical whipple shields
[DE95-005916] p 2311 N95-28337

SPACE ENVIRONMENT SIMULATION

A new technique for ground simulation of hypervelocity debris p 2154 N95-27671

SPACE ERECTABLE STRUCTURES

Static stability of a three-dimensional space truss
[NASA-TM-106944] p 2164 N95-27730

Pre-integrated truss space station and method of assembly
[NASA-CASE-MSC-22015-1] p 2165 N95-27842

SPACE EXPLORATION

A rotating arm using shape-memory alloy
p 2157 N95-27276

Views of the solar system
[DE95-006446] p 2461 N95-27326

Multi-spacecraft coherent Doppler and ranging for interplanetary-navigation p 2150 N95-27786

TOPS: Toward Other Planetary Systems. A report by the solar system exploration division
[NASA-TM-110609] p 2464 N95-28009

SPACE FLIGHT

The Long Duration Exposure Facility (LDEF) photographic survey special publication
p 2457 N95-27660

Spaceflight revolution: NASA Langley Research Center from Sputnik to Apollo
[NASA-SP-4308] p 2474 N95-27685

SPACE HEATING (BUILDINGS)

Research on combustion processes relevant to burners in HVAC systems
[PB95-179735] p 2208 N95-28006

Planning, design and construction of the cavern arena: Heating, ventilation and air conditioning
[PB95-196382] p 2361 N95-28659

SPACE LABORATORIES

Microgravity Sciences Biotechnology Facility assessment
[NASA-CR-196602] p 2351 N95-27329

SPACE MISSIONS

Feasibility of flywheel energy storage systems for applications in future space missions
[NASA-CR-195422] p 2316 N95-26393

A multi-attribute-utility-theory model that minimizes interview-data requirements: A consolidation of space launch decisions
[AD-A289421] p 2164 N95-27144

Special features of the CLUSTER antenna and radial booms design, development and verification
p 2157 N95-27281

Microgravity Sciences Biotechnology Facility assessment
[NASA-CR-196602] p 2351 N95-27329

Development of a direct match technique for star identification on the SWAS mission
p 2148 N95-27771

TOPS: Toward Other Planetary Systems. A report by the solar system exploration division
[NASA-TM-110609] . p 2464 N95-28009

SPACE NAVIGATION

An analysis of orbital propagators for Low Earth Orbit Rendezvous
[AD-A288883] p 2161 N95-26458

Flight Mechanics/Estimation Theory Symposium 1995
[NASA-CP-3299] p 2146 N95-27763

Analysis of filter tuning techniques for sequential orbit determination p 2146 N95-27764

Differenced Range Versus Integrated Doppler (DRVID) ionospheric analysis of metric tracking in the Tracking and Data Relay Satellite System (TDRSS)
p 2147 N95-27766

A modified proportional navigation scheme for rendezvous and docking with tumbling targets: The Planar case p 2150 N95-27784

Application of non-coherent Doppler data types for deep space navigation p 2151 N95-27788

Operational considerations of using GPS for spacecraft navigation p 2152 N95-27794

SPACE OBSERVATIONS (FROM EARTH)

Observations of comets with the IUE
[NASA-CR-197816] p 2461 N95-27166

Tracking and impact prediction of Earth-Crossing-Objects (ECO's) on a collision course with Earth
[AD-A289321] p 2461 N95-27303

SPACE PLASMAS

Special features of the CLUSTER antenna and radial booms design, development and verification
p 2157 N95-27281

Differenced Range Versus Integrated Doppler (DRVID) ionospheric analysis of metric tracking in the Tracking and Data Relay Satellite System (TDRSS)
p 2147 N95-27766

Laboratory high-energy astrophysics on lasers
[DE95-008062] p 2462 N95-28013

Energization and transport of ions of ionospheric origin in the terrestrial magnetosphere
[NASA-CR-199618-REV] p 2338 N95-28035

Magnetic viscosity by localized shear flow instability in magnetized accretion disks
[DE95-006879] p 2433 N95-28111

Proceedings of the International Workshop on Acceleration and Radiation Generation in Space and Laboratory Plasmas
[AD-A291673] p 2436 N95-28668

SPACE PLATFORMS

Alternate charging profiles for the onboard nickel cadmium batteries of the Explorer Platform/Extreme Ultraviolet Explorer p 2272 N95-26796

Space Station as a Long Duration Exposure Facility
p 2166 N95-27663

SPACE PROGRAMS

A methodology to assess the utility of future space systems
[AD-A289414] p 2144 N95-27133

SPACE SHUTTLE BOOSTERS

Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation. Volume 4: System models and data analysis
[NASA-CR-197811] p 2160 N95-26401

Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation. Volume 5: Auxiliary shuttle risk analyses
[NASA-CR-197812] p 2160 N95-26403

Debris/Ice/TPS assessment and integrated photographic analysis of Shuttle mission STS-67
[NASA-TM-110651] p 2160 N95-27238

SPACE SHUTTLE MAIN ENGINE

Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation. Volume 4: System models and data analysis
[NASA-CR-197811] p 2160 N95-26401

Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation. Volume 5: Auxiliary shuttle risk analyses
[NASA-CR-197812] p 2160 N95-26403

Developmental problems and their solution for the Space Shuttle main engine alternate liquid oxygen high-pressure turbopump: Anomaly or failure investigation the key
[NASA-TP-3553] p 2169 N95-28263

AMCC casting development. Volume 1: Executive Summary
[NASA-CR-196597] p 2247 N95-28419

SPACE SHUTTLE MISSIONS

An overview of the Evaluation of Oxygen Interactions with Materials 3 experiment: Space Shuttle Mission 46, July-August 1992 p 2210 N95-27630

Evaluation of Oxygen Interactions with Materials 3: Mission and induced environments
p 2210 N95-27631

Spacecraft materials studies on the Aerospace Corporation tray on EOIM-3 p 2210 N95-27632

Exposure of LDEF materials to atomic oxygen: Results of EOIM 3 p 2210 N95-27633

LEO degradation of graphite and carbon-based composites aboard Space Shuttle Flight STS-46
p 2199 N95-27636

Orbital atomic oxygen effects on materials: An overview of MSFC experiments on the STS-46 EOIM-3
p 2419 N95-27637

Observational magnetometer calibration with the Hubble Space Telescope's new magnetometers
p 2148 N95-27773

SPACE SHUTTLE ORBITERS

Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation. Volume 5: Auxiliary shuttle risk analyses
[NASA-CR-197812] p 2160 N95-26403

SPACE SHUTTLE PAYLOADS

Micron Accuracy Deployment Experiment (MADE), phase A. Volume 1
[NASA-CR-197792] p 2144 N95-26426

The design and implementation of the Military Applications of Shiptracks experiment on Space Transportation System - 65
[AD-A288488] p 2160 N95-26834

Space Station as a Long Duration Exposure Facility p 2166 N95-27663

SPACE SHUTTLES

Orbital impacts and the Space Shuttle windshield [NASA-TM-110594] p 2159 N95-26379

Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation, volume 1 [NASA-CR-197808] p 2159 N95-26398

Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation. Volume 2: Integrated loss of vehicle model [NASA-CR-197809] p 2159 N95-26399

Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation. Volume 3: Basic events and minimal cutsets [NASA-CR-197810] p 2160 N95-26400

Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation. Volume 4: System models and data analysis [NASA-CR-197811] p 2160 N95-26401

Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation. Volume 5: Auxiliary shuttle risk analyses [NASA-CR-197812] p 2160 N95-26403

Aqueous degreasing, precision cleaning, and cleanliness verification p 2231 N95-27121

Debris/Ice/TPS assessment and integrated photographic analysis of Shuttle mission STS-67 [NASA-TM-110651] p 2160 N95-27238

SPACE STATION FREEDOM

A Materials Exposure Facility p 2166 N95-27664

Pre-integrated truss space station and method of assembly [NASA-CASE-MSC-22015-1] p 2165 N95-27842

SPACE STATION POWER SUPPLIES

Feasibility of flywheel energy storage systems for applications in future space missions [NASA-CR-195422] p 2316 N95-26393

SPACE STATION STRUCTURES

Static stability of a three-dimensional space truss [NASA-TM-106944] p 2164 N95-27730

Pre-integrated truss space station and method of assembly [NASA-CASE-MSC-22015-1] p 2165 N95-27842

SPACE STATIONS

Development and testing of the rack insertion device p 2158 N95-27289

LDEF: 69 Months in Space. Third Post-Retrieval Symposium, part 3 [NASA-CP-3275-PT-3] p 2466 N95-27629

LDEF's contribution to the selection of thermal control coatings for the Space Station p 2242 N95-27661

Space Station program status and research capabilities p 2166 N95-27662

Space Station as a Long Duration Exposure Facility p 2166 N95-27663

Discharge ignition behavior of the Space Station plasma contactor [NASA-TM-106925] p 2168 N95-27862

SPACE SURVEILLANCE (GROUND BASED)

Compensated deconvolution from wavefront sensing [AD-A289490] p 2336 N95-26824

A hybrid genetic algorithm for resolving closely spaced objects p 2384 N95-27387

SPACE SURVEILLANCE (SPACEBORNE)

A hybrid genetic algorithm for resolving closely spaced objects p 2384 N95-27387

SPACE TRANSPORTATION SYSTEM FLIGHTS

The design and implementation of the Military Applications of Shiptracks experiment on Space Transportation System - 65 [AD-A288488] p 2160 N95-26634

Load measurement system with load cell lock-out mechanism p 2159 N95-27291

LEO degradation of graphite and carbon-based composites aboard Space Shuttle Flight STS-46 p 2199 N95-27636

Orbital atomic oxygen effects on materials: An overview of MSFC experiments on the STS-46 EOIM-3 p 2419 N95-27637

LDEF's contribution to the selection of thermal control coatings for the Space Station p 2242 N95-27661

Tank pressure control in low gravity by jet mixing [NASA-CR-191012] p 2243 N95-28001

SPACE-TIME FUNCTIONS

The method of space-time conservation element and solution element-applications to one-dimensional and two-dimensional time-marching flow problems [NASA-TM-106915] p 2389 N95-26663

Spectral analyses, climatology, and interannual variability of Nimbus-7 TOMS version 6 total column ozone [NASA-RP-1360] p 2341 N95-26689

Crushing singularities in spacetimes with spherical, plane and hyperbolic symmetry [PB95-190146] p 2397 N95-28011

SPACEBORNE ASTRONOMY

A long-term space astrophysics research program: An x-ray perspective of the components and structure of galaxies [NASA-CR-197787] p 2461 N95-26593

The development of infrared detectors and mechanisms for use in future infrared space missions [NASA-CR-197819] p 2290 N95-26702

A rule-based shell to hierarchically organize HST observations p 2384 N95-27384

Development of a direct match technique for star identification on the SWAS mission p 2148 N95-27771

Retrofitting a fine-pointing system to satellite optics [DE95-004529] p 2427 N95-28516

SPACEBORNE EXPERIMENTS

The design and implementation of the Military Applications of Shiptracks experiment on Space Transportation System - 65 [AD-A288488] p 2160 N95-26634

An overview of the Evaluation of Oxygen Interactions with Materials 3 experiment: Space Shuttle Mission 46, July-August 1992 p 2210 N95-27630

Evaluation of Oxygen Interactions with Materials 3: Mission and induced environments p 2210 N95-27631

Spacecraft materials studies on the Aerospace Corporation tray on EOIM-3 p 2210 N95-27632

Exposure of LDEF materials to atomic oxygen: Results of EOIM 3 p 2210 N95-27633

LEO degradation of graphite and carbon-based composites aboard Space Shuttle Flight STS-46 p 2199 N95-27636

Orbital atomic oxygen effects on materials: An overview of MSFC experiments on the STS-46 EOIM-3 p 2419 N95-27637

Thermal control materials on EOIM-3 p 2242 N95-27639

Evaluation of space environmental effects on metals and optical thin films on EOIM-3 p 2210 N95-27641

Analysis of selected specimens from the STS-46 Energetic Oxygen Interaction with Materials-3 experiment p 2210 N95-27642

STS-46 plasma composition measurements using the EOIM-3 mass spectrometer p 2211 N95-27645

System results from FRECOPA p 2211 N95-27648

Space environmental effect on solar cells: LDEF and other flight tests p 2326 N95-27649

A final look at LDEF electro-optic systems components p 2428 N95-27650

Long Duration Exposure Facility (LDEF) space optics handbook p 2428 N95-27654

Space Station program status and research capabilities p 2166 N95-27662

Space Station as a Long Duration Exposure Facility p 2166 N95-27663

Element material experiment by EFFU p 2145 N95-27667

Orbiting meteoroid and debris counting experiment p 2463 N95-27668

Classification of RF transients in space using digital signal processing and neural network techniques [DE95-006287] p 2256 N95-27840

SPACEBORNE TELESCOPES

Comprehension and retrieval of failure cases in airborne observatories p 2145 N95-27394

Retrofitting a fine-pointing system to satellite optics [DE95-004529] p 2427 N95-28516

SPACECRAFT

Composite flexible insulation for thermal protection of space vehicles p 2166 N95-28293

SPACECRAFT ANTENNAS

Solar concentrator technology development for space based applications, volume 2 [NASA-CR-197724] p 2319 N95-27194

SPACECRAFT CHARGING

Discharge ignition behavior of the Space Station plasma contactor [NASA-TM-106925] p 2168 N95-27862

SPACECRAFT COMPONENTS

The 29th Aerospace Mechanisms Symposium [NASA-CP-3293] p 2154 N95-27260

Performance of the Satellite Test Assistant Robot in JPL's Space Simulation Facility p 2154 N95-27264

Changing paradigms: Manufacturing vs. fabricating a high volume Hold Down and Release Mechanism p 2155 N95-27267

The Clementine mechanisms p 2156 N95-27268

SPACECRAFT CONFIGURATIONS

An LDEF follow-on spacecraft concept p 2166 N95-27665

SPACECRAFT CONSTRUCTION MATERIALS

Spacecraft materials studies on the Aerospace Corporation tray on EOIM-3 p 2210 N95-27632

Exposure of LDEF materials to atomic oxygen: Results of EOIM 3 p 2210 N95-27633

LEO degradation of graphite and carbon-based composites aboard Space Shuttle Flight STS-46 p 2199 N95-27636

Orbital atomic oxygen effects on materials: An overview of MSFC experiments on the STS-46 EOIM-3 p 2419 N95-27637

A Materials Exposure Facility p 2166 N95-27664

Long Duration Exposure Facility post-flight data as it influences the Tropical Rainfall Measuring Mission p 2345 N95-27666

Element material experiment by EFFU p 2145 N95-27667

The Strategic Technologies for Automation and Robotics (STEAR) program: Protection of materials in the space environment subprogram p 2242 N95-27669

A new technique for ground simulation of hypervelocity debris p 2154 N95-27671

SPACECRAFT CONTAMINATION

International Space Station Alpha trace contaminant control subassembly life test report [NASA-TM-108488] p 2358 N95-26364

Evaluation of Oxygen Interactions with Materials 3: Mission and induced environments p 2210 N95-27631

Exposure of LDEF materials to atomic oxygen: Results of EOIM 3 p 2210 N95-27633

Long Duration Exposure Facility post-flight data as it influences the Tropical Rainfall Measuring Mission p 2345 N95-27666

SPACECRAFT CONTROL

Limits to ground control in autonomous spacecraft p 2383 N95-27381

Stable adaptive neurocontrollers for spacecraft and space robots p 2384 N95-27385

Fuzzy logic techniques for rendezvous and docking of two geostationary satellites p 2384 N95-27386

Geostationary Operational Environmental Satellite (GOES)-8 mission flight experience p 2153 N95-27798

SPACECRAFT DESIGN

Chinese space science and technology [AD-A289618] p 2466 N95-26856

Structures and materials technology needs for communications and remote sensing spacecraft [NASA-CR-198166] p 2163 N95-27026

The Clementine mechanisms p 2156 N95-27268

Thermal neutral format based on the step technology p 2283 N95-27363

From LDEF to a national Space Environment and Effects (SEE) program: A natural progression p 2145 N95-27657

An LDEF follow-on spacecraft concept p 2166 N95-27665

JPRS report: Science and technology. Central Eurasia [JPRS-UST-94-022] p 2246 N95-27699

PC Software graphics tool for conceptual design of space/planetary electrical power systems [NASA-TM-106908] p 2372 N95-27905

SPACECRAFT DOCKING

Telepresent spacecraft docking with object-based bilateral control (OBBC) [AD-A289268] p 2163 N95-26980

Fuzzy logic techniques for rendezvous and docking of two geostationary satellites p 2384 N95-27386

A modified proportional navigation scheme for rendezvous and docking with tumbling targets: The Planar case p 2150 N95-27784

SPACECRAFT ELECTRONIC EQUIPMENT

Characteristics of the standard current trip circuit [PB95-192886] p 2271 N95-28663

SPACECRAFT EQUIPMENT

The 50 Ah NiH2 CPV qualification tests p 2272 N95-26792

LDEF: 69 Months in Space. Third Post-Retrieval Symposium, part 3 [NASA-CP-3275-PT-3] p 2466 N95-27629

SPACECRAFT INSTRUMENTS

Orbiting meteoroid and debris counting experiment p 2463 N95-27668

The orbital debris detector consortium: Suppliers of instruments for in-situ measurements of small-particles in the space environment p 2294 N95-27670

SPACECRAFT LAUNCHING

A multi-attribute-utility-theory model that minimizes interview-data requirements: A consolidation of space launch decisions [AD-A289421] p 2164 N95-27144

Geostationary Operational Environmental Satellite (GOES)-8 mission flight experience
p 2153 N95-27798
Autonomous control system reconfiguration for spacecraft with non-redundant actuators
p 2153 N95-27802
Weather hazards to a Titan 4 on-pad destack-restack operation p 2172 N95-28307
Cape Canaveral air station launch emergency response forces and toxic materials release contingency plans
p 2172 N95-28308
Stratospheric ozone reactive chemicals generated by space launches worldwide
[AD-A289852] p 2332 N95-28623

SPACECRAFT MAINTENANCE
Building an adaptive agent to monitor and repair the electrical power system of an orbital satellite
p 2383 N95-27380
A fuzzy logic intelligent diagnostic system for spacecraft integrated vehicle health management
p 2385 N95-27392

SPACECRAFT MANEUVERS
Evaluation and modeling of autonomous attitude thrust control for the Geostation Operational Environmental Satellite (GOES)-8 orbit determination
p 2146 N95-27765
Operational improvements of long-term predicted ephemerides of the Tracking and Data Relay Satellites (TDRSs) p 2147 N95-27769
Attitude determination using an adaptive multiple model filtering Scheme p 2148 N95-27772
Optimal attitude maneuver execution for the Advanced Composition Explorer (ACE) mission
p 2149 N95-27778
A modified proportional navigation scheme for rendezvous and docking with tumbling targets: The Planar case p 2150 N95-27784
Contingency maneuver strategies for the Total Ozone Mapping Spectrometer-Earth Probe (TOMS-EP)
p 2152 N95-27796
Geostationary Operational Environmental Satellite (GOES)-8 mission flight experience
p 2153 N95-27798
ORION: A Supersynchronous Transfer Orbit mission
p 2154 N95-27804

SPACECRAFT MODULES
Element material experiment by EFFU
p 2145 N95-27667

SPACECRAFT MOTION
Differenced Range Versus Integrated Doppler (DRVID) ionospheric analysis of metric tracking in the Tracking and Data Relay Satellite System (TDRSS)
p 2147 N95-27766

SPACECRAFT ORBITS
A PC-based magnetometer-only attitude and rate determination system for gyroless spacecraft
p 2147 N95-27770
Attitude determination using an adaptive multiple model filtering Scheme p 2148 N95-27772
Application of non-coherent Doppler data types for deep space navigation p 2151 N95-27788
Operational considerations of using GPS for spacecraft navigation p 2152 N95-27794
The Global Positioning System (GPS) and attitude determination: Applications and activities in the Flight Dynamics Division p 2152 N95-27795
Summary of EOS flight dynamics analysis
p 2152 N95-27797

SPACECRAFT POWER SUPPLIES
Alternate charging profiles for the onboard nickel cadmium batteries of the Explorer Platform/Extreme Ultraviolet Explorer p 2272 N95-26796
Heat pipe cooled reactors for multi-kilowatt space power supplies
[DE95-005211] p 2420 N95-27425
PC Software graphics tool for conceptual design of space/planetary electrical power systems
[NASA-TM-106908] p 2372 N95-27905

SPACECRAFT PROPULSION
Advanced Earth-to-orbit propulsion technology information, dissemination and research
[NASA-CR-196582] p 2168 N95-27424

SPACECRAFT RADIATORS
Transitional flow in thin tubes for space station freedom radiator p 2282 N95-27360
Composite heat pipe development status: Development of lightweight prototype carbon-carbon heat pipe with integral fins and metal foil liner
[NASA-TM-106909] p 2283 N95-27369

SPACECRAFT RECOVERY
Chinese space science and technology
[AD-A289618] p 2466 N95-26856

SPACECRAFT REENTRY
Viscous shock-layer analysis on hypersonic flow over reentry capsule with nonequilibrium chemistry
[ISAS-R-656] p 2274 N95-26739
Rarefied gas effects on aerobraking/reentry vehicles with wakes
[NASA-CR-196586] p 2164 N95-27093

SPACECRAFT RELIABILITY
Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation. Volume 2: Integrated loss of vehicle model
[NASA-CR-197809] p 2159 N95-26399
Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation. Volume 5: Auxiliary shuttle risk analyses
[NASA-CR-197812] p 2160 N95-26403

SPACECRAFT SHIELDING
Debris/Ice/TPS assessment and integrated photographic analysis of Shuttle mission STS-67
[NASA-TM-110651] p 2160 N95-27238
Computational studies of projectile melt in impact with typical whipple shields
[DE95-005916] p 2311 N95-28337

SPACECRAFT STRUCTURES
Control of a large space structure using multiple model adaptive estimation and control techniques
[AD-A289309] p 2162 N95-26916
Analysis of modal behavior at frequency cross-over
[AD-A289304] p 2162 N95-26918
A state-space model of a large, lightly damped space structure using the Eigensystem realization algorithm
[AD-A289251] p 2163 N95-26970
The Clementine mechanisms p 2156 N95-27268
Basic space payload fastener p 2156 N95-27273
System identification of damped truss-like space structures
[NASA-TM-106638] p 2303 N95-27911
Stiffness and strength tailoring in uniform space-filling truss structures p 2188 N95-28290
Designing for time-dependent material response in spacecraft structures p 2166 N95-28292

SPACECRAFT TRACKING
Flight Mechanics/Estimation Theory Symposium 1995
[NASA-CP-3299] p 2146 N95-27763
Multi-spacecraft coherent Doppler and ranging for interplanetary-navigation p 2150 N95-27786
Application of non-coherent Doppler data types for deep space navigation p 2151 N95-27788
Operational considerations of using GPS for spacecraft navigation p 2152 N95-27794

SPACECRAFT TRAJECTORIES
Ulysses orbit determination at high declinations
p 2151 N95-27787
Contingency designs for attitude determination of TRMM p 2154 N95-27803

SPACELAB
Space Station program status and research capabilities p 2166 N95-27662

SPACING
Preliminary design study of the beam collapser and certain optomechanical aspects of the siderostat
[AD-A288423] p 2423 N95-26549
Characterization and redesign of the AFIT multielectrode array
[AD-A289295] p 2354 N95-27039

SPANWISE BLOWING
Study of potential aerodynamic benefits from spanwise blowing at wingtip
[NASA-TP-3515] p 2124 N95-28669

SPARK IGNITION
Aircraft fuel system lightning protection design and qualification test procedures development
[AD-A288401] p 2125 N95-26497

SPATIAL DEPENDENCIES
Temporal and spatial decorrelation scales of the Yellow Sea thermal fields
[AD-A288617] p 2346 N95-26483

SPATIAL DISTRIBUTION
Neural models of spatial orientation in novel environments
[AD-A288420] p 2380 N95-26530
Codes of processing and multiple resources: Model and methodology
[AD-A289583] p 2355 N95-26691
Boron-induced reconstructions of Si(100) investigated by scanning tunneling microscopy
[AD-A289222] p 2438 N95-26959
Amorphous silicon pixel radiation detectors and associated thin film transistor electronics readout
[DE95-006568] p 2265 N95-27678
Full complex modulation using two one-parameter spatial light modulators
[NASA-CASE-MSC-22255-1] p 2427 N95-28384
Method of space-time sequence transform used to measure acousto-optic deflection and modulation
[AD-A289612] p 2402 N95-28671

SPATIAL RESOLUTION
Fluxes across the west coast resolved by Picket Fence observations during stormfest
[AD-A288511] p 2341 N95-26653
Grayscale/resolution trade-off for text: Model predictions and psychophysical results for letter confusion and letter discrimination
[NASA-CR-197784] p 2369 N95-26930
A hybrid genetic algorithm for resolving closely spaced objects p 2384 N95-27387
Improved reduced-resolution satellite imagery
p 2376 N95-27388
A new technique for measuring the separation of closely spaced dislocations using residual contrast conditions
[DE95-007147] p 2219 N95-27968

SPECIFIC HEAT
C15 intermetallic compounds HfV2+Nb
[DE95-005264] p 2215 N95-27463
High energy electron beams for ceramic joining
[DE95-006316] p 2420 N95-27480

SPECIFICATIONS
Generalized CNF satisfiability, local reductions and complexity of succinctly specified problems
[DE95-006343] p 2372 N95-27849

SPECIMEN GEOMETRY
Density changes in amorphous Pd80Si20 during low temperature ion irradiation
[DE95-007132] p 2441 N95-27928

SPECKLE PATTERNS
Speckle spectrum of the ERS-1 wavemode product
[PB95-196564] p 2315 N95-28180
SAR noise reduction through the utilization of robust filters
[INPE-5504-PRE/1787] p 2258 N95-28569

SPECTRA
A spectral algorithm for the seriation problem
[DE95-004775] p 2372 N95-27436

SPECTRAL BANDS
FTIR measurements of thermal infrared sky radiance and transmission
[DE95-003642] p 2334 N95-26436

SPECTRAL EMISSION
Solar UV flux measurements from the SBUV2 monitor on the NOAA9 satellite. Part 1: Mg II h and k line core-to-wing ratios for 1986-1988
[PB95-181962] p 2464 N95-28007

SPECTRAL METHODS
Spectral methods on arbitrary grids
[NASA-CR-198158] p 2279 N95-27247
The Benard problem: A comparison of finite difference and spectral collocation eigen value solutions
p 2283 N95-27364
Weighting the recursive spectral bisection algorithm for unstructured grids
[DE95-008080] p 2373 N95-28521

SPECTRAL REFLECTANCE
Effects of low earth orbit on the optical performance of multi-layer enhanced high reflectance mirrors
p 2428 N95-27652

SPECTRAL RESOLUTION
Reconstruction of an infrared band of meteorological satellite imagery with abductive networks
[SAIC-94/1062] p 2345 N95-27389

SPECTRAL SENSITIVITY
The sensitive detection of hydrazine using chemiluminescence p 2173 N95-28311
A novel sensitive detector of atmospheric nitrocompounds based on laser photofragmentation/ionization spectrometry
p 2174 N95-28314

SPECTRAL SIGNATURES
Infrared field measurements of sea surface temperature: Analysis of wake signatures and comparison of skin layer models
[NASA-CR-197849] p 2346 N95-26533
Signatures of Higgs-Triplet representations at TeV-e(+)e(-) colliders
[DE95-007201] p 2419 N95-27089
Method for determining surface coverage by materials exhibiting different fluorescent properties
[NASA-CASE-GSC-13539-1] p 2315 N95-28211

SPECTRAL THEORY
Laser beam propagation in non-Kolmogorov atmospheric turbulence
[AD-A289256] p 2295 N95-26974

SPECTROGRAMS
Isolated digit recognition without time alignment
[AD-A289344] p 2254 N95-27062

SPECTROMETERS
Magnetic field measurement for the spectrometric magnet of the ISTRA-M setup
[DE95-608560] p 2362 N95-27162
The Alpha-Proton-X-ray Spectrometer deployment mechanism: An anthropomorphic approach to sensor placement on Martian rocks and soil
p 2155 N95-27265

A cryogenic scan mechanism for use in Fourier transform spectrometers p 2158 N95-27287

Search for deeply bound pionic atoms with high-purity germanium tagging spectrometer [DE95-609072] p 2416 N95-28252

A continuous emissions monitor for airborne metals p 2174 N95-28313

Pipelined first-level trigger for the H1 forward-muon spectrometer [PB95-196242] p 2423 N95-28452

Dimensionally self regulating materials [AD-A291671] p 2257 N95-28456

SPECTROPHOTOMETRY

Classical novae and recurrent novae: General properties p 2459 N95-27072

SPECTROSCOPIC ANALYSIS

Plume measurements with the T5 xenon ion thruster [AD-A288697] p 2167 N95-26489

Large area smart piezoelectric and pyroelectric sensors [AD-A288565] p 2290 N95-26541

Coronal abundances and their variation [NASA-CR-197788] p 2464 N95-26671

Collisional dynamics and spectroscopic studies of highly excited rovibrational levels of I2(X)(0(+)(sub g)) via stimulated emission pumping [AD-A289447] p 2295 N95-27172

Iron oxides characterization by Moessbauer spectroscopy [DE95-607869] p 2202 N95-27199

Magnetic resonance imaging of solvent transport in polymer networks [DE95-007142] p 2234 N95-27455

Material analysis using combined Elastic Recoil Detection and Rutherford/Enhanced Rutherford Backscattering Spectrometry [DE95-005415] p 2205 N95-27681

High temperature kinetic study of the reactions H + O2 = OH + O and O + H2 = OH + H in H2/O2 system by shock tube-laser absorption spectroscopy [NASA-CR-195473] p 2206 N95-27695

Plasma properties and magnetic field structure of the solar corona, based on coordinated Max 1991 observations from SERTS, the VLA, and magnetographs [NASA-CR-198592] p 2464 N95-27858

Investigation of the collision line broadening problem as applicable to the NASA Optical Plume Anomaly Detection (OPAD) system, phase 1 [NASA-CR-198605] p 2426 N95-27913

Electron spectroscopy studies of argon K-shell excitation and vacancy cascades [DE95-007096] p 2442 N95-27963

Bubble chamber spectroscopy for chemical analysis: A new concept [DE95-006350] p 2209 N95-28088

Computational and matrix isolation studies of (2- and 3-furyl)methylene [AD-A280085] p 2178 N95-28154

Method for determining surface coverage by materials exhibiting different fluorescent properties [NASA-CASE-GSC-13539-1] p 2315 N95-28211

Use of mussels in biomonitoring of environmental impacts of propellants, projectiles, explosives, and pyrotechnics p 2170 N95-28298

Weightless Environment Training Facility (WETF) materials coating evaluation, volume 2 [NASA-CR-188366-VOL-2] p 2239 N95-28386

Fellowship in physics [AD-A291691] p 2446 N95-28522

SPECTROSCOPY

Materials, structures, and devices for high-speed electronics [NASA-CR-197815] p 2260 N95-26816

Determining nanoscale physical properties of materials by microscopy and spectroscopy [AD-A289532] p 2201 N95-26870

Photoluminescence spectroscopy of 4H- and 6H-SiC [AD-A289326] p 2202 N95-26896

Observations of CEF-split intermultiplet transitions in optically opaque EuBa2Cu3O7 using inelastic neutron scattering [DE95-007135] p 2408 N95-27453

Material analysis using combined Elastic Recoil Detection and Rutherford/Enhanced Rutherford Backscattering Spectrometry [DE95-005415] p 2205 N95-27681

Assay of weathering effects on protective polymer coatings using positron annihilation spectroscopy [DE95-007040] p 2236 N95-27962

An investigation of the chemical and physical properties of pristine, electrochromically damaged, and photochromically damaged KTiOPO4 (KTP) using surface analytical and optical spectroscopic techniques [DE95-007865] p 2443 N95-28023

Phase stability and elasticity of C15 transition-metal intermetallic compounds [DE95-007876] p 2219 N95-28026

Observation on radiation transfer experiments using k-shell absorption spectra [DE95-008068] p 2434 N95-28141

Analysis of forward and inverse problems in chemical dynamics and spectroscopy [DE95-009309] p 2209 N95-28164

Spectroscopic and dynamical studies of highly energized small polyatomic molecules [DE95-006640] p 2414 N95-28199

Vibrational spectroscopy of water interfaces [DE95-006592] p 2209 N95-28218

International journal of quantum chemistry [AD-A291633] p 2352 N95-28546

SPECTRUM ANALYSIS

SeaWiFS technical report series. Volume 26: Results of the SeaWiFS Data Analysis Round-Robin, July 1994 (DARR-1994) [NASA-TM-104566-VOL-26] p 2345 N95-26430

Spectral analyses, climatology, and interannual variability of Nimbus-7 TOMS version 6 total column ozone [NASA-RP-1360] p 2341 N95-26689

Voice analysis using the bispectrum [AD-A289204] p 2254 N95-27008

Programming for time resolved spectrum in pulse radiolysis experiments [DE95-607929] p 2406 N95-27212

Effects of low earth orbit on the optical performance of multi-layer enhanced high reflectance mirrors p 2428 N95-27652

Basic principles and recent observations of rotationally sampled wind p 2321 N95-27971

Low power limits in ultrashort pulse measurement using Frequency-Resolved Optical Gating [DE95-007150] p 2299 N95-28219

Search for molecular absorptions with the Fourier Transform Spectrometer [NASA-CR-198648] p 2462 N95-28222

A study of heart rate and heart rate variability during rapid decompression to 50,000 ft [AD-A291598] p 2355 N95-28561

Material characterization system [AD-D017385] p 2210 N95-28584

In situ dynamic material property measurement system [AD-D017387] p 2210 N95-28585

SPECULAR REFLECTION

Off-specular scattering in neutron reflectometry [DE95-007835] p 2412 N95-28057

SPEECH

The automatic extraction of selected speech spectral characteristics [IFTR-2/1994] p 2250 N95-26835

An experimental version of the MZT (speech-from-text) system with external F(sub 0) control [IFTR-14/1994] p 2250 N95-26836

Voice analysis using the bispectrum [AD-A289204] p 2254 N95-27008

TRAINS: Dialogue transcription tools [AD-A289869] p 2259 N95-28624

SPEECH RECOGNITION

Speech analysis and synthesis based on pitch-synchronous segmentation of the speech waveform [AD-A288824] p 2248 N95-26349

Isolated digit recognition without time alignment [AD-A289344] p 2254 N95-27062

Multiclassifier fusion of an ultrasonic lip reader in automatic speech recognition [AD-A289207] p 2254 N95-27079

Construction of a connectionist network supercomputer [AD-A288439] p 2377 N95-27182

SPEED REGULATORS

Variable speed generator technology options for wind turbine generators p 2273 N95-27988

Variable speed generator application on the MOD-5A 7.3 mW wind turbine generator p 2273 N95-27989

SPHERES

Extensional flow convecting a reactant undergoing a first order homogeneous reaction and diffusional mass transfer from a sphere at low to intermediate Peclet and Damkohler numbers p 2280 N95-27346

Internal electric field of anisotropic and bi-anisotropic spheres [PB95-195491] p 2257 N95-28449

Method of images applied to electromagnetic problems involving spherical, spheroidal and planar geometries [PB95-195517] p 2257 N95-28451

Monte-Carlo simulation methods for finite flat plate winding flows [AD-A289842] p 2289 N95-28619

SPHERICAL ANTENNAS

Data acquisition software for DREO's near-field antenna measurement facility [AD-A289819] p 2258 N95-28573

SPHERICAL WAVES

Uncertainties in the calibration of hydrophones at NPL by the three-transducer spherical-wave reciprocity method in the frequency range 10 kHz on 500 kHz [PB95-185245] p 2401 N95-26615

Laser beam propagation in non-Kolmogorov atmospheric turbulence [AD-A289256] p 2295 N95-26974

SPHEROMAKS

Theoretical aspects of energy confinement in spheromaks [DE95-008079] p 2435 N95-28542

SPHINX

Prediction of material strength and fracture of glass using the SPHINX smooth particle hydrodynamics code [DE95-004869] p 2236 N95-27943

SPILLING

Use of SURFACE CHEMKIN to model multiphase atmospheric chemistry: Application to nitrogen tetroxide spills p 2172 N95-28305

SPIN

Structural oxidation state studies of the manganese cluster in the oxygen evolving complex of Photosystem II [DE95-008488] p 2409 N95-27744

SPIN STABILIZATION

Optimization of a nutation damper attached to a spin-stabilized satellite [AD-A289424] p 2162 N95-26887

Telemetry down-link Doppler as an attitude sensor for spin stabilized spacecraft p 2150 N95-27785

SPINE

Manikin integrated data acquisition system (MIDAS) initial modifications [AD-A291662] p 2361 N95-28667

SPINEL

AEM investigation of tetrahedrally coordinated Ti(4+) in nickel-titanate spinel [DE95-006624] p 2215 N95-27473

SPIRAL ANTENNAS

Improving the performance of spiral antennas by using passive scatterers [AD-A289324] p 2251 N95-26893

SPOILER SLOT AILERONS

Comparative wind tunnel tests of NACA 23024 airfoils with several aileron and spoiler configurations p 2124 N95-27976

SPONTANEOUS EMISSION

Design and characterization of resonant cavity light-emitting diodes [AD-A289307] p 2261 N95-26921

SPRAY CHARACTERISTICS

Apparatus for testing high pressure injector elements [NASA-CASE-MFS-28773-1] p 2304 N95-28347

SPRAY NOZZLES

Structure of high-speed sprays [AD-A291696] p 2288 N95-28523

SPRAYERS

Spray-formed tooling [DE95-005031] p 2246 N95-27404

Structure of high-speed sprays [AD-A291696] p 2288 N95-28523

SPRAYING

A composition joint PDF method for the modeling of spray flames p 2287 N95-27901

SPRINGS (ELASTIC)

Reference manual: Naive physics simulator [PB95-184917] p 2369 N95-26907

Analysis techniques for the prediction of springback in formed and bonded composite components p 2188 N95-28289

SPUTTERING

Faraday screen sputtering on TPX [DE95-008347] p 2434 N95-28224

STABILITY

Stability and thermal influences in nonlinear continuum mechanics and material science [AD-A288333] p 2448 N95-26563

Construction of arbitrary order schemes for many dimensional wave equation [PB95-184818] p 2276 N95-26928

First-principles study of intermetallic phase stability in the ternary Ti-Al-Nb alloy system [DE95-005259] p 2213 N95-27082

The effect on stability and thermal hydraulic quenchback of perforating the jacket of a cable-in-conduit conductor [DE95-005392] p 2262 N95-27083

New radiation stable and long-lived plastic scintillators [DE95-608622] p 2233 N95-27163

Comparison of the calculated and measured stability of a NbTi cable-in-conduit conductor [DE95-007964] p 2265 N95-27693

Phase stability and elasticity of C15 transition-metal intermetallic compounds
[DE95-007876] p 2219 N95-28026
Stability measurements on a 1-T high temperature superconducting magnet
[DE95-007411] p 2267 N95-28048
Normal modes and continuous spectra
[DE95-006166] p 2287 N95-28055
Formation of anisotropic Tl-1212, Tl-2212, Tl-1223 and Tl-2223 particles using aerosol flow reacted powders
[DE95-007400] p 2444 N95-28079
Infrared spectroscopy of nonclassical ions and their complexes
[DE95-008487] p 2413 N95-28091
Stability of chromite interconnections in dual environments
[DE95-007755] p 2267 N95-28131
FENIX experimental results of large-scale CICC made of bronze-processed Nb3Sn strands
[DE95-007965] p 2222 N95-28167
Aspects of strange matter
[DE95-008316] p 2414 N95-28170
Stability of strange quark stars with nuclear crusts against radial oscillations
[DE95-008484] p 2463 N95-28357
Development of low-expansion ceramics with strength retention to elevated temperatures
[DE95-005760] p 2239 N95-28397
Bilateral force feedback for hydraulically actuated systems
[AD-A291632] p 2387 N95-28545
A genuinely multidimensional upwind scheme and efficient multigrid solver for the compressible Euler equations
[NASA-CR-195000] p 2288 N95-28571
High energy density systems in cryogenic media: The production and reactions of atoms and radicals
[AD-A289818] p 2417 N95-28572

STABILITY TESTS
On the nonlinear stability of the unsteady, viscous flow of an incompressible fluid in a curved pipe
[NASA-CR-195065] p 2278 N95-27028
Flight control design using mixed H2/micron optimization
[AD-A289288] p 2142 N95-27036

STABILIZATION
Environmental effects on high energy density materials
[AD-A288296] p 2199 N95-26416
On the physics of ion ring generation for the stabilization of FRX discharges
[DE95-007105] p 2410 N95-27922
Wall stabilization of rotating high (Beta) discharges in D3-D
[DE95-008207] p 2435 N95-28406

STABILIZERS (FLUID DYNAMICS)
Composite repair of a CF18: Vertical stabilizer leading edge p 2134 N95-27517
NASA-ACEE/Boeing 737 graphite-epoxy horizontal stabilizer service p 2138 N95-28489

STAINING
To develop an aerosoling immunomagnetic device for rapid medical diagnosis from clinical samples
[AD-A288504] p 2354 N95-27059

STAINLESS STEELS
Fatigue fracture analysis in medium carbon structural steel and austenitic stainless steel by X-ray fractography
[DE95-601504] p 2213 N95-26675
Effects of helium pre-implantation on the microstructure and mechanical properties of irradiated 316 stainless steel
[DE95-007162] p 2214 N95-27086
Fluid dynamic effects on precision cleaning with supercritical fluids p 2232 N95-27129
Effect of internal hydrogen on the mixed-mode 1/3 fracture toughness of a ferrific/martensitic stainless steel
[DE95-005722] p 2216 N95-27479
Radiation-induced segregation: A microchemical gauge to quantify fundamental defect parameters
[DE95-005720] p 2216 N95-27492
A compatibility study of containment materials in FEFO, bis-(2-fluoro-2,2-dinitroethyl) formal
[DE95-007548] p 2206 N95-27750
Pulsed ion beam surface treatment for preparing rapidly solidified corrosion resistant steel and aluminum surfaces
[DE95-007741] p 2221 N95-28116
Mechanism of deposit formation on fuel-wetted hot metal surfaces
[AD-A289847] p 2210 N95-28621

STANDARD MODEL (PARTICLE PHYSICS)
The physics program and status of the SLAC B-Factory and detector
[DE95-006562] p 2409 N95-27676
Supersymmetry and light quark masses in a realistic superstring model
[DE95-610201] p 2412 N95-28041
Constraints on the anomalous WW gamma couplings from b vector s gamma
[DE95-608866] p 2415 N95-28246
Weak matrix elements efforts on the lattice: Status and prospects
[DE95-007701] p 2416 N95-28355

STANDARDIZATION
Standards for excellence
[NONP-NASA-VT-95-49096] p 2451 N95-27202
A comparison of measured wind park load histories with the WISPER and WISPERX load spectra
[DE95-000295] p 2319 N95-27459
The development of an engineering standard for composite repairs p 2135 N95-27528

STANDARDS
Digital mapping, charting, and geodesy analysis program technical review of Vector Quantization (VQ) Decompression for the National Imagery Transmission Format Standard (NITFS)
[AD-A288998] p 2314 N95-26682
Stability of reference masses 4: Growth of carbonaceous contamination on platinum-iridium mass standard surfaces, and its cleaning by UV/ozone treatment
[PB95-190096] p 2226 N95-26745
Survey of sub-micrometre powder size measurement for ceramic and cermet powders
[PB95-190104] p 2227 N95-26746

STANDING WAVES
Analysis of the dimerized Sb/Si(001)-(2x1) surface by x-ray standing waves
[DE95-007097] p 2208 N95-27965
Material characterization system
[AD-D017385] p 2210 N95-28584

STAPHYLOCOCCUS
Anti-idiotype probes for toxin detection
[AD-A288955] p 2348 N95-26435

STAR DISTRIBUTION
Development of a direct match technique for star identification on the SWAS mission
p 2148 N95-27771

STAR TRACKERS
Development of a direct match technique for star identification on the SWAS mission
p 2148 N95-27771
Experience from the in-flight calibration of the Extreme Ultraviolet Explorer (EUVE) and Upper Atmosphere Research Satellite (UARS) fixed head star trackers (FHSTs) p 2149 N95-27779

STATE ESTIMATION
A PC-based magnetometer-only attitude and rate determination system for gyroless spacecraft
p 2147 N95-27770
An MME-based attitude estimator using vector observations p 2148 N95-27775
Post Kalman progress p 2148 N95-27776
Use of nonlinear identification in robust attitude and attitude rate estimation for SAMPEX
p 2149 N95-27781
Telemetry down-link Doppler as an attitude sensor for spin stabilized spacecraft p 2150 N95-27785
Estimation of attitude sensor timetag biases
p 2153 N95-27799
Performance analysis of bullet trajectory estimation: Approach, simulation, and experiments
[DE95-007949] p 2399 N95-28109

STATE VECTORS
Computing NORAD mean orbital elements from a state vector
[AD-A289281] p 2146 N95-27033
The Hurwitz-Eulerian reduction
[DE95-608760] p 2396 N95-27337
Post Kalman progress p 2148 N95-27776
Estimation of attitude sensor timetag biases
p 2153 N95-27799
Performance analysis of bullet trajectory estimation: Approach, simulation, and experiments
[DE95-007949] p 2399 N95-28109
Quantum retrodiction and causality principle
[DE94-628438] p 2450 N95-28183

STATIC AERODYNAMIC CHARACTERISTICS
Reliability analysis of composite structures
p 2192 N95-28441

STATIC CHARACTERISTICS
Effects of floor location on response of composite fuselage frames p 2192 N95-28439

STATIC DISCHARGERS
The protection of electro-explosive devices (EEDs) and electronics from electrostatic discharge (ESD) hazards
[DSTO-TR-0100] p 2258 N95-28568

STATIC ELECTRICITY
The effect of aviation fuels containing low amounts of static dissipater additive on electrostatic charge generation
[AD-A280075] p 2243 N95-28152

STATIC LOADS
Investigation of static and cyclic bearing failure mechanisms for GR/EP laminates p 2190 N95-28427

STATIC MODELS
Earth horizon modeling and application to static Earth sensors on TRMM spacecraft p 2150 N95-27783
Alternative fuels and vehicles choice model
[DE95-005695] p 2243 N95-27944

STATIC TESTS
Experimental investigation of static and dynamic ground effect on HOPE ALFLEX vehicle
[NAL-TR-1236] p 2128 N95-26525
On aircraft repair verification of a fighter A/C integrally stiffened fuselage skin p 2133 N95-27515
External patch repair of CFRP/honeycomb sandwich
p 2134 N95-27522
Static and fatigue testing of full-scale fuselage panels fabricated using a Therm-X(R) process
p 2185 N95-28270
Development of composite carrythrough bulkhead
p 2192 N95-28438

STATIONKEEPING
Electric propulsion for geostationary orbit insertion
[NASA-TM-106942] p 2168 N95-27727

STATISTICAL ANALYSIS
Filtered kernel density estimation
[AD-A288293] p 2394 N95-26413
Quantitative modeling and analysis in environmental studies
[AD-A288451] p 2326 N95-26431
Fast multidimensional density estimation based on Random-width bins
[AD-A288286] p 2394 N95-26457
Nonlinear scalespace via hierarchical statistical modeling
[AD-A289057] p 2394 N95-26478
Indexing meso-beta surface wind site representative
[AD-A288501] p 2341 N95-26650
Statistical analysis of tensile mechanical property data of carbon/polyimide composites
[NAL-TR-1238] p 2180 N95-26667
Spectral analyses, climatology, and interannual variability of Nimbus-7 TOMS version 6 total column ozone
[NASA-RP-1360] p 2341 N95-26689
Statistical model for molecular internal energy exchange in DSMC method for rarefied flow analysis
[ISAS-R-654] p 2274 N95-26741
Satellite surface material composition from synthetic spectra
[AD-A289236] p 2163 N95-26963
Diagnosing cloudiness from global numerical weather prediction model forecasts
[AD-A289456] p 2356 N95-26992
Multiple model adaptive estimation and head motion tracking in a virtual environment: An engineering approach
[AD-A289299] p 2359 N95-27046
Statistical data analysis
[DE95-007214] p 2454 N95-27090
Probabilistic material strength degradation model for Inconel 718 components subjected to high temperature, high-cycle and low-cycle mechanical fatigue, creep and thermal fatigue effects
[NASA-CR-197832] p 2214 N95-27167
A probabilistic model of a porous heat exchanger
p 2282 N95-27359
Scientific statistics and graphics on the Macintosh
[DE95-006445] p 2372 N95-27533
An automated method of tuning an attitude estimator
p 2148 N95-27774
An MME-based attitude estimator using vector observations p 2148 N95-27775
Experience from the in-flight calibration of the Extreme Ultraviolet Explorer (EUVE) and Upper Atmosphere Research Satellite (UARS) fixed head star trackers (FHSTs) p 2149 N95-27779
Use of nonlinear identification in robust attitude and attitude rate estimation for SAMPEX
p 2149 N95-27781
Calculation of design load for the MOD-5A 7.3 mW wind turbine system p 2312 N95-27982
Emerging applications of probability (stochastic models in geosystems)
[AD-A289117] p 2313 N95-28099
Reliability analysis of composite structures
p 2192 N95-28441
The performance of cargo airdrop systems using g-12E parachutes: Statistical determination of minimum altitude
[AD-A291666] p 2126 N95-28454

Modeling and statistical analysis of bioassay data: Medaka cell proliferation under DEN and TCE [AD-A289998] p 2352 N95-28519

STATISTICAL CORRELATION

Towards the detection and attribution of an anthropogenic effect on climate [DE95-008589] p 2331 N95-28157

STATISTICAL DISTRIBUTIONS

A method for simulating correlated random variables from partially specified distributions [AD-A288820] p 2393 N95-26347

STATISTICAL MECHANICS

Statistical theory and reliability [AD-A288519] p 2394 N95-26733

STATISTICAL TESTS

Uncertainties in obtaining high reliability from stress-strength models p 2193 N95-28442

STEADY FLOW

SUPG finite numerical element solutions for non-compressible Navier-Stokes equation sets [AD-A289600] p 2274 N95-26718

A 3D agglomeration multigrid solver for the Reynolds-averaged Navier-Stokes equations on unstructured meshes [NASA-CR-195073] p 2390 N95-27029

STEADY STATE

Experimental investigation of the effects of relative physical orientation between evaporator and condenser for a loop heat pipe [AD-A289248] p 2277 N95-26968

Features and applications of the Groove Analysis Program (GAP) p 2281 N95-27349

Measurement of the D0 WAMUS magnet inductance [DE95-005128] p 2399 N95-27530

Advanced tokamak operating modes in TPX and ITER [DE95-008058] p 2434 N95-28138

Thermal analysis of PANSAT batteries and Electrical Power Subsystem [AD-A290013] p 2269 N95-28388

Operating points and feedback control of plasma characteristics in tokamaks with full current drive [DE95-007037] p 2435 N95-28553

A genuinely multidimensional upwind scheme and efficient multigrid solver for the compressible Euler equations [NASA-CR-195000] p 2288 N95-28571

STEELS

Current programmes on physical metallurgy and related areas in BARC [DE95-607939] p 2214 N95-27255

Investigation on LCA (Life Cycle Analysis/assessment) [DE95-759260] p 2330 N95-27942

Effects of hydrogen on carbon steels at the Multi-Function Waste Tank Facility [DE95-007194] p 2219 N95-28005

Improved hardness RHA weldability and material property testing [AD-A289127] p 2221 N95-28102

Stress analysis and failure of an internally pressurized composite-jacketed steel cylinder p 2186 N95-28280

Surface scanning techniques to locate and study defects in painted zinc and zinc alloy coated steels [DE95-006099] p 2240 N95-28547

STEERING

Aircraft nosewheel steering simulation p 2118 N95-26944

ELVIS: Eigenvectors for land vehicle image system [AD-A289297] p 2381 N95-27041

STELLAR COLOR

Dwarf novae p 2458 N95-27069

STELLAR COMPOSITION

Precision asteroseismology of DAV (ZZ CETI) white dwarf stars [DE95-006265] p 2462 N95-28056

STELLAR ENVELOPES

Models of classical and recurrent novae p 2459 N95-27073

Models of symbiotic stars p 2460 N95-27077

STELLAR EVOLUTION

Precision asteroseismology of DAV (ZZ CETI) white dwarf stars [DE95-006265] p 2462 N95-28056

STELLAR LUMINOSITY

Dwarf novae p 2458 N95-27069

Models for various aspects of dwarf novae and nova-like stars p 2459 N95-27071

Classical novae and recurrent novae: General properties p 2459 N95-27072

Precision asteroseismology of DAV (ZZ CETI) white dwarf stars [DE95-006265] p 2462 N95-28056

International Ultraviolet Explorer Atlas of B-type spectra from 1200 to 1900 A [NASA-RP-1363] p 2463 N95-28328

STELLAR MAGNITUDE

Dwarf novae p 2458 N95-27069

Classical novae and recurrent novae: General properties p 2459 N95-27072

STELLAR MASS

Precision asteroseismology of DAV (ZZ CETI) white dwarf stars [DE95-006265] p 2462 N95-28056

A new method of determining the ejected mass of novae [DE95-007884] p 2462 N95-28062

STELLAR MASS EJECTION

Models of classical and recurrent novae p 2459 N95-27073

Typical examples of classical novae p 2459 N95-27074

Recurrent novae p 2460 N95-27075

Discussion on selected symbiotic stars p 2460 N95-27078

A new method of determining the ejected mass of novae [DE95-007884] p 2462 N95-28062

STELLAR MODELS

Cataclysmic variables and related objects [NASA-SP-507] p 2458 N95-27068

Dwarf novae p 2458 N95-27069

Models for various aspects of dwarf novae and nova-like stars p 2459 N95-27071

Models of classical and recurrent novae p 2459 N95-27073

Models of symbiotic stars p 2460 N95-27077

Precision asteroseismology of DAV (ZZ CETI) white dwarf stars [DE95-006265] p 2462 N95-28056

STELLAR ORBITS

Dwarf novae p 2458 N95-27069

Models for various aspects of dwarf novae and nova-like stars p 2459 N95-27071

STELLAR OSCILLATIONS

Dwarf novae p 2458 N95-27069

Typical examples of classical novae p 2459 N95-27074

STELLAR RADIATION

Models of classical and recurrent novae p 2459 N95-27073

STELLAR SPECTRA

Nova-like variables p 2458 N95-27070

Models for various aspects of dwarf novae and nova-like stars p 2459 N95-27071

Classical novae and recurrent novae: General properties p 2459 N95-27072

Models of classical and recurrent novae p 2459 N95-27073

Typical examples of classical novae p 2459 N95-27074

Recurrent novae p 2460 N95-27075

Overview of the observations of symbiotic stars p 2460 N95-27076

Models of symbiotic stars p 2460 N95-27077

Discussion on selected symbiotic stars p 2460 N95-27078

International Ultraviolet Explorer Atlas of B-type spectra from 1200 to 1900 A [NASA-RP-1363] p 2463 N95-28328

STELLAR SPECTROPHOTOMETRY

Nova-like variables p 2458 N95-27070

Overview of the observations of symbiotic stars p 2460 N95-27076

STELLAR SYSTEMS

Normal modes and continuous spectra [DE95-006166] p 2287 N95-28055

STELLAR WINDS

International Ultraviolet Explorer Atlas of B-type spectra from 1200 to 1900 A [NASA-RP-1363] p 2463 N95-28328

STELLARATORS

Energetic particle destabilization of shear Alfven waves in stellarators and tokamaks [DE95-006393] p 2431 N95-27419

Nonlinear phenomena, turbulence and anomalous transport in fusion plasmas [DE95-007044] p 2431 N95-27497

Physics assessment of stellarators as fusion power plants [DE95-007045] p 2431 N95-27498

STEP FUNCTIONS

The ambiguity function of the stepped frequency radar [AD-A289533] p 2251 N95-26871

STEP RECOVERY DIODES

Survey on step recovery diode and its applications [PB95-184974] p 2260 N95-26646

STEPPING MOTORS

High performance stepper motors for space mechanisms p 2156 N95-27271

STIFFENING

Analytical investigations of the acceleration sensitivity of acoustic bulk and surface wave resonators [AD-A291715] p 2402 N95-28505

STIFFNESS

Effect of surface coating on one-dimensional system subjected to unit step pressure wave [AD-A288237] p 2308 N95-26625

Stiffness and strength tailoring in uniform space-filling truss structures p 2188 N95-28290

Indentability of conventional and negative Poisson's ratio foams p 2195 N95-28472

Damage tolerance of a geodesically stiffened advanced composite structural concept for aircraft structural applications p 2138 N95-28487

STIMULATED EMISSION

Collisional dynamics and spectroscopic studies of highly excited rovibrational levels of I2(X)(0(+)(sub g)) via stimulated emission pumping [AD-A289447] p 2295 N95-27172

STIMULATION

Silicon based microactuators for telerobotic tactile stimulation [AD-A289340] p 2260 N95-26767

STOCHASTIC PROCESSES

A method to determine the structure of an unknown mixture using the Akaike Information Criterion and the bootstrap [AD-A288295] p 2394 N95-26415

Nonlinear scalespace via hierarchical statistical modeling [AD-A289057] p 2394 N95-26478

Stochastic adaptive estimation and control [AD-A289088] p 2380 N95-26480

Random relaxation of fixed point iteration [PB95-185013] p 2389 N95-26910

The electrical behaviour of an excitable cell at different conditions [DE95-607911] p 2351 N95-27254

A NASTRAN-based computer program for structural dynamic analysis of Horizontal Axis Wind Turbines p 2312 N95-27980

Emerging applications of probability (stochastic models in geosystems) [AD-A289117] p 2313 N95-28099

DNS, LES and stochastic modeling of turbulent reacting flows [AD-A280099] p 2287 N95-28155

A study of non-stationary processes and their applications [AD-A291725] p 2395 N95-28510

Stochastic control and topics in applied probability [AD-A291712] p 2395 N95-28526

Exploiting parallelism in a Monte Carlo image-matching algorithm [AD-A289872] p 2374 N95-28625

STOICHIOMETRY

Stoichiometry, structure, and properties of La2NiO(4+(delta)) and La(2-x)Sr(x)NiO(4+/-(delta)) [DE95-007682] p 2439 N95-27443

AEM investigation of tetrahedrally coordinated Ti(4+) in nickel-titanate spinel [DE95-006624] p 2215 N95-27473

Crystal and magnetic structure of stoichiometric YFe2O4 [DE95-006627] p 2440 N95-27487

Trace elements and the mechanical properties of intermetallic compounds [DE95-007378] p 2220 N95-28046

STORABLE PROPELLANTS

High pressure Earth storable rocket technology program: Basic program [NASA-CR-195449] p 2166 N95-26390

STORAGE RINGS (PARTICLE ACCELERATORS)

Coupling in the Tevatron [DE95-005129] p 2421 N95-27531

The physics program and status of the SLAC B-Factory and detector [DE95-006562] p 2409 N95-27676

Lattice calculation for lepton capture from vacuum-pair production in relativistic heavy-ion collisions [DE95-007392] p 2413 N95-28077

Skew chromaticity [DE95-007677] p 2422 N95-28115

Nonlinear beam dynamics experimental program at SPEAR [DE95-007823] p 2422 N95-28122

Ordered one-component plasmas: Phase transitions, normal modes, large systems, and experiments in a storage ring [DE95-007077] p 2434 N95-28233

Pipelined first-level trigger for the H1 forward-muon spectrometer [PB95-196242] p 2423 N95-28452

STORAGE TANKS

Tank pressure control in low gravity by jet mixing [NASA-CR-191012] p 2243 N95-28001

Bases for extrapolating materials durability in fuel storage pools [DE95-007748] p 2222 N95-28129

Recovery, evaluation, and decontamination of landfilled pentaborane cylinders, former liquid propellant rocket engine test facility, Washoe County, Nevada p 2171 N95-28302

STORMS

FORTE antenna element and release mechanism design p 2157 N95-27282

STOVL AIRCRAFT

Simulation model of the integrated flight/propulsion control system, displays, and propulsion system for ASTOVL lift-fan aircraft [NASA-TM-108866] p 2139 N95-26412

STOWAGE (ONBOARD EQUIPMENT)

Tie-down trials involving a Sikorsky S-70B-2 helicopter [DSTO-TR-0132] p 2136 N95-28567

STRAIN ENERGY METHODS

Evaluation of patch effectiveness in repairing aircraft components p 2133 N95-27513

STRAIN ENERGY RELEASE RATE

Static and dynamic strain energy release rates in toughened thermosetting composite laminates p 2188 N95-28288

Analysis of composite structures with delaminations under combined bending and compression p 2190 N95-28429

STRAIN GAGES

Power train torque measurement [AD-A289577] p 2301 N95-26688

STRAIN MEASUREMENT

Fatigue behavior of a cross-ply metal matrix composite at elevated temperature under strain controlled mode [AD-A289425] p 2181 N95-26865

SMART materials: Surfaces, transforms and interfaces. The commensurate engineering dimension [AD-A289598] p 2312 N95-28649

STRAIN RATE

The high strain rate deformation of tungsten single crystals [AD-A288674] p 2223 N95-28189

Technology integration box beam failure study p 2194 N95-28468

The elevated temperature tensile properties of S-200E commercially pure beryllium [DE95-009331] p 2223 N95-28534

STRANDS

FENIX experimental results of large-scale CICC made of bronze-processed Nb3Sn strands [DE95-007965] p 2222 N95-28167

STRANGE ATTRACTORS

Vibration control using chaotic motion stabilizers [AD-A289576] p 2398 N95-26687

STRANGENESS

Aspects of strangeness [DE95-008314] p 2414 N95-28169

Aspects of strange matter [DE95-008316] p 2414 N95-28170

Stability of strange quark stars with nuclear crusts against radial oscillations [DE95-008484] p 2463 N95-28357

STRATEGY

Malcolm Baldrige National Quality Award winners 1989 [NONP-NASA-VT-95-49119] p 2451 N95-27207

Strategies for recycling CdTe photovoltaic modules [DE95-006776] p 2325 N95-28517

STRATOSPHERE

Replicator for characterization of cirrus and polar stratospheric cloud particles [NASA-CR-197785] p 2341 N95-26669

Stratospheric ozone reactive chemicals generated by space launches worldwide [AD-A289852] p 2332 N95-28623

STRESS ANALYSIS

Creep recovery of PVC and polypropylene [PB95-185112] p 2224 N95-26448

Effect of surface coating on one-dimensional system subjected to unit step pressure wave [AD-A288237] p 2308 N95-26625

Statistical theory and reliability [AD-A288519] p 2394 N95-26733

Comparison of life theories for rolling-element bearings [NASA-TM-106585] p 2301 N95-26774

Addressing tension instability in SPH methods [AD-A289531] p 2276 N95-26852

Effect of hoop stress on ball bearing life prediction [NASA-TM-106874] p 2301 N95-27178

Design and structural validation of CF116 upper wing skin boron doubler p 2132 N95-27510

Evaluation of patch effectiveness in repairing aircraft components p 2133 N95-27513

Repair technology for thermoplastic aircraft structures p 2134 N95-27519

Scarf repairs to graphite/epoxy components p 2135 N95-27523

Damage occurrence on composites during testing and fleet service: Repair of Airbus aircraft p 2135 N95-27526

Using hob offset to balance dynamic strength in spur gears [NASA-TM-106934] p 2302 N95-27698

Stress transfer from axially loaded fiber to matrix in a microcomposite [DE95-007366] p 2183 N95-28043

Accuracy issues in modeling superplastic metal forming [DE95-008934] p 2222 N95-28163

Stress analysis and failure of an internally pressurized composite-jacketed steel cylinder p 2186 N95-28280

Analysis of stresses in finite anisotropic panels with centrally located cutouts p 2187 N95-28286

Compression failure of angle-ply laminates p 2190 N95-28428

Reliability analysis of composite structures p 2192 N95-28441

Uncertainties in obtaining high reliability from stress-strength models p 2193 N95-28442

Non-linear viscoelastic behaviour [PB95-192811] p 2199 N95-28639

STRESS CONCENTRATION

Tension fracture of laminates for transport fuselage. Part 1: Material screening p 2137 N95-28471

STRESS CORROSION CRACKING

Environmentally assisted cracking of high strength beta titanium alloys [AD-A289156] p 2213 N95-27032

Stress corrosion cracking susceptibility of the earthquake resistant NOM B457 Mexican steel [DE95-607956] p 2214 N95-27256

STRESS DISTRIBUTION

Fatigue fracture analysis in medium carbon structural steel and austenitic stainless steel by X-ray fractography [DE95-601504] p 2213 N95-26675

Comparison of life theories for rolling-element bearings [NASA-TM-106585] p 2301 N95-26774

Reactor pressure vessel structural integrity research [DE95-007034] p 2223 N95-28208

Tension fracture of laminates for transport fuselage. Part 1: Material screening p 2137 N95-28471

STRESS MEASUREMENT

Fatigue fracture analysis in medium carbon structural steel and austenitic stainless steel by X-ray fractography [DE95-601504] p 2213 N95-26675

STRESS-STRAIN RELATIONSHIPS

Fatigue behavior of a cross-ply metal matrix composite at elevated temperature under strain controlled mode [AD-A289425] p 2181 N95-26865

Viscoplastic characterization and fatigue modeling of titanium based metal matrix composites [AD-A289430] p 2181 N95-26868

Characterization of fatigue behavior of 2-D woven fabric reinforced ceramic matrix composite at elevated temperature [AD-A289423] p 2181 N95-26886

Fatigue behavior of a cross-ply ceramic matrix composite at elevated temperature under tension-tension loading [AD-A289250] p 2182 N95-26969

Forming metallurgy: Supervised drawing course, NTH [PB95-196507] p 2219 N95-27934

Deformation limits on two-parameter fracture mechanics in terms of higher order asymptotics [AD-A289113] p 2310 N95-28098

Residual stress, strain, and faults in nanocrystalline palladium and copper [DE95-008294] p 2223 N95-28543

STRESSES

Split pipe testing device for the measurement of bond of reinforcement under controlled confinement [AD-D017258] p 2245 N95-26500

STRETCH FORMING

Application of advanced material systems to composite frame elements p 2191 N95-28432

STRING THEORY

Finite fermion density effects on the electroweak string [DE95-608802] p 2448 N95-27312

Supersymmetry and light quark masses in a realistic superstring model [DE95-610201] p 2412 N95-28041

STRINGERS

Load transfer in the stiffener-to-skin joints of a pressurized fuselage [NASA-CR-198610] p 2310 N95-27865

STRONG INTERACTIONS (FIELD THEORY)

Measurement of alpha(s) in e(+)e(-) annihilation at E(cm) = 29 GeV [DE95-006486] p 2417 N95-28594

STRONTIUM COMPOUNDS

The oxidation state and magnetic behaviour of Tb in high-(Tc) related materials [DE95-007129] p 2219 N95-27966

STRUCTURAL ANALYSIS

Manual for SHOCK3D, version 2.0. Computer program for non-linear shock response [AD-A288631] p 2307 N95-26342

A non-iterative grid deformation algorithm for computational fluid dynamics for aeroelasticity [AD-A288298] p 2273 N95-26418

User's guide: Computer program for analysis of beam-column structures with nonlinear supports (CBEAMC) [AD-A289031] p 2307 N95-26464

Large area smart piezoelectric and pyroelectric sensors [AD-A288565] p 2290 N95-26541

Addressing tension instability in SPH methods [AD-A289531] p 2276 N95-26852

The collapse of composite cylindrical panels with various thickness using finite element analysis [AD-A289370] p 2308 N95-26905

Characterization of the membrane theory of a clamped shell. The hyperbolic case [PB95-185021] p 2308 N95-26911

Analysis of modal behavior at frequency cross-over [AD-A289304] p 2162 N95-26918

Structures and materials technology needs for communications and remote sensing spacecraft [NASA-CR-198166] p 2163 N95-27026

Summaries of theses for the degree of diploma engineer 1992-1993 [PB95-184867] p 2246 N95-27048

Fatigue behavior of a cross-ply ceramic matrix composite subjected to tension-tension cycling with hold time [AD-A289418] p 2182 N95-27134

An experimental investigation of sandwich flat panels under low velocity impact [AD-A289420] p 2309 N95-27135

The Solar X-ray Imager Vacuum Door Assembly p 2157 N95-27280

Micromechanical modeling of damage and inelasticity of composite materials in macroscopic structural analysis [DE95-003666] p 2182 N95-27421

Bonded composite repair of metallic aircraft components: Overview of Australian activities p 2132 N95-27505

Design and structural validation of CF116 upper wing skin boron doubler p 2132 N95-27510

Static stability of a three-dimensional space truss [NASA-TM-106944] p 2164 N95-27730

Load transfer in the stiffener-to-skin joints of a pressurized fuselage [NASA-CR-198610] p 2310 N95-27865

Trace elements and the mechanical properties of intermetallic compounds [DE95-007378] p 2220 N95-28046

Aeroelasticity and structural optimization of composite helicopter rotor blades with swept tips [NASA-CR-4665] p 2136 N95-28262

Static and fatigue testing of full-scale fuselage panels fabricated using a Therm-X(R) process p 2185 N95-28270

Higher order finite element analysis of thick composite laminates p 2186 N95-28282

Failure analysis of thick composite cylinders under external pressure p 2187 N95-28284

Analysis of stresses in finite anisotropic panels with centrally located cutouts p 2187 N95-28286

The role of biaxial stresses in discriminating between meaningful and illusory composite failure theories p 2187 N95-28287

Analysis techniques for the prediction of springback in formed and bonded composite components p 2188 N95-28289

Stiffness and strength tailoring in uniform space-filling truss structures p 2188 N95-28290

Mechanisms of compressive failure in woven composites and stitched laminates p 2189 N95-28424

Investigation of static and cyclic bearing failure mechanisms for GR/EP laminates p 2190 N95-28427

Analysis of composite structures with delaminations under combined bending and compression p 2190 N95-28429

Development of composite carrythrough bulkhead p 2192 N95-28438

Probabilistic evaluation of fuselage-type composite structures p 2137 N95-28444

Composite fuselage shell structures research at NASA Langley Research Center p 2194 N95-28466

Structural testing of the technology integration box beam p 2194 N95-28467

Development of stitched/RTM composite primary structures p 2195 N95-28469

Test and analysis results for composite transport fuselage and wing structures p 2137 N95-28470

STRUCTURAL DESIGN

Design and development of a test rig for the high frequency testing of rolling sleeve airsprings
[DSTO-TN-0001] p 2142 N95-26378

Fabrication of long wavelength array by in-situ molecular beam epitaxy
[AD-A288599] p 2423 N95-26679

Design and development of experimental facilities for short duration, low-gravity combustion and fire experiments
[NASA-CR-195458] p 2244 N95-26709

Calorimetric evaluation of commercial Ni-MH cells and charges p 2272 N95-26790

Unique features of a new nickel-hydrogen 2-cell CPV
p 2272 N95-26793

AIAA Techfest 20 Proceedings
[NIAR-94-1] p 2118 N95-26941

Summaries of theses for the degree of diploma engineer 1992-1993
[PB95-184867] p 2246 N95-27048

SXI Prototype mirror mount
[NASA-CR-198613] p 2301 N95-27244

Damage occurrence on composites during testing and fleet service: Repair of Airbus aircraft
p 2135 N95-27526

Space Station as a Long Duration Exposure Facility
p 2166 N95-27663

Load transfer in the stiffener-to-skin joints of a pressurized fuselage
[NASA-CR-198610] p 2310 N95-27865

Analytical and experimental evaluation of joining silicon carbide to silicon carbide and silicon nitride to silicon nitride for advanced heat engine applications, phase 2
[DE95-005761] p 2303 N95-27947

Horizontal axis wind turbine post stall airfoil characteristics synthesization p 2124 N95-27974

Calculation of design load for the MOD-5A 7.3 mW wind turbine system p 2312 N95-27982

Whirl plus tilt
[DE95-007948] p 2399 N95-28108

Ninth DOD/NASA/FAA Conference on Fibrous Composites in Structural Design, volume 3
[NASA-CR-198718] p 2184 N95-28266

Development of a low-cost, modified resin transfer molding process using elastomeric tooling and automated preform fabrication p 2184 N95-28268

Resin transfer molding of textile preforms for aircraft structural applications p 2185 N95-28276

Stiffness and strength tailoring in uniform space-filling truss structures p 2188 N95-28290

Ninth DOD/NASA/FAA Conference on Fibrous Composites in Structural Design, volume 1
[NASA-CR-198723] p 2189 N95-28420

Ninth DOD/NASA/FAA Conference on Fibrous Composites in Structural Design, volume 2
[NASA-CR-198722] p 2193 N95-28462

Overview of the ACT program p 2193 N95-28463

Development of stitched/RTM composite primary structures p 2195 N95-28469

Recent progress in NASA Langley textile reinforced composites program p 2196 N95-28475

Damage tolerance of a geodesically stiffened advanced composite structural concept for aircraft structural applications p 2138 N95-28487

Design and fabrication of a diamond-turned hybrid diffractive/refractive singlet for visible applications at ORNL
[DE95-007007] p 2427 N95-28552

STRUCTURAL DESIGN CRITERIA

Structural design optimization with survivability dependent constraints application: Primary wing box of a multi-role fighter p 2137 N95-28440

STRUCTURAL ENGINEERING

Summaries of theses for the degree of diploma engineer 1992-1993
[PB95-184867] p 2246 N95-27048

Probabilistic evaluation of fuselage-type composite structures p 2137 N95-28444

COINS: A composites information database system
p 2194 N95-28465

STRUCTURAL FAILURE

The collapse of composite cylindrical panels with various thickness using finite element analysis
[AD-A289370] p 2308 N95-26905

Design and structural validation of CF116 upper wing skin boron doubler p 2132 N95-27510

Repair technology for thermoplastic aircraft structures
p 2134 N95-27519

Static stability of a three-dimensional space truss
[NASA-TM-106944] p 2164 N95-27730

Reactor pressure vessel structural integrity research
[DE95-007034] p 2223 N95-28208

Applications of a damage tolerance analysis methodology in aircraft design and production
p 2197 N95-28483

Numerical simulation of crack growth in pressurized fuselages
[PB95-192415] p 2137 N95-28636

STRUCTURAL MEMBERS

Analysis and development of finite element methods for the study of nonlinear thermomechanical behavior of structural components
[NASA-CR-195354] p 2307 N95-26387

Comparison of resin film infusion, resin transfer molding, and consolidation of textile preforms for primary aircraft structure p 2196 N95-28477

STRUCTURAL RELIABILITY

Reliability analysis of composite structures
p 2192 N95-28441

Probabilistic design of advanced composite structure
p 2193 N95-28443

STRUCTURAL STABILITY

C15 intermetallic compounds HfV2+Nb
[DE95-005264] p 2215 N95-27463

Static stability of a three-dimensional space truss
[NASA-TM-106944] p 2164 N95-27730

High pressure optical studies of semiconductors and heterostructures
[DE95-007119] p 2410 N95-27927

Aeroelastic stability of wind turbine blade/aileron systems p 2124 N95-27981

STRUCTURAL STRAIN

A model of rotationally-sampled wind turbulence for predicting fatigue loads in wind turbines
p 2312 N95-27972

STRUCTURAL VIBRATION

Ball bearing vibrations amplitude modeling and test comparisons p 2158 N95-27286

Experimental studies to test simple flexural neutralizers fitted to beams
[ISVR-TR-239] p 2309 N95-27846

Vibration analysis of a split path gearbox
[NASA-TM-106875] p 2302 N95-27855

System identification of damped truss-like space structures
[NASA-TM-106638] p 2303 N95-27911

In situ dynamic material property measurement system
[AD-D017387] p 2210 N95-28585

STRUCTURAL WEIGHT

Structural design optimization with survivability dependent constraints application: Primary wing box of a multi-role fighter p 2137 N95-28440

STRUCTURED GRIDS (MATHEMATICS)

Introduction to multigrid methods
[NASA-CR-195045] p 2388 N95-26395

Unstructured mesh generation and adaptivity
[NASA-CR-195069] p 2278 N95-27027

STUDENTS

Funding for AFRAPT student trainees for academic year 1992-1993
[AD-A288461] p 2466 N95-26604

Characterization and redesign of the AFIT multielectrode array
[AD-A289295] p 2354 N95-27039

SUBDIVISIONS

Selected bibliography on heavy water, tritiated water and hydrogen isotopes (1981-1992)
[DE95-608331] p 2405 N95-27159

Current programmes on physical metallurgy and related areas in BARC
[DE95-607939] p 2214 N95-27255

SUBLIMATION

Self-assembly of low-dimensional molecular nanoclusters on Au(111) surfaces
[AD-A288936] p 2178 N95-28334

SUBMERGING

SeaWiFS technical report series. Volume 27: Case studies for SeaWiFS calibration and validation, part 3
[NASA-TM-104566-VOL-27] p 2348 N95-28030

SUBROUTINE LIBRARIES (COMPUTERS)

Using the scalable nonlinear equations solvers package
[DE95-008323] p 2378 N95-28071

SUBROUTINES

Fitting: Subroutine to fit four-moment probability distributions to data
[DE95-007722] p 2395 N95-27684

SUBSIDIARIES

An ugly duckling becomes a swan (hor ellipsis): How an organization becomes customer focused through listening
[DE95-004974] p 2454 N95-27461

Investigation on working out the global regeneration plan
[DE95-759246] p 2329 N95-27938

SUBSONIC FLOW

A fixed time performance evaluation of parallel CFD applications
[DE94-014240] p 2273 N95-26445

Effect of toroidal plasma flow and flow shear on global MHD modes
[DE95-006676] p 2433 N95-28106

TranAir: A full-potential, solution-adaptive, rectangular grid code for predicting subsonic, transonic, and supersonic flows about arbitrary configurations. User's manual
[NASA-CR-4349] p 2123 N95-28230

TranAir: A full-potential, solution-adaptive, rectangular grid code for predicting subsonic, transonic, and supersonic flows about arbitrary configurations. Theory document
[NASA-CR-4348] p 2123 N95-28265

Response of multi-panel assembly to noise from a jet in forward motion
[NASA-CR-198164] p 2289 N95-28673

SUBSONIC SPEED

Airfoil modification effects on subsonic and transonic pressure distributions and performance for the EA-6B airplane
[NASA-TP-3516] p 2120 N95-26382

Performance characterization of a highly-offset diffuser with and without blowing vortex generator jets
[AD-A289334] p 2122 N95-26901

A general theory of two- and three-dimensional rotational flow in subsonic and transonic turbomachines
[NASA-CR-4496] p 2123 N95-28003

Measurements of store forces and moments and cavity pressures for a generic store in and near a box cavity at subsonic and transonic speeds
[NASA-TM-4611] p 2123 N95-28241

Study of potential aerodynamic benefits from spanwise blowing at wingtip
[NASA-TP-3515] p 2124 N95-28669

Noise exposure reduction of advanced high-lift systems
[NASA-CR-195077] p 2402 N95-28670

Numerical study to assess sulfur hexafluoride as a medium for testing multielement airfoils
[NASA-TP-3496] p 2124 N95-28674

SUBSTITUTES

Mechanisms of hypertension after cross-linked hemoglobin blood-substitute transfusion
[AD-A289558] p 2352 N95-26680

Wipe solvent substitutions for 1,1,1-trichloroethane (TCA) and methyl ethyl ketone (MEK) at Hill Air Force Base p 2228 N95-27107

Investigation on energy conversion technology using biochemical reaction elements, 2
[DE95-759250] p 2321 N95-27940

Surfactants and desensitizing wax substitutes for TNT-Based systems
[AD-A289652] p 2243 N95-28834

SUBSTRATES

Electrocrystallization of an ordered organic monolayer: Selective epitaxial growth of beta(ET)213 ongraphite
[AD-A288942] p 2178 N95-26589

Monolithic electronics for nuclear and high-energy physics experiments
[DE95-005393] p 2420 N95-27427

Growth of hydrogenated amorphous silicon (a-Si:H) on patterned substrates for increased mechanical stability
[DE95-006589] p 2234 N95-27472

Preferentially etched epitaxial liftoff of InP material
[NASA-CASE-LEW-15760-1] p 2235 N95-27503

Atomic oxygen dosimetry measurements made on STS-46 by CONCAP 2 p 2418 N95-27634

Effects of long term space environment exposure on optical substrates and coatings p 2428 N95-27653

Flat panel display development activities at Sandia National Laboratories
[DE95-005442] p 2265 N95-27706

Analysis of the dimerized Sb/Si(001)-(2x1) surface by x-ray standing waves
[DE95-007097] p 2208 N95-27965

Effects of interlayers on the scratch adhesion performance of ultra-thin films of copper and gold on silicon substrates
[DE95-007367] p 2220 N95-28044

Pulsed laser deposition of zeolitic membranes
[DE95-006274] p 2298 N95-28124

Weightless Environment Training Facility (WETF) materials coating evaluation, volume 1
[NASA-CR-188366-VOL-1] p 2239 N95-28385

Weightless Environment Training Facility (WETF) materials coating evaluation, volume 2
[NASA-CR-188366-VOL-2] p 2239 N95-28386

Weightless Environment Training Facility (WETF) materials coating evaluation, volume 3
[NASA-CR-188366-VOL-3] p 2239 N95-28387

Functionalized block copolymers as adhesion promoters
[DE95-008158] p 2239 N95-28400

SUBSTRUCTURES
Micromechanical modeling of damage and inelasticity of composite materials in macroscopic structural analysis
[DE95-003666] p 2182 N95-27421

SUBZERO TEMPERATURE
FREZCHEM: A chemical-thermodynamic model for aqueous solutions at subzero temperatures
[AD-A288456] p 2200 N95-26432

SULFATES
Thermodynamics of aqueous electrolytes at high temperatures by the isopiestic technique
[DE95-006747] p 2449 N95-27546
Towards the detection and attribution of an anthropogenic effect on climate
[DE95-008589] p 2331 N95-28157

SULFIDES
Molecular approach to mesoporous metal sulfides
[DE95-005418] p 2202 N95-27137
Solid film lubricants and thermal control coatings flown aboard the EOIM-3 MDA sub-experiment
p 2242 N95-27640
Muon spin relaxation in ferromagnets: Theoretical results for paramagnetic EuO and EuS
[PB95-192860] p 2418 N95-28641

SULFONES
A new technique for ground simulation of hypervelocity debris p 2154 N95-27671

SULFUR
Hydrogen induced C-C, C-N, and C-S bond activities on Pi and Ni surfaces
[DE95-006251] p 2206 N95-27838
High temperature oxidation of nickel concentrates
[PB95-195566] p 2224 N95-28644

SULFUR COMPOUNDS
Measurement of heterogeneous chemical processes relevant to aerosol surfaces and trace gases active in the marine environment
[DE95-008337] p 2328 N95-27743

SULFUR DIOXIDES
FY 1994 ambient air monitoring report for McMurdo Station, Antarctica
[DE95-008565] p 2331 N95-28149
Remote sensing of the atmosphere by resonance Raman LIDAR
[DE95-007312] p 2315 N95-28520

SULFUR HEXAFLUORIDE
Numerical study to assess sulfur hexafluoride as a medium for testing multielement airfoils
[NASA-TP-3496] p 2124 N95-28674

SULFUR OXIDES
Measurement of heterogeneous chemical processes relevant to aerosol surfaces and trace gases active in the marine environment
[DE95-008337] p 2328 N95-27743

SULFURIC ACID
Solid film lubricants and thermal control coatings flown aboard the EOIM-3 MDA sub-experiment
p 2242 N95-27640

SUM RULES
Couplings of heavy hadrons with soft pions from QCD sum rules
[DE95-610349] p 2407 N95-27410

SUMMARIES
Summaries of theses for the degree of diploma engineer 1992-1993
[PB95-184867] p 2246 N95-27048

SUN
Coronal abundances and their variation
[NASA-CR-197788] p 2464 N95-26671
SXI Prototype mirror mount
[NASA-CR-196613] p 2301 N95-27244
Axionic fuel for sun
[DE95-608788] p 2464 N95-27342
Solar UV flux measurements from the SBUV2 monitor on the NOAA9 satellite. Part 1: Mg II h and k line core-to-wing ratios for 1986-1988
[PB95-181962] p 2464 N95-28007
Advances in scientific visualization
[DE95-008065] p 2343 N95-28014

SUNLIGHT
The program for calculating sunshine duration from global radiation
[KNMI-TR-158] p 2343 N95-28237

SUNSPOT CYCLE
Relativistic electrons in the outer-zone: An 11 year cycle, their relation to the solar wind
[DE95-007882] p 2338 N95-28061

SUNSPOTS
Solar-geophysical data number 604, December 1994. Part 1: (Prompt reports). Data for November, October 1994, and late data
[PB95-181848] p 2465 N95-28087

SUPERCOMPUTERS
Massively parallel self-consistent-field calculations
[DE95-004128] p 2376 N95-26441
Parallel computing on various platforms: A case study
[AD-A289008] p 2376 N95-26460
Performance prediction: A case study using a multi-ring KSR-1 machine
[NASA-CR-195068] p 2361 N95-26697
Performance and policy dimensions in internet routing
[NASA-CR-197772] p 2367 N95-26770
Second International Conference on Software for Multiprocessors and Supercomputers Theory, Practice, Experience
[AD-A289474] p 2368 N95-26820
Construction of a connectionist network supercomputer
[AD-A288439] p 2377 N95-27182
NAS Technical Summeries, March 1993 - February 1994
[NASA-RP-1355] p 2466 N95-27367
Gigabit LAN issues: HIPPI, Fibre Channel, or ATM?
[DE95-003673] p 2378 N95-27422
Lattice QCD calculation using VPP500
[DE95-007076] p 2449 N95-27448
Fluctuations and transport in fusion plasmas
[DE95-007111] p 2433 N95-27924
Sandia's network for Supercomputing '94: Linking the Los Alamos, Lawrence Livermore, and Sandia National Laboratories using switched multimegabit data service
[DE95-007717] p 2378 N95-28074
Applications of boundary element methods on the Intel Paragon
[DE94-014135] p 2393 N95-28393

SUPERCONDUCTING DEVICES
The effect on stability and thermal hydraulic quenchback of perforating the jacket of a cable-in-conduit conductor
[DE95-005392] p 2262 N95-27083
Investigation of high-temperature superconducting flywheel energy storage devices
[DE95-759242] p 2320 N95-27936

SUPERCONDUCTING MAGNETS
Measurement of the D0 WAMUS magnet inductance
[DE95-005128] p 2399 N95-27530
Induced axial oscillations in superconducting dipole windings
[DE95-005690] p 2265 N95-27554
Investigation of high-temperature superconducting flywheel energy storage devices
[DE95-759242] p 2320 N95-27936
Stability measurements on a 1-T high temperature superconducting magnet
[DE95-007411] p 2267 N95-28048
Field quality improvements in superconducting magnets for RHIC
[DE95-006096] p 2269 N95-28339
Manufacture and testing of the superconducting wire and cable for the RHIC dipoles and quadrupoles
[DE95-006000] p 2270 N95-28515

SUPERCONDUCTING SUPER COLLIDER
Silicon subsystem mechanical engineering closeout report for the Solenoidal Detector Collaboration
[DE95-006336] p 2421 N95-27735
Beam instability studies for the SSC
[DE95-008024] p 2423 N95-28551

SUPERCONDUCTIVITY
Investigations of the hyperfine interactions in copper-oxide perovskites using Eu-151 and Fe-57 Moessbauer spectroscopy
[PB95-185138] p 2437 N95-26513
The 18th Annual Condensed Matter Physics Meeting
[DE95-605568] p 2398 N95-26598
Diagnostic system Cryo-D for the determination of parameters of vapor-liquid currents of the coolant
[DE95-608775] p 2280 N95-27338
Electromagnetic hysteretic response calculation for superconductors in demagnetizing geometries
[DE95-005028] p 2264 N95-27403
Review of activities in USA on HTS materials
[DE95-006404] p 2234 N95-27468
Induced axial oscillations in superconducting dipole windings
[DE95-005690] p 2265 N95-27554
Inflight resistance measurement on high-T(sub c) superconducting thin films exposed to orbital atomic oxygen on CONCAP-2 (STS-46) p 2272 N95-27635
Magnetic structures in RNi2B2C (R = Ho, Er) superconductors
[DE95-008370] p 2442 N95-27932
Sintering of textured YBa2Cu3O(7-x) under intensive Co-60 gamma irradiation
[DE95-007098] p 2442 N95-27950
Recent neutron scattering results on high-temperature superconductors
[DE95-007028] p 2413 N95-28066
FENIX experimental results of large-scale CICC made of bronze-processed Nb3Sn strands
[DE95-007965] p 2222 N95-28167
Theory of exotic superconductivity and normal states of heavy electron and high temperature superconductivity materials
[DE95-006637] p 2268 N95-28198

SUPERCONDUCTORS (MATERIALS)
Electromagnetic hysteretic response calculation for superconductors in demagnetizing geometries
[DE95-005028] p 2264 N95-27403
The physics and chemistry of heavy Fermions
[DE95-005277] p 2407 N95-27431
Review of activities in USA on HTS materials
[DE95-006404] p 2234 N95-27468
Magnetic structures in RNi2B2C (R = Ho, Er) superconductors
[DE95-008370] p 2442 N95-27932
Formation of anisotropic Tl-1212, Tl-2212, Tl-1223 and Tl-2223 particles using aerosol flow reacted powders
[DE95-007400] p 2444 N95-28079
The real structure of columnar pinning centers in heavy-ion-irradiated cuprate superconductors
[DE95-003948] p 2445 N95-28186

SUPERCOOLING
Supercooled liquid dynamics for the charged hard-sphere model
[DE95-609158] p 2241 N95-28609

SUPERCRITICAL FLOW
Effect of turbulence models on criticality conditions in swirling flows p 2282 N95-27356

SUPERCRITICAL FLUIDS
Environmentally Benign Cleaning and Degreasing Technology: JANNAF Safety and Protection Subcommittee and Propellant Development and Characterization Subcommittee Joint Workshop
[CPIA-PUBL-611] p 2227 N95-27101
Observations on the solvating power of supercritical fluids p 2228 N95-27106
The use of supercritical carbon dioxide for contaminant removal from solid waste p 2229 N95-27110
Precision parts cleaning with supercritical CO2: Practical applications and solutions p 2229 N95-27111
Corrosive effects of supercritical carbon dioxide and cosolvents on metals p 2224 N95-27113
Precision parts cleaning with supercritical carbon dioxide p 2229 N95-27114
Survey of environmentally benign cleaning methodologies and materials p 2231 N95-27122
Design considerations in supercritical fluid technology
p 2232 N95-27126
The experience of CF Technologies, Inc. (CF Tech) in critical fluid processing p 2232 N95-27128
Fluid dynamic effects on precision cleaning with supercritical fluids p 2232 N95-27129
Small angle x ray scattering studies of reverse micelles in supercritical fluids
[DE95-007803] p 2287 N95-28021

SUPERFLUIDITY
Detection of charged particles in superfluid helium
[DE95-007354] p 2403 N95-26560

SUPERHIGH FREQUENCIES
Prediction of rain attenuation and total atmospheric attenuation for low-availability satellite communications in Europe
[PB95-184925] p 2252 N95-26908
Measurement of wakefield suppression in a detuned X-band accelerator structure
[DE95-008592] p 2422 N95-28159

SUPERLATTICES
Elastic properties of metallic superlattices
[AD-A288699] p 2212 N95-26490
Molecular object liquid crystals: An approach to new materials
[AD-A288905] p 2437 N95-26553
Materials, structures, and devices for high-speed electronics
[NASA-CR-197815] p 2260 N95-26816
Magnetic and structural properties of Fe/Pd multilayers studied by magnetic x-ray dichroism and x-ray absorption spectroscopy
[DE95-007095] p 2206 N95-27755
Heterostructures and infrared emitters with compressed InAsSb layers
[DE95-008157] p 2446 N95-28399

SUPERNOVAE
Discovery of the most distant supernovae and the quest for (Omega)
[DE95-006569] p 2460 N95-28197
Theoretical studies of interstellar processes
[NASA-CR-198647] p 2462 N95-28216

SUPERPLASTIC FORMING
Accuracy issues in modeling superplastic metal forming
[DE95-008934] p 2222 N95-28163

SUPERSONIC AIRCRAFT
Development of injury preventing helmet servo-support system for high performance aircraft
[AD-A289547] p 2359 N95-26755
SUPERSONIC BOUNDARY LAYERS
Compressible turbulence measurements in a supersonic boundary layer including favorable pressure gradient effects
[AD-A289475] p 2276 N95-26821
On the modulational instability of large amplitude waves in supersonic boundary layers
[NASA-CR-195072] p 2284 N95-27760
SUPERSONIC COMBUSTION RAMJET ENGINES
Experiment on a rectangular cross section scramjet combustor. 2: Effects of fuel injector geometry
[NAL-TR-1220] p 2139 N95-26600
Effects of dust from storage heaters on ignition in scramjets
[NAL-TR-1234] p 2139 N95-26706
Experimental investigation of inlet-combustor isolators for a dual-mode scramjet at a Mach number of 4
[NASA-TP-3502] p 2140 N95-28343
SUPERSONIC FLOW
A fixed time performance evaluation of parallel CFD applications
[DE94-014240] p 2273 N95-26445
Wind tunnel experiments on wake flow field behind a reentry capsule from a viewpoint of parachute deployment at supersonic speeds
[ISAS-R-655] p 2121 N95-26740
Development of an upwind, finite-volume code with finite-rate chemistry
[NASA-CR-197747] p 2121 N95-26760
Compressible turbulence measurements in a supersonic boundary layer including favorable pressure gradient effects
[AD-A289475] p 2276 N95-26821
Compressible turbulence measurements in a supersonic flow with adverse pressure gradient
[AD-A289477] p 2276 N95-26822
An investigation of the AFIT 2-inch shock tube as a flow source for supersonic testing
[AD-A289246] p 2143 N95-26966
A laboratory scale supersonic combustive flow system
[DE95-006347] p 2206 N95-27851
A numerical method for solving the three-dimensional parabolized Navier-Stokes equations
[NASA-CR-198159] p 2287 N95-27917
TranAir: A full-potential, solution-adaptive, rectangular grid code for predicting subsonic, transonic, and supersonic flows about arbitrary configurations. User's manual
[NASA-CR-4349] p 2123 N95-28230
TranAir: A full-potential, solution-adaptive, rectangular grid code for predicting subsonic, transonic, and supersonic flows about arbitrary configurations. Theory document
[NASA-CR-4348] p 2123 N95-28265
SUPERSONIC JET FLOW
Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device development
[AD-A289550] p 2437 N95-26756
Supersonic coaxial jet noise predictions
[NASA-TM-106917] p 2401 N95-26801
Preliminary results and research capabilities of a new jet facility at the University of Kansas
p 2119 N95-26951
Visualization of the multiple supersonic jet oscillations by swept focused strobed schlieren technique
p 2119 N95-26952
A numerical study of fundamental shock noise mechanisms
[NASA-TM-110608] p 2401 N95-27908
SUPERSONIC SPEED
An investigation of the AFIT 2-inch shock tube as a flow source for supersonic testing
[AD-A289246] p 2143 N95-26966
Experimental investigation of inlet-combustor isolators for a dual-mode scramjet at a Mach number of 4
[NASA-TP-3502] p 2140 N95-28343
SUPERSONIC TRANSPORTS
Supersonic transport grid generation, validation, and optimization
[NASA-CR-197752] p 2365 N95-26648
CFD research, parallel computation and aerodynamic optimization
[NASA-CR-197748] p 2120 N95-26649
Design and testing of low sonic boom configurations and an oblique all-wing supersonic transport
[NASA-CR-197744] p 2129 N95-26651
Supersonic civil airplane study and design: Performance and sonic boom
[NASA-CR-197745] p 2130 N95-26813
Preliminary design problems and solutions for a supersonic oblique all-wing transport aircraft
p 2118 N95-26942
The high speed civil transport and NASA's High Speed Research (HSR) program p 2118 N95-26945
SUPERSONIC TURBINES
Turbomachinery design and tonal acoustics computations
[NASA-CR-197749] p 2139 N95-26777
SUPERSONIC WAKES
Wind tunnel experiments on wake flow field behind a reentry capsule from a viewpoint of parachute deployment at supersonic speeds
[ISAS-R-655] p 2121 N95-26740
SUPERSONIC WIND TUNNELS
Computational support of the laminar flow supersonic wind tunnel, CNSFV code development, Maglev, and grid generation
[NASA-CR-197750] p 2143 N95-26775
A laboratory scale supersonic combustive flow system
[DE95-006347] p 2206 N95-27851
SUPERSYMMETRY
q-structure algebra of U(sub q)(g-circumflex) from its adjoint action
[DE95-608749] p 2390 N95-27301
Extended BRST symmetry for the relativistic particle with curvature
[DE95-608799] p 2406 N95-27309
Field theory of point-like systems with higher-order derivatives
[DE95-608800] p 2448 N95-27310
Implications of horizontal symmetries on baryon number violation in supersymmetric models
[DE95-610202] p 2407 N95-27406
Search for SUSY at CDF
[DE95-005109] p 2407 N95-27430
Search for supersymmetry and leptoquark states at FNAL
[DE95-003381] p 2410 N95-27871
Supersymmetry and light quark masses in a realistic superstring model
[DE95-610201] p 2412 N95-28041
SUPPLYING
Alternative fuels and vehicles choice model
[DE95-005695] p 2243 N95-27944
SUPPORT SYSTEMS
Vector Smart Map Level 1: A new DMA product
[AD-A288920] p 2452 N95-26607
Design considerations for FrankTalk: A distributed group support system
[AD-A289386] p 2359 N95-26863
SUPPORTS
User's guide: Computer program for analysis of beam-column structures with nonlinear supports (CBEAMC)
[AD-A289031] p 2307 N95-26464
Preliminary design study of the beam collapser and certain optomechanical aspects of the siderostat
[AD-A288423] p 2423 N95-26549
SXI Prototype mirror mount
[NASA-CR-196613] p 2301 N95-27244
Tie-down trials involving a Sikorsky S-70B-2 helicopter
[DSTO-TR-0132] p 2136 N95-28567
SUPPRESSORS
Suppressor of oscillations in airframe cavities
[AD-D017265] p 2128 N95-26507
SURFACE CRACKS
New radiation stable and long-lived plastic scintillators
[DE95-608622] p 2233 N95-27163
SURFACE DEFECTS
Surface damage effects generated by a fast-pulse laser beam
[AD-A289131] p 2295 N95-26996
Reactor pressure vessel structural integrity research
[DE95-007034] p 2223 N95-28208
Surface scanning techniques to locate and study defects in painted zinc and zinc alloy coated steels
[DE95-006099] p 2240 N95-28547
SURFACE DISTORTION
Thermally-induced unsymmetric optical distortion of output window of high-power CO2 laser
[AD-A289604] p 2300 N95-28650
SURFACE EMITTING LASERS
Time-dependent model for vertical-cavity surface-emitting laser
[DE95-007880] p 2298 N95-28027
Surface-emitting semiconductor laser for intracavity spectroscopy and microscopy
[DE95-007745] p 2299 N95-28128
Comprehensive numerical model for CW vertical-cavity surface-emitting lasers
[DE95-007758] p 2299 N95-28132
SURFACE ENERGY
Surface energy driven crystallization of amorphous Ni69Cr14P17 alloy
[DE95-005543] p 2438 N95-27085
Atomistic study of energy and structure of surfaces in NiO
[DE95-005207] p 2215 N95-27446
Measurement and analysis of the surface energy budget for ARM field experiments
[DE95-007646] p 2338 N95-28114
The unusual properties of beryllium surfaces
[DE95-006471] p 2223 N95-28593
SURFACE FINISHING
Effect of processing parameters on surface finish for fused deposition machinable wax patterns
[NASA-TP-3550] p 2244 N95-26769
SURFACE LAYERS
Effect of processing parameters on surface finish for fused deposition machinable wax patterns
[NASA-TP-3550] p 2244 N95-26769
Satellite surface material composition from synthetic spectra
[AD-A289236] p 2163 N95-26963
Laser ultrasonic generation at the surface of a liquid metal
[DE95-004999] p 2216 N95-27477
Surface crystallization and thin film melting in normal alkanes
[DE95-006694] p 2440 N95-27535
Plasma source ion implantation of ammonia into electroplated chromium
[DE95-006275] p 2444 N95-28125
SURFACE NAVIGATION
Using virtual active vision tools to improve autonomous driving tasks
[AD-A289175] p 2356 N95-27013
SURFACE PROPERTIES
Surface chemistry of silicon
[AD-A288893] p 2224 N95-26351
Molecular object liquid crystals: An approach to new materials
[AD-A288905] p 2437 N95-26553
Materials with self organized surfaces: 2D polymer assemblies
[AD-A288928] p 2226 N95-26627
Numerical solution of fluid flow and heat tranfer problems with surface radiation p 2282 N95-27357
The influence of surface structure on the interaction of water with TiO2(100)
[DE95-004927] p 2203 N95-27401
LDEF's contribution to the selection of thermal control coatings for the Space Station p 2242 N95-27661
Simulations of metal dissolution and corrosion
[DE95-007486] p 2218 N95-27748
Analysis of surfaces, films and multilayers by resonant laser ablation
[DE95-006295] p 2297 N95-27841
Method for determining surface coverage by materials exhibiting different fluorescent properties
[NASA-CASE-GSC-13539-1] p 2315 N95-28211
Self-assembly of low-dimensional molecular nanoclusters on Au(111) surfaces
[AD-A286936] p 2178 N95-28334
Cesium/oxide interactions for ultrathin films on (alpha)-Al2O3(001) and (alpha)-Al2O3(1(bar 1)O2)
[DE95-008159] p 2238 N95-28358
Nonlinear optical studies of surfaces
[DE95-006574] p 2428 N95-28557
SURFACE REACTIONS
Surface chemistry of silicon
[AD-A288893] p 2224 N95-26351
Photo and thermal excitation of surface chemistry on model catalyst surfaces
[AD-A288541] p 2200 N95-26528
Theoretical studies of reaction surfaces
[AD-A288458] p 2404 N95-26632
Changes in the anisotropy parameters of an aluminum alloy caused by cyclical deformation
[IFTR-27/1994] p 2212 N95-26666
Materials Research Society Symposium Proceedings. Volume 339: Diamond, SiC and nitride wide bandgap semiconductors
[AD-A288690] p 2437 N95-26818
Iron oxides characterization by Moessbauer spectroscopy
[DE95-607869] p 2202 N95-27199
Spacecraft materials studies on the Aerospace Corporation tray on EOIM-3 p 2210 N95-27632
Exposure of LDEF materials to atomic oxygen: Results of EOIM 3 p 2210 N95-27633
Orbital atomic oxygen effects on materials: An overview of MSFC experiments on the STS-46 EOIM-3
p 2419 N95-27637
Effects of atomic oxygen on polymeric materials flown on EOIM-3 p 2242 N95-27638
Thermal control materials on EOIM-3
p 2242 N95-27639
Solid film lubricants and thermal control coatings flown aboard the EOIM-3 MDA sub-experiment
p 2242 N95-27640

Evaluation of space environmental effects on metals and optical thin films on EOIM-3 p 2210 N95-27641
Molecular beam scattering from C-13 enriched Kapton and correlation with the EOIM-3 carousel experiment
p 2419 N95-27643
BMDO materials testing in the EOIM-3 experiment
p 2211 N95-27644
STS-46 plasma composition measurements using the EOIM-3 mass spectrometer p 2211 N95-27645
Process for non-contact removal of organic coatings from the surface of paintings
[NASA-CASE-LEW-15896-1] p 2235 N95-27702
Hydrogen induced C-C, C-N, and C-S bond activities on Pi and Ni surfaces
[DE95-006251] p 2206 N95-27838
FTIR studies of CH3OH on porous silicon
[AD-A289038] p 2207 N95-27904
The role of hydrogen in the hydrogenation and hydrogenolysis of aniline on the nickel single crystal surfaces: Its implication on the mechanisms of HDN reactions
[DE95-006687] p 2222 N95-28134
Self-assembly of low-dimensional molecular nanoclusters on Au(111) surfaces
[AD-A288936] p 2178 N95-28334
Cesium/oxide interactions for ultrathin films on (alpha)-Al2O3(001) and (alpha)-Al2O3(1(bar 1)O2)
[DE95-008159] p 2238 N95-28358
Molecular engineering of thin polymer films prepared from functionally-terminated oligomers
[AD-A291681] p 2240 N95-28457
High temperature oxidation of nickel concentrates
[PB95-195566] p 2224 N95-28644
TV-holography at high temperatures: In situ observations of the oxidation of advanced materials
[PB95-195343] p 2294 N95-28651
Photoemission study of solid state reaction and initial oxidation of the Ce/Al(100) system
[PB95-195368] p 2210 N95-28652

SURFACE ROUGHNESS
Theoretical and experimental models of the diffuse radar backscatter from Mars
[NASA-CR-198650] p 2463 N95-27700
Scaling of localization length of a quasi 1D system with longitudinal boundary roughness
[DE95-609148] p 2391 N95-27739
Off-specular scattering in neutron reflectometry
[DE95-007835] p 2412 N95-28057
Numerical and theoretical studies of rough surface scattering
[AD-A291748] p 2257 N95-28528

SURFACE ROUGHNESS EFFECTS
Modeling surface effects with the parabolic equation method
[AD-A289199] p 2254 N95-27021

SURFACE TEMPERATURE
Chemical physics of uniform cyclic etching
[AD-A288975] p 2404 N95-26574
Laser ultrasonic generation at the surface of a liquid metal
[DE95-004999] p 2216 N95-27477
A study of surface temperatures, clouds and net radiation
[NASA-CR-198589] p 2329 N95-27864
Remote measurement of ground temperature and emissivity
[DE95-008055] p 2314 N95-28053

SURFACE TREATMENT
Stability of reference masses 4: Growth of carbonaceous contamination on platinum-iridium mass standard surfaces, and its cleaning by UV/ozone treatment
[PB95-190096] p 2226 N95-26745
Pulsed ion beam surface treatment for preparing rapidly solidified corrosion resistant steel and aluminum surfaces
[DE95-007741] p 2221 N95-28116
Weightless Environment Training Facility (WETF) materials coating evaluation, volume 2
[NASA-CR-188366-VOL-2] p 2239 N95-28386
Weightless Environment Training Facility (WETF) materials coating evaluation, volume 3
[NASA-CR-188366-VOL-3] p 2239 N95-28387

SURFACE VEHICLES
A new drag measurement system for wind tunnel testing of the racing bicycle and rider to determine a low drag configuration
[AD-A289375] p 2122 N95-26875

SURFACE WATER
Tomographic observations of deep convection and the thermal evolution of the Greenland Sea Gyre 1988-1989
[AD-A289104] p 2348 N95-28096
Vibrational spectroscopy of water interfaces
[DE95-006592] p 2209 N95-28218

SURFACE WAVES
Evaluation of the FMICW waveform in HF surface radar applications
[AD-A288245] p 2249 N95-26545
Nonlinear problems in fluid dynamics and inverse scattering: Langmuir circulations and spiral flows
[AD-A289194] p 2278 N95-27019
Analysis of the dimerized Sb/Si(001)-(2x1) surface by x-ray standing waves
[DE95-007097] p 2208 N95-27965
Modeling the shock response of submerged structures
[AD-A289082] p 2288 N95-28351
Analytical investigations of the acceleration sensitivity of acoustic bulk and surface wave resonators
[AD-A291715] p 2402 N95-28505
Numerical and theoretical studies of rough surface scattering
[AD-A291748] p 2257 N95-28528

SURFACTANTS
Application of bacterial bioemusifiers to in situ maintenance of oil/water separators
p 2179 N95-27120
Molecular approach to mesoporous metal sulfides
[DE95-005418] p 2202 N95-27137
Determination of phase transitions in a lyotropic liquid crystal by positron annihilation technique
[DE95-609162] p 2442 N95-27964
Surfactants and desensitizing wax substitutes for TNT-Based systems
[AD-A289652] p 2243 N95-28634

SURGES
Energy-measuring resistor bank
[AD-D017392] p 2271 N95-28613

SURVEILLANCE
Advanced neutron source materials surveillance program
[DE95-005700] p 2215 N95-27464

SURVEYS
Development of an acuity-based nurse staffing system for the post anesthesia care unit
[AD-A288831] p 2352 N95-26494
Survey and implementation of commercial manual controllers for a generic telerobotics architecture
[AD-A289215] p 2381 N95-26990
Crew adaptation evaluation of the Norwegian Crew Concept (NOROREW)
[AD-A288478] p 2360 N95-27058
Geophex airborne unmanned survey system
[DE95-007566] p 2131 N95-27440
Survey on researches related to ocean disposal of carbon dioxide
[DE95-759247] p 2329 N95-27939
Investigation on LCA (Life Cycle Analysis/assessment)
[DE95-759260] p 2330 N95-27942
The Top...is it There? A Survey of the CDF and D0 Experiments
[DE95-005746] p 2411 N95-27945
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 35: The use of computer networks in aerospace engineering
[NASA-CR-198170] p 2456 N95-28600

SUSPENSION SYSTEMS (VEHICLES)
The vibration transmission of lift truck suspension seats
[ISVR-TR-245] p 2302 N95-27844

SWEAT COOLING
Investigation of boundary layer and performance effects of transpiration cooling through a porous plate in a rocket nozzle
[AD-A289393] p 2167 N95-26880

SWEDEN
Milestones in telecommunications in some selected countries
[PB95-184826] p 2252 N95-26929

SWEEP EFFECT
Evaluation of a doubly-swept blade tip for rotorcraft noise reduction
[NASA-CR-189677] p 2402 N95-28264

SWELLING
Feasibility studies for separation processes using environmentally sensitive hydrogels
[DE95-008355] p 2238 N95-28226

SWEPT WINGS
Study of potential aerodynamic benefits from spanwise blowing at wingtip
[NASA-TP-3515] p 2124 N95-28669

SWIRLING
Effect of turbulence models on criticality conditions in swirling flows p 2282 N95-27356

SWITCHING
Stochastic adaptive estimation and control
[AD-A289088] p 2380 N95-26480
Optimal control of two queues in series
[DE95-608731] p 2382 N95-27045

SWITCHING CIRCUITS
Forback DC-to-DC converter
[NASA-CASE-GSC-13404-1] p 2269 N95-28341

SYMBIOTIC STARS
Cataclysmic variables and related objects
[NASA-SP-507] p 2458 N95-27068
Overview of the observations of symbiotic stars
p 2460 N95-27076
Models of symbiotic stars p 2460 N95-27077
Discussion on selected symbiotic stars
p 2460 N95-27078

SYMBOLS
High temperature Hexoloy(trademark) SX silicon carbide
[DE95-007290] p 2221 N95-28075

SYMMETRY
Electromagnetic hysteretic response calculation for superconductors in demagnetizing geometries
[DE95-005028] p 2264 N95-27403
Depth migration in transversely isotropic media with explicit operators
[DE95-007670] p 2337 N95-27442
Crushing singularities in spacetimes with spherical, plane and hyperbolic symmetry
[PB95-190146] p 2397 N95-28011
Lie group weight multiplicities from conformal field theory
[PB95-190153] p 2392 N95-28012
Heterostructures and infrared emitters with compressed InAsSb layers
[DE95-008157] p 2446 N95-28399
Wavelet analysis and its applications
[AD-A291735] p 2387 N95-28527

SYNAPSES
Comparative transduction mechanisms of hair cells in the bullfrog utriculus. 1: Responses to intracellular current p 2350 N95-26731

SYNCHRONISM
Minimizing the impact of synchronization overhead in parallel discrete event simulations
[AD-A289278] p 2377 N95-26984

SYNCHRONOUS PLATFORMS
ORION: A Supersynchronous Transfer Orbit mission
p 2154 N95-27804

SYNCHRONOUS SATELLITES
Long-term variability of electron radiation dose in geosynchronous orbit
[AD-A289335] p 2162 N95-26902
Accurate orbit determination strategies for the tracking and data relay satellites p 2147 N95-27768

SYNCHROTRON RADIATION
Resonant photoemission studies of thickness dependence of the unoccupied Gd 5d bands
[DE95-004127] p 2436 N95-26440
CAS CERN Accelerator School 5th General Accelerator Physics Course
[DE95-608324] p 2419 N95-27158

SYNCHROTRONS
Analytical spectroscopy
[DE95-607896] p 2203 N95-27200
Synchrotron X-ray scattering studies at mineral-water interfaces
[DE95-008303] p 2440 N95-27542
Performance of an accordion electromagnetic calorimeter with liquid krypton
[DE95-006693] p 2292 N95-27738

SYNOPTIC METEOROLOGY
Synoptic features of the Yunan rainy season before the onset of the tropical monsoons
[AD-A289641] p 2342 N95-26724

SYNTAX
Unification of LARCH and Z-based object models to support algebraically-based design refinement: The Z perspective
[AD-A289234] p 2369 N95-26962

SYNTHESIS
Template synthesis of electronically conductive polymer nanostructures
[AD-A288373] p 2225 N95-26472

SYNTHESIS (CHEMISTRY)
Stabilization and control of high energy intermediates through adsorption of restricted spaces
[AD-A288552] p 2201 N95-26606
Materials design and processing by biomimicking. Section 1: Research progress
[AD-A288229] p 2226 N95-26623
Design and processing of materials by biomimicking. Section 2. Publications
[AD-A288230] p 2226 N95-26624
Computational and matrix isolation studies of (2- and 3-furyl)methylene
[AD-A280085] p 2178 N95-28154
On the synthesis of mixed-metal and mixed-pnicogen13-15 ring-systems
[AD-A288869] p 2223 N95-28332

Ash-based ceramic materials
[AD-D017272] p 2241 N95-28582

SYNTHETIC APERTURE RADAR

Perceptual based image fusion with applications to hyperspectral image data
[AD-A289429] p 2251 N95-26867

Processing of wide-angle synthetic aperture radar signals for detection of obscured ground targets
[AD-A289243] p 2253 N95-26976

Speckle spectrum of the ERS-1 wavemode product
[PB95-196564] p 2315 N95-28180

Binary segmentation of SAR images by the ICM algorithm
[INPE-5464-PRE/1772] p 2258 N95-28559

SAR noise reduction through the utilization of robust filters
[INPE-5504-PRE/1787] p 2258 N95-28569

SYNTHETIC FIBERS

The 18th Asilomar Conference on Polymeric Materials
[AD-A291721] p 2240 N95-28508

SYNTHETIC FUELS

Biomass Pyrolysis Oil Properties and Combustion Meeting
[DE95-004017] p 2204 N95-27438

SYSTEM FAILURES

Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation. Volume 5: Auxiliary shuttle risk analyses
[NASA-CR-197812] p 2160 N95-26403

Comprehension and retrieval of failure cases in airborne observatories p 2145 N95-27394

SYSTEM IDENTIFICATION

System identification of damped truss-like space structures
[NASA-TM-106638] p 2303 N95-27911

SYSTEMS ANALYSIS

Long term distributed file reference tracing: Implementation and experience
[AD-A288585] p 2452 N95-26535

Structures and materials technology needs for communications and remote sensing spacecraft
[NASA-CR-198166] p 2163 N95-27026

LDEF: 69 Months in Space. Third Post-Retrieval Symposium, part 3
[NASA-CP-3275-PT-3] p 2466 N95-27629

LDEF systems special investigation group overview p 2470 N95-27647

The Global Positioning System (GPS) and attitude determination: Applications and activities in the Flight Dynamics Division p 2152 N95-27795

Summary of EOS flight dynamics analysis p 2152 N95-27797

Autonomous control system reconfiguration for spacecraft with non-redundant actuators p 2153 N95-27802

ORION: A Supersynchronous Transfer Orbit mission p 2154 N95-27804

Comparison of measured and calculated dynamic loads for the Mod-2 2.5 mW wind turbine system p 2312 N95-27983

Analysis methods for wind turbine control and electrical system dynamics p 2273 N95-27984

A conceptual framework for evaluating variable speed generator options for wind energy applications p 2273 N95-27987

Variable speed generator technology options for wind turbine generators p 2273 N95-27988

Variable speed generator application on the MOD-5A 7.3 mW wind turbine generator p 2273 N95-27989

SYSTEMS ENGINEERING

Aircraft fuel system lightning protection design and qualification test procedures development
[AD-A288401] p 2125 N95-26497

Design and synthesis of a real-time controller for an unmanned air vehicle
[AD-A289134] p 2141 N95-26555

Design considerations for FrankTalk: A distributed group support system
[AD-A289386] p 2359 N95-26863

A systems engineering approach to electro-mechanical reconfiguration for mobility autonomy
[AD-A289479] p 2301 N95-26926

Next generation real-time systems: Investigating the potential of partial-solution tasks
[AD-A289203] p 2381 N95-27007

Changing paradigms: Manufacturing vs. fabricating a high volume Hold Down and Release Mechanism p 2155 N95-27267

Development of a miniature actuator/controller system p 2156 N95-27272

Design, development and testing of the x-ray timing explorer High Gain Antenna System p 2157 N95-27279

Spray-formed tooling
[DE95-005031] p 2246 N95-27404

Magnetic resonance imaging of solvent transport in polymer networks
[DE95-007142] p 2234 N95-27455

Calculation of design load for the MOD-5A 7.3 mW wind turbine system p 2312 N95-27982

Evaluating the environmental viability of open burning/open detonation operations p 2170 N95-28297

Prototype development and test results of a continuous ambient air monitoring system for hydrazine at the 110 ppb level p 2173 N95-28310

Hazards analysis of an integral class 1.1/1.3 rocket motor demilitarization and ingredient recovery system using ammonia p 2174 N95-28315

Development and implementation of a system safety program for the space launch complex 3 east (SLC-3E) ground support system project to support Atlas 2 family of space launch vehicles p 2174 N95-28316

Unmanned aerial vehicles, 1994 master plan
[AD-A291628] p 2136 N95-28411

SYSTEMS INTEGRATION

US Coast Guard Human Systems Integration (HSI) process model
[AD-A289172] p 2358 N95-26612

Basic space payload fastener p 2156 N95-27273

Non-explosive actuation for the ORBCOMM (TM) satellite p 2156 N95-27274

Integrated planning and scheduling for Earth science data processing p 2384 N95-27382

A fuzzy logic intelligent diagnostic system for spacecraft integrated vehicle health management p 2385 N95-27392

Analysis methods for wind turbine control and electrical system dynamics p 2273 N95-27984

A conceptual framework for evaluating variable speed generator options for wind energy applications p 2273 N95-27987

A knowledge highway for integrated modelling from manufacturing to design
[AD-A288872] p 2247 N95-28187

SYSTEMS MANAGEMENT

Analysis, design and implementation of a database system for the systems management curriculum office
[AD-A289656] p 2452 N95-26758

Research and development management information system, system user manual
[AD-A289151] p 2453 N95-27004

SYSTEMS SIMULATION

Adiabatic charging of nickel-hydrogen batteries p 2272 N95-26795

Reference manual: Naive physics simulator
[PB95-184917] p 2369 N95-26907

SYSTEMS STABILITY

Modulation effect of a Bragg acousto-optic bistable system
[AD-A289622] p 2401 N95-26857

Design considerations in supercritical fluid technology p 2232 N95-27126

T

T-56 ENGINE

Characteristics of the turbine inlet temperature sensing circuit for the T56 turbo-prop engine
[DSTO-TR-0095] p 2139 N95-26424

TABLES (DATA)

Development and analysis of SCR requirements tables for system scenarios
[NASA-CR-197769] p 2367 N95-26802

Enplanement and all cargo activity
[AD-A280074] p 2144 N95-28151

TACTILE SENSORS (ROBOTICS)

Silicon based microactuators for telerobotic tactile stimulation
[AD-A289340] p 2260 N95-26767

TAIL ASSEMBLIES

F/A-18 IFOSTP Fatigue test airbag load determination on the vertical and horizontal tails
[DSTO-TR-0135] p 2128 N95-26389

Numerical simulation of the SOFIA flow field
[NASA-CR-197757] p 2274 N95-26589

Application of damage tolerance methodology in certification of the Piaggio P-180 Avanti p 2138 N95-28480

TANTALUM

Engineered materials for appliation in severe metallurgical environments: Tantalum-carbon alloy development
[DE95-006838] p 2216 N95-27488

TAPE RECORDERS

Distributed interactive simulation virtual cassette recorder (DIS VCR); A datalogger with variable speed replay
[AD-A289212] p 2290 N95-26989

TAPS

ACT adaptive filters
[AD-A288385] p 2363 N95-26474

TARGET ACQUISITION

Target detection for vision systems
[AD-D017271] p 2249 N95-26509

A probabilistic target classification and description model for seismic sensors
[AD-A288548] p 2335 N95-26531

A mathematical framework for an improved search model
[AD-A288858] p 2358 N95-26552

A mathematical analysis of the Janus combat simulation weather effects models and sensitivity analysis of sky-to-ground brightness ratio on target detection
[AD-A289629] p 2336 N95-26858

Classification of ultra high range resolution radar using decision boundary analysis
[AD-A289378] p 2251 N95-26877

An image quality analysis of ANVIS-6 night vision goggles
[AD-A289398] p 2359 N95-26883

Processing of wide-angle synthetic aperture radar signals for detection of obscured ground targets
[AD-A289243] p 2253 N95-26976

Nonlinear signal processing schemes for robust target detection in radar
[AD-A288449] p 2255 N95-27185

Aircraft IR/acoustic detection evaluation. Volume 2: Development of a ground-based acoustic sensor system for the detection of subsonic jet-powered aircraft
[NASA-CR-189705-VOL-2] p 2402 N95-28073

TARGET RECOGNITION

A probabilistic target classification and description model for seismic sensors
[AD-A288548] p 2335 N95-26531

Classification of ultra high range resolution radar using decision boundary analysis
[AD-A289378] p 2251 N95-26877

An image quality analysis of ANVIS-6 night vision goggles
[AD-A289398] p 2359 N95-26883

Cognitive networks for ATR: The roles of bifurcation and chaos
[AD-A289010] p 2387 N95-28336

TARGETS

Target detection for vision systems
[AD-D017271] p 2249 N95-26509

Neural models of spatial orientation in novel environments
[AD-A288420] p 2380 N95-26530

A probabilistic target classification and description model for seismic sensors
[AD-A288548] p 2335 N95-26531

Scale model experiments with ceramic laminate targets
[AD-A288322] p 2225 N95-26561

Classification of ultra high range resolution radar using decision boundary analysis
[AD-A289378] p 2251 N95-26877

Simulating a multi-target acoustic array on the Intel Paragon
[AD-A288443] p 2377 N95-27183

Nonlinear signal processing schemes for robust target detection in radar
[AD-A288449] p 2255 N95-27185

Neutral gas compression in the Alcator C-Mod divertor. Experimental observations
[DE95-007762] p 2432 N95-27688

A modified proportional navigation scheme for rendezvous and docking with tumbling targets: The Planar case p 2150 N95-27784

Investigation on LCA (Life Cycle Analysis/assessment)
[DE95-759260] p 2330 N95-27942

The diffusion properties of ion implanted species in selected target materials
[DE95-007006] p 2442 N95-27959

Three-dimensional photogrammetry for laboratory applications
[AD-A291624] p 2294 N95-28410

TASK PLANNING (ROBOTICS)

Advanced development for space robotics with emphasis on fault tolerance p 2155 N95-27263

A sustainable genetic algorithm for satellite resource allocation p 2376 N95-27383

TASKS

A sustainable genetic algorithm for satellite resource allocation p 2376 N95-27383

TAYLOR SERIES

Depth migration in transversely isotropic media with explicit operators
[DE95-007670] p 2337 N95-27442

TDR SATELLITES

Flight Mechanics/Estimation Theory Symposium 1995
[NASA-CP-3299] p 2146 N95-27763

Differenced Range Versus Integrated Doppler (DRVID) ionospheric analysis of metric tracking in the Tracking and Data Relay Satellite System (TDRSS) p 2147 N95-27766

Accurate orbit determination strategies for the tracking and data relay satellites p 2147 N95-27768

Operational improvements of long-term predicted ephemerides of the Tracking and Data Relay Satellites (TDRSs) p 2147 N95-27769

A demonstration of unified TDRS/GPS tracking and orbit determination p 2151 N95-27792

TECHNICAL WRITING

Beginning to edit physics [DE95-008374] p 2455 N95-28085

TECHNOLOGIES

Performance enhancing ration components program: Supplemental carbohydrate test [AD-A288560] p 2358 N95-26558

Bibliography of NRL publications - 1990 [AD-A289483] p 2466 N95-26823

Utilization of composite materials by the US Army: A look ahead p 2189 N95-28421

NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 35: The use of computer networks in aerospace engineering [NASA-CR-198170] p 2456 N95-28600

TEFLON (TRADEMARK)

Design and development of experimental facilities for short duration, low-gravity combustion and fire experiments [NASA-CR-195458] p 2244 N95-26709

Effects of atomic oxygen on polymeric materials flown on EOIM-3 p 2242 N95-27638

Thermal control materials on EOIM-3 p 2242 N95-27639

TELECOMMUNICATION

Assessment of long-distance HF radio and satellite communication assets for RNLAF out-of-area operations [AD-A288633] p 2247 N95-26344

Milestones in telecommunications in some selected countries [PB95-184826] p 2252 N95-26929

XTP as a transport protocol for distributed parallel processing [DE95-004992] p 2378 N95-27402

Low-power, parallel photonic interconnections for Multi-Chip Module applications [DE95-008518] p 2267 N95-28147

Inspection methods for underwater cables [AD-A289610] p 2312 N95-28616

TELECONFERENCING

Technical progress report to the Department of Energy on the Solid State Sciences Committee (SSSC) [DE95-007113] p 2441 N95-27925

TELEGRAPH SYSTEMS

Milestones in telecommunications in some selected countries [PB95-184826] p 2252 N95-26929

TELEMETRY

A simple method for verifying the deployment of the TOMS-EP solar arrays p 2150 N95-27782

Telemetry down-link Doppler as an attitude sensor for spin stabilized spacecraft p 2150 N95-27785

Preliminary flight software specification for the petite amateur Navy satellite (PANSAT) [AD-A280068] p 2165 N95-28150

TELEOPERATORS

Telepresent spacecraft docking with object-based bilateral control (OBBC) [AD-A289268] p 2163 N95-26980

TELEPHONES

Milestones in telecommunications in some selected countries [PB95-184826] p 2252 N95-26929

TELEROBOTICS

Silicon based microactuators for telerobotic tactile stimulation [AD-A289340] p 2260 N95-26767

Survey and implementation of commercial manual controllers for a generic telerobotics architecture [AD-A289215] p 2381 N95-26990

Performance of the Satellite Test Assistant Robot in JPL's Space Simulation Facility p 2154 N95-27264

TELESCOPES

Numerical simulation of the SOFIA flow field [NASA-CR-197757] p 2274 N95-26589

Compensated deconvolution from wavefront sensing [AD-A289490] p 2336 N95-26824

SXI Prototype mirror mount [NASA-CR-196613] p 2301 N95-27244

Retrofitting a fine-pointing system to satellite optics p 2157 N95-27277

The Solar X-ray Imager Vacuum Door Assembly p 2157 N95-27280

TELEVISION SYSTEMS

Information superhighway: Issues affecting development [AD-A289434] p 2252 N95-26923

TV-holography at high temperatures: In situ observations of the oxidation of advanced materials [PB95-195343] p 2294 N95-28651

TEMPERATURE CONTROL

Characteristics of the turbine inlet temperature sensing circuit for the T56 turbo-prop engine [DSTO-TR-0095] p 2139 N95-26424

CAE for thermal management of aerospace electronic boards using the BETAsoft program p 2272 N95-27354

Reducing cold-start emissions by catalytic converter thermal management [DE95-000256] p 2327 N95-27540

Thermal analysis of PANSAT batteries and Electrical Power Subsystem [AD-A290013] p 2269 N95-28388

Cryogenic temperature control and tension/compression attachment stage for an electron microscope [AD-D017390] p 2294 N95-28612

TEMPERATURE DEPENDENCE

Temperature dependence of ion-beam-induced amorphization in (Beta)-SiC [DE95-007164] p 2438 N95-27087

Simulating the production of free defects in irradiated metals [DE95-007165] p 2214 N95-27088

Spin-density-wave magnetism in dilute copper-manganese alloys [DE95-005121] p 2215 N95-27462

D/H and O-18/O-16 partitioning between water liquid and vapor in the system H2O-Na-K-Mg-Ca-Cl-SO4 from 0 to 350 C [DE95-007013] p 2208 N95-27961

Determination of phase transitions in a lyotropic liquid crystal by positron annihilation technique [DE95-609162] p 2442 N95-27964

Polarization relaxation in zinc oxide varistors from 77 K to 450 K [DE95-007761] p 2268 N95-28156

Low noise monolithic Si JFETS for operation in the 90-300K range and in high radiation environments [DE95-007303] p 2269 N95-28244

Temperature dependence of the static dielectric response in a Q1D electron gas [DE95-609269] p 2400 N95-28350

Fellowship in physics [AD-A291691] p 2446 N95-28522

TEMPERATURE DISTRIBUTION

Engineering calculations associated with the ablative thermal protective structures of returnable satellites [AD-A289593] p 2162 N95-26715

RTE: A computer code for Rocket Thermal Evaluation p 2177 N95-27355

TEMPERATURE EFFECTS

Process control of microstructure in manufacturing [AD-A288291] p 2245 N95-26410

Rotor phases in compound semiconductors [DE95-004139] p 2436 N95-26442

Micromechanical prediction of tensile damage for ceramic matrix composites under high temperature [AD-A288238] p 2180 N95-26626

Characteristics of thermal lens in a copper-vapor laser [AD-A289545] p 2294 N95-26874

The noise reduction potential of dual-stream coaxial rectangular improperly expanded jet flows [NASA-CR-197820] p 2277 N95-26995

A finite element based technique for simulation helix TWT interaction circuit thermal behavior [AD-A289552] p 2262 N95-27152

Probabilistic material strength degradation model for Inconel 718 components subjected to high temperature, high-cycle and low-cycle mechanical fatigue, creep and thermal fatigue effects [NASA-CR-197832] p 2214 N95-27167

The 77 K operation of a multi-resonant power converter [NASA-TM-106941] p 2264 N95-27374

The effects of temperature on Schottky diode barrier height and evidence of multiple barrier [DE95-609147] p 2264 N95-27405

Bonded composite repair of thin metallic materials: Variable load amplitude and temperature cycling effects p 2132 N95-27509

Repair of high temperature composite aircraft structure p 2134 N95-27520

Scarf joint technique with cocured and precured patches for composite repair p 2135 N95-27524

Point defect formation in optical materials expos ed to the space environment p 2428 N95-27646

Effects of high-temperature environments on flaw generation and fracture behavior of SiC/SiC composites [DE95-008270] p 2183 N95-28068

Stability of chromite interconnections in dual environments [DE95-007755] p 2267 N95-28131

Neural network error compensation of machine tools [AD-A289300] p 2387 N95-28217

On the thermally-induced residual stresses in thick fiber-thermoplastic matrix (PEEK) cross-ply laminated plates p 2187 N95-28285

Composite flexible insulation for thermal protection of space vehicles p 2166 N95-28293

Poly(N-arylenbenzimidazoles) via aromatic nucleophilic displacement [NASA-CASE-LAR-14939-1] p 2179 N95-28360

Polybenzimidazoles via aromatic nucleophilic displacement [NASA-CASE-LAR-14924-1-CU] p 2179 N95-28361

Characterization of a fused silica capacitance standard [DE95-006457] p 2270 N95-28597

High temperature oxidation of nickel concentrates [PB95-195566] p 2224 N95-28644

Thermally-induced unsymmetric optical distortion of output window of high-power CO2 laser [AD-A289604] p 2300 N95-28650

TEMPERATURE GRADIENTS

A finite element based technique for simulation helix TWT interaction circuit thermal behavior [AD-A289552] p 2262 N95-27152

Laser ultrasonic generation at the surface of a liquid metal [DE95-004999] p 2216 N95-27477

AMCC casting development. Volume 1: Executive Summary [NASA-CR-196597] p 2247 N95-28419

Experimental study on transition characteristics of natural-convection flow [PB95-192423] p 2289 N95-28637

TEMPERATURE MEASUREMENT

Characteristics of the turbine inlet temperature sensing circuit for the T56 turbo-prop engine [DSTO-TR-0095] p 2139 N95-26424

The effect of infrared sea surface temperature measurements on evaporation duct height estimation [AD-A289045] p 2346 N95-26477

Infrared field measurements of sea surface temperature: Analysis of wake signatures and comparison of skin layer models [NASA-CR-197849] p 2346 N95-26533

BIPM project: Intercomparison of water triple-point cells [PB95-185237] p 2398 N95-26614

Method and apparatus for polaradiometric pyrometer [NASA-CASE-NPO-19064-1-CU] p 2290 N95-26765

A phase-stepped point diffraction interferometer using liquid crystals [NASA-TM-106922] p 2293 N95-28037

Remote measurement of ground temperature and emissivity [DE95-008055] p 2314 N95-28053

TEMPERATURE MEASURING INSTRUMENTS

Micro-time stress measurement device development [AD-A289511] p 2361 N95-26845

TEMPERATURE PROFILES

Temporal and spatial decorrelation scales of the Yellow Sea thermal fields [AD-A288617] p 2346 N95-26483

Development of density and temperature profile diagnostics for ICF targets [DE95-007664] p 2433 N95-28052

TEMPERATURE SENSORS

Characteristics of the turbine inlet temperature sensing circuit for the T56 turbo-prop engine [DSTO-TR-0095] p 2139 N95-26424

Method and apparatus for measuring temperatures in fabrics and flexible thermal insulations [NASA-CASE-ARC-11984-1] p 2293 N95-28345

TEMPLATES

An introduction to software architecture [AD-A288356] p 2363 N95-26467

High pressure conductivity study of template synthesized polypyrrole: Observation of a crossover from three to one dimensional variable range hopping [AD-A288367] p 2224 N95-26470

Template synthesis of electronically conductive polymer nanostructures [AD-A288373] p 2225 N95-26472

TEMPORAL RESOLUTION

Fluxes across the west coast resolved by Picket Fence observations during stormfest [AD-A288511] p 2341 N95-26653

Measurement of particle transport coefficients on Alcator C-Mod [DE95-007763] p 2411 N95-28020

TENSILE PROPERTIES

Micromechanical prediction of tensile damage for ceramic matrix composites under high temperature [AD-A288238] p 2180 N95-26626

Statistical analysis of tensile mechanical property data of carbon/polyimide composites [NAL-TR-1238] p 2180 N95-26667

Overview of through-thickness test methods for polymer matrix composites [PB95-190112] p 2227 N95-26747

Tensile properties of Fe-16 at. % Al alloys [DE95-007102] p 2215 N95-27450

The development of mechanical strength in a ceramic material during firing [DE95-004925] p 2234 N95-27476

Tension fracture of laminates for transport fuselage. Part 1: Material screening p 2137 N95-28471

The elevated temperature tensile properties of S-200E commercially pure beryllium [DE95-009331] p 2223 N95-28534

TENSILE STRENGTH

Identification of the plastic anisotropy of an aluminum alloy [IFTR-26/1994] p 2212 N95-26512

Status of bonded boron/epoxy doublers for military and commercial aircraft structures p 2132 N95-27506

Tungsten carbide fragmentation: Experimental characterization and numerical modelling [DE95-008521] p 2236 N95-27879

Service tough composite structures using the Z-direction reinforcement process p 2185 N95-28272

Mechanical properties of triaxially braided composites: Experimental and analytical results p 2189 N95-28423

Effect of the fiber-matrix interphase on the transverse tensile strength of the unidirectional composite material p 2190 N95-28425

TENSILE STRESS

Creep recovery of PVC and polypropylene [PB95-185112] p 2224 N95-26448

Addressing tension instability in SPH methods [AD-A289531] p 2276 N95-26852

Fatigue behavior of a cross-ply ceramic matrix composite subjected to tension-tension cycling with hold time [AD-A289418] p 2182 N95-27134

Deployment and retraction of a cable-driven solar array: Testing and simulation p 2158 N95-27283

Composite repair issues on the CF-18 aircraft p 2134 N95-27518

The elevated temperature tensile properties of S-200E commercially pure beryllium [DE95-009331] p 2223 N95-28534

TENSILE TESTS

On aircraft repair verification of a fighter A/C integrally stiffened fuselage skin p 2133 N95-27515

TENSIOMETERS

Cryogenic temperature control and tension/compression attachment stage for an electron microscope [AD-D017390] p 2294 N95-28612

TENSORS

The role of microprocesses in macroscale magnetotail dynamics [DE95-006288] p 2432 N95-27673

Hydrogen-like atom in laser field: Invariant atomic parameters in the ground state [DE95-609036] p 2411 N95-27930

TERBIUM COMPOUNDS

The oxidation state and magnetic behaviour of Tb in high-(Tc) related materials [DE95-007129] p 2219 N95-27966

TERMINAL BALLISTICS

Scale model experiments with ceramic laminate targets [AD-A288322] p 2225 N95-26561

TERMS

The PCMDI Visualization and Computation System (VCS): A workbench for climate data display and analysis [DE95-008586] p 2328 N95-27558

TERNARY ALLOYS

First-principles study of intermetallic phase stability in the ternary Ti-Al-Nb alloy system [DE95-005259] p 2213 N95-27082

TERNARY SYSTEMS

Ultrasonic study on ternary liquid systems by laser-sound interaction [DE95-608783] p 2207 N95-27929

TERPENES

A summary of ODS replacement technologies at Litton Poly-Scientific p 2228 N95-27105

TERRACES (LANDFORMS)

Boron-induced morphology changes in silicon CVD growth: A scanning tunneling microscopy study [AD-A289275] p 2290 N95-26982

TERRAIN
Meso-beta scale numerical simulation studies of terrain-induced jet streak mass/momentum perturbations
[NASA-CR-197804] p 2335 N95-26592

TERRESTRIAL RADIATION
Solar terrestrial radiation data from the Sleepers River Research Watershed
[AD-A288444] p 2464 N95-27184
Classification of RF transients in space using digital signal processing and neural network techniques
[DE95-006287] p 2256 N95-27840
Cloud classification using whole-sky imager data
[DE95-006501] p 2344 N95-28556

TEST CHAMBERS
NASA Lewis Research Center's combustor test facilities and capabilities
[NASA-TM-106903] p 2143 N95-27176
Two-phase flow research using the learjet apparatus
[NASA-TM-106814] p 2284 N95-27854
NASA Dryden flow visualization facility
[NASA-TM-4631] p 2362 N95-27914

TEST FACILITIES
Stall precursor study of high frequency data for three high speed, swept compressor rotors
[AD-A289379] p 2139 N95-26878
NASA Lewis Research Center's combustor test facilities and capabilities
[NASA-TM-106903] p 2143 N95-27176
Femtosecond X-ray generation through 90 degrees T homson scattering: Status of the LBL experiment
[DE95-006560] p 2296 N95-27674
Plasma lens experiments at the final focus test beam
[DE95-008595] p 2434 N95-28161

TEST STANDS
Design and development of a test rig for the high frequency testing of rolling sleeve airsprings
[DSTO-TN-0001] p 2142 N95-26378
Fluid dynamic effects on precision cleaning with supercritical fluids p 2232 N95-27129

TEST VEHICLES
Electric vehicle activities
[DE95-006648] p 2267 N95-28105

TESTS
JTEC monograph on biodegradable polymers and plastics in Japan: Research, development, and applications
[NASA-CR-198562] p 2235 N95-27694

TETHERED SATELLITES
Space tether-radar data processing
[AD-A289654] p 2250 N95-26725
Dynamics and control of SEDSAT tethered multi-probe for thermospheric research flight data analysis of SEDS-2 satellite: Tethered systems dynamics and flight data analysis
[NASA-CR-198653] p 2165 N95-27836

TETHERING
Dynamics and control of SEDSAT tethered multi-probe for thermospheric research flight data analysis of SEDS-2 satellite: Tethered systems dynamics and flight data analysis
[NASA-CR-198653] p 2165 N95-27836

TETRAHEDRONS
AEM investigation of tetrahedrally coordinated Ti(4+) in nickel-titanate spinel
[DE95-006624] p 2215 N95-27473

TETRAHYDROFURAN
Isolation and x-ray crystal structures of (Li(mu2-As(SiMe3)2) (mu3-As(SiMe3)2)(THF))2 and ((Me3Si)2AsLi(THF)2)2
[AD-A288870] p 2241 N95-28661

TEXTILES
Polymer infiltration studies
[NASA-CR-198601] p 2236 N95-27857
Physical interpretation and development of ultrasonic nondestructive evaluation techniques applied to the quantitative characterization of textile composite materials
[NASA-CR-198591] p 2306 N95-28034
Recent progress in NASA Langley textile reinforced composites program p 2196 N95-28475
Advanced textile applications for primary aircraft structures p 2138 N95-28476

TEXTS
Digital mapping, charting, and geodesy analysis program: Initial technical review of Raster Product Format
[AD-A289039] p 2313 N95-26476
Grayscale/resolution trade-off for text: Model predictions and psychophysical results for letter confusion and letter discrimination
[NASA-CR-197784] p 2369 N95-26930
The controller memory guide. Concepts from the field
[AD-A289263] p 2127 N95-26978

TEXTURES
Forming metallurgy: Supervised drawing course, NTH
[PB95-196507] p 2219 N95-27934
Advances in scientific visualization
[DE95-008065] p 2343 N95-28014
Local texture and grain boundary misorientations in high H(C) oxide superconductors
[DE95-007004] p 2447 N95-28606

THEOREM PROVING
A case study in automated theorem proving: A difficult problem about commutators
[DE95-008392] p 2392 N95-28173
Absolute logics
[ISBN-951-41-0775-6] p 2397 N95-28238

THEOREMS
Using the dimension reduction technique to prove that clique trees define facets for the asymmetric traveling salesman polytope
[AD-A289397] p 2389 N95-26882
Some commutativity theorems for a certain class of rings
[DE95-608750] p 2390 N95-27302
On commutativity of right s-unital rings with some polynomial constraints
[DE95-608752] p 2390 N95-27330
Mean value theorem in topological vector spaces
[DE95-608753] p 2390 N95-27331
Acceleration theorems
[DE95-007300] p 2420 N95-27484

THEORETICAL PHYSICS
The use of acoustic methods to determine the parameters of porous materials
[IFTR-40/1994] p 2401 N95-26519
Bogolyubov renormalization group
[DE95-608830] p 2448 N95-27315
Space physics educational outreach
[NASA-CR-198649] p 2399 N95-27852
The 1993 European school of high-energy physis
[DE95-610196] p 2421 N95-28040
Nonlinear beam dynamics experimental program at SPEAR
[DE95-007823] p 2422 N95-28122
General relativity and experiment
[PB95-192894] p 2450 N95-28664

THEORIES
Horizontal axis wind turbine post stall airfoil characteristics synthesization p 2124 N95-27974

THERMAL ANALYSIS
Chemistry involving the separation, isolation, and immobilization of 3-5 compound semiconductor nanocrystals and quantum dots
[AD-A288381] p 2436 N95-26473
Energization and transport of ions of ionospheric origin in the terrestrial magnetosphere
[NASA-CR-197813] p 2336 N95-26699
The Sixth Annual Thermal and Fluids Analysis Workshop
[NASA-CP-10161] p 2280 N95-27345
Validation of the SINDA/FLUINT code using several analytical solutions p 2281 N95-27350
CAE for thermal management of aerospace electronic boards using the BETAsoft program
p 2272 N95-27354
RTE: A computer code for Rocket Thermal Evaluation
p 2177 N95-27355
Numerical solution of fluid flow and heat tranfer problems with surface radiation p 2282 N95-27357
Thermal neutral format based on the step technology
p 2283 N95-27363
Thermal analysis of PANSAT batteries and Electrical Power Subsystem
[AD-A290013] p 2269 N95-28388

THERMAL BATTERIES
Electrolyte effects in Li(Si)/FeS2 thermal batteries
[DE95-001614] p 2264 N95-27474

THERMAL BOUNDARY LAYER
Direct numerical simulation of transitional and turbulent flow over a heated flat plate using finite-difference schemes
[NASA-CR-197753] p 2275 N95-26776

THERMAL CONDUCTIVITY
A new Cu-8 Cr-4 Nb alloy for high temperature applications
[NASA-TM-106910] p 2218 N95-27728
Subharmonic phonon transmission and Kapitza conductance between crystals with very different vibrational spectra
[DE95-609151] p 2447 N95-28608

THERMAL CONTROL COATINGS
Orbital atomic oxygen effects on materials: An overview of MSFC experiments on the STS-46 EOIM-3
p 2419 N95-27637
Thermal control materials on EOIM-3
p 2242 N95-27639
Solid film lubricants and thermal control coatings flown aboard the EOIM-3 MDA sub-experiment
p 2242 N95-27640
LDEF's contribution to the selection of thermal control coatings for the Space Station p 2242 N95-27661

THERMAL CYCLING TESTS
Composite repair of metallic airframe: Twenty years of experience p 2132 N95-27508
Bonded composite repair of thin metallic materials: Variable load amplitude and temperature cycling effects
p 2132 N95-27509

THERMAL DECOMPOSITION
Boron-induced reconstructions of Si(100) investigated by scanning tunneling microscopy
[AD-A289222] p 2438 N95-26959
Hydrogen induced C-C, C-N, and C-S bond activities on Pi and Ni surfaces
[DE95-006251] p 2206 N95-27838

THERMAL DEGRADATION
Combined investigation of Eddy current and ultrasonic techniques for composite materials NDE
[NASA-TM-110599] p 2306 N95-26778
Evaluation of high ester content PAO based single hydraulic fluid in high humidity conditions
[AD-A289374] p 2233 N95-27324

THERMAL DIFFUSION
Radiation production from stagnating compact toroids employing a nonequilibrium radiation diffusion model
[AD-A289602] p 2429 N95-26720

THERMAL ENERGY
Magnetization of ferromagnetic clusters
[DE95-006878] p 2399 N95-27548
Polarization relaxation in zinc oxide varistors from 77 K to 450 K
[DE95-007761] p 2268 N95-28156

THERMAL EXPANSION
Ultra high purity, dimensionally stable INVAR 36
[NASA-CASE-NPO-19358-1-CU] p 2213 N95-26862
Density changes in amorphous Pd80Si20 during low temperature ion irradiation
[DE95-007132] p 2441 N95-27928
Development of low-expansion ceramics with strength retention to elevated temperatures
[DE95-005760] p 2239 N95-28397

THERMAL FATIGUE
Development of welded solar arrays for DMSP and GPS satellites
[AD-A289512] p 2318 N95-26846
Characterization of fatigue behavior of 2-D woven fabric reinforced ceramic matrix composite at elevated temperature
[AD-A289423] p 2181 N95-26886
Probabilistic material strength degradation model for Inconel 718 components subjected to high temperature, high-cycle and low-cycle mechanical fatigue, creep and thermal fatigue effects
[NASA-CR-197832] p 2214 N95-27167
A microstructurally based model of solder joints under conditions of thermomechanical fatigue
[DE95-006226] p 2309 N95-27837

THERMAL INSULATION
Task 4 supporting technology. Part 2: Detailed test plan for thermal seals. Thermal seals evaluation, improvement and test. CAN8-1, Reusable Launch Vehicle (RLV), advanced technology demonstrator: X-33. Leading edge and seals thermal protection system technology demonstration
[NASA-CR-198628] p 2304 N95-28259
Composite flexible insulation for thermal protection of space vehicles p 2166 N95-28293
Method and apparatus for measuring temperatures in fabrics and flexible thermal insulations
[NASA-CASE-ARC-11984-1] p 2293 N95-28345
AMCC casting development. Volume 1: Executive Summary
[NASA-CR-196597] p 2247 N95-28419

THERMAL NEUTRONS
Materials considerations for molten salt accelerator-based plutonium conversion systems
[DE95-006743] p 2217 N95-27544

THERMAL PROTECTION
Probabilistic risk assessment of the Space Shuttle. Phase 3: A study of the potential of losing the vehicle during nominal operation. Volume 5: Auxiliary shuttle risk analyses
[NASA-CR-197812] p 2160 N95-26403
Chinese space science and technology
[AD-A289618] p 2466 N95-26856
Debris/Ice/TPS assessment and integrated photographic analysis of Shuttle mission STS-67
[NASA-TM-110651] p 2160 N95-27238
Task 4 supporting technology. Part 1: Detailed test plan for leading edge tile development. Leading edge material development and testing
[NASA-CR-198633] p 2160 N95-28258

Task 4 supporting technology. Part 2: Detailed test plan for thermal seals. Thermal seals evaluation, improvement and test. CAN8-1, Reusable Launch Vehicle (RLV), advanced technology demonstrator: X-33. Leading edge and seals thermal protection system technology demonstration
[NASA-CR-198628] p 2304 N95-28259
Composite flexible insulation for thermal protection of space vehicles p 2166 N95-28293

THERMAL RADIATION
Method and apparatus for polaradiometric pyrometer
[NASA-CASE-NPO-19064-1-CU] p 2290 N95-26765
A case study of view-factor rectification procedures for diffuse-gray radiation enclosure computations
p 2281 N95-27353
Observation on radiation transfer experiments using k-shell absorption spectra
[DE95-008068] p 2434 N95-28141

THERMAL RESISTANCE
Engineering calculations associated with the ablative thermal protective structures of returnable satellites
[AD-A289593] p 2162 N95-26715

THERMAL SHOCK
Crystal structure, short-range oxygen defects, and water adsorption in La- and Nd-modified ZrO2
[DE95-007134] p 2439 N95-27452
The development of mechanical strength in a ceramic material during firing
[DE95-004925] p 2234 N95-27476
Thermal shock behavior of fiber-reinforced composites
[DE95-006746] p 2183 N95-27955
Development of low-expansion ceramics with strength retention to elevated temperatures
[DE95-005760] p 2239 N95-28397

THERMAL STABILITY
International Space Station Alpha trace contaminant control subassembly life test report
[NASA-TM-108488] p 2358 N95-26364
Use of CTFE as an additive to enhance fire resistance of single hydraulic fluid
[AD-A289377] p 2233 N95-27325
Field repair materials for naval aircraft
p 2133 N95-27514
Stability of chromite interconnections in dual environments
[DE95-007755] p 2267 N95-28131

THERMAL STRESSES
Composite repair of metallic airframe: Twenty years of experience p 2132 N95-27508

THERMIONIC CONVERTERS
Analysis of instability growth and collisionless relaxation in thermionic converters using 1-D PIC simulations
[AD-A289310] p 2319 N95-26891

THERMOCHEMICAL PROPERTIES
Extended equation-of-state for dichlorodifluoromethane (CCl2F2)
[AD-A288885] p 2177 N95-26434

THERMOCHEMISTRY
Review and analysis of the 1980-1989 biomass thermochemical conversion program
[DE95-000287] p 2325 N95-28394

THERMOCOUPLES
Characteristics of the turbine inlet temperature sensing circuit for the T56 turbo-prop engine
[DSTO-TR-0095] p 2139 N95-26424
Process and control systems for composites manufacturing p 2184 N95-28267

THERMODYNAMIC PROPERTIES
Thermodynamics of electrolyte solutions for use in high energy lithium batteries
[AD-A288897] p 2199 N95-26352
Mathematical modelling of the thermodynamic properties of coolants and working media of heat pumps
[IFTR-6/1994] p 2447 N95-26510
Photo and thermal excitation of surface chemistry on model catalyst surfaces
[AD-A288541] p 2200 N95-26528
Lightweight cold weather underwear investigation
[AD-A288506] p 2358 N95-26736
JPRS report: Science and technology. Central Eurasia
[JPRS-UST-95-021] p 2202 N95-27155
RTE: A computer code for Rocket Thermal Evaluation
p 2177 N95-27355
Thermodynamics of aqueous electrolytes at high temperatures by the isopiestic technique
[DE95-006747] p 2449 N95-27546
Aqueous electrolyte modeling in ASPEN PLUS(trademark)
[DE95-007008] p 2208 N95-27960
Critical behaviour of spin models: A transfer-matrix approach
[PB95-192456] p 2418 N95-28638

THERMODYNAMICS
Analysis and development of finite element methods for the study of nonlinear thermomechanical behavior of structural components
[NASA-CR-195354] p 2307 N95-26387
FREZCHEM: A chemical-thermodynamic model for aqueous solutions at subzero temperatures
[AD-A288456] p 2200 N95-26432
Continuum mechanical modeling of solids undergoing a phase transformation
[AD-A288274] p 2200 N95-26451
Surface crystallization and thin film melting in normal alkanes
[DE95-006694] p 2440 N95-27535
Thermodynamics of aqueous electrolytes at high temperatures by the isopiestic technique
[DE95-006747] p 2449 N95-27546
Systematic study of the ion beam mixing of oxide markers into alumina
[DE95-006262] p 2217 N95-27555
Modeling precipitation from concentrated solutions with the EQ3/6 chemical speciation codes
[DE95-006264] p 2204 N95-27556
Development of low-expansion ceramics with strength retention to elevated temperatures
[DE95-005760] p 2239 N95-28397

THERMOELECTRIC POWER GENERATION
Solar concentrator technology development for space based applications, volume 2
[NASA-CR-197724] p 2319 N95-27194

THERMOGRAVIMETRY
Chemistry involving the separation, isolation, and immobilization of 3-5 compound semiconductor nanocrystals and quantum dots
[AD-A288381] p 2436 N95-26473

THERMONUCLEAR POWER GENERATION
Transport simulation of negative magnetic shear discharges
[DE95-003941] p 2416 N95-28329
Attractive characteristics of mirrors
[DE95-008073] p 2435 N95-28356

THERMONUCLEAR REACTIONS
A new method of determining the ejected mass of novae
[DE95-007884] p 2462 N95-28062

THERMOPLASTIC RESINS
Composite prepreg application device
[NASA-CASE-LAR-15259-1] p 2182 N95-27192
Higher order finite element analysis of thick composite laminates p 2186 N95-28282
Analysis techniques for the prediction of springback in formed and bonded composite components
p 2188 N95-28289
Characterization and manufacture of braided composites for large commercial aircraft structures
p 2196 N95-28478
Advanced wing design survivability testing and results
p 2138 N95-28488

THERMOPLASTICITY
Evaluation of composite joints
[AD-A289247] p 2181 N95-26967
Repair technology for thermoplastic aircraft structures
p 2134 N95-27519
ACT/ICAPS: Thermoplastic composite activities
p 2185 N95-28274
The 18th Asilomar Conference on Polymeric Materials
[AD-A291721] p 2240 N95-28508

THERMOSETTING RESINS
Phenylethynyl terminated imide oligomers
[NASA-CASE-LAR-15175-1] p 2235 N95-27732
Static and dynamic strain energy release rates in toughened thermosetting composite laminates
p 2188 N95-28288

THERMOSIPHONS
Numerical solution of fluid flow and heat tranfer problems with surface radiation p 2282 N95-27357

THERMOSPHERE
A study of magnetic activity effects on the thermospheric winds in the low ionosphere
[AD-A288677] p 2334 N95-26488
Dynamics and control of SEDSAT tethered multi-probe for thermospheric research flight data analysis of SEDS-2 satellite: Tethered systems dynamics and flight data analysis
[NASA-CR-198653] p 2165 N95-27836
A model of the diurnal variation in magnesium ion density and radiance in the thermosphere
[AD-A289824] p 2339 N95-28575

THESES
Advanced formation flight control
[AD-A289271] p 2142 N95-26981
Summaries of theses for the degree of diploma engineer 1992-1993
[PB95-184867] p 2246 N95-27048
Distributed methods and processes in games of incomplete information
[PB95-184842] p 2396 N95-28352
Distributed methods and processes in games of incomplete information
[PB95-184859] p 2396 N95-28353

THETA PINCH
Far-infrared laser interferometry measurements on the STP-3(M) reversed-field pinch
[DE94-765440] p 2297 N95-27868
Global dynamo in a reversed field pinch plasma
[DE94-765441] p 2432 N95-27869
Burst of energetic ions from reversed field pinch plasma
[DE94-765447] p 2432 N95-27870

THICK FILMS
ECR plasma-assisted deposition of Al2O3 and dispersion-strengthened AlO2
[DE95-007743] p 2235 N95-27687

THICK PLATES
Higher order finite element analysis of thick composite laminates p 2186 N95-28282

THICKNESS
Resonant photoemission studies of thickness dependence of the unoccupied Gd 5d bands
[DE95-004127] p 2436 N95-26440
Overview of through-thickness test methods for polymer matrix composites
[PB95-190112] p 2227 N95-26747
Scarf repairs to graphite/epoxy components
p 2135 N95-27523
Using hob offset to balance dynamic strength in spur gears
[NASA-TM-106934] p 2302 N95-27698
An improved plate theory of order (1,2) for thick composite laminates p 2187 N95-28283
Molecular engineering of thin polymer films prepared from functionally-terminated oligomers
[AD-A291681] p 2240 N95-28457

THIN FILMS
Radiation sensitive area detection device and method
[NASA-CASE-MFS-28563-3] p 2423 N95-26385
Joint Services Electronics Program (JSEP)
[AD-A288299] p 2345 N95-26419
Resonant photoemission studies of thickness dependence of the unoccupied Gd 5d bands
[DE95-004127] p 2436 N95-26440
High pressure conductivity study of template synthesized polypyrrole: Observation of a crossover from three to one dimensional variable range hopping
[AD-A288367] p 2224 N95-26470
Advanced solid lubricant films by Ion-Beam Assisted Deposition
[AD-A288866] p 2225 N95-26499
Pseudomorphic semiconducting heterostructures from combinations of AlN, GaN and selected SiC polytypes: Theoretical advancement and its coordination with experimental studies of nucleation, growth, characterization and device development
[AD-A289550] p 2437 N95-26756
Materials, structures, and devices for high-speed electronics
[NASA-CR-197815] p 2260 N95-26816
Materials Research Society Symposium Proceedings. Volume 339: Diamond, SiC and nitride wide bandgap semiconductors
[AD-A288690] p 2437 N95-26818
Study of frequency doubling antireflection coating
[AD-A289634] p 2424 N95-26860
Microwave characterization of sub-micron N- and P-channel MOSFET's fabricated with thin film silicon-on-sapphire
[AD-A289296] p 2438 N95-27040
Effects of blowing ratio on heat transfer to the throat region of a porous-walled nozzle
[AD-A289459] p 2167 N95-27153
Low temperature materials growth and processing development for flat panel display technology applications
[AD-A288970] p 2233 N95-27187
Analysis of gas absorption to a thin liquid film in the presence of a zero-order chemical reaction
p 2280 N95-27348
Surface crystallization and thin film melting in normal alkanes
[DE95-006694] p 2440 N95-27535
Atomic oxygen dosimetry measurements made on STS-46 by CONCAP 2 p 2418 N95-27634
Inflight resistance measurement on high-T(sub c) superconducting thin films exposed to orbital atomic oxygen on CONCAP-2 (STS-46) p 2272 N95-27635
Solid film lubricants and thermal control coatings flown aboard the EOIM-3 MDA sub-experiment
p 2242 N95-27640
Evaluation of space environmental effects on metals and optical thin films on EOIM-3 p 2210 N95-27641

Analysis of selected specimens from the STS-46 Energetic Oxygen Interaction with Materials-3 experiment
p 2210 N95-27642

Amorphous silicon pixel radiation detectors and associated thin film transistor electronics readout
[DE95-006568] p 2265 N95-27678

Micromagnetics and microstructure of epitaxially grown Co and Co-Cr films for perpendicular magnetic recording
[DE95-004681] p 2441 N95-27720

Analysis of surfaces, films and multilayers by resonant laser ablation
[DE95-006295] p 2297 N95-27841

Nonlinear optical microscopy for imaging thin films and surfaces
[DE95-007872] p 2426 N95-28018

Effects of interlayers on the scratch adhesion performance of ultra-thin films of copper and gold on silicon substrates
[DE95-007367] p 2220 N95-28044

Low temperature deposition and characterization of N- and P-type silicon carbide thin films and associated Ohmic and Schottky contacts
[AD-A289107] p 2237 N95-28097

Control of thin film processing behavior through precursor structural modifications
[DE95-006468] p 2444 N95-28103

Pulsed laser deposition of zeolitic membranes
[DE95-006274] p 2298 N95-28124

Multivariate classification of BPSG thin films using Mahalanobis distances
[DE95-008519] p 2267 N95-28148

Atomic layer epitaxy of group 4 materials: Surface processes, thin films, devices and their characterization
[AD-A289092] p 2446 N95-28327

Cesium/oxide interactions for ultrathin films on (alpha)-Al2O3(001) and (alpha)-Al2O3(1(bar 1)O2)
[DE95-008159] p 2238 N95-28358

Molecular engineering of thin polymer films prepared from functionally-terminated oligomers
[AD-A291681] p 2240 N95-28457

Deformation behavior of thin lubricant films at elevated pressure
[AD-A288906] p 2241 N95-28592

The in situ observation of epitaxial diamond thin film nucleation and growth using emission electron microscopy
[AD-A289841] p 2447 N95-28618

Influences of film structures on laser damage thresholds
[AD-A289647] p 2300 N95-28633

Photoemission study of solid state reaction and initial oxidation of the Ce/Al(100) system
[PB95-195368] p 2210 N95-28652

THIN WALLED SHELLS

Characterization of the membrane theory of a clamped shell. The hyperbolic case
[PB95-185021] p 2308 N95-26911

Models of classical and recurrent novae
p 2459 N95-27073

THIN WALLS

Determination of the cyclical properties of 18G2A steel on the basis of skeleton curves for a planar stress state
[IFTR-32/1994] p 2211 N95-26359

Identification of the plastic anisotropy of an aluminum alloy
[IFTR-26/1994] p 2212 N95-26512

Vibrational behavior of adaptive aircraft wing structures modelled as composite thin-walled beams
p 2191 N95-28435

THREADS

A software bus for thread objects
[NASA-CR-197764] p 2365 N95-26575

THREE AXIS STABILIZATION

An MME-based attitude estimator using vector observations p 2148 N95-27775

SAMPEX special pointing mode p 2149 N95-27780

THREE BODY PROBLEM

Tracking and impact prediction of Earth-Crossing-Objects (ECO's) on a collision course with Earth
[AD-A289321] p 2461 N95-27303

THREE DIMENSIONAL BODIES

Development of an upwind, finite-volume code with finite-rate chemistry
[NASA-CR-197747] p 2121 N95-26760

THREE DIMENSIONAL BOUNDARY LAYER

Nonlinear stability of non-stationary cross-flow vortices in compressible boundary layers
[NASA-CR-189184] p 2279 N95-27242

Computation of three-dimensional mixed convective boundary layer flow p 2280 N95-27347

THREE DIMENSIONAL FLOW

Computational fluid dynamics and transonic flow
[AD-A288962] p 2273 N95-26405

Effects of three-dimensional imposed 3-D disturbances on bluff-body near wake flows
[AD-A289553] p 2121 N95-26757

Turbomachinery design and tonal acoustics computations
[NASA-CR-197749] p 2139 N95-26777

A 3D agglomeration multigrid solver for the Reynolds-averaged Navier-Stokes equations on unstructured meshes
[NASA-CR-195073] p 2390 N95-27029

Global flowfield about the V-22 Tiltrotor Aircraft
[NASA-CR-198603] p 2122 N95-27248

Calculation of three-dimensional (3-D) internal flow by means of the velocity-vorticity formulation on a staggered grid
[NASA-TM-110352] p 2122 N95-27258

Three-dimensional computer modeling of hydrogen injection and combustion
[DE95-006261] p 2203 N95-27437

Three-dimensional visualization of reactive flows in complex geometries
[DE95-006332] p 2284 N95-27845

A numerical method for solving the three-dimensional parabolized Navier-Stokes equations
[NASA-CR-198159] p 2287 N95-27917

A general theory of two- and three-dimensional rotational flow in subsonic and transonic turbomachines
[NASA-CR-4496] p 2123 N95-28003

TranAir: A full-potential, solution-adaptive, rectangular grid code for predicting subsonic, transonic, and supersonic flows about arbitrary configurations. User's manual
[NASA-CR-4349] p 2123 N95-28230

THREE DIMENSIONAL MODELS

Manual for SHOCK3D, version 2.0. Computer program for non-linear shock response
[AD-A288631] p 2307 N95-26342

Progress towards computer simulation of NiH2 battery performance over life p 2272 N95-26786

Study of the response of a three-dimensional coupled ice-ocean model to daily varying atmospheric forcing
[AD-A289050] p 2347 N95-27189

Three-dimensional computer modeling of hydrogen injection and combustion
[DE95-006261] p 2203 N95-27437

A point-centered diffusion differencing for unstructured meshes in 3-D
[DE95-008382] p 2392 N95-28232

Three-dimensional forecast models for emergency response management p 2172 N95-28303

Cloud classification using whole-sky imager data
[DE95-006501] p 2344 N95-28556

THROATS

Effects of blowing ratio on heat transfer to the throat region of a porous-walled nozzle
[AD-A289459] p 2167 N95-27153

THRUST CHAMBERS

High pressure Earth storable rocket technology program: Basic program
[NASA-CR-195449] p 2166 N95-26390

THRUST CONTROL

Evaluation and modeling of autonomous attitude thrust control for the Geostation Operational Environmental Satellite (GOES)-8 orbit determination
p 2146 N95-27765

Optimal attitude maneuver execution for the Advanced Composition Explorer (ACE) mission
p 2149 N95-27778

THRUST VECTOR CONTROL

Plume measurements with the T5 xenon ion thruster
[AD-A288697] p 2167 N95-26489

THUNDERSTORMS

A study of lightning in winter thunderstorms and the analysis of thunderstorm overflight data
[NASA-CR-198577] p 2343 N95-28191

TIDES

Observations of near-bottom flow in a wave-dominated nearshore environment
[AD-A289331] p 2347 N95-27043

TILES

Task 4 supporting technology. Part 1: Detailed test plan for leading edge tile development. Leading edge material development and testing
[NASA-CR-198633] p 2160 N95-28258

TIME

Modal event calculus in Lolli
[AD-A288544] p 2365 N95-26605

TIME DEPENDENCE

Operating system support for coexistence of real-time and conventional scheduling
[AD-A288584] p 2364 N95-26534

Anomalous collision rate in the time counter scheme of the direct simulation Monte Carlo method for rarefied gas flow analysis
[ISAS-R-653] p 2275 N95-26742

Measurement of viscosity by capillary rheometry: Dwell time effects
[PB95-190203] p 2201 N95-26750

Single-drop reactive extraction/extractive reaction with forced convective diffusion and interphase mass transfer
p 2283 N95-27365

Time-dependent model for vertical-cavity surface-emitting laser
[DE95-007880] p 2298 N95-28027

Lattice calculation for lepton capture from vacuum-pair production in relativistic heavy-ion collisions
[DE95-007392] p 2413 N95-28077

Designing for time-dependent material response in spacecraft structures p 2166 N95-28292

TIME DIVISION MULTIPLEXING

Pulse Code Modulation (PCM) encoder handbook for Aydin Vector MMP-900 series system
[NASA-RP-1365] p 2255 N95-27435

TIME FUNCTIONS

Programming for time resolved spectrum in pulse radiolysis experiments
[DE95-607929] p 2406 N95-27212

TIME LAG

A numerical study of ultra-short-pulse reflectometry
[DE95-008070] p 2266 N95-28015

TIME MARCHING

The method of space-time conservation element and solution element-applications to one-dimensional and two-dimensional time-marching flow problems
[NASA-TM-106915] p 2389 N95-26663

Numerical investigation to S-inlet flows (Numerical simulation study of S-inlet flows)
[AD-A289590] p 2120 N95-26713

TIME MEASUREMENT

Estimation of attitude sensor timetag biases
p 2153 N95-27799

Particle fallout/activity sensor
[NASA-CASE-KSC-11687-1] p 2293 N95-28362

TIME OF FLIGHT SPECTROMETERS

Future opportunities and present possibilities for coherent inelastic single crystal measurements on pulsed neutron sources
[PB95-195798] p 2418 N95-28657

TIME OPTIMAL CONTROL

Time-optimal control of the magnetically levitated photolithography platen
[DE95-005493] p 2266 N95-27724

TIME SERIES ANALYSIS

Embedology and neural estimation for time series prediction
[AD-A289312] p 2394 N95-26892

Evolving cascade-correlation networks for time-series forecasting
[AD-A289197] p 2390 N95-27020

Linear and nonlinear trending and prediction for AVHRR time series data p 2385 N95-27391

On the persistence of the oceanic background of apparent sea level changes in the Baltic Sea
[REPT-94:5] p 2348 N95-27996

Chua's circuits: Phenomena and applications
[AD-A291638] p 2271 N95-28666

TIME SHARING

Operating system support for coexistence of real-time and conventional scheduling
[AD-A288584] p 2364 N95-26534

TIME TEMPERATURE PARAMETER

Low resistivity ohmic contacts to moderately doped n-GaAs with low temperature processing
[DE95-008507] p 2445 N95-28144

Polarization relaxation in zinc oxide varistors from 77 K to 450 K
[DE95-007761] p 2268 N95-28156

TIN ALLOYS

A microstructurally based model of solder joints under conditions of thermomechanical fatigue
[DE95-006226] p 2309 N95-27837

TISSUES (BIOLOGY)

A 3-D finite difference time domain investigation of microwave propagation through inhomogeneous biological materials
[AD-A289431] p 2251 N95-26869

TITAN 4 LAUNCH VEHICLE

Chemical reactions identified in the Titan 2, Titan 4, and Delta 2 propellant systems and their application to source modeling p 2172 N95-28304

Weather hazards to a Titan 4 on-pad destack-restack operation p 2172 N95-28307

TITANIUM

On-axis polarization coupling in y-cut titanium in-diffused lithium niobate slab waveguides
[AD-A289260] p 2253 N95-26977

AEM investigation of tetrahedrally coordinated Ti(4+) in nickel-titanate spinel
[DE95-006624] p 2215 N95-27473

TITANIUM ALLOYS

Viscoplastic characterization and fatigue modeling of titanium based metal matrix composites
[AD-A289430] p 2181 N95-26868

Environmentally assisted cracking of high strength beta titanium alloys
[AD-A289156] p 2213 N95-27032

JPRS report: Science and technology. Central Eurasia
[JPRS-UST-95-019] p 2270 N95-28565

TITANIUM COMPOUNDS

Lattice parameters and Debye-Waller factors of gamma-TiAl alloys
[AD-A288843] p 2213 N95-26681

TITANIUM ISOTOPES

Lattice parameters and Debye-Waller factors of gamma-TiAl alloys
[AD-A288843] p 2213 N95-26681

TITANIUM OXIDES

The influence of surface structure on the interaction of water with TiO2(100)
[DE95-004927] p 2203 N95-27401

Control of thin film processing behavior through precursor structural modifications
[DE95-006468] p 2444 N95-28103

Femtosecond OPO's at 3 microns and beyond: Design and performance issues related to the crystal properties of KTP and similar materials
[DE95-007286] p 2446 N95-28242

Radiant exchange considerations in design and scaleup of photocatalytic reactors for purification of nitroglycerine-contaminated air p 2171 N95-28300

TITRATION

Hydrogen-ion titrations of amino acids and proteins in solutions containing concentrated electrolyte
[DE95-008356] p 2209 N95-28229

TOKAMAK DEVICES

Fluctuations and transport in fusion plasma
[DE95-004178] p 2429 N95-26444

MHD simulations of DC helicity injection for current drive in tokamaks
[DE95-007018] p 2429 N95-26940

Dynamics of the L yields H transition, VH-mode evolution, edge localized modes and R.F. driven confinement control in tokamaks
[DE95-007012] p 2430 N95-27306

Evaluation of current drive requirements and operating characteristics of a high bootstrap fraction advanced tokamak reactor
[DE95-007041] p 2430 N95-27308

Outline and handling manual of fusion experimental data monitor system DAISY, version 2
[DE95-703895] p 2431 N95-27414

Energetic particle destabilization of shear Alfven waves in stellarators and tokamaks
[DE95-006393] p 2431 N95-27419

Fast wave current drive in D3-D
[DE95-007582] p 2431 N95-27441

Nonlinear phenomena, turbulence and anomalous transport in fusion plasmas
[DE95-007044] p 2431 N95-27497

Neutral gas compression in the Alcator C-Mod divertor. Experimental observations
[DE95-007762] p 2432 N95-27688

Fluctuations in high beta(sub p) plasmas in DIII-D
[DE95-008071] p 2432 N95-27710

Experimental aspects of effects of high-energy particles on Alfven modes
[DE95-003383] p 2432 N95-27873

Pumping characteristics of a cryopump with Ar sorbent in He and in D2/He mixture
[DE95-007049] p 2302 N95-27875

Fluctuations and transport in fusion plasmas
[DE95-007111] p 2433 N95-27924

Measurement of particle transport coefficients on Alcator C-Mod
[DE95-007763] p 2411 N95-28020

Scrape-off layer plasma modeling for the DIII-D tokamak
[DE95-008059] p 2433 N95-28054

UEDGE and DEGAS modeling of the DIII-D scrape-off layer plasma, revision 1
[DE95-008052] p 2433 N95-28065

Effect of toroidal plasma flow and flow shear on global MHD modes
[DE95-006676] p 2433 N95-28106

Advanced tokamak operating modes in TPX and ITER
[DE95-008058] p 2434 N95-28138

Divertor research on the DIII-D tokamak
[DE95-003942] p 2434 N95-28185

Faraday screen sputtering on TPX
[DE95-008347] p 2434 N95-28224

Transport simulation of negative magnetic shear discharges
[DE95-003941] p 2416 N95-28329

Operating points and feedback control of plasma characteristics in tokamaks with full current drive
[DE95-007037] p 2435 N95-28553

Tokamak ETE engineering preliminary project
[INPE-5529-PRE/1796] p 2435 N95-28562

Pellet injector research and development at ORNL
[DE95-006736] p 2435 N95-28596

Simulation of burning tokamak plasmas
[PB95-195426] p 2435 N95-28654

TOLERANCES (MECHANICS)

CORSSTOL: Cylinder Optimization of Rings, Skin, and Stringers with Tolerance sensitivity
[NASA-TP-3551] p 2392 N95-28215

Tension fracture of laminates for transport fuselage. Part 1: Material screening p 2137 N95-28471

Application of damage tolerance methodology in certification of the Piaggio P-180 Avanti
p 2138 N95-28480

Applications of a damage tolerance analysis methodology in aircraft design and production
p 2197 N95-28483

Damage tolerance of a geodesically stiffened advanced composite structural concept for aircraft structural applications p 2138 N95-28487

TOLLMIEN-SCHLICHTING WAVES

Analysis of hypersonic boundary layer second mode instability over a 7 deg cone
[AD-A289471] p 2276 N95-26819

On the modulational instability of large amplitude waves in supersonic boundary layers
[NASA-CR-195072] p 2284 N95-27760

TOMOGRAPHY

Tomographic observations of deep convection and the thermal evolution of the Greenland Sea Gyre 1988-1989
[AD-A289104] p 2348 N95-28096

Radon transform and its applications in gridding airborne geophysical survey data
[PB95-195533] p 2315 N95-28643

TOOLING

Spray-formed tooling
[DE95-005031] p 2246 N95-27404

TOPOGRAPHY

Deep convection in the Mediterranean Sea
[AD-A288497] p 2346 N95-26647

Naval Aviation System TEAM mapping, charting, and geodesy handbook
[AD-A288590] p 2314 N95-26841

Airborne geophysics and precise positioning: Scientific issues and future directions
[LC-94-68678] p 2314 N95-27156

TOPOLOGY

Live from Antarctica, volume 4
[NASA-CR-197828] p 2335 N95-26596

On compact multipliers of topological algebras
[DE95-608751] p 2390 N95-27092

Spectral properties of multipliers on topological algebras
[DE95-608747] p 2390 N95-27299

Holomorphic curves in Abelian varieties, part 1
[DE95-608748] p 2396 N95-27300

Harmonic maps of the bounded symmetric domains
[DE95-608798] p 2397 N95-27485

The assembly tower and some categorical and algebraic aspects of frame theory
[AD-A289360] p 2391 N95-27489

Topological density and instantons on a lattice
[DE95-006348] p 2445 N95-28240

TOPPING CYCLE ENGINES

Optimization of wave rotors for use as gas turbine engine topping cycles
[NASA-TM-106951] p 2140 N95-27860

TOROIDAL PLASMAS

Radiation production from stagnating compact toroids employing a nonequilibrium radiation diffusion model
[AD-A289602] p 2429 N95-26720

Energetic particle destabilization of shear Alfven waves in stellarators and tokamaks
[DE95-006393] p 2431 N95-27419

Burst of energetic ions from reversed field pinch plasma
[DE94-765447] p 2432 N95-27870

Scrape-off layer plasma modeling for the DIII-D tokamak
[DE95-008059] p 2433 N95-28054

UEDGE and DEGAS modeling of the DIII-D scrape-off layer plasma, revision 1
[DE95-008052] p 2433 N95-28065

Effect of toroidal plasma flow and flow shear on global MHD modes
[DE95-006676] p 2433 N95-28106

TORQUE

Identification of the plastic anisotropy of an aluminum alloy
[IFTR-26/1994] p 2212 N95-26512

Power train torque measurement
[AD-A289577] p 2301 N95-26688

Effects of bearing cleaning and lube environment on bearing performance p 2158 N95-27285

Whirl plus tilt
[DE95-007948] p 2399 N95-28108

TORQUE MOTORS

Structural optimisation of cage induction motors using finite element analysis
[PB95-195434] p 2271 N95-28655

TORQUE SENSORS (ROBOTICS)

Multi-agent perception for Human/Robot interaction: A framework for intuitive trajectory modification
[AD-A289399] p 2359 N95-26884

TORQUEMETERS

Power train torque measurement
[AD-A289577] p 2301 N95-26688

TORQUERS

Observational magnetometer calibration with the Hubble Space Telescope's new magnetometers
p 2148 N95-27773

TORSION

Analysis of plate-twist test for in-plane shear modulus of composite materials (revised)
[PB95-190195] p 2308 N95-26749

TORUSES

Fast wave current drive in D3-D
[DE95-007582] p 2431 N95-27441

TOTAL ENERGY SYSTEMS

Development of a TECS control-law for the lateral directional axis of the McDonnell Douglas F-15 Eagle
[AD-A289771] p 2142 N95-28598

TOTAL OZONE MAPPING SPECTROMETER

Spectral analyses, climatology, and interannual variability of Nimbus-7 TOMS version 6 total column ozone
[NASA-RP-1360] p 2341 N95-26689

A simple method for verifying the deployment of the TOMS-EP solar arrays p 2150 N95-27782

Contingency maneuver strategies for the Total Ozone Mapping Spectrometer-Earth Probe (TOMS-EP)
p 2152 N95-27796

TOUGHNESS

Structural ceramics incorporating whiskers, platelets, and particulate phases
[DE95-007048] p 2235 N95-27499

High temperature Hexoloy(trademark) SX silicon carbide
[DE95-007290] p 2221 N95-28075

An experimental and numerical investigation of specimen size requirements for cleavage fracture toughness
[AD-A289120] p 2311 N95-28100

TOWERS

Engineering photochemical smog through convection towers
[DE95-007727] p 2328 N95-27888

TOXIC HAZARDS

Electromagnetic devices and processes in environment protection
[AD-A288656] p 2141 N95-26487

The use of supercritical carbon dioxide for contaminant removal from solid waste p 2229 N95-27110

Health and environmental hazards of CdTe photovoltaic module production, use and decommissioning
[DE95-006688] p 2320 N95-27682

The 1994 JANNAF Safety and Environmental Protection Subcommittee Meeting, volume 1
[CPIA-PUBL-614-VOL-1] p 2170 N95-28294

Destruction of pyrotechnics manufacture wastewater treatment sludge by plasma arc pyrolysis
p 2171 N95-28301

Cape Canaveral air station launch emergency response forces and toxic materials release contingency plans
p 2172 N95-28308

Toxicity assessment of liquid propellant XM46
p 2175 N95-28319

Hydrothermal oxidation of solid rocket propellant and other department of defense hazardous wastes
p 2177 N95-28325

Recovery and reuse of rocket motor propellant ingredients p 2177 N95-28326

TOXICITY

Retrofitting conventional vapor degreasers to use a solvent wash/fluorochemical rinse process
p 2232 N95-27127

Acute and subacute toxicity of ammonium dinitramide (ADN) p 2175 N95-28318

Toxicity assessment of liquid propellant XM46
p 2175 N95-28319

TOXICOLOGY

Acute and subacute toxicity of ammonium dinitramide (ADN) p 2175 N95-28318

TOXINS AND ANTITOXINS

Anti-idiotype probes for toxin detection
[AD-A288955] p 2348 N95-26435

TRACE CONTAMINANTS

International Space Station Alpha trace contaminant control subassembly life test report
[NASA-TM-108488] p 2358 N95-26364

TRACE ELEMENTS

Comparative experimental study of PIXE and X-ray fluorescence analysis
[DE95-607868] p 2327 N95-27198

Coupled chemistry/climate issues
[DE95-006443] p 2327 N95-27532

Measurement of heterogeneous chemical processes relevant to aerosol surfaces and trace gases active in the marine environment
[DE95-008337] p 2328 N95-27743

Trace elements and the mechanical properties of intermetallic compounds
[DE95-007378] p 2220 N95-28046

TRACING

Ultrashort Pulse retrieval using FROG trace irradiance moments and the adaptive neural networks backpropagation algorithm
[DE95-007153] p 2299 N95-28220

TRACKED VEHICLES

Power train torque measurement
[AD-A289577] p 2301 N95-26688

TRACKING (POSITION)

Gloved operator performance study. The effects of hand wear and elastic resistance of a control during tracking performance
[AD-A289405] p 2360 N95-27099

The detection and tracking of motion by means of time-space pattern modelling using random fields
[IFTR-37/1994] p 2374 N95-28566

TRADEOFFS

Specifying weak sets
[AD-A288587] p 2364 N95-26536

Grayscale/resolution trade-off for text: Model predictions and psychophysical results for letter confusion and letter discrimination
[NASA-CR-197784] p 2369 N95-26930

Free Electron Laser Physical Process Code (FELPPC)
[DE95-006276] p 2296 N95-27557

TRAILING EDGES

Airfoil modification effects on subsonic and transonic pressure distributions and performance for the EA-6B airplane
[NASA-TP-3516] p 2120 N95-26382

Unsteady base pressure measurements in the near wake of a cylinder with imposed three-dimensional disturbances
[AD-A289498] p 2276 N95-26827

The near-wake flow behavior of an oscillating airfoil with modified trailing edge p 2119 N95-26953

TRAINING ANALYSIS

Enhancing the effects of diversity awareness training: A review of the research literature
[DOT/FAA/AM-95/10] p 2355 N95-26361

TRAINING EVALUATION

Inspection methods for underwater cables
[AD-A289610] p 2312 N95-28616

TRAJECTORIES

Telepresent spacecraft docking with object-based bilateral control (OBBC)
[AD-A289268] p 2163 N95-26980

The performance of cargo airdrop systems using g-12E parachutes: Statistical determination of minimum altitude
[AD-A291666] p 2126 N95-28454

TRAJECTORY ANALYSIS

Tracking and impact prediction of Earth-Crossing-Objects (ECO's) on a collision course with Earth
[AD-A289321] p 2461 N95-27303

TRAJECTORY CONTROL

Multi-agent perception for Human/Robot interaction: A framework for intuitive trajectory modification
[AD-A289399] p 2359 N95-26884

Operational considerations of using GPS for spacecraft navigation p 2152 N95-27794

TRAJECTORY PLANNING

The D* algorithm for real-time planning of optimal traverses
[AD-A289361] p 2367 N95-26754

TRANSCENDENTAL FUNCTIONS

Kepler Equation solver p 2147 N95-27767

TRANSFER FUNCTIONS

Structures for time-reversed inversion in filter banks
[AD-A289238] p 2261 N95-26964

Head related transfer function approximation using neural networks
[AD-A289422] p 2382 N95-27145

TRANSFER ORBITS

ORION: A Supersynchronous Transfer Orbit mission
p 2154 N95-27804

Dynamics and control of SEDSAT tethered multi-probe for thermospheric research flight data analysis of SEDS-2 satellite: Tethered systems dynamics and flight data analysis
[NASA-CR-198653] p 2165 N95-27836

The combined release and radiation effects satellite time history data base system
[AD-A289835] p 2165 N95-28578

TRANSFERRING

Comparative transduction mechanisms of hair cells in the bullfrog uticulus. 2: Sensitivity and response dynamics to hair bundle displacement p 2350 N95-26732

TRANSFORMATIONS (MATHEMATICS)

Hyperkaehler metrics associated to compact Lie groups
[PB95-185161] p 2388 N95-26514

Generalized Schwarzians in several variables and Moebius invariant differential operators
[PB95-185211] p 2388 N95-26539

A general object model transformation system
[AD-A289289] p 2370 N95-27037

Holomorphic curves in Abelian varieties, part 1
[DE95-608748] p 2396 N95-27300

Denoising and robust non-linear wavelet analysis
[AD-A291668] p 2257 N95-28455

Wavelet analysis and its applications
[AD-A291735] p 2387 N95-28527

TRANSFORMERS

A general object model transformation system
[AD-A289289] p 2370 N95-27037

Forback DC-to-DC converter
[NASA-CASE-GSC-13404-1] p 2269 N95-28341

TRANSFUSION

Mechanisms of hypertension after cross-linked hemoglobin blood-substitute transfusion
[AD-A289558] p 2352 N95-26680

TRANSIENT HEATING

High energy electron beams for ceramic joining
[DE95-006316] p 2420 N95-27480

TRANSIENT RESPONSE

Transient studies of G-induced capillary dryout and rewet p 2281 N95-27351

TRANSISTOR CIRCUITS

Self-checking state machine realization in CMOS
[AD-A289149] p 2261 N95-27002

Characterization of microwave MESFET circuits under laser illumination. Applications to phased array radar, microwave communications, and digital clock control
[AD-A289181] p 2261 N95-27015

TRANSISTORS

Investigation of radiation resistance of transistors and integrated circuits using the heavy ions beam of energy higher than 1 MeV/amu and fast neutrons
[DE95-608624] p 2261 N95-27024

Amorphous silicon pixel radiation detectors and associated thin film transistor electronics readout
[DE95-006568] p 2265 N95-27678

Forback DC-to-DC converter
[NASA-CASE-GSC-13404-1] p 2269 N95-28341

TRANSITION FLOW

Turbulence modeling
[NASA-CR-197751] p 2274 N95-26665

The stability of the flow in a laminar separation bubble
[CUED/A-AERO/TR-22] p 2275 N95-26809

Transitional flow in thin tubes for space station freedom radiator p 2282 N95-27360

Experimental study on transition characteristics of natural-convection flow
[PB95-192423] p 2289 N95-28637

TRANSITION METALS

Theoretical studies of reaction surfaces
[AD-A288458] p 2404 N95-26632

The response of hydrotalcite coated aluminum to sealing with transition metal salt solutions
[DE95-004767] p 2234 N95-27460

Experimental determination of cluster geometrical structure
[DE95-007089] p 2409 N95-27753

Defect characterization of electronic conducting pseudo-perovskite systems
[DE95-007487] p 2220 N95-28049

Cavity formation and impurity gettering in He-implanted Si
[DE95-007744] p 2444 N95-28127

Chemical and electrical properties of cavities in silicon and germanium
[DE95-006812] p 2445 N95-28206

Surface structure of MX-chains studied by atomic force microscopy
[DE95-007881] p 2447 N95-28541

TRANSITION TEMPERATURE

High pressure conductivity study of template synthesized polypyrrole: Observation of a crossover from three to one dimensional variable range hopping
[AD-A288367] p 2224 N95-26470

Investigations of the hyperfine interactions in copper-oxide perovskites using Eu-151 and Fe-57 Moessbauer spectroscopy
[PB95-185138] p 2437 N95-26513

Recent neutron scattering results on high-temperature superconductors
[DE95-007028] p 2413 N95-28066

TRANSLATING

Chemical physics of uniform cyclic etching
[AD-A288975] p 2404 N95-26574

TRANSMISSION ELECTRON MICROSCOPY

Chemistry involving the separation, isolation, and immobilization of 3-5 compound semiconductor nanocrystals and quantum dots
[AD-A288381] p 2436 N95-26473

Characterization of collision cascade damage in Ca2La8(SiO4)6O2 by HRTEM
[DE95-005719] p 2440 N95-27491

Phase stability and elasticity of C15 transition-metal intermetallic compounds
[DE95-007876] p 2219 N95-28026

TRANSMISSION LOSS

Natural aerosol extinction module: XSCALE 1992 user's guide
[AD-A289029] p 2340 N95-26463

TRANSMISSIONS (MACHINE ELEMENTS)

Power train torque measurement
[AD-A289577] p 2301 N95-26688

Diagnosis of helicopter gearboxes using structure-based networks
[NASA-TM-106932] p 2302 N95-27373

Using hob offset to balance dynamic strength in spur gears
[NASA-TM-106934] p 2302 N95-27698

TRANSMITTER RECEIVERS

Radio telemetry buoy for long-range communication
[AD-D017269] p 2161 N95-28581

TRANSONIC COMPRESSORS

A general theory of two- and three-dimensional rotational flow in subsonic and transonic turbomachines
[NASA-CR-4496] p 2123 N95-28003

TRANSONIC FLOW

Computational fluid dynamics and transonic flow
[AD-A288962] p 2273 N95-26405

A numerical method for unsteady transonic flow about wings with control surfaces
[AD-A289631] p 2121 N95-26859

A general theory of two- and three-dimensional rotational flow in subsonic and transonic turbomachines
[NASA-CR-4496] p 2123 N95-28003

TranAir: A full-potential, solution-adaptive, rectangular grid code for predicting subsonic, transonic, and supersonic flows about arbitrary configurations. User's manual
[NASA-CR-4349] p 2123 N95-28230

TranAir: A full-potential, solution-adaptive, rectangular grid code for predicting subsonic, transonic, and supersonic flows about arbitrary configurations. Theory document
[NASA-CR-4348] p 2123 N95-28265

TRANSONIC SPEED

A fully implicit time accurate method for hypersonic combustion: Application to shock-induced combustion instability
[NASA-TM-106707] p 2273 N95-26380

Airfoil modification effects on subsonic and transonic pressure distributions and performance for the EA-6B airplane
[NASA-TP-3516] p 2120 N95-26382

Measurements of store forces and moments and cavity pressures for a generic store in and near a box cavity at subsonic and transonic speeds
[NASA-TM-4611] p 2123 N95-28241

TRANSPONDERS

Radio telemetry buoy for long-range communication
[AD-D017269] p 2161 N95-28581

Inspection methods for underwater cables
[AD-A289610] p 2312 N95-28616

TRANSPORT AIRCRAFT

Preliminary design problems and solutions for a supersonic oblique all-wing transport aircraft
p 2118 N95-26942

Load transfer in the stiffener-to-skin joints of a pressurized fuselage
[NASA-CR-198610] p 2310 N95-27865

High-stakes aviation: US-Japan technology linkages in transport aircraft
[LC-94-65759] p 2126 N95-27907

Evaluation of all-electric secondary power for transport aircraft
[NASA-CR-189077] p 2266 N95-27999

Overview of the ACT program p 2193 N95-28463

Designers' unified cost model p 2194 N95-28464

COINS: A composites information database system
p 2194 N95-28465

Composite fuselage shell structures research at NASA Langley Research Center p 2194 N95-28466
Test and analysis results for composite transport fuselage and wing structures p 2137 N95-28470

TRANSPORT PROPERTIES
Transport phenomena and interfacial kinetics in multiphase combustion systems
[AD-A288297] p 2199 N95-26417
Fluctuations and transport in fusion plasma
[DE95-004178] p 2429 N95-26444
RTE: A computer code for Rocket Thermal Evaluation
p 2177 N95-27355
Nonlinear phenomena, turbulence and anomalous transport in fusion plasmas
[DE95-007044] p 2431 N95-27497
Fluctuations and transport in fusion plasmas
[DE95-007111] p 2433 N95-27924
Survey on researches related to ocean disposal of carbon dioxide
[DE95-759247] p 2329 N95-27939
Laboratory high-energy astrophysics on lasers
[DE95-008062] p 2462 N95-28013
Multifractal character of the electronic states in disordered two-dimensional systems
[DE95-609153] p 2443 N95-28016
Measurement of particle transport coefficients on Alcator C-Mod
[DE95-007763] p 2411 N95-28020
A new algorithm for generating highly accurate benchmark solutions to transport test problems
[DE95-007397] p 2373 N95-28047
Low temperature carrier transport properties in isotopically controlled germanium
[DE95-008489] p 2444 N95-28092
Comprehensive numerical model for CW vertical-cavity surface-emitting lasers
[DE95-007758] p 2299 N95-28132
Transport coefficients for the NASA Lewis Chemical Equilibrium Program
[NASA-TM-4647] p 2209 N95-28182
On ionic charge distributions of heavy evaporation residues passing through a carbon foil
[DE94-629016] p 2414 N95-28184
Numerical simulation of coupled flow and transport with TOUGH2: A verification study
[DE95-008351] p 2287 N95-28225
Transport simulation of negative magnetic shear discharges
[DE95-003941] p 2416 N95-28329

TRANSPORT THEORY
On helicon wave induced radial plasma transport
[DE94-634477] p 2429 N95-26438
Monte Carlo study of electron-plasmon scattering effects on hot electron transport in GaAs
[DE95-607768] p 2403 N95-26542
The comparison of P(sub 1) and simplified P(sub 2) synthetic acceleration for iterative methods in transport solutions
[DE94-018306] p 2390 N95-27304
A composition joint PDF method for the modeling of spray flames p 2287 N95-27901

TRANSPORTATION
Alternative fuels and vehicles choice model
[DE95-005695] p 2243 N95-27944
Transportation R and D included in thermal and mechanical sciences program
[DE95-008275] p 2303 N95-28070
Review and analysis of the 1980-1989 biomass thermochemical conversion program
[DE95-000287] p 2325 N95-28394

TRANSPORTATION NETWORKS
Layer coefficients for NHDOT pavement materials
[AD-A288262] p 2246 N95-26548

TRANSPORTER
Pre-integrated truss space station and method of assembly
[NASA-CASE-MSC-22015-1] p 2165 N95-27842

TRANSPUTERS
Parallel block implicit integration technique for trajectory parallelism
[AD-A288961] p 2379 N95-28335

TRANSVERSE OSCILLATION
The effects of transverse vibration on the performance of an axial groove wick heat pipe
[AD-A289349] p 2278 N95-27065

TRAPPING
Extended linear ion trap frequency standard apparatus
[NASA-CASE-NPO-19081-1-CU] p 2404 N95-26861
Modeling of trapping and abrupt doping effects in MESFET's using R-dynamic element
[PB95-184891] p 2262 N95-27050
Extended linear ion trap frequency standard apparatus
[NASA-CASE-NPO-19081-1-CU] p 2416 N95-28348

TRAPS
Characterization of defects in deuterium-implanted beryllium
[DE95-005688] p 2217 N95-27553

TRAVELING SALESMAN PROBLEM
Using the dimension reduction technique to prove that clique trees define facets for the asymmetric traveling salesman polytope
[AD-A289397] p 2389 N95-26882

TRAVELING WAVE AMPLIFIERS
High power, broadband folded waveguide Gyrotron-Traveling-Wave-Amplifier
[AD-A286847] p 2259 N95-26433

TRAVELING WAVE TUBES
A finite element based technique for simulation helix TWT interaction circuit thermal behavior
[AD-A289552] p 2262 N95-27152
Ring-plane traveling-wave tube slow-wave circuit design simulations at V-Band frequencies
[NASA-TM-106949] p 2371 N95-27370

TRAYS
Spacecraft materials studies on the Aerospace Corporation tray on EOIM-3 p 2210 N95-27632

TREES
Scalable multicast tree construction for wide area networks
[AD-A288318] p 2379 N95-26421

TREND ANALYSIS
Linear and nonlinear trending and prediction for AVHRR time series data p 2385 N95-27391
A video strip chart program
[DE95-006389] p 2372 N95-27495

TRENDS
High-stakes aviation: US-Japan technology linkages in transport aircraft
[LC-94-65759] p 2126 N95-27907
New trends and ideas in the fields of microwave technology
[AD-A291663] p 2257 N95-28453

TRIANGULATION
Unstructured mesh generation and adaptivity
[NASA-CR-195069] p 2278 N95-27027

TRIGGER CIRCUITS
Pipelined first-level trigger for the H1 forward-muon spectrometer
[PB95-196242] p 2423 N95-28452

TRIGONOMETRIC FUNCTIONS
Kepler Equation solver p 2147 N95-27767

TRINITROTOLUENE
A novel sensitive detector of atmospheric nitrocompounds based on laser photofragmentation/ionization spectrometry
p 2174 N95-28314

TRITIUM
Recent high-speed ballistics experiments at ORNL
[DE95-006534] p 2422 N95-28205

TRIVALENT IONS
Synthesis and properties of lanthanide-exchanged Preyssler's heteropolyanions
[DE95-007136] p 2238 N95-28235

TROPICAL METEOROLOGY
Systematic and integrated approach to Tropical Cyclone track forecasting. Part 1: Approach overview and description of meteorological basis
[AD-A291775] p 2344 N95-28459

TROPICAL REGIONS
An observational study on the onset of the summer monsoon over eastern Asia in 1979
[AD-A289637] p 2341 N95-26723
Synoptic features of the Yunan rainy season before the onset of the tropical monsoons
[AD-A289641] p 2342 N95-26724
Contingency designs for attitude determination of TRMM p 2154 N95-27803
A study of lightning in winter thunderstorms and the analysis of thunderstorm overflight data
[NASA-CR-198577] p 2343 N95-28191

TROPICAL STORMS
Systematic and integrated approach to Tropical Cyclone track forecasting. Part 1: Approach overview and description of meteorological basis
[AD-A291775] p 2344 N95-28459

TROPOSPHERE
Coupled chemistry/climate issues
[DE95-006443] p 2327 N95-27532
Dynamics and control of SEDSAT tethered multi-probe for thermospheric research flight data analysis of SEDS-2 satellite: Tethered systems dynamics and flight data analysis
[NASA-CR-198653] p 2165 N95-27836
Use of SURFACE CHEMKIN to model multiphase atmospheric chemistry: Application to nitrogen tetroxide spills p 2172 N95-28305
Measurements of daytime and upper tropospheric water vapor profiles by Raman lidar
[DE95-007640] p 2344 N95-28538
Stratospheric ozone reactive chemicals generated by space launches worldwide
[AD-A289852] p 2332 N95-28623

TRUCKS
The vibration transmission of lift truck suspension seats
[ISVR-TR-245] p 2302 N95-27844

TRUSSES
Static stability of a three-dimensional space truss
[NASA-TM-106944] p 2164 N95-27730
Pre-integrated truss space station and method of assembly
[NASA-CASE-MSC-22015-1] p 2165 N95-27842
Stiffness and strength tailoring in uniform space-filling truss structures p 2188 N95-28290

TUBE LASERS
High temperature kinetic study of the reactions H + O2 = OH + O and O + H2 = OH + H in H2/O2 system by shock tube-laser absorption spectroscopy
[NASA-CR-195473] p 2206 N95-27695

TUMBLING MOTION
A modified proportional navigation scheme for rendezvous and docking with tumbling targets: The Planar case p 2150 N95-27784

TUNABLE LASERS
Toward coherent excitation: Development of a single-source pump for the rubidium hyperfine ground state doublet
[AD-A289413] p 2295 N95-27132
Fellowship in physics
[AD-A291691] p 2446 N95-28522

TUNERS
Display system employing acousto-optic tunable filter
[NASA-CASE-NPO-18736-1-CU] p 2426 N95-27843

TUNGSTEN
The high strain rate deformation of tungsten single crystals
[AD-A288874] p 2223 N95-28189

TUNGSTEN ALLOYS
Solid-state sintering of tungsten heavy alloys
[DE95-007749] p 2222 N95-28130

TUNGSTEN CARBIDES
Tungsten carbide fragmentation: Experimental characterization and numerical modelling
[DE95-008521] p 2236 N95-27879

TUNING
Analysis of filter tuning techniques for sequential orbit determination p 2146 N95-27764
An automated method of tuning an attitude estimator
p 2148 N95-27774

TUNNEL JUNCTIONS
Demonstration of photo-assisted tunneling process across the coulomb blockade energy gap in mesoscopic tunnel junctions — photon-assisted tunneling
[AD-A289534] p 2438 N95-26872

TURBINE BLADES
A summary of computational experience at GE Aircraft Engines for complex turbulent flows in gas turbines
p 2285 N95-27885
Basic principles and recent observations of rotationally sampled wind p 2321 N95-27971
A model of rotationally-sampled wind turbulence for predicting fatigue loads in wind turbines
p 2312 N95-27972
Comparative performance tests on the Mod-2, 2.5-mW wind turbine with and without vortex generators
p 2124 N95-27978
Aeroelastic stability of wind turbine blade/aileron systems p 2124 N95-27981
Comparison of measured and calculated dynamic loads for the Mod-2 2.5 mW wind turbine system
p 2312 N95-27983
Use of blade pitch control to provide power train damping for the Mod-2, 2.5-mW wind turbine
p 2306 N95-27986
Observed accustic and aeroelastic spectral responses of a MOD-2 turbine blade to turbulence excitation
p 2324 N95-27991
Mechanical properties of Hysol EA-9394 structural adhesive
[DE95-008187] p 2240 N95-28405

TURBINE ENGINES
Ceramic composite combustor cans for expendable turbine engines
[AD-A289551] p 2140 N95-28646

TURBINE PUMPS
Progress in incompressible Navier-Stokes computations for propulsion flows and its dual-use applications
[NASA-CR-197746] p 2275 N95-26766
Comparison of numerical results and multicavity purge and rim seal data with extensions to dynamics
[NASA-TM-106685] p 2168 N95-27434
Developmental problems and their solution for the Space Shuttle main engine alternate liquid oxygen high-pressure turbopump: Anomaly or failure investigation the key
[NASA-TP-3553] p 2169 N95-28263

TURBINE WHEELS

Preliminary analysis of dynamic stall effects on a 91-meter wind turbine rotor p 2124 N95-27975

Use of blade pitch control to provide power train damping for the Mod-2, 2.5-mW wind turbine p 2306 N95-27986

Variable speed generator application on the MOD-5A 7.3 mW wind turbine generator p 2273 N95-27989

TURBINES

Measurements of the volatilities of electrolytes: Application to water/steam cycles [DE95-007103] p 2204 N95-27451

A comparison of measured wind park load histories with the WISPER and WISPERX load spectra [DE95-000295] p 2319 N95-27459

Water driven turbine/brush pipe cleaner [NASA-CASE-KSC-11669-1] p 2304 N95-28359

TURBOCOMPRESSORS

WINCLR: A computer code for heat transfer and clearance calculation in a compressor [NASA-CR-195436] p 2117 N95-26363

TURBOJET ENGINES

Comparison of numerical results and multicavity purge and rim seal data with extensions to dynamics [NASA-TM-106685] p 2168 N95-27434

TURBOMACHINERY

A general theory of two- and three-dimensional rotational flow in subsonic and transonic turbomachines [NASA-CR-4496] p 2123 N95-28003

Bearing defect signature analysis using advanced nonlinear signal analysis in a controlled environment [NASA-TM-108491] p 2304 N95-28364

TURBULENCE

Fluctuations and transport in fusion plasma [DE95-004178] p 2429 N95-26444

Deep convection in the Mediterranean Sea [AD-A288497] p 2346 N95-26647

Compressible turbulence measurements in a supersonic boundary layer including favorable pressure gradient effects [AD-A289475] p 2276 N95-26821

Compressible turbulence measurements in a supersonic flow with adverse pressure gradient [AD-A289477] p 2276 N95-26822

Laser beam propagation in non-Kolmogorov atmospheric turbulence [AD-A289256] p 2295 N95-26974

Basic studies in turbulent shear flows [AD-A289145] p 2277 N95-26998

Turbulance boundary conditions for shear flow analysis, using the DTNS flow solver p 2283 N95-27362

NAS Technical Summaries, March 1993 - February 1994 [NASA-RP-1355] p 2466 N95-27367

Dithering transitions in resistive pressure-gradient-driven turbulence [DE95-006737] p 2431 N95-27536

Parallel plasma fluid turbulence calculations [DE95-006741] p 2431 N95-27537

Industry-Wide Workshop on Computational Turbulence Modeling [NASA-CP-10165] p 2285 N95-27882

Turbulence program for propulsion systems p 2285 N95-27883

Turbulence model development and application at Lockheed Fort Worth Company p 2285 N95-27884

Experiences with two-equation turbulence models p 2286 N95-27894

Second-order closures for compressible turbulence p 2286 N95-27898

Modeling of turbulent chemical reaction p 2286 N95-27899

Fluctuations and transport in fusion plasmas [DE95-007111] p 2433 N95-27924

Third-order-accurate numerical methods for efficient, large time-step solutions of mixed linear and nonlinear problems [DE95-009184] p 2288 N95-28533

Experimental study on transition characteristics of natural-convection flow [PB95-192423] p 2289 N95-28637

TURBULENCE EFFECTS

Compensated deconvolution from wavefront sensing [AD-A289490] p 2336 N95-26824

Flow visualization of a turbulent shear flow using an optical wavefront sensor [AD-A289208] p 2277 N95-26986

Effect of turbulence models on criticality conditions in swirling flows p 2282 N95-27356

Large HAWT wake measurement and analysis p 2289 N95-27973

Observed acoustic and aeroelastic spectral responses of a MOD-2 turbine blade to turbulence excitation p 2324 N95-27991

Anechoic wind tunnel study of turbulence effects on wind turbine broadband noise p 2325 N95-27992

TURBULENCE MODELS

Indexing meso-beta surface wind site representative [AD-A288501] p 2341 N95-26650

Turbulence modeling [NASA-CR-197751] p 2274 N95-26665

Supersonic coaxial jet noise predictions [NASA-TM-106917] p 2401 N95-26801

Effect of turbulence models on criticality conditions in swirling flows p 2282 N95-27356

Dithering transitions in resistive pressure-gradient-driven turbulence [DE95-006737] p 2431 N95-27536

Industry-Wide Workshop on Computational Turbulence Modeling [NASA-CP-10165] p 2285 N95-27882

Turbulence program for propulsion systems p 2285 N95-27883

Turbulence model development and application at Lockheed Fort Worth Company p 2285 N95-27884

A summary of computational experience at GE Aircraft Engines for complex turbulent flows in gas turbines p 2285 N95-27885

The applicability of turbulence models to aerodynamic and propulsion flowfields at McDonnell-Douglas Aerospace p 2285 N95-27886

Turbulence models for gas turbine combustors p 2285 N95-27888

Combustion system CFD modeling at GE Aircraft Engines p 2285 N95-27889

Recent progress in the joint velocity-scalar PDF method p 2285 N95-27890

Overview of turbulence model development and applications at Rocketdyne p 2286 N95-27891

Recent advances in PDF modeling of turbulent reacting flows p 2286 N95-27892

Experience with turbulence interaction and turbulence-chemistry models at Fluent Inc. p 2286 N95-27893

Progress in simulating industrial flows using two-equation models: Can more be achieved with further research? p 2286 N95-27895

Turbulence modeling needs of commercial CFD codes: Complex flows in the aerospace and automotive industries p 2286 N95-27896

Turbulence requirements of a commerical CFD code p 2286 N95-27897

Second-order closures for compressible turbulence p 2286 N95-27898

Modeling of turbulent chemical reaction p 2286 N95-27899

PDF methods for turbulent reactive flows p 2287 N95-27900

A composition joint PDF method for the modeling of spray flames p 2287 N95-27901

Improvements and new features in the PDF module p 2287 N95-27902

A model of rotationally-sampled wind turbulence for predicting fatigue loads in wind turbines p 2312 N95-27972

Measurement and prediction of broadband noise from large horizontal axis wind turbine generators p 2324 N95-27990

DNS, LES and stochastic modeling of turbulent reacting flows [AD-A280099] p 2287 N95-28155

Studies of radar backscatter as a function of wave properties and the winds in the turbulent marine atmosphere [NASA-CR-198608] p 2315 N95-28209

TURBULENT BOUNDARY LAYER

The small-scale structure of dispersing clouds in the atmosphere [AD-A288256] p 2341 N95-26546

The near-wake flow behavior of an oscillating airfoil with modified trailing edge p 2119 N95-26953

Turbulance boundary conditions for shear flow analysis, using the DTNS flow solver p 2283 N95-27362

Measurement and prediction of broadband noise from large horizontal axis wind turbine generators p 2324 N95-27990

TURBULENT COMBUSTION

Turbulence models for gas turbine combustors p 2285 N95-27888

Combustion system CFD modeling at GE Aircraft Engines p 2285 N95-27889

Recent progress in the joint velocity-scalar PDF method p 2285 N95-27890

Modeling of turbulent chemical reaction p 2286 N95-27899

PDF methods for turbulent reactive flows p 2287 N95-27900

TURBULENT DIFFUSION

A method for generating skewed random numbers using two overlapping uniform distributions [DE95-008747] p 2392 N95-28162

TURBULENT FLOW

The small-scale structure of dispersing clouds in the atmosphere [AD-A288256] p 2341 N95-26546

Plate manipulators [AD-A289601] p 2121 N95-26719

Direct numerical simulation of transitional and turbulent flow over a heated flat plate using finite-difference schemes [NASA-CR-197753] p 2275 N95-26776

Analysis of hypersonic boundary layer second mode instability over a 7 deg cone [AD-A289471] p 2276 N95-26819

Compressible turbulence measurements in a supersonic boundary layer including favorable pressure gradient effects [AD-A289475] p 2276 N95-26821

Compressible turbulence measurements in a supersonic flow with adverse pressure gradient [AD-A289477] p 2276 N95-26822

Calculation of suspended sediment transport by combined wave-current flows [AD-A289368] p 2346 N95-26904

Flow visualization of a turbulent shear flow using an optical wavefront sensor [AD-A289208] p 2277 N95-26986

Basic studies in turbulent shear flows [AD-A289145] p 2277 N95-26998

Flow control [AD-A289262] p 2279 N95-27197

Turbulence program for propulsion systems p 2285 N95-27883

A summary of computational experience at GE Aircraft Engines for complex turbulent flows in gas turbines p 2285 N95-27885

Experience with k-epsilon turbulence models for heat transfer computations in rotating p 2285 N95-27887

Recent advances in PDF modeling of turbulent reacting flows p 2286 N95-27892

Progress in simulating industrial flows using two-equation models: Can more be achieved with further research? p 2286 N95-27895

Turbulence modeling needs of commercial CFD codes: Complex flows in the aerospace and automotive industries p 2286 N95-27896

Modeling of turbulent chemical reaction p 2286 N95-27899

PDF methods for turbulent reactive flows p 2287 N95-27900

DNS, LES and stochastic modeling of turbulent reacting flows [AD-A280099] p 2287 N95-28155

A phenomenological treatment of rotating turbulence [NASA-CR-198168] p 2288 N95-28228

Computational and experimental studies of hydrodynamic instabilities and turbulent mixing [DE95-006837] p 2288 N95-28603

Numerical study to assess sulfur hexafluoride as a medium for testing multielement airfoils [NASA-TP-3496] p 2124 N95-28674

TURBULENT HEAT TRANSFER

Direct numerical simulation of transitional and turbulent flow over a heated flat plate using finite-difference schemes [NASA-CR-197753] p 2275 N95-26776

TURBULENT MIXING

Computational and experimental studies of hydrodynamic instabilities and turbulent mixing [DE95-006837] p 2288 N95-28603

TVD SCHEMES

A fully implicit time accurate method for hypersonic combustion: Application to shock-induced combustion instability [NASA-TM-106707] p 2273 N95-26380

Development of an upwind, finite-volume code with finite-rate chemistry [NASA-CR-197747] p 2121 N95-26760

TWO BODY PROBLEM

Two-body bound states and the Bethe-Salpeter equation [DE95-008302] p 2392 N95-27742

Kepler Equation solver p 2147 N95-27767

TWO DIMENSIONAL BODIES

Materials with self organized surfaces: 2D polymer assemblies [AD-A288928] p 2226 N95-26627

TWO DIMENSIONAL BOUNDARY LAYER

Computer program BL2D for solving two-dimensional and axisymmetric boundary layers [NASA-CR-4668] p 2279 N95-27257

TWO DIMENSIONAL FLOW

Numerical simulation of combustion flow around a flame holder with hydrogen injection [NAL-TR-1233] p 2200 N95-26523

The method of space-time conservation element and solution element-applications to one-dimensional and two-dimensional time-marching flow problems
[NASA-TM-106915] p 2389 N95-26663

Contribution to the optimal shape design of two-dimensional internal flows with embedded shocks
[NASA-CR-195062] p 2389 N95-26672

A general theory of two- and three-dimensional rotational flow in subsonic and transonic turbomachines
[NASA-CR-4496] p 2123 N95-28003

Numerical simulation of coupled flow and transport with TOUGH2: A verification study
[DE95-008351] p 2287 N95-28225

TWO DIMENSIONAL MODELS

Scrape-off layer plasma modeling for the DIII-D tokamak
[DE95-008059] p 2433 N95-28054

Critical behaviour of spin models: A transfer-matrix approach
[PB95-192456] p 2418 N95-28638

TWO PHASE FLOW

Cryogenic and simulated fuel jet breakup in argon, helium and nitrogen gas flows
[NASA-TM-106923] p 2291 N95-27030

Diagnostic system Cryo-D for the determination of parameters of vapor-liquid currents of the coolant
[DE95-608775] p 2280 N95-27338

The use of wavelet transforms in the solution of two-phase flow problems
[DE95-004688] p 2284 N95-27721

Two-phase flow research using the learjet apparatus
[NASA-TM-106814] p 2284 N95-27854

Structure of high-speed sprays
[AD-A291696] p 2288 N95-28523

U

UH-1 HELICOPTER

The effects of UH-1 experience on UH-6O simulator performance: A preliminary study
[AD-A289457] p 2130 N95-26993

UKRAINE

JPRS report: Science and technology. Central Eurasia
[JPRS-UST-94-022] p 2246 N95-27699

WTEC panel report on research submersibles and undersea technologies
[NASA-CR-198565] p 2247 N95-27909

ULTRAHIGH VACUUM

Low temperature deposition and characterization of N- and P-type silicon carbide thin films and associated Ohmic and Schottky contacts
[AD-A289107] p 2237 N95-28097

ULTRASHORT PULSED LASERS

Surface damage effects generated by a fast-pulse laser beam
[AD-A289131] p 2295 N95-26996

Direct ultrashort-pulse retrieval using frequency-resolved optical gating and a computational neural network
[DE95-007148] p 2425 N95-27482

Trident as an ultrahigh irradiance laser
[DE95-006345] p 2297 N95-27850

Effect of noise on Frequency-Resolved Optical Gating measurements of ultrashort pulses
[DE95-007149] p 2298 N95-27969

Phase retrieval and time-frequency methods in the measurement of ultrashort laser pulses
[DE95-006499] p 2300 N95-28549

ULTRASONIC AGITATION

Ethyl lactate as a solvent alternative for cleaning metal parts p 2229 N95-27112

ULTRASONIC TESTS

Ultrasonic test system
[AD-D017261] p 2400 N95-26502

Combined investigation of Eddy current and ultrasonic techniques for composite materials NDE
[NASA-TM-110599] p 2306 N95-26778

ULTRASONICS

Ultrasonic test system
[AD-D017261] p 2400 N95-26502

Multiclassifier fusion of an ultrasonic lip reader in automatic speech recognition
[AD-A289207] p 2254 N95-27079

The evaluation of a fluorochemical drying process for an electrical contact p 2227 N95-27103

JPRS report: Science and technology. Central Eurasia
[JPRS-UST-95-021] p 2202 N95-27155

Laser ultrasonic generation at the surface of a liquid metal
[DE95-004999] p 2216 N95-27477

Ultrasonic study on ternary liquid systems by laser-sound interaction
[DE95-608783] p 2207 N95-27929

Phase stability and elasticity of C15 transition-metal intermetallic compounds
[DE95-007876] p 2219 N95-28026

Physical interpretation and development of ultrasonic nondestructive evaluation techniques applied to the quantitative characterization of textile composite materials
[NASA-CR-198591] p 2306 N95-28034

ULTRAVIOLET ASTRONOMY

Typical examples of classical novae
p 2459 N95-27074

Recurrent novae p 2460 N95-27075

ULTRAVIOLET RADIATION

Radiation sensitive area detection device and method
[NASA-CASE-MFS-28563-3] p 2423 N95-26385

Method for determining surface coverage by materials exhibiting different fluorescent properties
[NASA-CASE-GSC-13539-1] p 2315 N95-28211

ULTRAVIOLET SPECTRA

Optical features of nanosize iron and molybdenum sulfide clusters
[DE95-005417] p 2202 N95-27136

International Ultraviolet Explorer Atlas of B-type spectra from 1200 to 1900 A
[NASA-RP-1363] p 2463 N95-28328

ULTRAVIOLET SPECTROSCOPY

International Ultraviolet Explorer Atlas of B-type spectra from 1200 to 1900 A
[NASA-RP-1363] p 2463 N95-28328

ULYSSES MISSION

Ulysses orbit determination at high declinations
p 2151 N95-27787

UNDERGROUND STORAGE

Recovery, evaluation, and decontamination of landfilled pentaborane cylinders, former liquid propellant rocket engine test facility, Washoe County, Nevada
p 2171 N95-28302

UNDERGROUND STRUCTURES

Planning, design and construction of the cavern arena: Heating, ventilation and air conditioning
[PB95-196382] p 2361 N95-28659

UNDERWATER ACOUSTICS

Ultrasonic test system
[AD-D017261] p 2400 N95-26502

Uncertainties in the calibration of hydrophones at NPL by the three-transducer spherical-wave reciprocity method in the frequency range 10 kHz on 500 kHz
[PB95-185245] p 2401 N95-26615

Very low frequency seismo-acoustic noise below the sea floor (0.2-10 Hz)
[AD-A289164] p 2347 N95-27011

Observations of near-bottom flow in a wave-dominated nearshore environment
[AD-A289331] p 2347 N95-27043

WTEC panel report on research submersibles and undersea technologies
[NASA-CR-198565] p 2247 N95-27909

Modeling the shock response of submerged structures
[AD-A289082] p 2288 N95-28351

Molecular modeling: An approach for the study of piezoelectric polymers
[AD-A289821] p 2241 N95-28574

Radio telemetry buoy for long-range communication
[AD-D017269] p 2161 N95-28581

Ultrasonic studies of liquid/solid seimoacoustic wave phenomena
[AD-A289644] p 2402 N95-28622

UNDERWATER COMMUNICATION

WTEC panel report on research submersibles and undersea technologies
[NASA-CR-198565] p 2247 N95-27909

UNDERWATER ENGINEERING

WTEC panel report on research submersibles and undersea technologies
[NASA-CR-198565] p 2247 N95-27909

UNDERWATER PROPULSION

WTEC panel report on research submersibles and undersea technologies
[NASA-CR-198565] p 2247 N95-27909

UNDERWATER STRUCTURES

Nondestructive testing apparatus for determining the orientation of reinforcing bars within a concrete structure
[AD-D017267] p 2245 N95-26508

UNDERWATER TESTS

Ultrasonic test system
[AD-D017261] p 2400 N95-26502

UNIQUENESS

On permanent capillar-heavy waves in circular shaped channels
[DE95-608779] p 2280 N95-27339

UNITED KINGDOM

Milestones in telecommunications in some selected countries
[PB95-184826] p 2252 N95-26929

WTEC panel report on research submersibles and undersea technologies
[NASA-CR-198565] p 2247 N95-27909

UNITED STATES

Strategy in the commercial aircraft industry in the United States: A comparison of decisionmaking by McDonnell-Douglas and Boeing aircraft companies from 1977-1983
[AD-A288289] p 2117 N95-26409

Comparison of fixed wing aircraft algorithms for JANUS
[AD-A288503] p 2129 N95-26652

Milestones in telecommunications in some selected countries
[PB95-184826] p 2252 N95-26929

UNITS OF MEASUREMENT

Standards for excellence
[NONP-NASA-VT-95-49096] p 2451 N95-27202

Chemical engineering: Measurements for a competitive age
[NONP-NASA-VT-95-49098] p 2203 N95-27204

Getting it right, making it better
[NONP-NASA-VT-95-49118] p 2451 N95-27206

UNIVERSE

Discovery of the most distant supernovae and the quest for (Omega)
[DE95-006569] p 2460 N95-28197

UNIVERSITIES

Summaries of theses for the degree of diploma engineer 1992-1993
[PB95-184867] p 2246 N95-27048

Intrusive multi-probe system
[DE95-006258] p 2292 N95-27465

UNIVERSITY PROGRAM

Space physics educational outreach
[NASA-CR-198649] p 2399 N95-27852

UNIX (OPERATING SYSTEM)

Beginner's guide to UNIX
[IFTR-17/1994] p 2364 N95-26511

Long term distributed file reference tracing: Implementation and experience
[AD-A288585] p 2452 N95-26535

A case for dynamic sets in operating systems
[AD-A289354] p 2454 N95-27529

The transition of GTDS to the Unix workstation environment p 2151 N95-27789

Research on the establishment of the database system for R and D on the innovative technology for the Earth
[DE95-759244] p 2458 N95-27937

Replacing the message service component in an integration framework
[AD-A289928] p 2375 N95-28628

UNMANNED SPACECRAFT

Analysis of modal behavior at frequency cross-over
[AD-A289304] p 2162 N95-26918

UNSTEADY AERODYNAMICS

An experimental investigation of helicopter downwash and tailboom interaction at the Wichita State University 7x10 foot wind tunnel p 2120 N95-26955

Modeling of aircraft unsteady aerodynamic characteristics. Part 2: Parameters estimated from wind tunnel data
[NASA-TM-110161] p 2142 N95-27839

A numerical study of fundamental shock noise mechanisms
[NASA-TM-110608] p 2401 N95-27908

UNSTEADY FLOW

A fully implicit time accurate method for hypersonic combustion: Application to shock-induced combustion instability
[NASA-TM-106707] p 2273 N95-26380

Progress in incompressible Navier-Stokes computations for propulsion flows and its dual-use applications
[NASA-CR-197746] p 2275 N95-26766

Turbomachinery design and tonal acoustics computations
[NASA-CR-197749] p 2139 N95-26777

Unsteady base pressure measurements in the near wake of a cylinder with imposed three-dimensional disturbances
[AD-A289498] p 2276 N95-26827

A numerical method for unsteady transonic flow about wings with control surfaces
[AD-A289631] p 2121 N95-26859

On the nonlinear stability of the unsteady, viscous flow of an incompressible fluid in a curved pipe
[NASA-CR-195065] p 2276 N95-27028

Global flowfield about the V-22 Tiltrotor Aircraft
[NASA-CR-198603] p 2122 N95-27248

Comparison of numerical results and multicavity purge and rim seal data with extensions to dynamics
[NASA-TM-106685] p 2168 N95-27434

A numerical study of fundamental shock noise mechanisms
[NASA-TM-110608] p 2401 N95-27908

UNSTEADY STATE
Acoustic field in unsteady moving media
[NASA-CR-198162] p 2279 N95-27179
UNSTRUCTURED GRIDS (MATHEMATICS)
Unstructured mesh generation and adaptivity
[NASA-CR-195069] p 2278 N95-27027
Spectral methods on arbitrary grids
[NASA-CR-198158] p 2279 N95-27247
Multigrid techniques for unstructured meshes
[NASA-CR-195070] p 2391 N95-27433
A point-centered diffusion differencing for unstructured meshes in 3-D
[DE95-008382] p 2392 N95-28232
Numerical study to assess sulfur hexafluoride as a medium for testing multielement airfoils
[NASA-TP-3496] p 2124 N95-28674
UPPER ATMOSPHERE RESEARCH SATELLITE (UARS)
Experience from the in-flight calibration of the Extreme Ultraviolet Explorer (EUVE) and Upper Atmosphere Research Satellite (UARS) fixed head star trackers (FHSTs) p 2149 N95-27779
UPWELLING WATER
SeaWiFS technical report series. Volume 26: Results of the SeaWiFS Data Analysis Round-Robin, July 1994 (DARR-1994)
[NASA-TM-104566-VOL-26] p 2345 N95-26430
URANIUM
An investigation of the applicability of the new Reillex(tm)-HPQ anion exchange resin system for technetium/rhenium and uranium in the Hanford waste tanks
[DE95-007643] p 2412 N95-28051
URANIUM ALLOYS
Study of the phase transformations and microstructures of uranium rich alloys of the binary uranium-gallium system
[DE95-609624] p 2217 N95-27713
URANIUM OXIDES
Analytical electron microscopy of nanometer-sized particles
[AD-A289124] p 2413 N95-28101
URBAN TRANSPORTATION
Layer coefficients for NHDOT pavement materials
[AD-A288262] p 2246 N95-26548
UREAS
Absorption of sparingly soluble gases by reactive media in self-aerated gas-liquid contactors: A scale-up procedure
[DE95-006429] p 2206 N95-27707
Growth and characterization of crystals for room temperature I.R. detectors and second harmonic generation devices
[NASA-CR-198598] p 2443 N95-28033
URETHANES
Cryogenic BRDF measurements at 10.6 micrometers and 0.63 micrometers on contaminated mirrors
[AD-A291611] p 2427 N95-28408
USER MANUALS (COMPUTER PROGRAMS)
Manual for SHOCK3D, version 2.0. Computer program for non-linear shock response
[AD-A288631] p 2307 N95-26342
WINCLR: A computer code for heat transfer and clearance calculation in a compressor
[NASA-CR-195436] p 2117 N95-26363
Long Duration Exposure Facility Mini-Data Base User's Guide: Macintosh version
[NASA-CR-4656] p 2177 N95-26391
Aircraft noise prediction program theoretical manual: Rotorcraft System Noise Prediction System (ROTONET), part 4
[NASA-TM-83199-PT-4] p 2400 N95-26392
Natural aerosol extinction module: XSCALE 1992 user's guide
[AD-A289029] p 2340 N95-26463
General purpose finite element solver
[PB95-185062] p 2388 N95-26495
Beginner's guide to UNIX
[IFTR-17/1994] p 2364 N95-26511
Software packager user's guide
[NASA-CR-197763] p 2366 N95-26693
User's and test case manual for FEMATS
[NASA-CR-197803] p 2366 N95-26694
Material modeling in the CRALE code. Users' manual
[AD-A288988] p 2178 N95-26712
The multidimensional Self-Adaptive Grid code, SAGE, version 2
[NASA-TM-110350] p 2367 N95-26726
User documentation of the CTA program
[AD-A289508] p 2121 N95-26854
Reference manual: Naive physics simulator
[PB95-184917] p 2369 N95-26907
Research and development management information system, system user manual
[AD-A289151] p 2453 N95-27004
Computer program BL2D for solving two-dimensional and axisymmetric boundary layers
[NASA-CR-4668] p 2279 N95-27257
Outline and handling manual of fusion experimental data monitor system DAISY, version 2
[DE95-703895] p 2431 N95-27414
FDTD-ANT user manual
[NASA-CR-195444] p 2372 N95-27729
Using the scalable nonlinear equations solvers package
[DE95-008323] p 2378 N95-28071
BEGET: The B-Factory Event Generator version 21
[DE95-008329] p 2414 N95-28171
Project Records Information System (PRIS) user's manual, revision 3
[DE95-008330] p 2456 N95-28172
TranAir: A full-potential, solution-adaptive, rectangular grid code for predicting subsonic, transonic, and supersonic flows about arbitrary configurations. User's manual
[NASA-CR-4349] p 2123 N95-28230
Software technology for adaptable, reliable systems (STARS). AdaWise user's manual
[AD-A289655] p 2375 N95-28635
Using COLETTE. (A simple guide)
[PB95-195806] p 2375 N95-28658
USER REQUIREMENTS
The value of simulation for training
[AD-A289174] p 2143 N95-26556
Enhanced visual user interface support for domain-oriented application composition systems
[AD-A289337] p 2359 N95-26737
User-centric development. Version 01.00.04
[AD-A289363] p 2368 N95-26903
A user-system interface agent p 2383 N95-27379
UTILITIES
DOE/KEURP Site Operator Program
[DE95-007116] p 2266 N95-27926

V

V-22 AIRCRAFT
Global flowfield about the V-22 Tiltrotor Aircraft
[NASA-CR-198603] p 2122 N95-27248
Navy composite maintenance and repair experience
p 2193 N95-28446
V/STOL AIRCRAFT
Flightpath synthesis and HUD scaling for V/STOL terminal area operations
[NASA-TM-110348] p 2127 N95-26587
VACANCIES (CRYSTAL DEFECTS)
Vacancy related defects in thin film Pb(Zr,Ti)O3 materials
[DE95-007696] p 2445 N95-28165
VACUUM
The influence of surface structure on the interaction of water with TiO2(100)
[DE95-004927] p 2203 N95-27401
Acceleration theorems
[DE95-007300] p 2420 N95-27484
Reducing cold-start emissions by catalytic converter thermal management
[DE95-000256] p 2327 N95-27540
Lattice calculation for lepton capture from vacuum-pair production in relativistic heavy-ion collisions
[DE95-007392] p 2413 N95-28077
The effects of processing variables on reaction synthesis of Fe-Al alloys
[DE95-007405] p 2221 N95-28082
Cryogenic BRDF measurements at 10.6 micrometers and 0.63 micrometers on contaminated mirrors
[AD-A291611] p 2427 N95-28408
VACUUM CHAMBERS
Process for non-contact removal of organic coatings from the surface of paintings
[NASA-CASE-LEW-15896-1] p 2235 N95-27702
VACUUM DEPOSITION
The Strategic Technologies for Automation and Robotics (STEAR) program: Protection of materials in the space environment subprogram p 2242 N95-27669
VACUUM FURNACES
The effects of processing variables on reaction synthesis of Fe-Al alloys
[DE95-007405] p 2221 N95-28082
VALENCE
The gluon propagator in non-Abelian Weizsaecker-Williams fields
[DE95-006877] p 2449 N95-27547
VALUE ENGINEERING
An analysis of the KC-135 three-person cockpit
[AD-A289540] p 2130 N95-26873
VALVES
Valve mechanism for an acoustic modulator
[AD-D017263] p 2300 N95-26504
The development and testing of ceramic components in piston engines
[DE95-005759] p 2236 N95-27946
VANADIUM
Photoluminescence spectroscopy of 4H- and 6H-SiC
[AD-A289326] p 2202 N95-26896
Coherent V2O3 precipitates in alpha-Al2O3CO-implanted with vanadium and oxygen
[DE95-007404] p 2444 N95-28081
VAPOR DEPOSITION
A new growth technology for highly non-linear, optical quality organic films: Organic vapor phase deposition
[AD-A289006] p 2178 N95-26567
Boron-induced morphology changes in silicon CVD growth: A scanning tunneling microscopy study
[AD-A289275] p 2290 N95-26982
High-density plasma source for large-area chemical vapor deposition of diamond films
[AD-A289053] p 2430 N95-27190
Copper CVD using liquid coinjection of (hfac)Cu(TMVS) and TMVS
[DE95-008155] p 2237 N95-28089
Low temperature deposition and characterization of N- and P-type silicon carbide thin films and associated Ohmic and Schottky contacts
[AD-A289107] p 2237 N95-28097
Atomic layer epitaxy of group 4 materials: Surface processes, thin films, devices and their characterization
[AD-A289092] p 2446 N95-28327
The in situ observation of epitaxial diamond thin film nucleation and growth using emission electron microscopy
[AD-A289841] p 2447 N95-28618
VAPOR PHASES
A new growth technology for highly non-linear, optical quality organic films: Organic vapor phase deposition
[AD-A289006] p 2178 N95-26567
Search for molecular absorptions with the Fourier Transform Spectrometer
[NASA-CR-198648] p 2462 N95-28222
The sensitive detection of hydrazine using chemiluminescence p 2173 N95-28311
Self-assembly of low-dimensional molecular nanoclusters on Au(111) surfaces
[AD-A288936] p 2178 N95-28334
VAPOR PRESSURE
Vapor pressures of mixtures of CFC-114 with the potential replacement coolants C4F(10) andc-C4F 8
[DE95-003444] p 2208 N95-28042
VAPORIZING
Structure of high-speed sprays
[AD-A291696] p 2288 N95-28523
VAPORS
Retrofitting conventional vapor degreasers to use a solvent wash/fluorochemical rinse process
p 2232 N95-27127
Diagnostic system Cryo-D for the determination of parameters of vapor-liquid currents of the coolant
[DE95-608775] p 2280 N95-27338
The surface of liquid He-4 at nonzero temperatures
[DE95-607841] p 2207 N95-27880
Evaluation of a conductive polymer-based sensor for detection of hydrazines at the part-per-billion level
p 2173 N95-28309
Prototype development and test results of a continuous ambient air monitoring system for hydrazine at the 110 ppb level p 2173 N95-28310
VARIABILITY
Coronal abundances and their variation
[NASA-CR-197788] p 2464 N95-26671
Long-term variability of electron radiation dose in geosynchronous orbit
[AD-A289335] p 2162 N95-26902
Overview of the observations of symbiotic stars
p 2460 N95-27076
Models of symbiotic stars p 2460 N95-27077
Variability study of foF2 for an equatorial station
[DE95-608080] p 2337 N95-27157
Study of the response of a three-dimensional coupled ice-ocean model to daily varying atmospheric forcing
[AD-A289050] p 2347 N95-27189
Variable speed generator technology options for wind turbine generators p 2273 N95-27988
VARIABLE AMPLITUDE LOADING
Bonded composite repair of thin metallic materials: Variable load amplitude and temperature cycling effects
p 2132 N95-27509
VARIANCE (STATISTICS)
Truncated Gaussians as tolerance sets
[NASA-CR-197732] p 2395 N95-27417
VARIATIONAL PRINCIPLES
First-principles study of intermetallic phase stability in the ternary Ti-Al-Nb alloy system
[DE95-005259] p 2213 N95-27082

VARISTORS

Polarization relaxation in zinc oxide varistors from 77 K to 450 K
[DE95-007761] p 2268 N95-28156

VAX COMPUTERS

Using COLETTE. (A simple guide)
[PB95-195806] p 2375 N95-28658

VECTOR ANALYSIS

Multipoint multirate signal processing
[AD-A289211] p 2253 N95-26988

VECTOR MESONS

Transverse tau polarization in inclusive bar-B yields tau bar-nu X decays
[DE95-610325] p 2407 N95-27409

VECTOR QUANTIZATION

Digital mapping, charting, and geodesy analysis program technical review of Vector Quantization (VQ) Decompression for the National Imagery Transmission Format Standard (NITFS)
[AD-A288998] p 2314 N95-26682

VECTOR SPACES

Hyperkaehler metrics associated to compact Lie groups
[PB95-185161] p 2388 N95-26514

Mean value theorem in topological vector spaces
[DE95-608753] p 2390 N95-27331

Harmonic maps of the bounded symmetric domains
[DE95-608798] p 2397 N95-27485

VECTORS (MATHEMATICS)

Vector Smart Map Level 1: A new DMA product
[AD-A288920] p 2452 N95-26607

Vector algorithms for solving 3D nonlinear magnetostatic problems
[DE95-608737] p 2399 N95-27298

On commutativity of right s-unital rings with some polynomial constraints
[DE95-608752] p 2390 N95-27330

Realization of vector fields for quantum groups as pseudodifferential operators on quantum spaces
[DE95-008485] p 2449 N95-27877

VEGETATION

Radiometer measurements of snow in Sodankylae, 1991-1993
[PB95-184966] p 2313 N95-26645

VELOCITY DISTRIBUTION

Indexing meso-beta surface wind site representative
[AD-A288501] p 2341 N95-26650

Fuzzy inference enhanced information recovery from digital PIV using cross-correlation combined with particle tracking
[NASA-TM-106896] p 2291 N95-27173

Analysis of developing laminar flows in circular pipes using a higher-order finite-difference technique
p 2281 N95-27352

Recovery and reuse of rocket motor propellant ingredients p 2177 N95-28326

VELOCITY MEASUREMENT

Flutter clearance flight tests of an OV-10A airplane modified for wake vortex flight experiments
[NASA-TM-109168] p 2117 N95-26381

Evaluation of a new laboratory acoustic Doppler velocimeter
[AD-A289592] p 2290 N95-26714

Calculation of three-dimensional (3-D) internal flow by means of the velocity-vorticity formulation on a staggered grid
[NASA-TM-110352] p 2122 N95-27258

VENTILATION

Research on combustion processes relevant to burners in HVAC systems
[PB95-179735] p 2208 N95-28006

Algorithm to describe the spread of a wall fire under a ceiling
[PB95-182259] p 2247 N95-28008

Planning, design and construction of the cavern arena: Heating, ventilation and air conditioning
[PB95-196382] p 2361 N95-28659

VERBAL COMMUNICATION

Codes of processing and multiple resources: Model and methodology
[AD-A289583] p 2355 N95-26691

VERTEBRATES

Biochemically vulnerable sites for antifungal intercession in the control of fungal growth
[AD-A288345] p 2348 N95-26573

VERTICAL DISTRIBUTION

The development of a feature-based concurrent engineering system
[AD-A288424] p 2364 N95-26557

VERTICAL TAKEOFF AIRCRAFT

Design and synthesis of a real-time controller for an unmanned air vehicle
[AD-A289134] p 2141 N95-26555

VERY LARGE SCALE INTEGRATION

Using machine learning to derive efficient cost and performance estimates in VLSI CAD designs
[AD-A288254] p 2363 N95-26408

Construction of a connectionist network supercomputer
[AD-A288439] p 2377 N95-27182

Leak detection utilizing analog binaural (VLSI) techniques
[NASA-CASE-NPO-18399-1-CU] p 2271 N95-28599

VERY LOW FREQUENCIES

A BATSE investigation of radiation belt electrons precipitated by VLF waves
[NASA-CR-197780] p 2336 N95-26922

VESTIBULAR TESTS

Role of somatosensory and vestibular cues in attenuating visually induced human postural sway
[NASA-CR-197845] p 2357 N95-27697

VESTIBULES

Comparative Transduction Mechanisms of Vestibular Otolith Hair Cells
[NASA-CR-197980] p 2349 N95-26727

Regional differences in lectin binding patterns of vestibular hair cells p 2349 N95-26728

Hair cell regeneration in the bullfrog vestibular otolith organs following aminoglycoside toxicity
p 2349 N95-26729

Peripheral innervation patterns of vestibular nerve afferents in the bullfrog utriculus p 2349 N95-26730

Comparative transduction mechanisms of hair cells in the bullfrog uticulus. 2: Sensitivity and response dynamics to hair bundle displacement p 2350 N95-26732

A model of the neural basis of the rat's sense of direction
[AD-A289678] p 2350 N95-26761

Role of somatosensory and vestibular cues in attenuating visually induced human postural sway
[NASA-CR-197845] p 2357 N95-27697

VHSIC (CIRCUITS)

Accelerating conservative parallel simulation of VHDL circuits
[AD-A289317] p 2264 N95-27294

VIABILITY

Unique features of a new nickel-hydrogen 2-cell CPV
p 2272 N95-26793

Preconversion catalytic deoxygenation of phenolic functional groups
[DE95-007556] p 2204 N95-27458

The demilitarization of class 1.1 rocket motors using high pressure waterjets p 2176 N95-28322

VIBRATION

Research activities on somatosensory (SI) cortical neurons
[AD-A288794] p 2348 N95-26360

Control of a large space structure using multiple model adaptive estimation and control techniques
[AD-A289309] p 2162 N95-26916

A state-space model of a large, lightly damped space structure using the Eigensystem realization algorithm
[AD-A289251] p 2163 N95-26970

Collisional dynamics and spectroscopic studies of highly excited rovibrational levels of I2(X)(0(+)(sub g)) via stimulated emission pumping
[AD-A289447] p 2295 N95-27172

Infrared spectroscopy of nonclassical ions and their complexes
[DE95-008487] p 2413 N95-28091

Spectroscopic and dynamical studies of highly energized small polyatomic molecules
[DE95-006640] p 2414 N95-28199

The solar array-induced disturbance of the Hubble Space Telescope pointing system
[NASA-TP-3556] p 2311 N95-28214

Vibrational spectroscopy of water interfaces
[DE95-006592] p 2209 N95-28218

Modeling helicopter blade dynamics using a modified Myklestad-Prohl transfer matrix method
[AD-A289891] p 2136 N95-28626

VIBRATION DAMPING

Vibration control using chaotic motion stabilizers
[AD-A289576] p 2398 N95-26687

Experimental studies to test simple flexural neutralizers fitted to beams
[ISVR-TR-239] p 2309 N95-27846

System identification of damped truss-like space structures
[NASA-TM-106638] p 2303 N95-27911

VIBRATION EFFECTS

The effects of transverse vibration on the performance of an axial groove wick heat pipe
[AD-A289349] p 2278 N95-27065

Developmental problems and their solution for the Space Shuttle main engine alternate liquid oxygen high-pressure turbopump: Anomaly or failure investigation the key
[NASA-TP-3553] p 2169 N95-28263

Vibrational behavior of adaptive aircraft wing structures modelled as composite thin-walled beams
p 2191 N95-28435

VIBRATION ISOLATORS

The vibration transmission of lift truck suspension seats
[ISVR-TR-245] p 2302 N95-27844

VIBRATION MEASUREMENT

Diagnosis of helicopter gearboxes using structure-based networks
[NASA-TM-106932] p 2302 N95-27373

The vibration transmission of lift truck suspension seats
[ISVR-TR-245] p 2302 N95-27844

TV-holography at high temperatures: In situ observations of the oxidation of advanced materials
[PB95-195343] p 2294 N95-28651

VIBRATION METERS

Micro-time stress measurement device development
[AD-A289511] p 2361 N95-28845

VIBRATION MODE

Aeroelastic stability of wind turbine blade/aileron systems p 2124 N95-27981

VIBRATION TESTS

The vibration transmission of lift truck suspension seats
[ISVR-TR-245] p 2302 N95-27844

Experimental studies to test simple flexural neutralizers fitted to beams
[ISVR-TR-239] p 2309 N95-27846

System identification of damped truss-like space structures
[NASA-TM-106638] p 2303 N95-27911

In situ dynamic material property measurement system
[AD-D017387] p 2210 N95-28585

VIBRATIONAL SPECTRA

The vibration transmission of lift truck suspension seats
[ISVR-TR-245] p 2302 N95-27844

Fellowship in physics
[AD-A291691] p 2446 N95-28522

Subharmonic phonon transmission and Kapitza conductance between crystals with very different vibrational spectra
[DE95-609151] p 2447 N95-28808

VIDEO COMMUNICATION

Information superhighway: Issues affecting development
[AD-A289434] p 2252 N95-26923

VIDEO DATA

Integration of video and radiation analysis data
[DE95-004165] p 2379 N95-26443

Information superhighway: Issues affecting development
[AD-A289434] p 2252 N95-26923

VIDEO SIGNALS

Target detection for vision systems
[AD-D017271] p 2249 N95-26509

Com(sup 3): A composite-compatible component coding system
[BBC-RD-1994/17] p 2249 N95-26670

Information superhighway: Issues affecting development
[AD-A289434] p 2252 N95-26923

A foveated system to reduce transmission bandwidth of video images from remote camera systems
[AD-A288516] p 2254 N95-27080

Display system employing acousto-optic tunable filter
[NASA-CASE-NPO-18736-1-CU] p 2426 N95-27843

Long-range eye tracking: A feasibility study
[DE95-008587] p 2357 N95-28176

VIDEO TAPES

The effects of processing variables on reaction synthesis of Fe-Al alloys
[DE95-007405] p 2221 N95-28082

VIEWING

Advanced interactive display formats for terminal area traffic control
[NASA-CR-198576] p 2127 N95-28188

VINYL COPOLYMERS

Small angle neutron scattering study of the micelle structure of amphiphilic block copolymers
[DE95-006625] p 2234 N95-27486

VINYL POLYMERS

Molecular modeling: An approach for the study of piezoelectric polymers
[AD-A289821] p 2241 N95-28574

VINYLIDENE

Molecular modeling: An approach for the study of piezoelectric polymers
[AD-A289821] p 2241 N95-28574

VIRTUAL REALITY

The photo-realistic AFIT virtual cockpit
[AD-A289376] p 2130 N95-26876

VISCOELASTICITY

Effect of surface coating on one-dimensional system subjected to unit step pressure wave [AD-A288237] p 2308 N95-26625

Two-layer or free surface shear flows and viscoelastic shear flows and the relationship between stability and eigenvalues — viscoelastic, shear, and convective flows [AD-A289510] p 2278 N95-27047

Junkyard chemistry p 2227 N95-27102

Designing for time-dependent material response in spacecraft structures p 2166 N95-28292

Non-linear viscoelastic behaviour [PB95-192811] p 2199 N95-28639

VISCOPLASTICITY

Viscoplastic characterization and fatigue modeling of titanium based metal matrix composites [AD-A289430] p 2181 N95-26868

Robust integration schemes for generalized viscoplasticity with internal-state variables. Part 1: Theoretical developments and applications [NASA-CR-195452-PT-1] p 2310 N95-28031

Robust integration schemes for generalized viscoplasticity with internal-state variables. Part 2: Algorithmic developments and implementation [NASA-CR-195453-PT-2] p 2310 N95-28032

VISCOSITY

Measurement of viscosity by capillary rheometry: Dwell time effects [PB95-190203] p 2201 N95-26750

Precision parts cleaning with supercritical carbon dioxide p 2229 N95-27114

Turbulance boundary conditions for shear flow analysis, using the DTNS flow solver p 2283 N95-27362

Surfactants and desensitizing wax substitutes for TNT-Based systems [AD-A289652] p 2243 N95-28634

VISCOUS FLOW

A fully implicit time accurate method for hypersonic combustion: Application to shock-induced combustion instability [NASA-TM-106707] p 2273 N95-26380

Development of an upwind, finite-volume code with finite-rate chemistry [NASA-CR-197747] p 2121 N95-26760

On the nonlinear stability of the unsteady, viscous flow of an incompressible fluid in a curved pipe [NASA-CR-195065] p 2278 N95-27028

A 3D agglomeration multigrid solver for the Reynolds-averaged Navier-Stokes equations on unstructured meshes [NASA-CR-195073] p 2390 N95-27029

Two-layer or free surface shear flows and viscoelastic shear flows and the relationship between stability and eigenvalues — viscoelastic, shear, and convective flows [AD-A289510] p 2278 N95-27047

Global flowfield about the V-22 Tiltrotor Aircraft [NASA-CR-198603] p 2122 N95-27248

Calculation of three-dimensional (3-D) internal flow by means of the velocity-vorticity formulation on a staggered grid [NASA-TM-110352] p 2122 N95-27258

A numerical method for solving the three-dimensional parabolized Navier-Stokes equations [NASA-CR-198159] p 2287 N95-27917

Numerical study to assess sulfur hexafluoride as a medium for testing multielement airfoils [NASA-TP-3496] p 2124 N95-28674

VISIBLE SPECTRUM

Design and fabrication of a diamond-turned hybrid diffractive/refractive singlet for visible applications at ORNL [DE95-007007] p 2427 N95-28552

VISUAL ACUITY

Image perception wavelet simulation and enhancement for the visually impaired [AD-A289303] p 2353 N95-26917

VISUAL AIDS

Image perception wavelet simulation and enhancement for the visually impaired [AD-A289303] p 2353 N95-26917

Views of the solar system [DE95-006446] p 2461 N95-27326

VISUAL CONTROL

Learning Hand/Eye coordination by an active observer. part 1: Organizing centers [AD-A289502] p 2356 N95-26843

VISUAL OBSERVATION

Nova-like variables p 2458 N95-27070

Classical novae and recurrent novae: General properties p 2459 N95-27072

VISUAL PERCEPTION

Characterization of corrosion and development of a breadboard of a D sight aircraft inspection system, phase 1 [AD-A288347] p 2125 N95-26527

A mathematical framework for an improved search model [AD-A288858] p 2358 N95-26552

Image quality metrics for color CRT displays [AD-A288934] p 2262 N95-27196

Practical color vision tests for air traffic control applicants: En route center and terminal facilities [DOT/FAA/AM-95/13] p 2357 N95-27323

VISUAL SIGNALS

Analysis of group performance in visual signal detection [AD-A289561] p 2355 N95-26683

Characterization and redesign of the AFIT multielectrode array [AD-A289295] p 2354 N95-27039

VISUAL STIMULI

Role of somatosensory and vestibular cues in attenuating visually induced human postural sway [NASA-CR-197845] p 2357 N95-27697

VISUAL TASKS

Analysis of group performance in visual signal detection [AD-A289561] p 2355 N95-26683

Subjective workload assessment in a spatial memory task [AD-A289491] p 2356 N95-26825

VITON RUBBER (TRADEMARK)

Effects of atomic oxygen on polymeric materials flown on EOIM-3 p 2242 N95-27638

VITRIFICATION

Application of modern diagnostic methods to environmental improvement [DE95-005797] p 2330 N95-28119

VLASOV EQUATIONS

Crushing singularities in spacetimes with spherical, plane and hyperbolic symmetry [PB95-190146] p 2397 N95-28011

VOICE COMMUNICATION

Speech analysis and synthesis based on pitch-synchronous segmentation of the speech waveform [AD-A288824] p 2248 N95-26349

An experimental version of the MZT (speech-from-text) system with external F(sub 0) control [IFTR-14/1994] p 2250 N95-26836

Information superhighway: Issues affecting development [AD-A289434] p 2252 N95-26923

Voice analysis using the bispectrum [AD-A289204] p 2254 N95-27008

Development of a coding form for approach control/pilot voice communications [DOT/FAA/AM-95/15] p 2128 N95-28540

VOICE DATA PROCESSING

Speech analysis and synthesis based on pitch-synchronous segmentation of the speech waveform [AD-A288824] p 2248 N95-26349

An experimental version of the MZT (speech-from-text) system with external F(sub 0) control [IFTR-14/1994] p 2250 N95-26836

VOLCANOES

Seismic constraints on shallow crustal processes at the East Pacific rise [AD-A289055] p 2338 N95-28094

VOLT-AMPERE CHARACTERISTICS

Characterization of wafer charging mechanisms and oxide survival prediction methodology [DE95-006583] p 2440 N95-27538

VOLTAGE CONTROLLED OSCILLATORS

Extended linear ion trap frequency standard apparatus [NASA-CASE-NPO-19061-1-CU] p 2416 N95-28348

VOLTAGE CONVERTERS (DC TO DC)

Forback DC-to-DC converter [NASA-CASE-GSC-13404-1] p 2269 N95-28341

VOLTAGE REGULATORS

Testing of Uninterruptible Power Supplies with nonlinear loads [AD-A289353] p 2262 N95-27067

VORTEX GENERATORS

Performance characterization of a highly-offset diffuser with and without blowing vortex generator jets [AD-A289334] p 2122 N95-26901

Collected papers on wind turbine technology [NASA-CR-195432] p 2321 N95-27970

Comparative performance tests on the Mod-2, 2.5-mW wind turbine with and without vortex generators p 2124 N95-27978

Comparison of measured and calculated dynamic loads for the Mod-2 2.5 mW wind turbine system p 2312 N95-27983

VORTEX SHEDDING

Unsteady base pressure measurements in the near wake of a cylinder with imposed three-dimensional disturbances [AD-A289498] p 2276 N95-26827

VORTICES

Flutter clearance flight tests of an OV-10A airplane modified for wake vortex flight experiments [NASA-TM-109168] p 2117 N95-26381

Suppressor of oscillations in airframe cavities [AD-D017265] p 2128 N95-26507

The small-scale structure of dispersing clouds in the atmosphere [AD-A288256] p 2341 N95-26546

Wavenumber selection for small-wavelength Goertler vortices in curved channel flows [NASA-CR-195063] p 2273 N95-26576

Numerical simulation of the flow about the F-18 HARV at high angle of attack [NASA-CR-197755] p 2121 N95-26735

Effects of three-dimensional imposed 3-D disturbances on bluff-body near wake flows [AD-A289553] p 2121 N95-26757

Performance characterization of a highly-offset diffuser with and without blowing vortex generator jets [AD-A289334] p 2122 N95-26901

The near-wake flow behavior of an oscillating airfoil with modified trailing edge p 2119 N95-26953

Nonlinear stability of non-stationary cross-flow vortices in compressible boundary layers [NASA-CR-189184] p 2279 N95-27242

Effect of turbulence models on criticality conditions in swirling flows p 2282 N95-27356

A general theory of two- and three-dimensional rotational flow in subsonic and transonic turbomachines [NASA-CR-4496] p 2123 N95-28003

VORTICITY

Basic studies in turbulent shear flows [AD-A289145] p 2277 N95-26998

Calculation of three-dimensional (3-D) internal flow by means of the velocity-vorticity formulation on a staggered grid [NASA-TM-110352] p 2122 N95-27258

VULCANIZING

The effect of proteins on the aging properties of radiation vulcanized Natural Rubber Latex [DE95-603357] p 2225 N95-26599

Radiation vulcanization of natural rubber latex [DE95-600026] p 2226 N95-26637

W

WAFERS

Characterization and control of wafer charging effects during high-current ion implantation [DE95-006587] p 2440 N95-27471

Characterization of wafer charging mechanisms and oxide survival prediction methodology [DE95-006583] p 2440 N95-27538

WAKES

Flutter clearance flight tests of an OV-10A airplane modified for wake vortex flight experiments [NASA-TM-109168] p 2117 N95-26381

Wake fields in semiconductor plasmas [DE94-634523] p 2429 N95-26439

Infrared field measurements of sea surface temperature: Analysis of wake signatures and comparison of skin layer models [NASA-CR-197849] p 2346 N95-26533

Rarefied gas effects on aerobraking/reentry vehicles with wakes [NASA-CR-196586] p 2164 N95-27093

Large HAWT wake measurement and analysis p 2289 N95-27973

WALL PRESSURE

Investigation of boundary layer and performance effects of transpiration cooling through a porous plate in a rocket nozzle [AD-A289393] p 2167 N95-26880

WALL TEMPERATURE

Viscous shock-layer analysis on hypersonic flow over reentry capsule with nonequilibrium chemistry [ISAS-R-656] p 2274 N95-26739

WALLS

Algorithm to describe the spread of a wall fire under a ceiling [PB95-182259] p 2247 N95-28008

Alpha characterization inside pipes using ion-transport technology [DE95-007869] p 2411 N95-28024

Wall stabilization of rotating high (Beta) discharges in D3-D [DE95-008207] p 2435 N95-28406

Monte-Carlo simulation methods for finite flat plate winding flows [AD-A289842] p 2289 N95-28619

WAR GAMES
Integrated mission precision attack cockpit technology (IMPACT). Phase 1: Identifying technologies for air-to-ground fighter integration
[AD-A289562] p 2129 N95-26684
A mathematical analysis of the Janus combat simulation weather effects models and sensitivity analysis of sky-to-ground brightness ratio on target detection
[AD-A289629] p 2336 N95-26858
WARFARE
Characterization of Ultra-Low Carbon Baintic steels for use as weld wire consumables
[AD-A288292] p 2212 N95-26411
WARNING SYSTEMS
Control system design for the MOD-5A 7.3 mW wind turbine generator p 2306 N95-27985
WASHING
Cleaning of parts for new manufacturing and parts rebuilding p 2231 N95-27123
Retrofitting conventional vapor degreasers to use a solvent wash/fluorochemical rinse process
p 2232 N95-27127
The application of waterjets for cleaning
p 2233 N95-27130
The demilitarization of class 1.1 rocket motors using high pressure waterjets p 2176 N95-28322
Cryogenic washout of solid rocket propellants
p 2176 N95-28324
WASTE DISPOSAL
Junkyard chemistry p 2227 N95-27102
The use of supercritical carbon dioxide for contaminant removal from solid waste p 2229 N95-27110
Microbial treatment for shipboard collection, holding, and transfer system tanks p 2179 N95-27119
A practical approach to soil remediation
p 2232 N95-27125
Design considerations in supercritical fluid technology
p 2232 N95-27126
The experience of CF Technologies, Inc. (CF Tech) in critical fluid processing p 2232 N95-27128
Marshall Space Flight Center solid waste characterization and recycling improvement study
[NASA-CR-196594] p 2360 N95-27164
The 1994 JANNAF Safety and Environmental Protection Subcommittee Meeting, volume 1
[CPIA-PUBL-614-VOL-1] p 2170 N95-28294
OB/OD treatment: The effective use of measured field data and air modeling to support an environmental assessment p 2170 N95-28296
Recovery, evaluation, and decontamination of landfilled pentaborane cylinders, former liquid propellant rocket engine test facility, Washoe County, Nevada
p 2171 N95-28302
Upgrade of the computer modeling programs POLU10 and POLU13A for open burning and open detonation of energetic materials p 2172 N95-28306
Hazards analysis of an integral class 1.1/1.3 rocket motor demilitarization and ingredient recovery system using ammonia p 2174 N95-28315
Commercial reformulation: An economic and environmentally neutral means of managing explosives and solid propellants p 2175 N95-28320
Hydrothermal oxidation of solid rocket propellant and other department of defense hazardous wastes
p 2177 N95-28325
Recovery and reuse of rocket motor propellant ingredients p 2177 N95-28326
Strategies for recycling CdTe photovoltaic modules
[DE95-006776] p 2325 N95-28517
WASTE ENERGY UTILIZATION
Intrusive multi-probe system
[DE95-006258] p 2292 N95-27465
Building-integrated photovoltaics: A case study
[DE95-004032] p 2325 N95-28396
WASTE HEAT
High power free-electron laser concepts and problems
[DE95-007841] p 2298 N95-28059
WASTE TREATMENT
Electromagnetic devices and processes in environment protection
[AD-A288656] p 2141 N95-26487
The use of supercritical carbon dioxide for contaminant removal from solid waste p 2229 N95-27110
A practical approach to soil remediation
p 2232 N95-27125
The experience of CF Technologies, Inc. (CF Tech) in critical fluid processing p 2232 N95-27128
Application of modern diagnostic methods to environmental improvement
[DE95-005797] p 2330 N95-28119
The 1994 JANNAF Safety and Environmental Protection Subcommittee Meeting, volume 1
[CPIA-PUBL-614-VOL-1] p 2170 N95-28294
Recovery, evaluation, and decontamination of landfilled pentaborane cylinders, former liquid propellant rocket engine test facility, Washoe County, Nevada
p 2171 N95-28302
Upgrade of the computer modeling programs POLU10 and POLU13A for open burning and open detonation of energetic materials p 2172 N95-28306
Hydrothermal oxidation of solid rocket propellant and other department of defense hazardous wastes
p 2177 N95-28325
WASTE UTILIZATION
Geothermal direct-heat utilization assistance
[DE95-007247] p 2319 N95-27236
WASTE WATER
The experience of CF Technologies, Inc. (CF Tech) in critical fluid processing p 2232 N95-27128
Biodegradation of nitrate esters p 2171 N95-28299
Destruction of pyrotechnics manufacture wastewater treatment sludge by plasma arc pyrolysis
p 2171 N95-28301
The demilitarization of class 1.1 rocket motors using high pressure waterjets p 2176 N95-28322
Hydrothermal oxidation of solid rocket propellant and other department of defense hazardous wastes
p 2177 N95-28325
WASTES
Hydrothermal oxidation of solid rocket propellant and other department of defense hazardous wastes
p 2177 N95-28325
WATER
Flow cytometry as a means of detecting, enumerating and characterizing bacteria for monitoring of the environment
[AD-A288997] p 2326 N95-26610
BIPM project: Intercomparison of water triple-point cells
[PB95-185237] p 2398 N95-26614
The influence of surface structure on the interaction of water with TiO_2(100)
[DE95-004927] p 2203 N95-27401
Synchrotron X-ray scattering studies at mineral-water interfaces
[DE95-008303] p 2440 N95-27542
D/H and O-18/O-16 partitioning between water liquid and vapor in the system H_2O-Na-K-Mg-Ca-Cl-SO_4 from 0 to 350 C
[DE95-007013] p 2208 N95-27961
Vibrational spectroscopy of water interfaces
[DE95-006592] p 2209 N95-28218
Cryogenic BRDF measurements at 10.6 micrometers and 0.63 micrometers on contaminated mirrors
[AD-A291611] p 2427 N95-28408
WATER CIRCULATION
Combined use of ground water circulation (UVB) technology and in situ bioreactors for enhanced bioremediation of subsurface contamination
p 2230 N95-27118
WATER DEPTH
Deep convection in the Mediterranean Sea
[AD-A288497] p 2346 N95-26647
WATER FLOW
Evaluation of a new laboratory acoustic Doppler velocimeter
[AD-A289592] p 2290 N95-26714
WATER INJECTION
Investigation on comprehensive fossil fuel cycle analysis and assessment approach as viewed from the global environment
[DE95-759241] p 2329 N95-27935
WATER POLLUTION
Combined use of ground water circulation (UVB) technology and in situ bioreactors for enhanced bioremediation of subsurface contamination
p 2230 N95-27118
The 1994 JANNAF Safety and Environmental Protection Subcommittee Meeting, volume 1
[CPIA-PUBL-614-VOL-1] p 2170 N95-28294
Destruction of pyrotechnics manufacture wastewater treatment sludge by plasma arc pyrolysis
p 2171 N95-28301
WATER PRESSURE
Water driven turbine/brush pipe cleaner
[NASA-CASE-KSC-11669-1] p 2304 N95-28359
WATER TEMPERATURE
FREZCHEM: A chemical-thermodynamic model for aqueous solutions at subzero temperatures
[AD-A288456] p 2200 N95-26432
WATER TREATMENT
Environmentally Benign Cleaning and Degreasing Technology: JANNAF Safety and Protection Subcommittee and Propellant Development and Characterization Subcommittee Joint Workshop
[CPIA-PUBL-611] p 2227 N95-27101
Corrosive effects of supercritical carbon dioxide and cosolvents on metals p 2224 N95-27113
Combined use of ground water circulation (UVB) technology and in situ bioreactors for enhanced bioremediation of subsurface contamination
p 2230 N95-27118
Sceening, down selection, and implementation of environmentally compliant cleaning and insulation bonding for MNASA p 2165 N95-27124
A practical approach to soil remediation
p 2232 N95-27125
Retrofitting conventional vapor degreasers to use a solvent wash/fluorochemical rinse process
p 2232 N95-27127
The application of waterjets for cleaning
p 2233 N95-27130
Destruction of pyrotechnics manufacture wastewater treatment sludge by plasma arc pyrolysis
p 2171 N95-28301
Evaluation of microporous carbon filters as catalysts for ozone decomposition
[DE95-006498] p 2331 N95-28548
WATER TUNNEL TESTS
NASA Dryden flow visualization facility
[NASA-TM-4631] p 2362 N95-27914
WATER VAPOR
Prediction of rain attenuation and total atmospheric attenuation for low-availability satellite communications in Europe
[PB95-184925] p 2252 N95-26908
D/H and O-18/O-16 partitioning between water liquid and vapor in the system H_2O-Na-K-Mg-Ca-Cl-SO_4 from 0 to 350 C
[DE95-007013] p 2208 N95-27961
Millimeter-wave imaging radiometer data processing and development of water vapor retrieval algorithms
[NASA-CR-198593] p 2343 N95-27997
Measurement and analysis of the surface energy budget for ARM field experiments
[DE95-007646] p 2338 N95-28114
Search for molecular absorptions with the Fourier Transform Spectrometer
[NASA-CR-198648] p 2462 N95-28222
Measurements of daytime and upper tropospheric water vapor profiles by Raman lidar
[DE95-007640] p 2344 N95-28538
WATER VEHICLES
Air cushioned landing craft (LCAC) based ship to shore movement simulation: A decision aid for the amphibious commander. A (SMMAT) application
[AD-A289635] p 2246 N95-26722
WATER WAVES
Calculation of suspended sediment transport by combined wave-current flows
[AD-A289368] p 2346 N95-26904
Observations of near-bottom flow in a wave-dominated nearshore environment
[AD-A289331] p 2347 N95-27043
Speckle spectrum of the ERS-1 wavemode product
[PB95-196564] p 2315 N95-28180
WATERSHEDS
Solar terrestrial radiation data from the Sleepers River Research Watershed
[AD-A288444] p 2464 N95-27184
WAVE DIFFRACTION
Ultrasonic study on ternary liquid systems by laser-sound interaction
[DE95-608783] p 2207 N95-27929
WAVE DISPERSION
Ultrasonic studies of liquid/solid seimoacoustic wave phenomena
[AD-A289644] p 2402 N95-28622
WAVE DRAG
Computational fluid dynamics and transonic flow
[AD-A288962] p 2273 N95-26405
WAVE EQUATIONS
Construction of arbitrary order schemes for many dimensional wave equation
[PB95-184818] p 2276 N95-26928
Nonlinear problems in fluid dynamics and inverse scattering: Nonlinear waves and inverse scattering
[AD-A289148] p 2278 N95-27001
WAVE EXCITATION
Shear Alfven wave excitation by direct antenna coupling and fast wave resonant mode conversion
[DE95-609109] p 2256 N95-28254
WAVE FRONTS
Compensated deconvolution from wavefront sensing
[AD-A289490] p 2336 N95-26824
Frame selection performance limits for statistical image reconstruction of adaptive optics compensated images
[AD-A289240] p 2424 N95-26965
Flow visualization of a turbulent shear flow using an optical wavefront sensor
[AD-A289208] p 2277 N95-26986
WAVE FUNCTIONS
Massively parallel self-consistent-field calculations
[DE95-004128] p 2376 N95-26441

Two-body bound states and the Bethe-Salpeter equation
[DE95-008302] p 2392 N95-27742
Off-specular scattering in neutron reflectometry
[DE95-007835] p 2412 N95-28057
Quantum retrodiction and causality principle
[DE94-628438] p 2450 N95-28183

WAVE GENERATION
Meso-beta scale numerical simulation studies of terrain-induced jet streak mass/momentum perturbations
[NASA-CR-197804] p 2335 N95-26592

WAVE PROPAGATION
Very low frequency seismo-acoustic noise below the sea floor (0.2-10 Hz)
[AD-A289164] p 2347 N95-27011
Modeling surface effects with the parabolic equation method
[AD-A289199] p 2254 N95-27021
Normal modes and continuous spectra
[DE95-006166] p 2287 N95-28055
Seismic constraints on shallow crustal processes at the East Pacific rise
[AD-A289055] p 2338 N95-28094
Emerging applications of probability (stochastic models in geosystems)
[AD-A289117] p 2313 N95-28099
Transformation to zero offset in transversely isotropic media
[DE95-007669] p 2339 N95-28192
Fowler DMO and time migration for transversely isotropic media with explicit operators
[DE95-007671] p 2339 N95-28194
Contact micromechanics in granular media with clay
[DE95-006566] p 2340 N95-28583

WAVE SCATTERING
Numerical analysis of wave scattering
[AD-A289478] p 2401 N95-26925
One dimensional global and local solution for ICRF heating
[DE95-007984] p 2392 N95-28110

WAVEFORMS
Speech analysis and synthesis based on pitch-synchronous segmentation of the speech waveform
[AD-A288824] p 2248 N95-26349
Evaluation of the FMICW waveform in HF surface radar applications
[AD-A288245] p 2249 N95-26545
Survey on step recovery diode and its applications
[PB95-184974] p 2260 N95-26646
A study of lightning in winter thunderstorms and the analysis of thunderstorm overflight data
[NASA-CR-198577] p 2343 N95-28191
Method and apparatus for maintaining linearity and frequency accuracy of an FM chirp waveform
[AD-D017398] p 2258 N95-28615

WAVEGUIDE ANTENNAS
Theoretical and experimental study of low-loss, High-efficiency monolithic antenna structures at 94 GHz
[AD-A291785] p 2257 N95-28513

WAVEGUIDES
High power, broadband folded waveguide Gyrotron-Traveling-Wave-Amplifier
[AD-A288847] p 2259 N95-26433
Analysis of electromagnetic problems involving chiral, bi-isotropic, and uniaxial bianisotropic media
[PB95-185096] p 2248 N95-26450
On-axis polarization coupling in y-cut titanium in-diffused lithium niobate slab waveguides
[AD-A289260] p 2253 N95-26977
Evaluation of defect-related diffusion in semiconductors by electrooptical sampling
[AD-A291630] p 2270 N95-28544

WAVELENGTHS
Multiwavelength observations of unidentified high energy gamma-ray sources
[NASA-CR-197840] p 2465 N95-26630
Fundamental concepts of integrated and fiber optic sensors
[NASA-TM-106920] p 2426 N95-27906

WAVELET ANALYSIS
Image perception wavelet simulation and enhancement for the visually impaired
[AD-A289303] p 2353 N95-26917
Multipoint multirate signal processing
[AD-A289211] p 2253 N95-26988
Nonlinear problems in fluid dynamics and inverse scattering: Propagation and capturing of singularities in problems of fluid dynamics and inverse scattering
[AD-A289146] p 2277 N95-26999
Improved reduced-resolution satellite imagery
p 2376 N95-27388
The use of wavelet transforms in the solution of two-phase flow problems
[DE95-004688] p 2284 N95-27721
An introduction to wavelet transforms
[AD-A289083] p 2256 N95-28095
Denoising and robust non-linear wavelet analysis
[AD-A291668] p 2257 N95-28455
Wavelet analysis and its applications
[AD-A291735] p 2387 N95-28527

WAXES
Effect of processing parameters on surface finish for fused deposition machinable wax patterns
[NASA-TP-3550] p 2244 N95-26769
Surfactants and desensitizing wax substitutes for TNT-Based systems
[AD-A289652] p 2243 N95-28634

WEAK ENERGY INTERACTIONS
Rare decays/CP: The perspective of a kaon physicist
[DE95-005964] p 2416 N95-28338

WEAK INTERACTIONS (FIELD THEORY)
Magnetic quadrupole moment of W-boson in Kobayashi-Maskawa model
[DE95-610355] p 2407 N95-27411

WEAPON SYSTEMS
A comparison of error categorization schemes for use in software system safety programs
[AD-A288741] p 2371 N95-27251
Time-dependent model for vertical-cavity surface-emitting laser
[DE95-007880] p 2298 N95-28027

WEAPONS DEVELOPMENT
Concurrent engineering research center
[NASA-CR-197726] p 2362 N95-26386
Report to Congressional Committees. Comanche Helicopter: Testing needs to be completed prior to production decisions
[GAO/NSIAD-95-112] p 2135 N95-27910

WEAR
Advanced solid lubricant films by Ion-Beam Assisted Deposition
[AD-A288866] p 2225 N95-26499

WEAR RESISTANCE
Gloved operator performance study. The effects of hand wear and elastic resistance of a control during tracking performance
[AD-A289405] p 2360 N95-27099

WEAR TESTS
Developmental problems and their solution for the Space Shuttle main engine alternate liquid oxygen high-pressure turbopump: Anomaly or failure investigation the key
[NASA-TP-3553] p 2169 N95-28263

WEATHER
WINCLR: A computer code for heat transfer and clearance calculation in a compressor
[NASA-CR-195436] p 2117 N95-26363
Synoptic features of the Yunan rainy season before the onset of the tropical monsoons
[AD-A289641] p 2342 N95-26724
A mathematical analysis of the Janus combat simulation weather effects models and sensitivity analysis of sky-to-ground brightness ratio on target detection
[AD-A289629] p 2336 N95-26858
Southern Africa: A climatological study
[AD-A289466] p 2342 N95-27148
Design, construction, test and evaluation of a frequency scanning radiometer for measuring oil slick thicknesses
[AD-A290040] p 2293 N95-28389
Severe weather guide mediterranean
[AD-A289829] p 2344 N95-28577

WEATHER FORECASTING
Live from Antarctica, volume 4
[NASA-CR-197828] p 2335 N95-26596
Indexing meso-beta surface wind site representative
[AD-A288501] p 2341 N95-26650
Fluxes across the west coast resolved by Picket Fence observations during stormfest
[AD-A288511] p 2341 N95-26653
Neural networks versus linear regression: Research into the value of neural networks in meteorological practice
[KNMI-TR-165] p 2343 N95-28236
Three-dimensional forecast models for emergency response management p 2172 N95-28303
Systematic and integrated approach to Tropical Cyclone track forecasting. Part 1: Approach overview and description of meteorological basis
[AD-A291775] p 2344 N95-28459

WEATHER STATIONS
Live from Antarctica: The coldest, windiest place on Earth
[NASA-CR-197737] p 2335 N95-26595

WEATHERING
The use of electrochemistry and ellipsometry for identifying and evaluating corrosion on aircraft
[AD-A288536] p 2125 N95-27186
Investigation on technology for increasing the biological CO2 sink and technology for CO2 fixation and reutilization
[DE95-759251] p 2329 N95-27941
Assay of weathering effects on protective polymer coatings using positron annihilation spectroscopy
[DE95-007040] p 2236 N95-27962
Weightless Environment Training Facility (WETF) materials coating evaluation, volume 1
[NASA-CR-188366-VOL-1] p 2239 N95-28385

WEAVING
Characterization and manufacture of braided composites for large commercial aircraft structures
p 2196 N95-28478

WEIBULL DENSITY FUNCTIONS
Proof test methodology for composites
p 2193 N95-28445

WEIGHTING FUNCTIONS
F/A-18 IFOSTP Fatigue test airbag load determination on the vertical and horizontal tails
[DSTO-TR-0135] p 2128 N95-26389
Weighting scheme for the space surveillance network automated tasker
[AD-A289285] p 2146 N95-27035
Ulysses orbit determination at high declinations
p 2151 N95-27787

WEIGHTLESSNESS
Weightless Environment Training Facility (WETF) materials coating evaluation, volume 1
[NASA-CR-188366-VOL-1] p 2239 N95-28385

WELD TESTS
Development of welded solar arrays for DMSP and GPS satellites
[AD-A289512] p 2318 N95-26846

WELDABILITY
Improved hardness RHA weldability and material property testing
[AD-A289127] p 2221 N95-28102

WELDED JOINTS
Characterization of Ultra-Low Carbon Baintic steels for use as weld wire consumables
[AD-A288292] p 2212 N95-26411
Development of welded solar arrays for DMSP and GPS satellites
[AD-A289512] p 2318 N95-26846
Non-metallic oxide inclusion formation in C-Mnlow alloy steel welds
[DE94-019160] p 2215 N95-27[illegible]19
Advances in welding science: A perspective
[DE95-006745] p 2302 N95-27545

WELDING
Advances in welding science: A perspective
[DE95-006745] p 2302 N95-27545

WETTING
Transient studies of G-induced capillary dryout and rewet p 2281 N95-27351

WHISKER COMPOSITES
Structural ceramics incorporating whiskers, platelets, and particulate phases
[DE95-007048] p 2235 N95-27499
High-temperature deformation of ZrO2-Al2O3/SiC whisker composites fabricated by two techniques
[DE95-008273] p 2183 N95-28069

WHITE DWARF STARS
Precision asteroseismology of DAV (ZZ CETI) white dwarf stars
[DE95-006265] p 2462 N95-28056
A new method of determining the ejected mass of novae
[DE95-007884] p 2462 N95-28062

WHITE NOISE
Post Kalman progress p 2148 N95-27776

WICKS
The effects of transverse vibration on the performance of an axial groove wick heat pipe
[AD-A289349] p 2278 N95-27065

WIGGLER MAGNETS
Free Electron Laser Physical Process Code (FELPPC)
[DE95-006276] p 2296 N95-27557

WIND (METEOROLOGY)
Proceedings: Workshop on Research Needs in Wind Engineering
[PB95-189528] p 2308 N95-26743
Basic principles and recent observations of rotationally sampled wind p 2321 N95-27971
Weather hazards to a Titan 4 on-pad destack-restack operation p 2172 N95-28307

WIND DIRECTION
Performance of a stand-alone wind-electric ice maker for remote villages
[DE95-004006] p 2320 N95-27475

WIND EFFECTS
Hindcasting wind-driven anomalies using reduced-gravity global ocean models with 1/2 deg and 1/4 deg resolution
[AD-A289060] p 2345 N95-26406
Proceedings: Workshop on Research Needs in Wind Engineering
[PB95-189528] p 2308 N95-26743

WIND MEASUREMENT

Indexing meso-beta surface wind site representative [AD-A288501] p 2341 N95-26650

Large HAWT wake measurement and analysis p 2289 N95-27973

WIND SHEAR

Studies of radar backscatter as a function of wave properties and the winds in the turbulent marine atmosphere [NASA-CR-198608] p 2315 N95-28209

WIND TUNNEL MODELS

Experimental investigation of static and dynamic ground effect on HOPE ALFLEX vehicle [NAL-TR-1236] p 2128 N95-26525

High-precision buffer circuit for suppression of regenerative oscillation [NASA-TM-4658] p 2291 N95-27259

WIND TUNNEL TESTS

Airfoil modification effects on subsonic and transonic pressure distributions and performance for the EA-6B airplane [NASA-TP-3516] p 2120 N95-26382

Experimental investigation of static and dynamic ground effect on HOPE ALFLEX vehicle [NAL-TR-1236] p 2128 N95-26525

Wind tunnel experiments on wake flow field behind a reentry capsule from a viewpoint of parachute deployment at supersonic speeds [ISAS-R-655] p 2121 N95-26740

Effects of three-dimensional imposed 3-D disturbances on bluff-body near wake flows [AD-A289553] p 2121 N95-26757

Analysis of hypersonic boundary layer second mode instability over a 7 deg cone [AD-A289471] p 2276 N95-26819

Compressible turbulence measurements in a supersonic boundary layer including favorable pressure gradient effects [AD-A289475] p 2276 N95-26821

Compressible turbulence measurements in a supersonic flow with adverse pressure gradient [AD-A289477] p 2276 N95-26822

Unsteady base pressure measurements in the near wake of a cylinder with imposed three-dimensional disturbances [AD-A289498] p 2276 N95-26827

A new drag measurement system for wind tunnel testing of the racing bicycle and rider to determine a low drag configuration [AD-A289375] p 2122 N95-26875

An experimental investigation of helicopter downwash and tailboom interaction at the Wichita State University 7x10 foot wind tunnel p 2120 N95-26955

Incorporating biplane wing theory into a large, subsonic, all-cargo transport p 2120 N95-26956

The lift-fan aircraft: Lessons learned [NASA-CR-196694] p 2131 N95-27143

Sailplane glide performance and control using fixed and articulating winglets [NASA-CR-198579] p 2131 N95-27180

Wind-tunnel test of the S814 thick root airfoil [DE95-000266] p 2122 N95-27541

Further investigations of icing effects on an advanced high-lift multi-element airfoil [NASA-TM-106947] p 2125 N95-27762

Modeling of aircraft unsteady aerodynamic characteristics. Part 2: Parameters estimated from wind tunnel data [NASA-TM-110161] p 2142 N95-27839

Optimization of measurements with pressure sensitive paints [NASA-TM-4695] p 2293 N95-27915

Collected papers on wind turbine technology [NASA-CR-195432] p 2321 N95-27970

Large HAWT wake measurement and analysis p 2289 N95-27973

Horizontal axis wind turbine post stall airfoil characteristics synthesization p 2124 N95-27974

Comparative wind tunnel tests of NACA 23024 airfoils with several aileron and spoiler configurations p 2124 N95-27976

Comparative wind tunnel test at high Reynolds numbers of NACA 64 621 airfoils with two aileron configurations p 2124 N95-27977

Flow structure generated by perpendicular blade vortex interaction and implications for helicopter noise predictions [NASA-CR-198590] p 2123 N95-28193

Performance study for inlet installations [NASA-CR-189714] p 2140 N95-28227

Measurements of store forces and moments and cavity pressures for a generic store in and near a box cavity at subsonic and transonic speeds [NASA-TM-4611] p 2123 N95-28241

Construction and wind tunnel test of a 1/12th scale helicopter model [AD-A288487] p 2123 N95-28331

Experimental investigation of inlet-combustor isolators for a dual-mode scramjet at a Mach number of 4 [NASA-TP-3502] p 2140 N95-28343

Study of potential aerodynamic benefits from spanwise blowing at wingtip [NASA-TP-3515] p 2124 N95-28669

Numerical study to assess sulfur hexafluoride as a medium for testing multielement airfoils [NASA-TP-3496] p 2124 N95-28674

WIND TUNNELS

Anechoic wind tunnel study of turbulence effects on wind turbine broadband noise p 2325 N95-27992

WIND TURBINES

Bibliography of NASA-related publications on wind turbine technology 1973-1995 [NASA-CR-195462] p 2316 N95-26734

A comparison of measured wind park load histories with the WISPER and WISPERX load spectra [DE95-000295] p 2319 N95-27459

Performance of a stand-alone wind-electric ice maker for remote villages [DE95-004006] p 2320 N95-27475

Collected papers on wind turbine technology [NASA-CR-195432] p 2321 N95-27970

Basic principles and recent observations of rotationally sampled wind p 2321 N95-27971

A model of rotationally-sampled wind turbulence for predicting fatigue loads in wind turbines p 2312 N95-27972

Large HAWT wake measurement and analysis p 2289 N95-27973

Horizontal axis wind turbine post stall airfoil characteristics synthesization p 2124 N95-27974

Preliminary analysis of dynamic stall effects on a 91-meter wind turbine rotor p 2124 N95-27975

Comparative wind tunnel test at high Reynolds numbers of NACA 64 621 airfoils with two aileron configurations p 2124 N95-27977

Comparative performance tests on the Mod-2, 2.5-mW wind turbine with and without vortex generators p 2124 N95-27978

Design of a real-time wind turbine simulator using a custom parallel architecture p 2322 N95-27979

A NASTRAN-based computer program for structural dynamic analysis of Horizontal Axis Wind Turbines p 2312 N95-27980

Aeroelastic stability of wind turbine blade/aileron systems p 2124 N95-27981

Calculation of design load for the MOD-5A 7.3 mW wind turbine system p 2312 N95-27982

Comparison of measured and calculated dynamic loads for the Mod-2 2.5 mW wind turbine system p 2312 N95-27983

Analysis methods for wind turbine control and electrical system dynamics p 2273 N95-27984

Control system design for the MOD-5A 7.3 mW wind turbine generator p 2306 N95-27985

Use of blade pitch control to provide power train damping for the Mod-2, 2.5-mW wind turbine p 2306 N95-27986

Variable speed generator technology options for wind turbine generators p 2273 N95-27988

Variable speed generator application on the MOD-5A 7.3 mW wind turbine generator p 2273 N95-27989

Measurement and prediction of broadband noise from large horizontal axis wind turbine generators p 2324 N95-27990

Observed acoustic and aeroelastic spectral responses of a MOD-2 turbine blade to turbulence excitation p 2324 N95-27991

Anechoic wind tunnel study of turbulence effects on wind turbine broadband noise p 2325 N95-27992

The U.S. Department of Energy Wind Turbine Development Program [DE95-000292] p 2325 N95-28395

Mechanical properties of Hysol EA-9394 structural adhesive [DE95-008187] p 2240 N95-28405

WIND VELOCITY

Indexing meso-beta surface wind site representative [AD-A288501] p 2341 N95-26650

Performance of a stand-alone wind-electric ice maker for remote villages [DE95-004006] p 2320 N95-27475

Basic principles and recent observations of rotationally sampled wind p 2321 N95-27971

A model of rotationally-sampled wind turbulence for predicting fatigue loads in wind turbines p 2312 N95-27972

Preliminary analysis of dynamic stall effects on a 91-meter wind turbine rotor p 2124 N95-27975

Comparative wind tunnel tests of NACA 23024 airfoils with several aileron and spoiler configurations p 2124 N95-27976

Comparative wind tunnel test at high Reynolds numbers of NACA 64 621 airfoils with two aileron configurations p 2124 N95-27977

Comparative performance tests on the Mod-2, 2.5-mW wind turbine with and without vortex generators p 2124 N95-27978

Comparison of measured and calculated dynamic loads for the Mod-2 2.5 mW wind turbine system p 2312 N95-27983

The performance of cargo airdrop systems using g-12E parachutes: Statistical determination of minimum altitude [AD-A291666] p 2126 N95-28454

WIND VELOCITY MEASUREMENT

Comparative performance tests on the Mod-2, 2.5-mW wind turbine with and without vortex generators p 2124 N95-27978

WINDING

Induced axial oscillations in superconducting dipole windings [DE95-005690] p 2265 N95-27554

Monte-Carlo simulation methods for finite flat plate winding flows [AD-A289842] p 2289 N95-28619

WINDOWS (APERTURES)

Development of repair processes and sources for C/KC-135 aircraft windows/windshields [AD-A288348] p 2117 N95-26629

Thermally-induced unsymmetric optical distortion of output window of high-power CO2 laser [AD-A289604] p 2300 N95-28650

WINDOWS (COMPUTER PROGRAMS)

High performance hardware and software for pattern recognition and image processing [AD-A289153] p 2370 N95-27031

WINDPOWER UTILIZATION

Bibliography of NASA-related publications on wind turbine technology 1973-1995 [NASA-CR-195462] p 2316 N95-26734

Collected papers on wind turbine technology [NASA-CR-195432] p 2321 N95-27970

Large HAWT wake measurement and analysis p 2289 N95-27973

Comparative performance tests on the Mod-2, 2.5-mW wind turbine with and without vortex generators p 2124 N95-27978

Design of a real-time wind turbine simulator using a custom parallel architecture p 2322 N95-27979

Analysis methods for wind turbine control and electrical system dynamics p 2273 N95-27984

A conceptual framework for evaluating variable speed generator options for wind energy applications p 2273 N95-27987

Variable speed generator technology options for wind turbine generators p 2273 N95-27988

WINDPOWERED GENERATORS

Collected papers on wind turbine technology [NASA-CR-195432] p 2321 N95-27970

Control system design for the MOD-5A 7.3 mW wind turbine generator p 2306 N95-27985

A conceptual framework for evaluating variable speed generator options for wind energy applications p 2273 N95-27987

Variable speed generator technology options for wind turbine generators p 2273 N95-27988

Variable speed generator application on the MOD-5A 7.3 mW wind turbine generator p 2273 N95-27989

Measurement and prediction of broadband noise from large horizontal axis wind turbine generators p 2324 N95-27990

WINDS ALOFT

A study of magnetic activity effects on the thermospheric winds in the low ionosphere [AD-A288677] p 2334 N95-26488

WINDSHIELDS

Orbital impacts and the Space Shuttle windshield [NASA-TM-110594] p 2159 N95-26379

Development of repair processes and sources for C/KC-135 aircraft windows/windshields [AD-A288348] p 2117 N95-26629

Prediction of material strength and fracture of glass using the SPHINX smooth particle hydrodynamics code [DE95-004869] p 2236 N95-27943

WING CAMBER

Unique considerations in the design and experimental evaluation of tailored wings with elastically produced chordwise camber p 2192 N95-28436

WING PANELS

Structural modification and repair of C-130 wing structure using bonded composites p 2133 N95-27512

Composite or metallic bolted repairs on self-stiffened carbon wing panel of the commuter ATR72 design criteria, analysis, verification by test p 2135 N95-27525

WING-FUSELAGE STORES
Airfoil modification effects on subsonic and transonic pressure distributions and performance for the EA-6B airplane
[NASA-TP-3516] p 2120 N95-26382
WINGLETS
Sailplane glide performance and control using fixed and articulating winglets
[NASA-CR-198579] p 2131 N95-27180
WINGS
Demonstration study of hierarchical control of fluid-dynamic phenomena
[AD-A289341] p 2275 N95-26751
A numerical method for unsteady transonic flow about wings with control surfaces
[AD-A289631] p 2121 N95-26859
Advanced formation flight control
[AD-A289271] p 2142 N95-26981
Design and structural validation of CF116 upper wing skin boron doubler p 2132 N95-27510
An LDEF follow-on spacecraft concept
p 2166 N95-27665
Vibrational behavior of adaptive aircraft wing structures modelled as composite thin-walled beams
p 2191 N95-28435
Unique considerations in the design and experimental evaluation of tailored wings with elastically produced chordwise camber p 2192 N95-28436
C-130 Advanced Technology Center wing box conceptual design/cost study p 2192 N95-28437
Structural testing of the technology integration box beam p 2194 N95-28467
Test and analysis results for composite transport fuselage and wing structures p 2137 N95-28470
Application of damage tolerance methodology in certification of the Piaggio P-180 Avanti
p 2138 N95-28480
Advanced wing design survivability testing and results
p 2138 N95-28488
WINTER
A study of lightning in winter thunderstorms and the analysis of thunderstorm overflight data
[NASA-CR-198577] p 2343 N95-28191
The northern wintertime divergence extrema at 200 hPa and surface cyclones as simulated in the integration of the ECMWF general circulation model
[DE95-007946] p 2332 N95-28550
WIRE
Characterization of Ultra-Low Carbon Baintic steels for use as weld wire consumables
[AD-A288292] p 2212 N95-26411
Iron oxides characterization by Moessbauer spectroscopy
[DE95-607869] p 2202 N95-27199
A rotating arm using shape-memory alloy
p 2157 N95-27276
Review of activities in USA on HTS materials
[DE95-006404] p 2234 N95-27468
Manufacture and testing of the superconducting wire and cable for the RHIC dipoles and quadrupoles
[DE95-006000] p 2270 N95-28515
WIRING
Design and development of experimental facilities for short duration, low-gravity combustion and fire experiments
[NASA-CR-195458] p 2244 N95-26709
Partial discharge testing of high voltage wiring harness for airborne displays
[AD-A289150] p 2138 N95-27003
AH-1F COBRA rewire program MANPRINT analysis
[AD-A289190] p 2130 N95-27018
WORDS (LANGUAGE)
Isolated digit recognition without time alignment
[AD-A289344] p 2254 N95-27062
Multiclassifier fusion of an ultrasonic lip reader in automatic speech recognition
[AD-A289207] p 2254 N95-27079
Free Electron Laser Physical Process Code (FELPPC)
[DE95-006276] p 2296 N95-27557
Simulator report for SCI systems with HIC-router
[PB95-196580] p 2379 N95-28093
WORK
Change, Learning and Mental Work in Organizations: Working papers of the 3rd Otaniemi-Dresden Workshop
[PB95-184941] p 2356 N95-26909
WORK HARDENING
Forming metallurgy: Supervised drawing course, NTH
[PB95-196507] p 2219 N95-27934
WORKING FLUIDS
Mathematical modelling of the thermodynamic properties of coolants and working media of heat pumps
[IFTR-6/1994] p 2447 N95-26510
The effects of transverse vibration on the performance of an axial groove wick heat pipe
[AD-A289349] p 2278 N95-27065
Features and applications of the Groove Analysis Program (GAP) p 2281 N95-27349
WORKLOADS (PSYCHOPHYSIOLOGY)
Development of an acuity-based nurse staffing system for the post anesthesia care unit
[AD-A288831] p 2352 N95-26494
Integrated mission precision attack cockpit technology (IMPACT). Phase 1: Identifying technologies for air-to-ground fighter integration
[AD-A289562] p 2129 N95-26684
Handbook of perception and human performance, volume 2. Cognitive processes and performance
[AD-A289587] p 2355 N95-26692
Enhanced visual user interface support for domain-oriented application composition systems
[AD-A289337] p 2359 N95-26737
Subjective workload assessment in a spatial memory task
[AD-A289491] p 2356 N95-26825
Full span flaperons for a biplane
p 2119 N95-26954
Human factors in aviation maintenance, phase 4
[DOT/FAA/AM-95/14] p 2360 N95-27696
Pilot opinions on high level flight deck automation issues: Toward the development of a design philosophy
[NASA-CR-4669] p 2357 N95-28253
WORKSTATIONS
Next generation controller specification for an open systems architecture standard - overview
[AD-A289507] p 2368 N95-26853
NIST Automated Manufacturing Research Facility (AMRF): March 1987
[NONP-NASA-VT-95-49097] p 2246 N95-27203
A study of workstation computational performance for real-time flight simulation
[NASA-TM-109184] p 2362 N95-27241
The transition of GTDS to the Unix workstation environment p 2151 N95-27789
Optimization strategies for molecular dynamics programs on Cray computers and scalar work stations
[AD-A289574] p 2418 N95-28648
WORLD METEOROLOGICAL ORGANIZATION
The Global Historical Climatology Network: A preview of version 2
[DE95-007003] p 2332 N95-28605
WOVEN COMPOSITES
Characterization of fatigue behavior of 2-D woven fabric reinforced ceramic matrix composite at elevated temperature
[AD-A289423] p 2181 N95-26886
Mechanisms of compressive failure in woven composites and stitched laminates p 2189 N95-28424
Development of stitched/RTM composite primary structures p 2195 N95-28469
WRIST
Research activities on somatosensory (SI) cortical neurons
[AD-A288794] p 2348 N95-26360

X

X RAY ABSORPTION
Structural oxidation state studies of the manganese cluster in the oxygen evolving complex of Photosystem II
[DE95-008488] p 2409 N95-27744
Magnetic and structural properties of Fe/Pd multilayers studied by magnetic x-ray dichroism and x-ray absorption spectroscopy
[DE95-007095] p 2206 N95-27755
X RAY ANALYSIS
Structure of ordinary ice Ih. Part 2: Defects in ice. Volume 1: Point defects
[AD-A288279] p 2200 N95-26452
Large area smart piezoelectric and pyroelectric sensors
[AD-A288565] p 2290 N95-26541
Comparative experimental study of PIXE and X-ray fluorescence analysis
[DE95-607868] p 2327 N95-27198
Basic and applied research in the field of electronics and communications
[AD-A291727] p 2270 N95-28512
X RAY ASTRONOMY
A long-term space astrophysics research program: An x-ray perspective of the components and structure of galaxies
[NASA-CR-197787] p 2461 N95-26593
Multiwavelength observations of unidentified high energy gamma-ray sources
[NASA-CR-197840] p 2465 N95-26630
A new method of determining the ejected mass of novae
[DE95-007884] p 2462 N95-28062
X RAY DIFFRACTION
Fatigue fracture analysis in medium carbon structural steel and austenitic stainless steel by X-ray fractography
[DE95-601504] p 2213 N95-26675
Stoichiometry, structure, and properties of La2NiO(4+(delta)) and La(2-x)Sr(x)NiO(4+/-(delta))
[DE95-007682] p 2439 N95-27443
C15 intermetallic compounds HfV2+Nb
[DE95-005264] p 2215 N95-27463
Superior catalysts for selective catalytic reduction of nitric oxide
[DE95-007903] p 2205 N95-27691
Formation of anisotropic Tl-1212, Tl-2212, Tl-1223 and Tl-2223 particles using aerosol flow reacted powders
[DE95-007400] p 2444 N95-28079
X RAY FLUORESCENCE
Comparative experimental study of PIXE and X-ray fluorescence analysis
[DE95-607868] p 2327 N95-27198
X RAY SCATTERING
Synchrotron X-ray scattering studies at mineral-water interfaces
[DE95-008303] p 2440 N95-27542
Small angle x ray scattering studies of reverse micelles in supercritical fluids
[DE95-007803] p 2287 N95-28021
X RAY SPECTRA
Multiwavelength observations of unidentified high energy gamma-ray sources
[NASA-CR-197840] p 2465 N95-26630
Coronal abundances and their variation
[NASA-CR-197788] p 2464 N95-26671
X RAY SPECTROSCOPY
Probe molecule studies: Active species in alcohol synthesis
[DE95-003514] p 2203 N95-27420
NO decomposition in non-reducing atmospheres
[DE95-007895] p 2205 N95-27690
Low resistivity ohmic contacts to moderately doped n-GaAs with low temperature processing
[DE95-008507] p 2445 N95-28144
X RAY TIMING EXPLORER
Design, development and testing of the x-ray timing explorer High Gain Antenna System
p 2157 N95-27279
Development of the solar array deployment and drive system for the XTE spacecraft p 2158 N95-27284
X RAYS
Radiation sensitive area detection device and method
[NASA-CASE-MFS-28563-3] p 2423 N95-26385
Fatigue fracture analysis in medium carbon structural steel and austenitic stainless steel by X-ray fractography
[DE95-601504] p 2213 N95-26675
PXAMS: Projectile X ray AMS: X ray yields and applications
[DE95-006438] p 2204 N95-27496
Femtosecond X-ray generation through 90 degrees T homson scattering: Status of the LBL experiment
[DE95-006560] p 2296 N95-27674
Amorphous silicon pixel radiation detectors and associated thin film transistor electronics readout
[DE95-006568] p 2265 N95-27678
Small angle x ray scattering studies of reverse micelles in supercritical fluids
[DE95-007803] p 2287 N95-28021
Solar-geophysical data number 604, December 1994. Part 1: (Prompt reports). Data for November, October 1994, and late data
[PB95-181848] p 2465 N95-28087
XENON
Temperature dependence of ion-beam-induced amorphization in (Beta)-SiC
[DE95-007164] p 2438 N95-27087
XENON ISOTOPES
Search for deeply bound pionic atoms with high-purity germanium tagging spectrometer
[DE95-609072] p 2416 N95-28252

Y

YANG-MILLS THEORY
Compactification of moduli spaces of monopoles
[PB95-185179] p 2388 N95-26515
YAWING MOMENTS
Sailplane glide performance and control using fixed and articulating winglets
[NASA-CR-198579] p 2131 N95-27180
YBCO SUPERCONDUCTORS
Inflight resistance measurement on high-T(sub c) superconducting thin films exposed to orbital atomic oxygen on CONCAP-2 (STS-46) p 2272 N95-27635
Sintering of textured YBa2Cu3O(7-x) under intensive Co-60 gamma irradiation
[DE95-007098] p 2442 N95-27950

Recent neutron scattering results on high-temperature superconductors
[DE95-007028] p 2413 N95-28066

YIELD POINT
The role of edge dislocations in the deformation of BCC metals
[DE95-609157] p 2219 N95-27759
The elevated temperature tensile properties of S-200E commercially pure beryllium
[DE95-009331] p 2223 N95-28534
Influences of film structures on laser damage thresholds
[AD-A289647] p 2300 N95-28633

YIELD STRENGTH
ECR plasma-assisted deposition of Al2O3 and dispersion-strengthened AlO2
[DE95-007743] p 2235 N95-27687
An experimental and numerical investigation of specimen size requirements for cleavage fracture toughness
[AD-A289120] p 2311 N95-28100
Uncertainties in obtaining high reliability from stress-strength models p 2193 N95-28442
Indentability of conventional and negative Poisson's ratio foams p 2195 N95-28472

YLF LASERS
Improved performance 1590 nm Er:YLF laser
[DE95-003691] p 2296 N95-27705

YTTRIUM
High temperature Hexoloy(trademark) SX silicon carbide
[DE95-007290] p 2221 N95-28075
Structural chemistry of some phases in the YC-Ni-B system
[DE95-007403] p 2447 N95-28537

YTTRIUM COMPOUNDS
The oxidation state and magnetic behaviour of Tb in high-(Tc) related materials
[DE95-007129] p 2219 N95-27966

YTTRIUM-ALUMINUM GARNET
Method and apparatus for maintaining linearity and frequency accuracy of an FM chirp waveform
[AD-D017398] p 2258 N95-28615

Z

ZEOLITES
NO decomposition in non-reducing atmospheres
[DE95-007695] p 2205 N95-27690
Photochemistry in constrained spaces: Zeolites and layered double metal hydroxides
[DE95-008417] p 2207 N95-27951
Pulsed laser deposition of zeolitic membranes
[DE95-006274] p 2298 N95-28124

ZINC ALLOYS
Surface scanning techniques to locate and study defects in painted zinc and zinc alloy coated steels
[DE95-006099] p 2240 N95-28547

ZINC OXIDES
Polarization relaxation in zinc oxide varistors from 77 K to 450 K
[DE95-007761] p 2268 N95-28156

ZINC SELENIDES
Electronic characterization of defects in narrow gap semiconductors: Comparison of electronic energy levels and formation energies in mercury cadmium telluride, mercury zinc telluride, and mercury zinc selenide
[NASA-CR-197835] p 2437 N95-26780

ZINC SULFIDES
Effects of low earth orbit on the optical performance of multi-layer enhanced high reflectance mirrors
p 2428 N95-27652

ZINC TELLURIDES
Electronic characterization of defects in narrow gap semiconductors: Comparison of electronic energy levels and formation energies in mercury cadmium telluride, mercury zinc telluride, and mercury zinc selenide
[NASA-CR-197835] p 2437 N95-26780

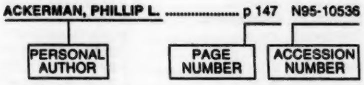
ZIRCONIUM ALLOYS
Bases for extrapolating materials durability in fuel storage pools
[DE95-007748] p 2222 N95-28129

ZIRCONIUM OXIDES
Long life 80Ah standard IPV NiH2 battery cell
p 2272 N95-26787
Crystal structure, short-range oxygen defects, and water adsorption in La- and Nd-modified ZrO2
[DE95-007134] p 2439 N95-27452
High-temperature deformation of ZrO2-Al2O3/SiC whisker composites fabricated by two techniques
[DE95-008273] p 2183 N95-28069
Control of thin film processing behavior through precursor structural modifications
[DE95-006468] p 2444 N95-28103

ZONAL FLOW (METEOROLOGY)
Spectral analyses, climatology, and interannual variability of Nimbus-7 TOMS version 6 total column ozone
[NASA-RP-1360] p 2341 N95-26689

PERSONAL AUTHOR INDEX

Typical Personal Author Index Listing



Listings in this index are arranged alphabetically by personal author. The page number helps you locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

A

AARONSON, PHILIP G. ..... p 2365 N95-26848

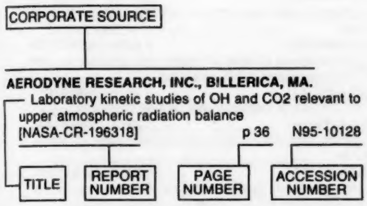
CORPORATE SOURCE INDEX

Typical Corporate Source Index Listing



CORPORATE SOURCE
AERODYNE RESEARCH, INC., BILLERICA, MA.
Laboratory kinetic studies of OH and CO2 relevant to upper atmospheric radiation balance
[NASA-CR-196318] p 36 N95-10128
TITLE
REPORT NUMBER
PAGE NUMBER
ACCESSION NUMBER

Listings in this index are arranged alphabetically by corporate source. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document cited (e.g., NASA report, translation, NASA contractor report). The accession number denotes the number by which the citation is identified. The page number helps you locate the citation in the abstract section. The titles are arranged under each corporate source in ascending accession number order.

A

ACADEMY OF SCIENCES (USSR), KRASNOYARSK (USSR).

Second International Conference on Software for Multiprocessors and Supercomputers Theory, Practice, Experience
[AD-A289474] p 2368 N95-26820

ACADEMY OF SCIENCES (USSR), NOVOSIBIRSK (USSR).

Measurement of inclusive Lambda production in electron-positron interactions at the upsilon energies
[DE95-610302] p 2407 N95-27407

Measurement of R in e(+)e(-)-annihilation at center-of-mass energies between 7.2 and 10.34 GeV
[DE95-610303] p 2407 N95-27408

Couplings of heavy hadrons with soft pions from QCD sum rules
[DE95-610349] p 2407 N95-27410

Magnetic quadrupole moment of W-boson in Kobayashi-Maskawa model
[DE95-610355] p 2407 N95-27411

Large relativistic corrections to the positronium decay rate
[DE95-610470] p 2407 N95-27412

ACE-ABLE ENGINEERING CO., INC., GOLETA, CA.

Low-cost tubular antenna deployer for WISP-2
p 2156 N95-27269

ADAPTIVE SOLUTIONS, INC., BEAVERTON, OR.

High performance hardware and software for pattern recognition and image processing
[AD-A289153] p 2370 N95-27031

ADVANCED DEVICE TECHNOLOGIES, INC., CHARLOTTESVILLE, VA.

Novel field effect transistors for low power electronics
[AD-A288650] p 2262 N95-27096

Novel field effect transistors for low power electronics
[AD-A289929] p 2271 N95-28629

ADVANCED SCIENTIFIC COMPUTING LTD., WATERLOO (ONTARIO).

Turbulence requirements of a commerical CFD code
p 2286 N95-27897

ADVISORY GROUP FOR AEROSPACE RESEARCH AND DEVELOPMENT, NEUILLY-SUR-SEINE (FRANCE).

AGARD membership, 1995
[AGARD-MEMB-95] p 2450 N95-26353

Composite Repair of Military Aircraft Structures
[AGARD-CP-550] p 2131 N95-27504

AEPCO, INC., ROCKVILLE, MD.

AH-1F COBRA rewire program MANPRINT analysis
[AD-A289190] p 2130 N95-27018

AERONAUTICAL SYSTEMS DIV., EGLIN AFB, FL.

User documentation of the CTA program
[AD-A289508] p 2121 N95-26854

AERONAUTICAL SYSTEMS DIV., WRIGHT-PATTERSON AFB, OH.

Visual system operational evaluation
[AD-A289173] p 2356 N95-27012

AEROSPACE CORP., EL SEGUNDO, CA.

Plume measurements with the T5 xenon ion thruster
[AD-A288697] p 2167 N95-26489

Progress towards computer simulation of NiH2 battery performance over life p 2272 N95-26786

Development of welded solar arrays for DMSP and GPS satellites
[AD-A289512] p 2318 N95-26846

Subvisual cirrus: What it is and where you find it
[AD-A289329] p 2342 N95-26899

Long-term variability of electron radiation dose in geosynchronous orbit
[AD-A289335] p 2162 N95-26902

Computer Systems Division software system metrics approach
[AD-A288837] p 2370 N95-27210

Spacecraft materials studies on the Aerospace Corporation tray on EOIM-3 p 2210 N95-27632

Exposure of LDEF materials to atomic oxygen: Results of EOIM 3 p 2210 N95-27633

Design prediction for long term stress rupture service of composite pressure vessels p 2188 N95-28291

Stratospheric ozone reactive chemicals generated by space launches worldwide
[AD-A289852] p 2332 N95-28623

AEROSPACE CORP., LOS ANGELES, CA.

A sustainable genetic algorithm for satellite resource allocation p 2376 N95-27383

A hybrid genetic algorithm for resolving closely spaced objects p 2384 N95-27387

Improved reduced-resolution satellite imagery
p 2376 N95-27388

Use of SURFACE CHEMKIN to model multiphase atmospheric chemistry: Application to nitrogen tetroxide spills p 2172 N95-28305

AEROSPACE MEDICAL RESEARCH LABS., WRIGHT-PATTERSON AFB, OH.

Handbook of perception and human performance, volume 2. Cognitive processes and performance
[AD-A289587] p 2355 N95-26692

Design considerations for FrankTalk: A distributed group support system
[AD-A289386] p 2359 N95-26863

Acute and subacute toxicity of ammonium dinitramide (ADN) p 2175 N95-28318

AEROSPATIALE, TOULOUSE (FRANCE).

Composite or metallic bolted repairs on self-stiffened carbon wing panel of the commuter ATR72 design criteria, analysis, verification by test p 2135 N95-27525

AIR FORCE CIVIL ENGINEERING CENTER, TYNDALL AFB, FL.

Engineering Technical Letter (ETL) 94-5: Fire protection engineering criteria and technical guidance. Emergency lighting and marking of exits
[AD-A288953] p 2246 N95-26566

Silicone joint sealants for pavements
[AD-A289843] p 2241 N95-28620

AIR FORCE ENVIRONMENTAL TECHNICAL APPLICATIONS CENTER, SCOTT AFB, IL.

Southern Africa: A climatological study
[AD-A289466] p 2342 N95-27148

AIR FORCE INST. OF AVIATION MEDICINE, MANCHING (GERMANY).

Transient studies of G-induced capillary dryout and rewet p 2281 N95-27351

AIR FORCE INST. OF TECH., WRIGHT-PATTERSON AFB, OH.

Using machine learning to derive efficient cost and performance estimates in VLSI CAD designs
[AD-A288254] p 2363 N95-26408

Development of a nonlinear simulation for the McDonnell Douglas F-15 Eagle with a longitudinal TECS control-law
[AD-A288610] p 2128 N95-26481

A study of magnetic activity effects on the thermospheric winds in the low ionosphere
[AD-A288677] p 2334 N95-26488

Analysis of group performance in visual signal detection
[AD-A289561] p 2355 N95-26683

Enhanced visual user interface support for domain-oriented application composition systems
[AD-A289337] p 2359 N95-26737

Reduction of off-boresight fields for a TEM horn antenna
[AD-A289708] p 2250 N95-26738

Silicon based microactuators for telerobotic tactile stimulation
[AD-A289340] p 2260 N95-26767

Analysis of hypersonic boundary layer second mode instability over a 7 deg cone
[AD-A289471] p 2276 N95-26819

Compressible turbulence measurements in a supersonic boundary layer including favorable pressure gradient effects
[AD-A289475] p 2276 N95-26821

Compressible turbulence measurements in a supersonic flow with adverse pressure gradient
[AD-A289477] p 2276 N95-26822

Compensated deconvolution from wavefront sensing
[AD-A289490] p 2336 N95-26824

A numerical model to predict the fate of jettisoned aviation fuel
[AD-A289336] p 2242 N95-26842

A comparison of the Neal-Smith and omega Tau function, zeta function and tau function flying qualities criteria
[AD-A289503] p 2130 N95-26844

Fatigue behavior of a cross-ply metal matrix composite at elevated temperature under strain controlled mode
[AD-A289425] p 2181 N95-26865

The re-engineering of the Air Force Institute of Technology Student Information System
[AD-A289426] p 2453 N95-26866

Perceptual based image fusion with applications to hyperspectral image data
[AD-A289429] p 2251 N95-26867

Viscoplastic characterization and fatigue modeling of titanium based metal matrix composites
[AD-A289430] p 2181 N95-26868

A 3-D finite difference time domain investigation of microwave propagation through inhomogeneous biological materials
[AD-A289431] p 2251 N95-26869

An analysis of the KC-135 three-person cockpit
[AD-A289540] p 2130 N95-26873

A new drag measurement system for wind tunnel testing of the racing bicycle and rider to determine a low drag configuration
[AD-A289375] p 2122 N95-26875

The photo-realistic AFIT virtual cockpit
[AD-A289376] p 2130 N95-26876

Classification of ultra high range resolution radar using decision boundary analysis
[AD-A289378] p 2251 N95-26877

Stall precursor study of high frequency data for three high speed, swept compressor rotors
[AD-A289379] p 2139 N95-26878

A demonstration of Client-Server technology using remote procedure calls with an application of file migration for moving records based on time
[AD-A289392] p 2453 N95-26879

Investigation of boundary layer and performance effects of transpiration cooling through a porous plate in a rocket nozzle
[AD-A289393] p 2167 N95-26880

An image quality analysis of ANVIS-6 night vision goggles
[AD-A289398] p 2359 N95-26883

Characterization of fatigue behavior of 2-D woven fabric reinforced ceramic matrix composite at elevated temperature
[AD-A289423] p 2181 N95-26886

Optimization of a nutation damper attached to a spin-stabilized satellite
[AD-A289424] p 2162 N95-26887

Analysis of instability growth and collisionless relaxation in thermionic converters using 1-D PIC simulations
[AD-A289310] p 2319 N95-26891

Embedology and neural estimation for time series prediction
[AD-A289312] p 2394 N95-26892

Improving the performance of spiral antennas by using passive scatterers
[AD-A289324] p 2251 N95-26893

EASY-SIM: A visual simulation system software architecture with an Ada 9X application framework
[AD-A289325] p 2368 N95-26895

Photoluminescence spectroscopy of 4H- and 6H-SiC
[AD-A289326] p 2202 N95-26896

Design, fabrication, modeling, and optical characterization of organic polymer nonlinear directional couplers
[AD-A289327] p 2227 N95-26897

Analysis and simulation of narrowband GPS jamming using digital excision temporal filtering
[AD-A289328] p 2127 N95-26898

Performance characterization of a highly-offset diffuser with and without blowing vortex generator jets
[AD-A289334] p 2122 N95-26901

The collapse of composite cylindrical panels with various thickness using finite element analysis
[AD-A289370] p 2308 N95-26905

Control of a large space structure using multiple model adaptive estimation and control techniques
[AD-A289309] p 2162 N95-26916

Image perception wavelet simulation and enhancement for the visually impaired
[AD-A289303] p 2353 N95-26917

Analysis of modal behavior at frequency cross-over
[AD-A289304] p 2162 N95-26918

Predicting protein structure using parallel genetic algorithms
[AD-A289305] p 2369 N95-26919

A gain scheduling optimization method using genetic algorithms
[AD-A289306] p 2381 N95-26920

Design and characterization of resonant cavity light-emitting diodes
[AD-A289307] p 2261 N95-26921

Electro-hydrostatic actuator controller design using quantitative feedback theory
[AD-A289220] p 2141 N95-26957

A quantitative feedback theory FCS design for the subsonic envelope of the VISTA F-16 including configuration variation
[AD-A289221] p 2141 N95-26958

Generation of a single-lobe, far-field intensity pattern from a laser diode array using an optical delay line
[AD-A289226] p 2295 N95-26961

Unification of LARCH and Z-based object models to support algebraically-based design refinement: The Z perspective
[AD-A289234] p 2369 N95-26962

Satellite surface material composition from synthetic spectra
[AD-A289236] p 2163 N95-26963

Frame selection performance limits for statistical image reconstruction of adaptive optics compensated images
[AD-A289240] p 2424 N95-26965

An investigation of the AFIT 2-inch shock tube as a flow source for supersonic testing
[AD-A289246] p 2143 N95-26966

Experimental investigation of the effects of relative physical orientation between evaporator and condenser for a loop heat pipe
[AD-A289248] p 2277 N95-26968

Fatigue behavior of a cross-ply ceramic matrix composite at elevated temperature under tension-tension loading
[AD-A289250] p 2182 N95-26969

A state-space model of a large, lightly damped space structure using the Eigensystem realization algorithm
[AD-A289251] p 2163 N95-26970

ROC analysis of IR segmentation techniques
[AD-A289252] p 2424 N95-26971

Polarization sensitivity of monopulse radar boresight error induced by large, ogive radomes
[AD-A289254] p 2252 N95-26972

Laser beam propagation in non-Kolmogorov atmospheric turbulence
[AD-A289256] p 2295 N95-26974

Investigation into the behavior of geometrically nonlinear composite arches
[AD-A289258] p 2308 N95-26975

Processing of wide-angle synthetic aperture radar signals for detection of obscured ground targets
[AD-A289243] p 2253 N95-26976

Measurement of N2(+) mobility He via Fourier transform emission spectroscopy
[AD-A289266] p 2404 N95-26979

Telepresent spacecraft docking with object-based bilateral control (OBBC)
[AD-A289268] p 2163 N95-26980

Advanced formation flight control
[AD-A289271] p 2142 N95-26981

Minimizing the impact of synchronization overhead in parallel discrete event simulations
[AD-A289278] p 2377 N95-26984

An integrated GPS/INS/BARO and radar altimeter system for aircraft precision approach landings
[AD-A289280] p 2127 N95-26985

Flow visualization of a turbulent shear flow using an optical wavefront sensor
[AD-A289208] p 2277 N95-26986

Generic satellite monitoring expert system
[AD-A289209] p 2163 N95-26987

Multipoint multirate signal processing
[AD-A289211] p 2253 N95-26988

Distributed interactive simulation virtual cassette recorder (DIS VCR); A datalogger with variable speed replay
[AD-A289212] p 2290 N95-26989

Survey and implementation of commercial manual controllers for a generic telerobotics architecture
[AD-A289215] p 2381 N95-26990

Experimental definition for implantation of the AFIT cortical multielectrode array
[AD-A289216] p 2354 N95-26991

Next generation real-time systems: Investigating the potential of partial-solution tasks
[AD-A289203] p 2381 N95-27007

Voice analysis using the bispectrum

COMPUTATIONAL PHYSICS, INC., NEWTON, MA.

PRISM validation
[AD-A288476] p 2337 N95-27703

COMPUTER SCIENCES CORP., LANHAM, MD.

Analysis of filter tuning techniques for sequential orbit determination p 2146 N95-27764

Estimation of attitude sensor timetag biases
p 2153 N95-27799

CONNECTICUT UNIV., STORRS, CT.

Molecular engineering of thin polymer films prepared from functionally-terminated oligomers
[AD-A291681] p 2240 N95-28457

CONRAD TECHNOLOGIES, INC., KING OF PRUSSIA, PA.

Development of injury preventing helmet servo-support system for high performance aircraft
[AD-A289547] p 2359 N95-26755

CONSIGLIO NAZIONALE DELLE RICERCHE, FRASCATI (ITALY).

Overview of the observations of symbiotic stars
p 2460 N95-27076

Discussion on selected symbiotic stars
p 2460 N95-27078

CONSTRUCCIONES AERONAUTICAS S.A., MADRID (SPAIN).

Repairs of CFC primary structures
p 2135 N95-27527

COORDINATING RESEARCH COUNCIL, INC., ATLANTA, GA.

The effect of aviation fuels containing low amounts of static dissipater additive on electrostatic charge generation
[AD-A280075] p 2243 N95-28152

CORNELL UNIV., ITHACA, NY.

The development of infrared detectors and mechanisms for use in future infrared space missions
[NASA-CR-197819] p 2290 N95-26702

Second-order closures for compressible turbulence
p 2286 N95-27898

On the physics of ion ring generation for the stabilization of FRX discharges
[DE95-007105] p 2410 N95-27922

Fellowship in physics
[AD-A291691] p 2446 N95-28522

CTA SPACE SYSTEMS, MCLEAN, VA.

Autonomous control system reconfiguration for spacecraft with non-redundant actuators
p 2153 N95-27802

D

DACCO SCI, INC., COLUMBIA, MD.

The use of electrochemistry and ellipsometry for identifying and evaluating corrosion on aircraft
[AD-A288536] p 2125 N95-27186

DARTMOUTH COLL., HANOVER, NH.

A book and series of monographs on ice physics
[AD-A288319] p 2200 N95-26422

Structure of ordinary ice Ih. Part 2: Defects in ice. Volume 1: Point defects
[AD-A288279] p 2200 N95-26452

Photoinduced dipoles and charge pairs in condensed phase
[DE95-007071] p 2207 N95-27921

DASCON ENGINEERING, BAY VILLAGE, OH.

Bibliography of NASA-related publications on wind turbine technology 1973-1995
[NASA-CR-195462] p 2316 N95-26734

Collected papers on wind turbine technology
[NASA-CR-195432] p 2321 N95-27970

A model of rotationally-sampled wind turbulence for predicting fatigue loads in wind turbines
p 2312 N95-27972

DASSAULT AVIATION, SAINT-CLOUD (FRANCE).

Composite repair of metallic airframe: Twenty years of experience p 2132 N95-27508

DAVID SARNOFF RESEARCH CENTER, PRINCETON, NJ.

High-speed coherent laser arrays
[AD-A289373] p 2295 N95-26906

DAYTON UNIV., OH.

Evaluation of composite joints
[AD-A289247] p 2181 N95-26967

DEFENCE RESEARCH AGENCY, FARNBOROUGH, HAMPSHIRE (ENGLAND).

Adhesively bonded composite patch repair of cracked aluminum alloy structures p 2132 N95-27507

DEFENCE RESEARCH ESTABLISHMENT ATLANTIC, DARTMOUTH (NOVA SCOTIA).

A geo-acoustic and oceanographic description of several shallow water experimental sites on the Scotian Shelf
[AD-A288300] p 2345 N95-26420

DEFENCE RESEARCH ESTABLISHMENT OTTAWA, OTTAWA (ONTARIO).

Balanced data focusing: Direction of arrival estimation with maximum likelihood performance
[AD-A288252] p 2248 N95-26407

Evaluation of the FMICW waveform in HF surface radar applications
[AD-A288245] p 2249 N95-26545
Data acquisition software for DREO's near-field antenna measurement facility
[AD-A289819] p 2258 N95-28573
Low-angle tracking in the presence of ducting, coherent and incoherent multipath
[AD-A289838] p 2258 N95-28580

DEFENCE RESEARCH ESTABLISHMENT PACIFIC, VICTORIA (BRITISH COLUMBIA).
Composite repair issues on the CF-18 aircraft
p 2134 N95-27518

DEFENCE SCIENCE AND TECHNOLOGY ORGANISATION, MELBOURNE (AUSTRALIA).
Design and development of a test rig for the high frequency testing of rolling sleeve airsprings
[DSTO-TN-0001] p 2142 N95-26378
F/A-18 IFOSTP Fatigue test airbag load determination on the vertical and horizontal tails
[DSTO-TR-0135] p 2128 N95-26389
Characteristics of the turbine inlet temperature sensing circuit for the T56 turbo-prop engine
[DSTO-TR-0095] p 2139 N95-26424
Electrical performance characterisation of single-shot switches in high speed, high voltage and high current applications
[DSTO-RR-0010] p 2259 N95-26425
Bonded composite repair of metallic aircraft components: Overview of Australian activities
p 2132 N95-27505
Scarf repairs to graphite/epoxy components
p 2135 N95-27523
A review of Australian and New Zealand investigations on aeronautical fatigue during the period Apr. 1993 - Mar. 1995
[AR-009-202] p 2136 N95-27918
Tie-down trials involving a Sikorsky S-70B-2 helicopter
[DSTO-TR-0132] p 2136 N95-28567
The protection of electro-explosive devices (EEDs) and electronics from electrostatic discharge (ESD) hazards
[DSTO-TR-0100] p 2258 N95-28568

DEFENSE MAPPING AGENCY AEROSPACE CENTER, SAINT LOUIS, MO.
Vector Smart Map Level 1: A new DMA product
[AD-A288920] p 2452 N95-26607

DELAWARE UNIV., NEWARK, DE.
Performance and policy dimensions in internet routing
[NASA-CR-197772] p 2367 N95-26770
The effect of material heterogeneity in curved composite beams for use in aircraft structures
p 2190 N95-28426

[NASA-TM-110632] p 2242 N95-26781

GENERAL ACCOUNTING OFFICE, WASHINGTON, DC.
Asian Aeronautics: Technology acquisition drives industry development. Report to Congressional requesters
[GAO/NSIAD-94-140] p 2118 N95-26817
Information superhighway: Issues affecting development
[AD-A289434] p 2252 N95-26923
Briefing Report to the Ranking Minority Member, Subcommittee on Space and Aeronautics, Committee on Science, House of Representatives. Cassini Mission: Estimated launch costs for NASA's mission to Saturn
[GAO/NSIAD-95-141BR] p 2145 N95-27856
Report to Congressional Committees. Comanche Helicopter: Testing needs to be completed prior to production decisions
[GAO/NSIAD-95-112] p 2135 N95-27910
Report to the Chairman and Ranking Minority Member, Committee on Science, House of Representatives. Weather forecasting: Radar availability requirement not being met
[GAO/AIMD-95-132] p 2342 N95-27912

GENERAL ATOMICS CO., SAN DIEGO, CA.
Fast wave current drive in D3-D
[DE95-007582] p 2431 N95-27441
Experimental aspects of effects of high-energy particles on Alfven modes
[DE95-003383] p 2432 N95-27873
Effect of toroidal plasma flow and flow shear on global MHD modes
[DE95-006676] p 2433 N95-28106
Divertor research on the DIII-D tokamak
[DE95-003942] p 2434 N95-28185
Cryogenic washout of solid rocket propellants
p 2176 N95-28324
Hydrothermal oxidation of solid rocket propellant and other department of defense hazardous wastes
p 2177 N95-28325
Transport simulation of negative magnetic shear discharges
[DE95-003941] p 2416 N95-28329
Wall stabilization of rotating high (Beta) discharges in D3-D
[DE95-008207] p 2435 N95-28406

GENERAL DYNAMICS/CONVAIR, SAN DIEGO, CA.
Development of a low-cost, modified resin transfer molding process using elastomeric tooling and automated preform fabrication p 2184 N95-28268

GENERAL DYNAMICS CORP., FORT WORTH, TX.
Applications of a damage tolerance analysis methodology in aircraft design and production
p 2197 N95-28483

GENERAL DYNAMICS CORP., WARREN, MI.
Improved hardness RHA weldability and material property testing
[AD-A289127] p 2221 N95-28102

GENERAL ELECTRIC CO., CINCINNATI, OH.
A summary of computational experience at GE Aircraft Engines for complex turbulent flows in gas turbines
p 2285 N95-27885
Combustion system CFD modeling at GE Aircraft Engines p 2285 N95-27889

GENERAL ELECTRIC CO., PHILADELPHIA, PA.
Aeroelastic stability of wind turbine blade/aileron systems p 2124 N95-27981
Control system design for the MOD-5A 7.3 mW wind turbine generator p 2306 N95-27985
Variable speed generator application on the MOD-5A 7.3 mW wind turbine generator p 2273 N95-27989

GENERAL ELECTRIC CO., SCHENECTADY, NY.
Experience with k-epsilon turbulence models for heat transfer computations in rotating p 2285 N95-27887
Calculation of design load for the MOD-5A 7.3 mW wind turbine system p 2312 N95-27982

GEO-CENTERS, INC., NEWTON, MA.
Synthesis and characterization of polymeric materials
[AD-A288613] p 2225 N95-26482

GEOCONTROL SYSTEMS, INC., HOUSTON, TX.
A fuzzy logic intelligent diagnostic system for spacecraft integrated vehicle health management
p 2385 N95-27392

GEOPHEX LTD., RALEIGH, NC.
Geophex airborne unmanned survey system
[DE95-007566] p 2131 N95-27440

GEORGE MASON UNIV., FAIRFAX, VA.
Filtered kernel density estimation
[AD-A288293] p 2394 N95-26413
Parallelizing locally-weighted regression
[AD-A288294] p 2394 N95-26414
A method to determine the structure of an unknown mixture using the Akaike Information Criterion and the bootstrap
[AD-A288295] p 2394 N95-26415
Fast multidimensional density estimation based on Random-width bins
[AD-A288286] p 2394 N95-26457
Simulating a multi-target acoustic array on the Intel Paragon
[AD-A288443] p 2377 N95-27183
Building an adaptive agent to monitor and repair the electrical power system of an orbital satellite
p 2383 N95-27380
Visualization methods for the exploration of high dimensional data
[AD-A291717] p 2393 N95-28507

GEORGIA INST. OF TECH., ATLANTA, GA.
A FEAM based methodology for analyzing composite patch repairs of metallic structures
p 2133 N95-27511
A final look at LDEF electro-optic systems components p 2428 N95-27650

Operator modeling in commerical aviation: Cognitive models, intelligent displays, and pilot's assistants
[NASA-CR-198609] p 2138 N95-28203
Modeling the shock response of submerged structures
[AD-A289082] p 2288 N95-28351
Quasi-optical millimeter wave power combining
[AD-A291767] p 2270 N95-28529
Deformation behavior of thin lubricant films at elevated pressure
[AD-A288906] p 2241 N95-28592

GEORGIA TECH RESEARCH INST., ATLANTA, GA.
An acoustic charge transport imager for high definition television applications
[NASA-CR-197841] p 2249 N95-26708

GEORGIA UNIV., ATHENS, GA.
Environmental effects on high energy density materials
[AD-A288296] p 2199 N95-26416

GPS SOLUTIONS, INC., CARSON CITY, NV.
Reusable launch vehicle development research
[NASA-CR-196614] p 2154 N95-27245

GPS TECHNOLOGIES, INC., TAMPA, FL.
Pressure vessel burst test study p 2175 N95-28317

GRAMBLING STATE UNIV., LA.
NQR-NMR studies of higher alcohol synthesis Cu-Co catalysts
[DE95-007926] p 2205 N95-27680

GRUMMAN AEROSPACE CORP., BETHPAGE, NY.
Comparison of resin film infusion, resin transfer molding, and consolidation of textile preforms for primary aircraft structure p 2196 N95-28477
Advanced wing design survivability testing and results
p 2138 N95-28488

GTE GOVERNMENT SYSTEMS CORP., COLORADO SPRINGS, CO.
Applying AI tools to operational space environmental analysis p 2382 N95-27376

H

HAMPTON UNIV., VA.
A study of non-stationary processes and their applications
[AD-A291725] p 2395 N95-28510

HARVARD UNIV., CAMBRIDGE, MA.
Demonstration of photo-assisted tunneling process across the coulomb blockade energy gap in mesoscopic tunnel junctions
[AD-A289534] p 2438 N95-26872
A knowledge highway for integrated modelling from manufacturing to design
[AD-A288872] p 2247 N95-28187

HELSINKI UNIV., HELSINKI (FINLAND).
Absolute logics
[ISBN-951-41-0775-6] p 2397 N95-28238

HELSINKI UNIV. OF TECHNOLOGY, ESPOO (FINLAND).
Self-organizing artificial neural networks in dynamic systems modeling and control
[PB95-185120] p 2379 N95-26449
Analysis of electromagnetic problems involving chiral, bi-isotropic, and uniaxial bianisotropic media
[PB95-185096] p 2248 N95-26450
General purpose finite element solver
[PB95-185062] p 2388 N95-26495
Microwave circuit simulation using higher-order dynamic elements
[PB95-185088] p 2259 N95-26496
Investigations of the hyperfine interactions in copper-oxide perovskites using Eu-151 and Fe-57 Moessbauer spectroscopy
[PB95-185138] p 2437 N95-26513
Fractionation studies of polyethylene using DSC-technique
[PB95-185252] p 2200 N95-26540
Distributed computation of Pareto solutions for two decision makers
[PB95-185047] p 2396 N95-26613
Activities of the Laboratory of Information Processing Science
[PB95-184982] p 2452 N95-26631
Radiometer measurements of snow in Sodankylae, 1991-1993
[PB95-184966] p 2313 N95-26645
Survey on step recovery diode and its applications
[PB95-184974] p 2260 N95-26646
Reference manual: Naive physics simulator
[PB95-184917] p 2369 N95-26907
Prediction of rain attenuation and total atmospheric attenuation for low-availability satellite communications in Europe
[PB95-184925] p 2252 N95-26908
Change, Learning and Mental Work in Organizations: Working papers of the 3rd Otaniemi-Dresden Workshop
[PB95-184941] p 2356 N95-26909
Random relaxation of fixed point iteration
[PB95-185013] p 2389 N95-26910
Characterization of the membrane theory of a clamped shell. The hyperbolic case
[PB95-185021] p 2308 N95-26911
Distributed computation of Pareto solutions in N-player games
[PB95-185039] p 2396 N95-26912
Probabilistic growth model
[PB95-185054] p 2395 N95-26913
Conditions for the parameter dyadics of lossless bi-anisotropic media
[PB95-185104] p 2252 N95-26914
Construction of arbitrary order schemes for many dimensional wave equation
[PB95-184818] p 2276 N95-26928
Milestones in telecommunications in some selected countries
[PB95-184826] p 2252 N95-26929
Summaries of theses for the degree of diploma engineer 1992-1993
[PB95-184867] p 2246 N95-27048
Simple equivalent dipole distributions for dielectric spheroidal scatterers
[PB95-184883] p 2254 N95-27049
Modeling of trapping and abrupt doping effects in MESFET's using R-dynamic element
[PB95-184891] p 2262 N95-27050
Laboratory of production engineering
[PB95-184834] p 2451 N95-28135
Distributed methods and processes in games of incomplete information
[PB95-184842] p 2396 N95-28352
Distributed methods and processes in games of incomplete information
[PB95-184859] p 2396 N95-28353
Scattering by a small object close to an interface. 3. Buried object
[PB95-184909] p 2256 N95-28354
Measurement-based MESFET model in APLAC
[PB95-195483] p 2269 N95-28448
Internal electric field of anisotropic and bi-anisotropic spheres
[PB95-195491] p 2257 N95-28449
Crushing the delay: Tools for fractional delay filter design
[PB95-195509] p 2257 N95-28450
Method of images applied to electromagnetic problems involving spherical, spheroidal and planar geometries
[PB95-195517] p 2257 N95-28451
Local operators in Krylov subspaces
[PB95-195525] p 2393 N95-28499
Radon transform and its applications in gridding airborne geophysical survey data
[PB95-195533] p 2315 N95-28643
High temperature oxidation of nickel concentrates
[PB95-195566] p 2224 N95-28644
Remarks on the growth of the resolvent operators for power bounded operators
[PB95-195418] p 2393 N95-28653
Simulation of burning tokamak plasmas
[PB95-195426] p 2435 N95-28654
Structural optimisation of cage induction motors using finite element analysis
[PB95-195434] p 2271 N95-28655
Modeling and retrieval of snow and sea ice characteristics in the frequency range 6 to 90 GHz
[PB95-195467] p 2316 N95-28656

HERCULES, INC., MAGNA, UT.
Static and dynamic strain energy release rates in toughened thermosetting composite laminates
p 2188 N95-28288

HERCULES AEROSPACE CO., MAGNA, UT.
Advanced tow placement of composite fuselage structure p 2185 N95-28271
Hazards analysis of an integral class 1.1/1.3 rocket motor demilitarization and ingredient recovery system using ammonia p 2174 N95-28315

HONEYWELL, INC., DURHAM, NC.
Electromechanical rotary actuator
p 2157 N95-27278

LOCKHEED TECHNICAL OPERATIONS CO., CROFTON, MD.

GPS as an orbit determination subsystems
p 2152 N95-27793

LOGICON R AND D ASSOCIATES, ALBUQUERQUE, NM.

Extended equation-of-state for dichlorodifluoromethane (CCl2F2)
[AD-A288885] p 2177 N95-26434

LORAL FEDERAL SYSTEMS, MANASSA, VA.

Advanced flight computer. Special study
[NASA-CR-198165] p 2371 N95-27246

LOS ALAMOS NATIONAL LAB., NM.

Integration of video and radiation analysis data
[DE95-004165] p 2379 N95-26443

A study of internal damage of metal matrix composites by neutron diffraction
[DE95-005157] p 2182 N95-27080

Study of parity and time reversal violation in neutron-nucleus interactions
[DE95-005158] p 2405 N95-27081

First-principles study of intermetallic phase stability in the ternary Ti-Al-Nb alloy system
[DE95-005259] p 2213 N95-27082

The comparison of P(sub 1) and simplified P(sub 2) synthetic acceleration for iterative methods in transport solutions
[DE94-018306] p 2390 N95-27304

Views of the solar system
[DE95-006446] p 2461 N95-27326

Indirectly driven targets for ignition
[DE95-006451] p 2430 N95-27327

Micromechanical modeling of damage and inelasticity of composite materials in macroscopic structural analysis
[DE95-003666] p 2182 N95-27421

Gigabit LAN issues: HIPPI, Fibre Channel, or ATM?
[DE95-003673] p 2378 N95-27422

Heat pipe cooled reactors for multi-kilowatt space power supplies
[DE95-005211] p 2420 N95-27425

Matrix kernels for MEG and EEG source localization and imaging
[DE95-005238] p 2354 N95-27426

Variation of solvent scattering-length density small-angle neutron scattering as a means of determining structure of composite materials
[DE95-005394] p 2183 N95-27428

The physics and chemistry of heavy Fermions
[DE95-005277] p 2407 N95-27431

Three-dimensional computer modeling of hydrogen injection and combustion
[DE95-006261] p 2203 N95-27437

The second coming of cold dark matter?
[DE95-005156] p 2462 N95-27445

Atomistic study of energy and structure of surfaces in NiO
[DE95-005207] p 2215 N95-27446

C15 intermetallic compounds HfV2+Nb
[DE95-005264] p 2215 N95-27463

Intermediate energy neutrons at WNR. Spin-isospin and energy dependence of the NN interaction and the nuclear response
[DE95-006291] p 2408 N95-27466

Photon burst mass spectrometry--ultrasensitive detection of rare isotopes
[DE95-006403] p 2204 N95-27467

Review of activities in USA on HTS materials
[DE95-006404] p 2234 N95-27468

Engineered materials for appliation in severe metallurgical environments: Tantalum-carbon alloy development
[DE95-006838] p 2216 N95-27488

Bubble fusion: Preliminary estimates
[DE95-006337] p 2420 N95-27494

Systematic study of the ion beam mixing of oxide markers into alumina
[DE95-006262] p 2217 N95-27555

Modeling precipitation from concentrated solutions with the EQ3/6 chemical speciation codes
[DE95-006264] p 2204 N95-27556

Free Electron Laser Physical Process Code (FELPPC)
[DE95-006276] p 2296 N95-27557

Continuously-tunable, narrow-linewidth, Q-switched Cr:LiSAF laser for lidar applications
[DE95-006285] p 2296 N95-27672

The role of microprocesses in macroscale magnetotail dynamics
[DE95-006288] p 2432 N95-27673

Engineering photochemical smog through convection towers
[DE95-007727] p 2328 N95-27686

Improved performance 1590 nm Er:YLF laser
[DE95-003691] p 2296 N95-27705

Spectral broadening of KrF laser radiation by self-seeded Raman amplification in long air paths
[DE95-003697] p 2297 N95-27718

Measurement of high acidity using a renewable-reagent fiber optic sensor
[DE95-006327] p 2425 N95-27734

Silicon subsystem mechanical engineering closeout report for the Solenoidal Detector Collaboration
[DE95-006336] p 2421 N95-27735

Application of conventional laser technology to gamma-gamma colliders
[DE95-006341] p 2297 N95-27736

AFC generator development
[DE95-007094] p 2266 N95-27754

Classification of RF transients in space using digital signal processing and neural network techniques
[DE95-006287] p 2256 N95-27840

Analysis of surfaces, films and multilayers by resonant laser ablation
[DE95-006295] p 2297 N95-27841

Three-dimensional visualization of reactive flows in complex geometries
[DE95-006332] p 2284 N95-27845

The Sunrise project: An R&D project for a national information infrastructure prototype
[DE95-006340] p 2455 N95-27847

Low energy neutral atom imaging: Remote observations of the magnetosphere
[DE95-006342] p 2337 N95-27848

Generalized CNF satisfiability, local reductions and complexity of succinctly specified problems
[DE95-006343] p 2372 N95-27849

Trident as an ultrahigh irradiance laser
[DE95-006345] p 2297 N95-27850

A laboratory scale supersonic combustive flow system
[DE95-006347] p 2206 N95-27851

Prediction of material strength and fracture of glass using the SPHINX smooth particle hydrodynamics code
[DE95-004869] p 2236 N95-27943

Phenomenology from 100 large lattices
[DE95-006349] p 2442 N95-27994
Nonlinear optical microscopy for imaging thin films and surfaces
[DE95-007872] p 2426 N95-28018
Development of an optical trap as an ultra-sensitive analytical tool
[DE95-007843] p 2426 N95-28022
An investigation of the chemical and physical properties of pristine, electrochromically damaged, and photochromically damaged KTiOPO4 (KTP) using surface analytical and optical spectroscopic techniques
[DE95-007865] p 2443 N95-28023
Alpha characterization inside pipes using ion-transport technology
[DE95-007869] p 2411 N95-28024
Implementing an integrated standards-based management system to ensure compliance at Los Alamos National Laboratory
[DE95-007873] p 2451 N95-28025
Phase stability and elasticity of C15 transition-metal intermetallic compounds
[DE95-007876] p 2219 N95-28026
Time-dependent model for vertical-cavity surface-emitting laser
[DE95-007880] p 2298 N95-28027
An investigation of the applicability of the new Reillex(tm)-HPQ anion exchange resin system for technetium/rhenium and uranium in the Hanford waste tanks
[DE95-007643] p 2412 N95-28051
Precision asteroseismology of DAV (ZZ CETI) white dwarf stars
[DE95-006265] p 2462 N95-28056
Off-specular scattering in neutron reflectometry
[DE95-007835] p 2412 N95-28057
Geothermal development in Australia
[DE95-007837] p 2325 N95-28058
High power free-electron laser concepts and problems
[DE95-007841] p 2298 N95-28059
Aspects of macroscopic phase separation and interstitial oxygen ordering in oxygen doped La2CuO(4+delta)
[DE95-007864] p 2443 N95-28060
Relativistic electrons in the outer-zone: An 11 year cycle, their relation to the solar wind
[DE95-007882] p 2338 N95-28061
A new method of determining the ejected mass of novae
[DE95-007884] p 2462 N95-28062
Measurement of the reaction C(nu(sub mu), mu(-)) X near threshold
[DE95-007888] p 2412 N95-28063
Bubble chamber spectroscopy for chemical analysis: A new concept
[DE95-006350] p 2209 N95-28088
Measurement and analysis of the surface energy budget for ARM field experiments
[DE95-007646] p 2338 N95-28114
Pulsed laser deposition of zeolitic membranes
[DE95-006274] p 2298 N95-28124
Plasma source ion implantation of ammonia into electroplated chromium
[DE95-006275] p 2444 N95-28125
Investigation of rifting processes in the Rio Grande Rift using data from an unusually large earthquake swarm
[DE95-007623] p 2339 N95-28126
Topological density and instantons on a lattice
[DE95-006348] p 2445 N95-28240
Investigation of HE driven cylindrical liner
[DE95-007866] p 2311 N95-28539
Surface structure of MX-chains studied by atomic force microscopy
[DE95-007881] p 2447 N95-28541
High performance ground penetrating radar survey of TA-49/Area 2
[DE95-006856] p 2258 N95-28601
Computational and experimental studies of hydrodynamic instabilities and turbulent mixing
[DE95-006837] p 2288 N95-28603

WORCESTER POLYTECHNIC INST., MA.

Design and development of experimental facilities for short duration, low-gravity combustion and fire experiments
[NASA-CR-195458] p 2244 N95-26709

WRIGHT LAB., WRIGHT-PATTERSON AFB, OH.

A non-iterative grid deformation algorithm for computational fluid dynamics for aeroelasticity
[AD-A288298] p 2273 N95-26418

Life prediction methodology for composite laminates. Part 1: Constant amplitude and two-stress level fatigue
[AD-A288343] p 2180 N95-26571

Partial discharge testing of high voltage wiring harness for airborne displays
[AD-A289150] p 2138 N95-27003

Structural design optimization with survivability dependent constraints application: Primary wing box of a multi-role fighter p 2137 N95-28440

Post impact compressive strength in composites
p 2198 N95-28485

WRIGHT STATE UNIV., DAYTON, OH.

Process control of microstructure in manufacturing
[AD-A288291] p 2245 N95-26410

Codes of processing and multiple resources: Model and methodology
[AD-A289583] p 2355 N95-26691

Subjective workload assessment in a spatial memory task
[AD-A289491] p 2356 N95-26825

WULFMAN (D. S.) AND ASSOCIATES, INC., ROLLA, MO.

Commercial reformulation: An economic and environmentally neutral means of managing explosives and solid propellants p 2175 N95-28320

Y

YALE UNIV., NEW HAVEN, CT.

On the azimuthal Fourier components of the Green's function for the Helmholtz equation in three dimensions
[AD-A288775] p 2398 N95-26345

Transport phenomena and interfacial kinetics in multiphase combustion systems
[AD-A288297] p 2199 N95-26417

Nonlinear dynamics of global atmospheric and earth system processes
[NASA-CR-197926] p 2326 N95-26429

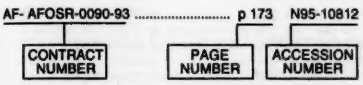
YAMADA SCIENCE AND ART CORP., LOS ALAMOS, NM.

Three-dimensional forecast models for emergency response management p 2172 N95-28303

CONTRACT NUMBER INDEX

SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS VOLUME 33 NUMBER 9

Typical Contract Number Index Listing



Listings in this index are arranged alphanumerically by contract number. Under each contract number the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged in ascending order. The page number helps to locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

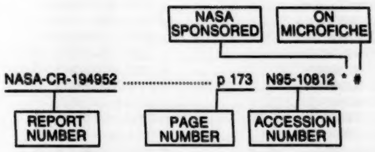
REPORT NUMBER INDEX

SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS VOLUME 33 NUMBER 9

Typical Report Number Index Listing



Listings in this index are arranged alphanumerically by report number. The accession number denotes the number by which the citation is identified. The page number helps to locate the citation in the abstract section. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.

APPENDIX

NASA SCIENTIFIC AND TECHNICAL INFORMATION OFFICE PRODUCTS AND SERVICES

The NASA Scientific and Technical Information (STI) Office provides for the collection and announcement of aerospace-related reports and literature obtained worldwide through agreements and exchanges. The result of the collection is the comprehensive NASA STI Database that covers aeronautics, space, and supporting disciplines.

The STI Database, documents generated or obtained by NASA, and products and services derived from or supporting the database are made available to the NASA research community and to the public. Descriptions and sources of these items are presented in the following pages.

Scientific and Technical Aerospace Reports (STAR) is an abstract journal, listing citations with abstracts for aerospace-related reports obtained from worldwide sources. *STAR* is issued on the first of each month, and announces current documents that have been entered into the NASA STI Database during the previous month. The reports are of the following types:

- NASA, NASA contractor, and NASA grantee reports;
- Reports issued by other U.S. Government agencies, domestic and foreign institutions, universities, and private firms;
- Translations in report form;
- NASA-owned patents and patent applications
- Other U.S. Government agency and foreign patents and patent applications
- Domestic and foreign dissertations and theses.

Journal, book, and conference literature, journal translations, and certain foreign dissertations having the same subject scope as *STAR* are announced in a companion journal, *NASA Open Volumes on Aerospace (NOVA). NOVA* is issued on the 15th of each month and is available from the NASA Center for AeroSpace Information, at the address below.

ELIGIBILITY AND REGISTRATION FOR NASA STI PRODUCTS AND SERVICES

Organizations of the type listed below that have registered with NASA can receive products and services.

- NASA offices and installations, contractors, subcontractors, grantees, and consultants;
- Other U.S. Government agencies and their contractors;
- Libraries in the United States that have arrangements with NASA to maintain collections of NASA documents for public reference;
- Other organizations in the United States having a need for NASA documents in work related to aeronautics and space research;
- Organizations abroad that have established reciprocal documents exchange arrangements with NASA.

The central service points—central points of document acquisition and control within qualified organizations—or individuals are eligible to register for NASA STI products and services. Domestic organizations or individuals may be eligible to receive various classes of NASA publications and services and should address their requests for registration or further information to:

ATTN: Registration Services
NASA Center for AeroSpace Information
800 Elkridge Landing Road
Linthicum Heights, MD 21090-2934
301-621-0390

Organizations abroad should direct requests to:

National Aeronautics and Space Administration
Scientific and Technical Information Office (JT)
International STI Office
Washington, DC 20546-0001
USA
703-271-5640

SUBJECT SCOPE

The subject scope of *STAR* and *NOVA* includes all aspects of aeronautics and space research and development, supporting basic and applied research, and applications. Aerospace aspects of Earth resources, energy development, conservation, oceanography, environmental protection, urban transportation, and other topics of high national priority are also covered.

HOW TO USE *STAR* SUBJECT CATEGORIES

Abstracts in *STAR* are categorized by 10 major subject divisions that are divided further into 76 specific subject categories. The subject divisions and categories are listed in the Table of Contents together with a note for each that defines its scope and provides any cross-references. For example:

> **16 SPACE TRANSPORTATION**
>
> Includes passenger and cargo space transportation, e.g., shuttle operations; and space rescue techniques. For related information see also *03 Air Transportation and Safety* and *18 Spacecraft Design, Testing and Performance*. For space suits see *54 Man/System Technology and Life Support*.

CROSS-REFERENCES

Individual *STAR* abstracts are not ordinarily cross-referenced, except for certain conference reports or book translations that have had separate abstracts written for their component papers or chapters. Citations and abstracts of the components follow immediately after those of the parent document. When the subject content of a component differs sufficiently from the general content of the parent, a cross-reference citation also is printed at the end of the category to which it normally would have been assigned if it were independent.

DOCUMENTS ON MICROFICHE

Documents available on microfiche are designated by a pound sign (#) following the accession number.

LIMITED REPRODUCIBILITY

A note of limited reproducibility appears in the citation, if there are factors affecting the reproducibility of more than 20% of the document. These factors include faint or broken type, color photographs, black and white photographs, foldouts, dot matrix print, or some other factor that limits the reproducibility of the document. This notation also appears on the microfiche header.

NASA PATENTS AND PATENT APPLICATIONS

Patents and patent applications owned by NASA are announced in *STAR* under appropriate subject categories and are referenced in the *STAR* indexes. In the Report Number Index, patents are indexed by the NASA Case Number, and the U.S. Patent Class. Patent applications are indexed by the NASA Case Number and the U.S. Patent Application Serial Number.

Printed copies of patents (which are not microfiched) are available for purchase from the U.S. Patent and Trademark Office.

When ordering patents, the U.S. Patent Number should be used, and payment must be remitted in advance, by money order or check payable to the Commissioner of Patents and Trademarks. Prepaid purchase coupons for ordering are also available from the U.S. Patent and Trademark Office.

NASA patent application specifications are sold in both paper copy and microfiche by the NASA Center for AeroSpace Information (CASI). The N accession number should be used in ordering either paper copy or microfiche from CASI.

The patents and patent applications announced in *STAR* are owned by NASA and are available for royalty-free licensing. Requests for licensing terms and further information should be addressed to:

National Aeronautics and Space Administration
Associate General Counsel for Intellectual Property
Code GP
Washington, DC 20546-0001

SOURCES FOR DOCUMENTS

One or more sources from which a document announced in *STAR* is available to the public is ordinarily given on the last line of the citation. The most commonly indicated sources and their acronyms or abbreviations are listed below, and their addresses are listed on page A-6. If the publication is available from a source other than those listed, the publisher and his address will be displayed on the availability line or in combination with the corporate source line.

Avail: CASI. Sold by the NASA Center for AeroSpace Information. Prices for hard copy (HC) and microfiche (MF) are indicated by a price code following the letters HC or MF in the *STAR* citation. Current values for the price codes are given in the tables on page A-7.

NOTE ON ORDERING DOCUMENTS: When ordering publications from NASA CASI, use the N accession number or other report number. It is also advisable to cite the title and other bibliographic identification.

Avail: SOD (or GPO). Sold by the Superintendent of Documents, U.S. Government Printing Office, in hard copy.

Avail: BLL (formerly NLL): British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. Photocopies available from this organization at the price shown. (If none is given, inquiry should be addressed to the BLL.)

Avail: DOE Depository Libraries. Organizations in U.S. cities and abroad that maintain collections of Department of Energy reports, usually in microfiche form, are listed in *Energy Research Abstracts*. Services available from the DOE and its depositories are described in a booklet, *DOE Technical Information Center - Its Functions and Services* (TID-4660), which may be obtained without charge from the DOE Technical Information Center.

Avail: ESDU. Pricing information on specific data, computer programs, and details on Engineering Sciences Data Unit (ESDU) topic categories can be obtained from ESDU International Ltd. Requesters in North America should use the Virginia address while all other requesters should use the London address, both of which are on page A-6.

Avail: Fachinformationszentrum Karlsruhe. Gesellschaft für wissenschaftlich-technische Information mbH 76344 Eggenstein-Leopoldshafen, Germany.

Avail: HMSO. Publications of Her Majesty's Stationery Office are sold in the U.S. by Pendragon House, Inc. (PHI), Redwood City, CA. The U.S. price (including a service and mailing charge) is given, or a conversion table may be obtained from PHI.

Avail: Issuing Activity, or Corporate Author, or no indication of availability. Inquiries as to the availability of these documents should be addressed to the organization shown in the citation as the corporate author of the document.

Avail: NASA Public Document Rooms. Documents so indicated may be examined at or purchased from the National Aeronautics and Space Administration (JBD-4), Public Documents Room (Room 1H23), Washington, DC 20546-0001, or public document rooms located at NASA installations, and the NASA Pasadena Office at the Jet Propulsion Laboratory.

Avail: NTIS. Sold by the National Technical Information Service. Initially distributed microfiche under the NTIS SRIM (Selected Research in Microfiche) are available. For information concerning this service, consult the NTIS Subscription Section, Springfield, VA 22161.

Avail: Univ. Microfilms. Documents so indicated are dissertations selected from *Dissertation Abstracts* and are sold by University Microfilms as xerographic copy (HC) and microfilm. All requests should cite the author and the Order Number as they appear in the citation.

Avail: US Patent and Trademark Office. Sold by Commissioner of Patents and Trademarks, U.S. Patent and Trademark Office, at the standard price of $1.50 each, postage free. (See discussion of NASA patents and patent applications on page A-3.)

Avail: (US Sales Only). These foreign documents are available to users within the United States from the National Technical Information Service (NTIS). They are available to users outside the United States through the International Nuclear Information Service (INIS) representative in their country, or by applying directly to the issuing organization.

Avail: USGS. Originals of many reports from the U.S. Geological Survey, which may contain color illustrations, or otherwise may not have the quality of illustrations preserved in the microfiche or facsimile reproduction, may be examined by the public at the libraries of the USGS field offices whose addresses are listed on page A-6. The libraries may be queried concerning the availability of specific documents and the possible utilization of local copying services, such as color reproduction.

FEDERAL DEPOSITORY LIBRARY PROGRAM

In order to provide the general public with greater access to U.S. Government publications, Congress established the Federal Depository Library Program under the Government Printing Office (GPO), with 53 regional depositories responsible for permanent retention of material, inter-library loan, and reference services. At least one copy of nearly every NASA and NASA-sponsored publication, either in printed or microfiche format, is received and retained by the 53 regional depositories. A list of the regional GPO libraries, arranged alphabetically by state, appears on page A-8. These libraries are *not* sales outlets. A local library can contact a regional depository to help locate specific reports, or direct contact may be made by an individual.

PUBLIC COLLECTION OF NASA DOCUMENTS

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England for public access. The British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols # and * from ESA — Information Retrieval Service European Space Agency, 8-10 rue Mario-Nikis, 75738 CEDEX 15, France.

SUBMITTING DOCUMENTS

All users of this abstract service are urged to forward reports to be considered for announcement in *STAR*. This will aid NASA in its efforts to provide the fullest possible coverage of all scientific and technical publications that might support aeronautics and space research and development. If you have prepared relevant reports (other than those you will transmit to NASA, DOD, or DOE through the usual contract- or grant-reporting channels), please send them for consideration to the NASA Center for AeroSpace Information, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.

Reprints of journal articles, book chapters, and conference papers are also welcome. These will be considered for announcement in *STAR's* companion journal, *NOVA*.

You may specify a particular source to be included in a report announcement if you wish; otherwise the report will be placed on a public sale at the NASA Center for AeroSpace Information. Copyrighted publications will be announced but not distributed or sold.

PURCHASE OF *STAR*

STAR is publicly available on annual subscription from the NASA Center for AeroSpace Information (CASI). 1995 *STAR* subscription prices are $100.00/domestic and $125.00/foreign. Single copy prices: $33.00/domestic, $41.00/foreign.

An annual, cumulative *STAR Index* is also available at $70.00/domestic and foreign.

STAR is available to registered users on annual subscription from the NASA Center for AeroSpace Information, ATTN: Registration Services, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.

IMPORTANT NOTICE

For users not registered at the NASA CASI, prepayment is required. Additionally, a shipping and handling fee of $1.00 per document for delivery within the United States and $9.00 per document for delivery outside the United States is charged.

For users registered at the NASA CASI, document orders may be invoiced at the end of the month, charged against a deposit account, or paid by check or credit card. NASA CASI accepts American Express, Diners' Club, MasterCard, and VISA credit cards. There are no shipping and handling charges. To register at the NASA CASI, please request a registration form through the NASA Access Help Desk at the numbers or addresses below.

RETURN POLICY

Effective June 1, 1995, the NASA Center for AeroSpace Information will gladly replace or make full refund on items you have requested if we have made an error in your order, if the item is defective, or if it was received in damaged condition and you contact us within 30 days of your original request. Just contact our NASA Access Help Desk at the numbers or addresses listed below.

SCAN Goes Electronic!

If you have NASA Mail or if you can access the Internet, you can get biweekly issues of *SCAN* delivered to your desktop absolutely free!

Electronic SCAN takes advantage of computer technology to alert you to the latest aerospace-related, worldwide scientific and technical information that has been published.

No more waiting while the paper copy is printed and mailed to you. You can review *Electronic SCAN* the same day it is released! And you get all 191—or any combination of—subject areas of announcements with abstracts to browse at your leisure. When you locate a publication of interest, you can print the announcement or electronically add it to your publication order list. Start your free access to *Electronic SCAN* today.

Electronic SCAN
Timely
Flexible
Complete
Free!

Over 1,000 announcements of new reports, books, conference proceedings, journal articles . . . and more—delivered to your computer every two weeks.

For instant access via Internet:
